January 26, 2005

A former California Conservation Corps member could be sentenced to prison next month for starting an Aug. 19 vegetation fire in the Whiskeytown Lake area.

Zackary Murray, 20, of Shasta Lake has accepted a plea bargain that calls for a prison sentence not to exceed two years.

Murray, who is to be sentenced Feb. 23, pleaded guilty to unlawfully causing a fire in exchange for having an arson count dismissed that carried a maximum punishment of six years in prison.

According to investigative reports, Murray admitted to starting the fire near Highway 299 and Crystal Creek Road by lighting a cigarette, tucking it inside a matchbook and throwing it from the window of a CCC vehicle.

According to the investigative reports, Murray was part of a CCC crew assigned to remove brush in the Whiskeytown National Recreation Area.

And he admitted to investigators that some on his crew were angry because they had not been assigned to fight the Bear and French fires, the reports say.

In a September written statement, Murray said that he threw the cigarette and matchbook out the window in hopes that he would be accepted as a friend by some in the CCC crew.

"It was a bad idea," he wrote. "I tried to fit in the wrong way."

But, he said, it was not his purpose to start a fire.

"He said he thought it would stay on the roadway and someone would run over it, extinguishing the flames," according to an investigative report.

The small vegetation fire was put out by California Department of Forestry and Fire Protection firefighters from San Diego who were fighting the French Fire in French Gulch.

Reporter Jim Schultz can be reached at 225-8223 or at jschultz@....

Santa Clara County Fire working a large structure fire at 15700 Blossom Hill in Los Gatos. This is a 4th alarm at this time. One fire fighter was hit by down power lines and has gone into cardiac arrest with severe 3rd degree burns. AMR medics have transported him to Good Samaritian hospital (nearby) the paramedics on last call had CPR in progress enroute and had shocked him once with no effect. This does NOT sound good at all.

S.Clara County Fire 154.25
S.Clara Command 1 153.905
AMR Med 91 856.4375
AMR Med 92 857.4375

From: Jake H
Topic: 8469 Message: 8477

Sorry to wake you up before fire season started, but the ability to post files to the web portion of Norcalfire has been temporarily disabled until at least fire season. A spam user subscribed and then started posting lots of bad files to the Files section.

New members are moderated until they prove they're human, but unfortunately we can't control file posting in the same way.

If you wish to post a file, send it to norcalfire-owner@yahoogroups.com and one of the moderators will post the file.

Thanks!
Jake

8478. Grass Valley to pull fire alarm boxes?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-03-09 03:52:19 UTC
From: Harry Marnell
Topic: 8478 Message: 8478

Grass Valley to decide whether to retire or upgrade alarm system

From http://www.theunion.com/apps/pbcs.dll/article?AID=2005103080131 (which could vanish from the web at any moment)

by Britt Retherford
March 8, 2005

Grass Valley city officials are trying to determine what to do with downtown fire alarm boxes such as this one at the intersection of Bank and Mill streets. Several don't work anymore, and fire officials feel the boxes have become impractical.

With telephones just about everywhere these days, the red pull boxes that make up historic downtown Grass Valley's fire alarm system are somewhat impractical, fire officials say.

"Why would someone run out of their house, run across the street and pull the box when they could just dial 911?" said Fire Chief Hank Weston.

It is now up to the Grass Valley City Council to decide whether it's time to retire the 160 boxes, some of which don't work anymore. Some might be kept as historic icons, with the others sold to help finance the restoration of the old Race Street fire station into a museum. The money also could help refurbish an antique fire truck.

The proceeds could be as much as $30,000, Weston said, with potential buyers being "anybody who is a fire department buff. They are collectors items."

On the other hand, the City Council could opt to keep the system that has been in place since 1951. If council members choose this route, they would need to upgrade it at a cost of about $25,000. They could replace and modernize the system, which could cost about $500,000.

Problems with the current system and lack of use are what prompted Weston to bring the issue to the City Council tonight. Overgrown foliage, juvenile pranks, inebriated jokesters and old wires with thin insulation have plagued the system in its old age.

The system is also expensive to keep up. Parts are tough to find, and repairing some of the broken alarm boxes would come with a high price. But Weston said he will do whatever the City Council decides.

Nevada City's City Council faced a similar decision a few years ago when its fire department brought a similar choice before the council. Instead of decommissioning the boxes, however, council members opted to spend the money to fix them.

This amounted to about $70,000, said Nevada City firefighter Kevin Cartzdafner. Since then, while the maintenance costs for the system remain low each year, "we haven't had one fire call yet," he said.

The Nevada City Fire Department does receive about one or two prank calls each month - similar to Grass Valley. In an effort to deter these types of calls, the fire department puts a little paste on the box that shows up with a black light.

A call from an alarm box gets directed to the old fire station on Broad Street rather than the station on Providence Mine Road. Firefighters must get information from the Broad Street station on which alarm box was activated.

This may have been efficient at a time when most of the firefighters in both Grass Valley and Nevada City were volunteers and there was no 911 emergency system, but nowadays the stations are staffed, Weston said.

"I think it is a wonderful historic attribute; however, in terms of using it, it may be counterproductive," said Nevada City City Manager Mark Miller. "But it is not my expertise."

Thanks Mike. Fully "charged" (as it was initially reported) and fully "involved" are different ;) It was a save, with significant floor damage near the back. The basement was charred with most fire under the back "porch" and into the basement. Once we realized where the flames were, and not even in the building yet, putting a Tempest fan up front to blow the air out the back saved the rest of the house from significant smoke damage. For a while we had hydrant problems and were only on tank water - which was real scary at the beginning of the incident. We were doing everything we could to keep the fire outside and contained to under the back room only and not making it up the wall into the basement. It worked ;)

For a basement fire fed with Natural Gas under a Victorian house, they did an excellent job. Arrived with it fully charged (smoke coming out of every orfice bottom to top,) and contained to what it is. Because it was a basement fire, it's unknown what is really going to happen to the pretty-much intact house above it. Besides the typical basement "junk", I can safely say 95% of their belongings were saved.

We were on our normal, City Tac 1 153.830 for on-scene, heard 4 blocks away on NorCalScan's live scanner www.norcalscan.org/live.html

Glad to have you on board again this season Carolyn. Hopefully you won't have to sweat as much as last year. Where is fire season declared open this early? Just your area? I know SoCal has their own calander of events down there...

Butte County on up to Oregon usually start the last week in May.

And if it weren't a work day I would enjoy the ceremonies in Sac. Hopefully some others here can go.

8486. Shasta County Fire on 453.000 still?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-03-22 03:44:29 UTC
From: Jake H
Topic: 8486 Message: 8486

Any Shasta County listeners still hearing County Net 154.430 simulcasted on 453.000? Anybody still hearing units responding on County Net or is everything responding on CDF Local 151.160? That was their goal, to get everybody on local net and utilize County Net as a command net. Not sure if that's ready this fire season or not.

Thanks!
Jake

Hello,

The CDF Firefighers' Auxiliary will be selling CDF 100 Year Commerative Bear's. If anyone is interested in purchasing a commerative bear, please let me know and I'll put your name on the list. I'd be happy to email anyone a photo of what the bears will look like. Depending on "selling permit" issues on State grounds, we're not sure if we'll be able to sell the bears on May 9th. We're working on it. If the bears arrive by the CDF baseball tournament the end of April, we may be selling bears that day as well.

Auxiliary applications are available via our website or contacting me via email and I'd be happy to email an application to you. You could help us tremendously by passing this information around at your stations. We are seeking new members....spouse, significant-other, siblings, children, parents, etc. Any person interested in the betterment of the CDF Firefighters' and their families are invited to join the Auxiliary. The Auxiliary to the CDF Firefighters was formed in November 0f 2001. The Auxiliary is concerned with promoting camaraderie among CDF firefighters' families, as well as providing comfort during times of sorrow or need. If we can be of assistance to your or your family at any time, please contact any auxiliary officer or member. Officer's are posted at the website below.

Thank you,
Robin Besotes (NYP)
aka Rawben

Posted a pic from a Fuji Finepix S3 12MP camera.
http://www.norcalscan.org/misc/jefferson.jpg

The fire was behind the green tree and on the exterior, went up the wall
to the eave. It also schorched underneath that door and window behind
the tree. I'm standing right above the red helmet. :)

From: jerry.tannhauser@us.army.mil
Topic: 8490 Message: 8490

Does any one have the Radio Frequency Plan for the Tuolumne/Calaverea
CDF Ranger Unit.

This list could be for the Midland or Kenwood mobile radio.

Also looking for a list of TCU local net repeater sites with tones.

Thanks,

Jerry T.

8493. Scanner Feed

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-03-28 23:43:02 UTC
From: norcalfire
Topic: 3974 Message: 8493

Hey everyone, I think I finally got the feed tuned up right. Have a audio/video feed of the scanner. So if everyone could stop by www.geocities.com/shastaradio and test it out let me know what you think. Once again this is a feed of Northern California based in Redding. Have mulitple CDF units, CHP, County Fire, Blah blah blah on it. Let me know if you want a freq on or off. During fire season this will be a FIRE only feed with SHU,TGU, SKU, NEU, LMU, as well as LNU. Thanks!

Mike

PS Also the feed is available through Bens site. www.mattlogic.com/scanner5.html

Seems perfectly in sync, both sites. In my arrogant opinion it's the audio that's most important, of course, and listeners familiar with NoVa scanning often won't need to see the display, though it is nice to have it available.

And BTW, in the brighter "strip" near the top of the display I can see a reflection of you (or somebody) moving around. Keep your clothes on ;-)

hm

From: mikeheight
Topic: 8499 Message: 8499

I am going to be staying in Sac for a couple of days on Business
and will have my scanner in motel room so I get bored with listen to
all the med call
so if county fire tac channels are used the in same way as here in
alco so i just
listen to the tac channels
so i am thing about just listening to sac county fie tac channels
if they works like here when they get a call that has a BC rolloing that
he takes a tac
channel . and how busy are the tac channels will one same do

thank you for the imput

mike....

first thank you getting back to me so fast so if understanted
this when i come up with one radio and just listen to the tac
channels
then i would only the calls like house fire . any thing that a bc is
rolling he is asiged a tac channel that is how i listen here the
med calls get old i just listen to the tac channels --- it is a great
way to hear just the major calls it sounds like this would work in
sac .

thank for you help

8502. Commercial Structure Fire - Tac ch recording

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-04-08 17:47:58 UTC
From: rrvilla@comcast.net
Topic: 8502 Message: 8502

Commercial Structure fire in El Dorado, CA, last night @ 2355.

Located 100 feet away from CDF Station #43.

I would have posted the event, but figured everyone was asleep. Was only about .5 miles away from me, so I posted an mp3 recording of a majority of the TAC (CDF Tac 8) channel comms to my website: HYPERLINK "http://eldoscanner.servebeer.com/"http://eldoscanner.servebeer.com.

Not sure what building it was. I will drive by later today and see if I recognize the building.

Ryan

The 100 Year Commerative CDF Bears have arrived!

Here's how to order. The Bears are $10.00 each. If you order 1 to 3 Bears add $3.85 for shipping to your order. 4 to 6 Bears $4.55. If you are needing more than this, please send me an email, so that I can send you the shipping total. Make checks out to CDF Firefighters Auxiliary or (CDFFA) and mail to :

Robin Besotes

c/o CDF FF Auxiliary Treasurer

202 Critter Creek Road

Lincoln, CA 95648-9524

916-645-1550

Once I receive your check payment, bear(s) will be shipped immediately. If you have any questions you can email Robin at besotes@... or phone (916) 645-1550. Thanks for supporting the Auxiliary!!

You may pick up bear(s) at Station #20 (NYP) from HFEO Besotes and save on shipping. Please email me ahead of time so I can make sure I send enough bears with Jeff. :):)

We will be shipping bears to Hemet (RRU), Fresno (TUU), Wilseyville (TCU) and the Redding area. If you're in one of these areas and want bears, let me know.

Please forward this email to your friends, family and co-workers and help support the Auxiliary.

If you are planning to attend any of the following events and wish to save the shipping, just email me how many and which event you will pick your Bears up at.

April 30 & May 1 CDF Softball Tournament

May 9th 100 Year Celebration at the State Capitol, Sacramento

May 9, 10 & 11th CDF Firefighters State Board Meeting, Sacramento

May 14 25 Year Club Dinner, Plymouth

Application to join the auxiliary can be obtained from the following website:

CDF FF Auxiliary Website: www.cdffirefighters.org/auxiliary/

8504. OT - Proposal to rename Mount Diablo "Mount Kawukum"

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-04-10 00:26:58 UTC
From: Don Root
Topic: 8504 Message: 8504

The Department of the Interior's U.S. Board on Geographic Names has received a proposal that Mount Diablo be officially renamed to "Mount Kawukum" on Federal maps and publications. The proponent feels the existing name is derogatory. The Board is requesting public comment on the proposal.

U. S. Board on Geographic Names website:
http://geonames.usgs.gov/bgn.html

Minutes of February 5, 2005 meeting where proposal reported:
http://geonames.usgs.gov/DNCFeb05Minutes.pdf

BGN Docket 388:
http://geonames.usgs.gov/Docket388.pdf

----- Original Message -----
From: "Jennifer E Runyon" <jrunyon@...>
Sent: Friday, April 08, 2005 8:55 AM
Subject: Geographic Name Proposal: Renaming Mount Diablo?

To: various "Mount Diablo" organizations:

Dear Representative:

This is in reference to a proposal that the U.S. Board on Geographic Names has received, to change officially the name of Mount Diablo in Contra Costa County. As you may know, the Board is responsible by law for standardizing geographic names for use by the Federal government, and its members must approve any new name or name change before it can appear on Federal maps and products. Because local acceptance of any proposed name is very important to the Board, we would be interested to receive the opinion of your organization regarding this proposal. We have also asked the Contra Costa County Board of Supervisors and the California Advisory Committee on Geographic Names (CACGN) to comment on the issue.

The proposal to rename Mount Diablo was submitted to us by a resident of Oakley, who believes the existing name is derogatory. He has suggested the summit be renamed to Mount Kawukum, a name of indigenous origin that reportedly means, ?laughing mountain, everywhere seen.? (We should note that the proponent also suggested the summit might be renamed for the late President Reagan, but we have informed him that the U.S. Board cannot accept that name, as its Commemorative Naming Policy requires that the honoree of any new name for a natural geographic feature must have been deceased for at least five years).

To view a synopsis of this proposal, please visit our website at http://geonames.usgs.gov/Docket388.pdf (scroll down to the section on California). Please submit comments to the address, fax number, or e-mail address provided below. Also, please include an explanation as to the reason for your recommendation, regardless whether negative or positive.

We encouarge you to distribute this e-mail to other groups or individuals who might wish to comment.

As soon as our research is complete and all interested parties have had an opportunity to comment, we shall present the proposal to rename Mount Diablo to the U.S. Board for discussion and a decision. Thank you for your assistance in this matter and we look forward to hearing from you. If you have any questions, please let us know.

Sincerely yours,
Jennifer Runyon, research staff

8515. Chico - CSUC Whitney Hall 9th floor dorm fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-04-15 04:44:15 UTC
From: Nick Caldwell
Topic: 8515 Message: 8515

Last night CSU Chico's Whitney Hall (a freshman dorm) had a single room burnout on the 9th floor that was quite a sight. This building is the tallest in Chico, most aren't over 2 or 3 stories, so it was easy to see from blocks away. Chico Fire had 6 engines and 2 trucks (their entire regularly staffed force) and I presume their volly company, and Butte County Fire sent two engines and another volly company.

I took these pictures with my Nikon D70 and Sigma 28-80 f/2.8-4:
http://nick.norcalscan.org/D70/WhitneyDormFire/

The Chico Enterprise-Record news story:

8516. Butte Fire dispatch change?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-04-20 06:13:58 UTC
From: Nick Caldwell
Topic: 8516 Message: 8516

I have been hearing what sounds like a new tone on BTU's dispatch (151.400). The CDF ECC is contracted by the city of Oroville to dispatch their city fire dept, and it seems they may have added another tone to cover just the city. I hear it very poorly in Chico, where I could hear the south county and west county tones fairly well before.

Anyone else notice a change? It would be with the 1## engines and trucks, as well as Company 1 and Chief 1, and possibly the 7## units (run by the casinos just east of Oroville). Shouldn't change monitoring too much, as its not a new freq, but interesting addition none-the-less.

Would that be a new paging tone, or a new repeater tone?

Repeater tone, they tweak pager tones more constantly than I care to keep up with. They just added a whole new protection district run/staffed/payed for (not sure of the details) by the local casino tribe, the apparatus are 7#, then there is Company 7 and Chief 7 to go with it.

8519. Tehama, Plane wreckage found on fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-04-21 04:19:32 UTC
From: Jake H
Topic: 8519 Message: 8519

This has been a mystery call all evening long.

CHP H16 apparantly was dispatched to investigate fire/smoke in the Campbellville Ridge area in southeastern Tehama County. H16 came back on Tehama CDF 151.370 and reported fire on a hill and smoke, standby for further. Then reported (loosely quoted) "plane wreckage on fire, solo plane, fire into vegetation. Going to attempt to land and investigate further. Lat/Lon 39 59.12 by 121 47.23" Red Bluff copies.

Then H16 came back and asked Red Bluff to (loosly quoted) "contact Butte County and see if they have (or had) any CDF aircraft flying out of Chico"

That was it for probably 45 minutes on any radio freqs I could think of. Then H16 comes back and says (loosly quoted) "we're back in the air, couldn't make it to crash site due to heavy terrain. We took aerial photos for anybody who would want them and we'll be back in service"

Red Bluff asked back on extent of fire. H16 reported "fire is confined to 2 acre crash site near bottom of ravine, some hot spots where fuel is on fire, but nothing spreading into vegetation."

Just now heard Lassen USFS on 172.225 "Divison 2 is in service Campbellville area"

For a fresh plane wreck, this has as much radio traffic excitement as an ambulance being reduced to code 2 on a medical call. That's what doesn't make sense. No sense of urgency. No obvious SAR callout from tehama or butte side. H16 seems to be back in service available. I can make as much out of this as you guys can. No speculation please. Just passing what I'm hearing (or not hearing). All of this on norcalscan.org live scanner.

151.370 TGU Local
172.225 Lassen USFS

Jake,
heard the end of this too when I left the college and guess what, I was leaving from my Aviation ground school class. wierd.

anyways I though I heard something about a recovery only when H16 was talking to TGU.

I was kind of stumped on that too.

There was and still is a working fully involved structure fire in the Anderson,Ca area.

Howard st. near church st.

APD was asking for all available units code 3. Stated wires down and alot of people in the area.

sorry but could not get the tac ch. heard all this about the same time of the TC plane crash.

Tehama SAR is responding, you are hearing the talk on a USFS net with Division 2 and some Edward units that are headed into the area. Best access is from the Butte side it seems, from Cohasset ridge. SPI is the logging company up in that area and they have many gates, not only at the entrance points to their logging roads but randomly around their logging roads as well, and it can be quite a pain for SAR teams to see a road on the maps, get half way down the road and then be stopped by a gate. Most the times these gates can barely be opened with the key because people shove rocks and dirt up inside them.

Yeah, most traffic is now on 172.225 USFS Lassen off of Turner Mtn. LNF Div 2 coming in from north (Ike Dye Hill) and 6E3 coming in from Cohasset Ridge side (from Chico). Engine 16 from Chester responding for the fire. They're coming all the way from Chester down 32 into Chico, then going back up through Cohasset Ridge.

Roads very rarely cut across canyons in this area. To get across a canyon, you have to drive to one end or the other (30-40mi to 60mi drive) and start back up the other side.

Tehama Sheriff is starting a SAR response. Rescue 20 on 154.740 Tehama SO Ch1. A couple of other deputies enroute too but I don't have their calls.

All on the live scanner. LNF and TGU is on priority to get over the mundane law stuff. I am trying to stop on LNF when they talk. Staying up until first LNF unit gets on scene with a report. Very little/no cell coverage in this area.

Sounds like LNF 6E3 is in area and trying to find the scene. Tomorrow is going to be full-on operations. Chester engine 16 staying in hotel in chico to start up cohasset ridge first thing in morning. Operations is going to be out of Windy Cut off of Hwy 32. They're going to try and get 2 copters up there to work the scene based out of Windy Cut. Tehama SAR sounds like they will try a recovery tonight. Local news is reporting it now. Expect a story tomorrow. I'm hitting the sack. All of this on live scanner. I'll leave LNF on priority for tomorrow.

Aside from the personal impacts on the families of the crew (to whom I express my sincere condolances), this is going to have a huge impact on this year's fire season not only locally but throughout the country. It is likely that this may ground or yank the Aero Union planes which are some of the few flying so far this year.

8531. NTSB DISPATCHES TEAM TO INVESTIGATE CRASH OF FIREFIGHTING AIRCRAFT IN CALIFORNIA

****
NTSB ADVISORY
****

National Transportation Safety Board
Washington, DC 20594

April 21, 2005

****
NTSB DISPATCHES TEAM TO INVESTIGATE CRASH OF FIREFIGHTING AIRCRAFT IN CALIFORNIA

****

The National Transportation Safety Board has dispatched a team to begin an investigation into the crash of a firefighting aircraft in California that killed all three crewmembers aboard.

At approximately 6:50 p.m., PDT, Wednesday, April 20, a Lockheed P-3B air tanker, N926AU, owned and operated by the Aero Union Corporation of Chico, California, crashed immediately following a fire retardant training drop near Chico. Visual meteorological conditions prevailed.

According to the company, the accident flight was the seventh flight of the day for that aircraft. The purpose of the flights was to conduct qualification checks for pilots who were scheduled to conduct firefighting operations during the upcoming fire season. The aircraft was manufactured in 1966 and was formerly operated by the United States Navy. It was powered by four Allison T56A11 turboprop engines.

Senior air safety investigator Georgia Struhsaker, from the NTSB's Seattle regional office, will lead the team as Investigator-in-Charge. She will be joined by four NTSB investigators, with assistance from representatives of the Federal Aviation Administration, Lockheed Aircraft Corporation, and the Aero Union Corporation. Rolls Royce (Allison) Engines will also be offered party status. NTSB Member Ellen Engleman Conners will accompany the team and serve as principal spokesperson for the on-scene investigation. Paul Schlamm is also accompanying the team as press officer.

The Safety Board issued 5 recommendations (A-04-29 through 33) last year to the Department of Agriculture, the Department of Interior and the Federal Aviation Administration as a result of several accidents involving structural failure of firefighting aircraft (it is unknown

at this time if yesterday's accident is related to structural failure).
Those recommendations may be found on the Board's web site via the
following link:
http://www.ntsb.gov/recs/letters/2004/a04%5F29%5F33.pdf.

AFAIK, there are no set dates for "fire season" to start or end, but it depends on weather/moisture conditions on each ranger unit. TYPICALLY, but not at all necessarily, fire season tends to start earlier and end later in the southern part of the state than in the north. Always subject to vary, though.

hm

All willdland agencies do it different. CDF which goes by it's "bluebook" says April 15th is when money is availible to start staffing resources. But it now is a unit by unit request. The 3 southern units will start next Monday. The only thing CDF will declare is "Peak" which means all second engine stations will be covered.

Was wondering if anyone here flys or been with someone who flys in a private airplane and tried scanning frequencies and if the range is real good due too being so high up in the air.

if so what was the range-miles you got?

I cant use mine because Im to busy flying with my instructor to check.

I would think you could get a good range.

any help greatly appreciated.....

From: Pamela Alley
Topic: 8545 Message: 8545

Ed, thanks for the reminder...I started weedwhacking my place two months ago and it's growing back faster than ever.

So I Roundup'd it yesterday and hopefully in a week or so I'll be able to rake and hoe allll those nasty foxtails and grasses into a nice bin to take to the dump for composting.

Seeing lots of places around the county though that haven't even touched their weeds OR lawns yet, much less done spring pruning.

Considering the wind that hit this evening about 5:15, that's downright scary.

and Im surprised why I havent heard any left over,un-attended control burns escape yet with all this wind here in redding and anderson this evening.

maybe after the thunderstorms come in will hear some spot fires.

will be a good idea to listen to jake and mikes feeds next few days.

some areas in anderson seemed to be gusting 30+ MPH.

One of the problems aircraft have on fires is even though they are pre assigned a air tactics channel they get to hear ALL the traffic that is out there on that freq. I know when our folks leave HMT, they can hear clear up to Columbia like they were there. The pilots even talk to each other, chit chatting like they were right there, in rotation. They say it saves them a phone call :)

From: Mike Larish
Topic: 8551 Message: 8551

Looks like they'll keep flying for now. NTSB is apparently done with their on-site investigation... Further, based upon the article, it looks like the plane was in tact when it hit (i.e. didn't break up in the sky like some other P2's have).

http://www.chicoer.com/Stories/0,1413,135~25088~2836586,00.html#

8552. T-26 NTSB PRELIM REPORT

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-04-26 21:23:16 UTC
From: Dave
Topic: 8552 Message: 8552

NTSB Identification: SEA05MA085
14 CFR Part 91: General Aviation
Accident occurred Wednesday, April 20, 2005 in Chico, CA
Aircraft: Lockheed P-3B, registration: N926AU
Injuries: 3 Fatal.

This is preliminary information, subject to change, and may contain errors. Any errors in this report will be corrected when the final report has been completed.

On April 20, 2005, about 1850 Pacific daylight time, a Lockheed P-3B air tanker airplane, N926AU, registered to and operated by Aero Union Corporation, Chico, California, impacted terrain while maneuvering about 12 nautical miles north of the Chico Municipal Airport. The three crewmembers on board were fatally injured, and the airplane was destroyed by fire and impact forces. The training flight was being conducted under 14 CFR Part 91. Day visual meteorological conditions prevailed, and a company flight plan was filed. The flight departed the Chico Airport at 1838.

According to representatives with Aero Union Corporation, the accident flight was the tenth flight of the day for the accident airplane. The purpose of the flights was to provide recurrent flight training for pilots scheduled to conduct fire-fighting operations for the United States Department of Agriculture Forest Service (USFS) during the upcoming fire season. The accident flight involved conducting practice drops of water over an area of rugged mountainous terrain located north of the Chico Airport. Aboard the flight were a pilot, a co-pilot, and Aero Union's chief pilot, who was providing flight instruction. Prior to departing on the flight, the airplane was loaded with 2,550 gallons of water.

The airplane was equipped with an automatic flight following system that relays data from an onboard global positioning system (GPS) to the ground where it is recorded. Data was relayed every 2 minutes. Preliminary review of the data recorded for the accident flight indicates that the airplane departed the airport, proceeded north to the practice area and began maneuvering. The last data point was recorded at 1850:01 and showed the airplane was at 39 degrees 57.498 minutes North latitude and 121 degrees 49.368 West longitude, traveling at a ground speed of 176 knots on a true heading of 008 degrees at an altitude of 2,785 feet. No distress calls were received from the airplane.

According to local authorities, witnesses observed a "fire ball" at the time of the accident. When the airplane did not return to Chico Airport, a search was initiated. The wreckage was spotted from the air on the evening of April 20, and ground search and rescue personnel reached the site early on the morning of April 21.

The accident site was located approximately 2.4 nautical miles northeast of the last recorded GPS data point at 39 degrees 59.241 minutes North latitude and 121 degrees 47.208 minutes West longitude at an elevation of 2,359 feet. The accident site was located in a ravine that was oriented approximately 278 degrees magnetic. A ground scar oriented about 304 degrees magnetic ran down the south slope of the ravine. The majority of the wreckage was found along and up the north slope of the ravine. The airplane was severely fragmented

and a severe ground fire had destroyed most of the structure and surrounding vegetation. The wreckage field measured approximately 400 feet long and 100 feet wide.

All of the aircraft structure was accounted for at the wreckage site. Remains of the control surfaces were found. Control continuity could not be established due to the fragmentation of the airplane. The four engines, propellers, and reduction gearbox main drive gears were located at the wreckage site. There were no indications of any engine uncontaiments, case ruptures, or in-flight fires. The cockpit engine instruments were found in the debris and the shaft horsepower, turbine inlet temperature and fuel flow indications were read out. The readings were consistent with the engines producing power at the time of impact.

Mike,
I believe Galt is dispatched by Sac Metro (county), not Sac City. Same trunked system. Metro is 2XXX talkgroups and City is 3XXX talkgroups.I always thought Galt was Dept. 4400 with stations 44, 45, and 46, but Kelty lists it as 3700. Hopefully Ed or someone who monitors Sac County TRS can make us smart on this. Metro's unit numbering convention mirrors the station number - Engine 37 would be out of Station 37, etc.

Galt is it's own entity, meaning not part of Sac Metro, however they are dispatched on Sac Metro's Freq. I tried going to www.galtfire.com but it seems that web page isn't available anymore. I'd invest in a Thomas Guide and when you hear a dispatch for a familiar street, look it up. Of course, you can always sit outside a Galt Fire Station and see if you can catch either a Station number or an apparatus number.

Interesting story, Ed. Thanks for the link. The writer neglected to mention that Riverside is one of only 3 CDF units in the state that received 100% Fire Prevention funding for this year (the other 2 being San Bernadino and San Diego). All other units received 50%.

8563. CDF - 100 Years

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-05-06 19:37:55 UTC
From: George Cusack
Topic: 8563 Message: 8563

If any of you are going to the CDF centennial celebration at the State Capitol Monday, and you are packing a scanner, here are the incident frequencies:
Command: CDF Tac 1, 151.145
Tactical: CDF Tac 5, 151.250
The organization of the event is pretty much straight ICS. Operations has 1 branch consisting of 3 divisions. They are:
Division A, "Street" or "10th Street". This will be all of the vehicles parked on 10th Street.
Division B, "Displays". This will be all of the displays, tables, and booths on the lawn area, plus the mobile kitchen and comm units.
Division C, "Step" or "Top Step". This will include the podium area, the equipment between the podium and the Capitol building, the media lift, and the seating areas for dignitaries and politicians.

Mike - Probably too late for your Galt trip, but my old notes are apparently still correct. I passed Truck 45 on the highway this morning. So, Galt should be station and unit numbers 44-46.

Somebody will call a technical foul on this, so...

The incident/event has 3 divisions, period. ICS 203 thinks big and
assumes branches. If there are just 3 divisions, they get listed on the
form under Branch 1, which is the case for Monday.

I believe its also around different counties throughout the state too.

Shasta Co. had a big write up in the record searchight on possibly not renewing the CDF contracts. trying to save something like 7 million.

scary.....

You are right. A lot of schedule A contracts are looking at CDF's rising costs. What they forget is that CDF has always been the best bang for the buck, because we put the minimum staffing on their equipment and we work a 72 compared to a local 56 that most agencies work today. Those 2 items bring a lower cost. But as CDF fire fighters slowly climb out of the bottom of the pay barrel, it IS going to cost those agencies that use us more money. But we will never cost as much as a LAC, ORC, LFD, or SFFD. Just look at San Bernardino County fire. They are some 18 million in the whole since contracting away from CDF and starting their own department. And they STILL are covering many stations with 1 person. These folks we contract with have to understand that everyones cost go up and you get what you pay for.

The Pioneer District in southern El Dorado County cancelled their CDF contract for Station 38 coverage this year. They have "plans" to hire a paid chief for the district and provide local staffing for 38, but as of a week ago, I had heard nothing was in place. As we head into fire season, the Grizzly Flat area is uncovered.

Probably a tossup between Windows Media and Shoutcast. Personally I would go with Shoutcast just to be anti-Microsoft and be friendly to just about any computer and operating system out there. Oh, did I say that outloud? There are other options I think but I'm not sure what they are or pay attention because I am happy where I'm at. It also depends on if you want to host listeners on your connection, or have somebody else who has lots of bandwidth host the multiple connections. I send 1 stream to my norcalscan.org server and that then kicks it out up to 60 listeners at a time.

8574. Dropping CDF / Riverside

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-05-08 18:31:07 UTC
From: Ed
Topic: 8574 Message: 8574

I am no expert but it seems that starting up your own department , especially one in a county as big as Riverside just has to be so expensive and in a time when counties don't have as much money as in years past seems risky.

In my local area we have had several depts combine in the last few years and very possibly more on the way. Cuts Admin cost if nothing else

In San Mateo County , Daly City , Pacifica and Brisbane formed North County Fire. Burlingame and Hillsborough formed Central County Fire and cut one Engine and one Chief (Stations 31 and 34 were VERY close to each other.

The only Department I know of that is adding (and we have covered this on Bayscan) is San Jose Fire which is planning on adding Stations 33,34,35, 36 and 37 which includes 4 new Engines , 2 new Trucks possibly one more BC and another Quint. Lot of money involved.

Be interesting to see what happens with the counties talking about cutcutting CDF.

Well, let's take a look.

Equipment - Riverside County already owns the equipment (including overhead vehicles) used in the Schedule A (County Contract) operations.

Stations - Riverside County already owns the stations used in Schedule A operations.

Staffing - I am told that Riverside County already provides payroll services to the staff hired for Schedule A operations.

Communications systems - here is where things get a little dicey. RRU and RVC share the comm center at Perris. CDF channels are used for most of the operations, although RVC has licensed some of the frequencies used in the county.

As I see it, the major costs are going to be establishing the overhead services (Department administration, HR, training, and logistics) and communications systems.

But I could be wrong...

Don

8576. Burney 4.4 earthquake

Yahoo group: norcalfire (2005 — 2016)

wierd I still have not heard anything on 118.950 and im using a handheld.

find any cordinates to were they are training?

I though they may have started at that time (14:30) the way they seem to be giving all the beginning fire info (freqs,etc)

probably had a break from the morning and restarted when I turned on my scanner. thanks for the correction :-)

Cy,
I believe so. they did some drops with a tanker and copters. got copters 202,205 and tanker 100 and some others I missed.

I also heard that they had parachutiest (hotshots?) 4 of them dropping into the incident and something about caming overnight. most likely just comm training.

was real interesting and great training listening. will be listening today for more.

Redding is one of the few programs out there that still have air attack training so any new air attacks in the western US will come out here to play and learn how things are done. For air attack, they need to practice managing air assets in the air, the more the merrier for training. I confirmed seeing Copter 202 (Beiber) and 205 (Vina) on the tarmac Monday evening behind the USFS Admin building (end of Avtec Ln is the end of the runway and the air attack tarmac.)

Every year they typically "dispatch" over one of the command nets. Then they will assign all sorts of air tacticals, and this is where they'll throw out freqs that might not be used often during the season, such as the 118.950 freq reported. All this is thrown at the air attack to see if they can handle it and organize it in the air. Numbers and radio traffic, try to overwhelm them or see where their limits are. Listen to air tactical while jotting down coord for new fire from "dispatch."

In the past they've used Buckhorn and Whitmore as incident names. And the freqs keep coming and coming. Enjoy!

Good catch on the freqs Darran. Thanks. CDF Tact 1 is rarely used up here, but it's still a valid freq for anybody to use up here. You never know where these guys will pop up. Keeps the new air attack on their toes, as well as us.

Good practice for fire season 2005 everybody ;) Glad to see the list is waking up after the winter hibernation. As we get closer to the season I'll post the usual rules, hints and tips on what works best on here.

And if it seems the volume on Tac 1 is lower than the rest of the channels, it is. Tac 1 was converted to narrow band last year due to an adjacent channel issue.

Don

8590. CDF - 100 Years

Yahoo group: norcalfire (2005 — 2016)

Topic: 8590 Message: 8590

Jake is going to load some photos that I took at the CDF Centennial celebration at the Capitol on Monday - whenever I could get a break from serving punch and cookies in the MKU.
Most of what I sent to Jake is historical stuff that I hope many of you have never seen - from the 1926 Moreland, to the 1930 Model A, to one of the three new Model 25s that are now deployed in the state. There a also a few shots of historical displays, the Color Guard with "Spot" sniffing up the rear, and the CDF pipers. Hope you enjoy.
George

It's hard to tell with the air attack training but I believe these are actual starts rather than training.

Batt 2112
Engines
2176
45
2167
2162

enroute to eight small vegetation fires located along wheelock road as well as an additional vegetation fire near the intersection of hwy 70 and hwy 149. Up on Jake's scanner.

From: Glenn
Topic: 8591 Message: 8592

Aircraft do not train with ground crews for there air tac training, so it must be the real thing. The one hour fuels are ready to burn throughout the state. We have had 100 acre fires this year in So Cal when it juist rained the day before.

Topic: 8591 Message: 8595

And just a friendly reminder from your moderators: as the fire season heats up remember to put in descriptive subject lines, once we get multiple fires going the generic subjects can lead to confusion.

Thanks.

Nick

you forget the most important part CDF is still low
bid so if you get rid of them all and have to pay your
own firefighters and benefits and have to deal with
the union and make sure your in parity with
surrounding districts you might have to double your
budget to do the same level of service you have now
with CDF...

This is accurate report although the district is
unsure what it is going to do as of this time, with
July 1st fast approaching... this contract was not
about money to pioneer it was about board member ego
especially one writing off building permits for
various wineries without any fire protection
engineered for the buildings so when pioneer tried to
pass a benefit assessment to save the contract he and
another board member lied and campaign very negatively
against the district as cdf..

Pictures are loaded in Photo area under CDF 100th Birthday. 2 minutues
for a batch change in Photoshop to the files to reduce them to 1200px
width and resolution down to drop 16MB of photos to 2MB of photos. And
the pics still rock! I enjoy Mac OSX 10.4.

Thanks George!
Jake

Topic: 8590 Message: 8608

Don't know about the Auburn area but both Loomis Fire and Rocklin Fire were having training burns today. Could that have been what you were seeing?

8613. SoCalFire Board

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-05-22 02:40:59 UTC
From: Brad Paulus
Topic: 8613 Message: 8613

Sounds like their busy tonight. They're having problems with the volume flowing thru the Yahoo servers. Can anyone help them, sounds like they need help with posting photo's as well. It appears to be a medium size fire in the upper area of Cajon Pass (I-15 near San Bernarding). Ben might also have some feeds up, otherwise you can use this link:

http://www.compucations.com/socalscanning/content.php?content.1

Hi,

I was wondering if I could ad your CDF page on the Nor Cal Scanning.org webpage to our CDF Firefighter's Auxiliary list of links (on our Yahoo Group)? This page is for auxiliary members only and will give another resource for our spouses (and their families) to better understand what our FF's do.

Thank you,
Robin Besotes

My ribs felt funny so I thought I would check my e-mail. I was busy with
the season finale of 24 tonight. Yes, so it's out. I'm a huge fan. :)
Although now my Monday evenings are free...

Robin, you may link to that page as you wish. The site is undergoing
some overhual, recoding, and content update very soon but this address
will remain the same for CDF Radio information, and the information
currently on the page is current as of the end of 2004 fire season.
Tongue-in-cheek, I am very happy with the CDF portion of NorCalScan.org ;)

From: Jake H
Topic: 8624 Message: 8624

Well Tehama county has its first header of the season with a massive vegetation management plan (VMP) burn. BLM land is being burned above The Bend northwest of Red Bluff along Jellys Ferry Rd and Bend Ferry Rd.

not sure of the tacticals involved since BLM is primary with CDF and Tehamam County Fire assisting. CDF TGU Local is 151.370

8628. UPDATE: Butte 99IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-05-26 16:24:51 UTC
From: Pamela Alley
Topic: 8628 Message: 8628

3 1144 at this time per BCSO; traffic control anticipated for at least a couple of hours; county working with CHP to break deputies to deal with the deceased on scene (they are our coroners).

CalTrans is enroute for traffic control.

Enloe Trauma Center seems to be handling most of the casualties. (Chico)

Last update unless something drastic happens (Heaven forbid! This is not a good start to this weekend!).

Release No. 0185.05

USDA, Ed Loyd (202) 720-4623
DOI, John Wright (202) 208-6416

FEDERAL AGENCIES' AERIAL RESOURCES ARE READY FOR 2005 FIRE SEASON
Resources May Include Additional P2V Airtankers

WASHINGTON, May 26, 2005-Federal firefighting agency leaders today said they have a sufficient mix of aerial resources to meet this fire season. This announcement follows preliminary results of a study on P2V airtankers, which showed that they could be used in the upcoming fire season.

"While many wildland fires are effectively suppressed on the ground without the need of air support, aerial resources remain one of the many tools that assist firefighters in stopping more than 99 percent of all fires before they ever become unmanageable," said Mark Rey, USDA under secretary for natural resources and environment. "In recent years, fire managers have increased the use of smaller planes and helicopters in firefighting support because of their increased capacity and maneuverability compared to the larger airtankers which offer the benefit of long-range delivery of retardant rapidly in the initial attack of a wildfire."

In May 2004, the Forest Service and Bureau of Land Management terminated the contracts for 33 heavy airtankers due to the National Transportation Safety Board concerns about the airworthiness of the aircraft. In July 2004, the agencies determined the airworthiness of eight P3s and returned these planes to service.

In February, the Forest Service initiated an engineering study to determine the life limit of nine P2Vs. The operational service life is expressed in how many hours an aircraft can be safely flown. It takes into account the stresses imposed on the airframe during different flight missions. Since the P2Vs were in service before the U.S. Navy's development of structural analysis and fatigue life limit programs, the development of this information required additional engineering work. In a typical fire season, a P2V aircraft flies approximately 200-300 hours.

Preliminary results of the study found that some P2V aircraft may be safely returned to service. Once additional inspections are completed on the P2V aircraft, two of the aircraft currently on limited service will be returned to full service and seven additional aircraft may be awarded contracts for work beginning in July. Minden Air (Minden, Nev.) owns two of the P2Vs and Neptune Aviation (Missoula, Mont.) owns the remaining seven.

"Airtankers are a critical component of the fire suppression program," said Interior Assistant Secretary Lynn Scarlett. "Restoring these aircraft to our fleet will give us greater flexibility in providing aviation support to wildland firefighting."

Firefighters will have the following aerial resources at their disposal this season:
--At least six large helitankers and helicopters and more than 700 helicopters total;
--28 single engine airtankers as well as about 70 on standby;
--Six CL215 and CL415 airtankers;
--Eight military C130 aircraft outfitted with modular airborne firefighting systems;
--Seven P3 airtankers; and
--Up to nine P2V airtankers (once additional inspections are completed).

The Forest Service and the Department of Interior, together with interagency partners, continue to work on a long-term plan for aviation resources.

The P2V operated as a land-based patrol bomber in the 1950s and 1960s by the U.S. Navy and was the predecessor to the P3. The original manufacturer is Lockheed Martin who produced the aircraft until 1963.

The preliminary outlook for the 2005 fire season shows normal fire potential in the southern and eastern states. Significant fire activity in the southwest is expected to occur mostly in the southern parts of Arizona and New Mexico at lower elevations. Recent rainfall in the west has delayed an early onset of the fire season in the northwest and northern rockies; activity in these areas should begin in early July. Alaska is not expected to have another severe fire season like that of last year. Currently, the main threat for high fire potential is in the western Kenai Peninsula due to large areas of bug-killed spruce.

From: Dianne Heryford
Topic: 8630 Message: 8630

Is there a page anywhere on the net where I can go and find out where fires are burning this fire season? There must be a good site out there somewhere. I get all my fire information from this my nor cal fire e-mail, but is there a page that list all of them? maybe a CDF page?

Not to spoil the fun but with fire season knocking the door down quick this weekend (Nick and I watched Copter 205 quench its first fire and apply structure protection this season today) lets try to keep crash and TC postings to ScanNorCal. Lets keep this list open for fire postings for the season.

Thanks everybody!

From: Don Root
Topic: 8639 Message: 8639

Hello, All.

To echo the request from the owner of the Northern California Fire list, fire season will be opening this week in many parts of California. As ScanNorCal is a generic scanning list, and NorCalFire is aimed at the Fire Service, please respect the wishes of the NorCalFire list management team and post only fire-related activity to NorCalFire. All other scanner-related traffic (including initial announcements of fires) can be posted on ScanNorCal.

Thanks,
Don
ScanNorCal List owner

8640. NorCalScan Live Scanner - dedicated fire mode

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-01 06:25:18 UTC
From: Jake H
Topic: 8630 Message: 8640

The NorCalScan live scanner is now in fire season mode. Sadly (?) I turned off the law enforcement banks and reprogrammed the fire banks with a clean slate of freqs for the area. It is a little quieter at night without cops running plates, but during the day it will be hopping.

It is now hooked up to an external antenna on the roof (vertical dipole Grove scanner antenna)! Because of some new freqs programmed, and the new antenna situation, I can't guaruntee 100% interference free yet. I need to learn the new birdies and interference spots from the computer and other electronics and lock them out so in the next couple of days you may hear the scanner stuck on noise for a few hours while I'm stuck at work. However the first 3 hours tonight have been perfectly clean. We'll see.

http://www.norcalscan.org/live.html

Enjoy!
Jake

8641. Shasta/Trinity: Control burn at whiskeytown Lake?

Hi Group,
was wondering if anyone knows if whiskeytown Lake Fire District is having a control burn? saw a large amount of smoke in that area while driving from anderson to redding on the freeway.

redding has a nice breeze and looks like the smoke is sideways which indicates a good breeze there too.

I didnt hear anything on the scanner and nothing reported in the newspaper.

tia,
-Ron

Heh yeah, that's the way we do control burns up here. Big, in the middle
of high dry fuel, at the beginning of fire season (or july 4th weekend ahem)

C205 was in the air and Red Bluff asked them if there was a large column
in the whiskeytown area. C205 practically responded "are you kidding?!"
It is odd though that nothing was reported in the paper etc. They are
usually real good at letting us know before the large column causes a
self-evacuation exodus...

I'm sending this as a 2acre moderate-rate of spread fire is sparking
south of Corning along I5. We've had countless 2acre moderate-rate
starts since Friday.

8646. Re: [NorCalFire] Shasta/Trinity: Control burn at whiskeytown Lake?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-02 05:38:17 UTC
From: mike@norcalscan.org
Topic: 8641 Message: 8646

Actually there was a small lil article in the Record Searchlight about the burn. The Roost burn as its called I belive can be heard on the following freqs:
165.3125 Whiskey Town NPS
168.200 USFS Tac 2 (Incident Tactical)

You can hear both of these and fire traffic from the burn on my live feed. www.mattlogic.com/scanner5.html or www.geocities.com/shastaradio

And on a side note, as of June 1 my live feed will be up 24/7. All fire no law.

Mike

From: Craig
Topic: 8648 Message: 8648

Maybe this was well before my scanning time, but was there ever a CDF 1300 Unit? I found a picture of Copter 103, and since there isn't a 1300 Unit I was wondering where 103 used to be based.

I believe 1300 was the Lake-Napa unit, which is now part of 1400 with
Sonoma. Copter 103 was then renumbered to 104. I think.

Cool, thanks guys. I just saw the Thursday paper online and it did indicate a control burn. check out Redding.com for the pic. also good article on a fire lookout.

on a side note I was driving on Eureka way near court St and notice at the gas station there a White fire truck that said Redwood National Forest. Could not get the unit number. they must have asked for some help on this burn, making sure it stays put.

thanks again,
Ron

8651. Shasta Co.: Redding 100 Yr. Forest Centennial Celebrations

Yahoo group: norcalfire (2005 — 2016)

From: hosgs1@webtv.net
Topic: 8651 Message: 8651

Redding will be having there 100 Yr. Anniversary Celebration beginning this friday June 3rd.

Friday June 3rd:
a free 2 hr. film "The Greatest Good" playing at the newly restored Cascade Theatre in Redding starting at 6:30 pm. The Film is about the history of the forest service and touch on the life of the first woman to man a fire lookout near etna (sawyer bar).

for your free tickets call 530-226-2500 or 530-243-8877

On Sat. June 4th:
100 yr Anniversary Celebration at the Redding Convention Center from 10am to 4pm. They will have music,food,displays,etc.

I will be at both. Hope to see some of you.

for further info check out Redding.com for the article or Thursdays Paper.

Side Note: Lassen National Forest will have there celebration June 15th at the Lassen County Fair Grounds in Susanville.

-Ron

Sounds like Redwood National Park decided to forward stage their equipment for this control burn based on past mutual aid requests...
http://www.norcalscan.org/photo/lowdenic/rnp_parkenginejpg.html

They like to bring fellow agency neighbors over to "practice" and get some flame experience on the firelines.

8655. Free daily NICC fire reports by email

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-02 19:37:22 UTC
From: David Coursey
Topic: 8655 Message: 8655

The daily National Incident Management Situation Report, which
covers wildland fires across the USA (see below for a sample) is
available free via e-mail subscription from the Center for
International Disaster Information. I've been getting these for
several years and find them interesting.

To subscribe: http://www.cidi.org/wildfire/fire.htm

Here's a sample:

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JUNE 2, 2005 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

Initial attack activity was light nationally with 54 new fires
reported.
No new large fires were reported. Very high to extreme fire indices
were reported in Arizona, Colorado and Kansas.

ALASKA AREA INCIDENTS / LARGE FIRES:

PILOT POINT, Southwest Area Forestry. This fire is four miles
northeast of
Pilot Point, AK in brush and tundra. Pilot Point airport was closed.
Bird
nesting grounds remain threatened. High southerly winds are
hampering
containment efforts. Running, torching and backing fire were
observed.

DOT LAKE, Tok Area Forestry. This fire is 50 miles northwest of Tok,
AK in
black spruce, mixed hardwoods, and brush. The community of Dot Lake
remains threatened. Fire behavior continued to creep and smolder.

OUTLOOK:

Weather Discussion: A trough of low pressure across the northern
Rockies
and Great Basin will bring an increase in winds and lower humidity
to
parts of the Southwest. In Alaska, a weak trough of low pressure
stretching east to west across the interior will continue to be the
focus
for cloud cover, though relative humidity will be lower on Thursday
as
showers become less widespread.

Southwest

Geographic Area Weather
Breezy to windy area-wide, with partly cloudy skies. Chance for dry
thunderstorms southeast AZ and western NM. Scattered wet
thunderstorms
west TX.

High Temperatures
50s to 70s mountains.
80s to near 100 lower elevations.

Minimum Relative Humidity
12 to 25% AZ and NM
20 to 30% west TX.

Wind
SW 10 to 25 mph AZ and NM
S to SE 10 to 25 mph west TX.

Alaska

Geographic Area Weather
Mostly cloudy with scattered showers and isolated afternoon
thunderstorms.

High Temperatures
50s and 60s.

Minimum Relative Humidity
30 to 45% inland Over 50% along the coast.

Wind
Southeast to southwest 5 to 15 mph.

Southern California

Geographic Area Weather
Morning, low clouds and fog in coastal basins and lower coastal
mountain
slopes, otherwise mostly sunny.

High Temperatures
65 to 75 mountains.
70 to 80 valleys.
80 to 85 upper deserts.
90 to 100 lower deserts.

Minimum Relative Humidity
20 to 30%.

Wind
Southwest to northwest 15 to 25 mph with higher gusts.

Topic: 8647 Message: 8657

Jerry I have a Shasta county line up in winscan. If you want it tell me where to send it.

Btw is the 780xlt the only base scanner that will do BOTH conventional and trunk scanning at the same time?

8659. Santa Clara FIRE Alert

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-04 22:35:18 UTC
From: Pamela Alley
Topic: 8659 Message: 8659

Just heard an 'information only' post; Santa Clara is working a fire of 100+ acres and are expecting it to go to 1,000+.

Resources may be called from this area (Butte Co).

PA
15:35
Butte Co Fire (151.400)

8664. Chico Engine 4 in pursuit

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-06 21:47:35 UTC
From: Nick Caldwell
Topic: 8664 Message: 8664

Not something you hear every day... Chico Engine 4 got a medical call for seizures, when they arrived on scene the patient was leaving in his car, driving very erratically, the engine decided to follow until PD could pull him over. It took a couple minutes to get PD in place, meanwhile Engine 4 was calling the "pursuit" to the fire dispatcher until eventually the guy got quite agitated and sped off, right into the waiting PD units at the next corner. Here is one occasion when Chico's combined PD/Fire dispatch center worked out quite nicely.

Nick

8665. Re: [NorCalFire] Chico Engine 4 in pursuit

Yahoo group: norcalfire (2005 — 2016)

Date: 2005-06-07 22:33:51 UTC
From: Robin Besotes
Topic: 8669 Message: 8669

Can someone tell me where I can find the frequencies (not sure of the technical name) for my area and the tactical channels - Nevada - Yuba - Placer (prior NEU). I looked on Nor Cal Fire and found some for the Chico areas, but not around here.

Grass Valley (NYP) 151.325 is all I have for now.

Thanks,
Robin Besotes

NEU is still the 3-letter identifier for the Nevada-Yuba-Placer CDF
unit.

151.325 is the local frequency for the Western slope
154.130 is the local frequency for the Eastern slope
151.160 is Tac 2 assigned to NEU
151.385 is Tac 9 assigned to NEU

8673. TGU: Veggie, Penner Drive

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-12 20:46:22 UTC
From: Jake H
Topic: 8673 Message: 8673

About 12:30pm a dispatch went out on Tehama/Glenn for a veggie on Penner Drive. I was just going to lunch so was unable to monitor or post but an hour later I'm hearing multiple engines and out-of-county units arriving on scene. The column looked a little scary with the north wind. This is one of the nastier I-Zone areas of Tehama County. Even had USFS Copter 506 responding but they were returned.

8695. RE: [NorCalFire] Shasta: Structure into veggie - crazy

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-17 00:30:34 UTC
From: Andrew Witham
Topic: 8690 Message: 8695

Interesting - the mobile home belonged to one of my security officers - she left something on the stove and went out!

As a result of the spread into vegitation, an Indian Fire Crew came to start cutting the vegitation around the casino first thing this morning, within an hour it was raining, and I just drove home over Hatchet Mountain with snow falling through thick fog - it certainly is a crazy start to fire season!

Drew

Sounds like they are getting an upper hand. They're cancelling the far-out engines and requesting just the nearest structure engine or two to continue in. Whew.

Well, it is fire weather and a USFS fire freq, it's definitely on-topic
to fire ;)

A quick check on www.scancal.org shows 168.775 is Forest Net for Tahoe
National Forest.

If it has fire in the message, put 'er here ;) Let's remember to change
subject lines to match the post. Thanks!

Jake
P.S. My wife touched the internet scanner and made it "quiet" for the
afternoon. She's lucky it's a rainy non-fire day or I'd direct all
complaint e-mails to her ;)

Quincy is HQ of Plumas National Forest which is to the north of Tahoe National Forest. Not sure why Tahoe would be dealing with Quincy weather - unless it's just close enough for them to consider it could affect weather/fire stuff on the Tahoe.

8709. South Ops Dispatch Freq

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-20 23:17:32 UTC
From: Glenn
Topic: 8709 Message: 8709

Some just emailed me and asked if CDF has a Dispatach Frequency like the Forest Service Dispatch Net that they could monitor.

Well yes they do and no you can't. CDF uses a state microwave to communicate to all the state ECC's and State Air Attack bases. It's called the "state intercom" You would be suprised what goes on with the intercom.

Anyhow, most of the southern forests use the CDF intercom as well, even though they can use either net. The FS dispatchers at South Ops prefer them to all use the state intercom, but they sometimes forget. Fox Tanker Base is getting the intercom installed now, so you may not be hearing much southern california traffic on Dispatch Net in the near furture.

Also LA, Orange, Kern, Ventura, and Santa Barbara Counties also have the intercom and use it with the other CDF units and forests.

At SCU, you can listen to the intercom on speakers throughout the station. It's sad the intercom isn't available over the air someplace, because this is where the ECC's, North ops, the air attack bases, etc., talk about resource line-ups and availability. It's interesting listening.

Pretty much just like you said, resources, dispatches out of unit that kind of thing. I still am not sure what the freq is offically called.

Mike

41.790 and 46.970 are simply rebroadcasts of the Forest Service intercom system, what the feds use similar to what the state uses. While the state system moves their state air assets over their intercom, the feds move their air assets as well as their hotshot crews, jumpers, etc. over their own system. For some reason, I think for remote access way back in the day, these two freqs were installed in some key locations in NorCal. I'm not sure if this system is still a primary system for remote bases or if it's just legacy left-over stuff that the radio techs haven't turned off yet. Back in the 70's (yes, before my time) USFS dispatched in lowband in many forests. They have some lowband legacy stuff.

I believe 41.790 was up on St. John and 46.970 covered Susanville area. There are 165.xxxx freqs too that were labeled on lists as "North Ops". Never heard a single peep on those in my 13 years of fire scanning. I think that was just legacy stuff from a long time ago.

One reason why there are no radio rebroadcast of the state "green phone" intercom system is because of the type of info passed over the system. There is some sensitive traffic etc. Granted, the intercom is sometimes heard blaring loud and clear over loudspeakers at air bases, there are at times some pretty crazy comms on there. You can hear an ECC captain begging and pleading for just 1 more tanker and North Ops replying back - sorry, you just can't have any since they're all committed. It gets ruthless on there at times (I can listen to the green phone audio when I do work around ECC). Those air assets are as popular as a scuba tank 100ft below the ocean surface. For obvious reasons, it wouldn't be popular to have some heated discussions broadcast over the radio why a fire threatening a neighborhood can't get 1 more tanker diverted etc.

Ben I would say yes, not sure if they will work in your area. But lucky me unlike Jake I have heard these used several times. It might help that I am only 2 miles away from the North Ops center but who knows. Try them out I say.

You might hear 41.790 from St. John Mtn, a pretty decent radio site on the west side of the valley in Glenn County. Mike, I've heard traffic on 41 and 46 freqs, it's the 165.xxxx freqs that have been labeled "north ops"in years past that I've heard nothing on.

Ff you are in range of those 41. or 46.xxx freqs, it can be some good monitoring. You'll hear resource checks at 10am from each Forest.

I'm in Detroit all week, so I'm more clueless than usual. My reference to the NorthOps frequency was a general comment, not specific to any traffic this morning. Let me know if something is up.

There's something on Storm Stories tonight about the arson caused
fires on 10/21/2003 that burned 600 acres.

Storm Stories is on every night at 8PM Eastern/Pacific.

8729. AT-230

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-06-23 02:30:47 UTC
From: Dave
Topic: 8729 Message: 8729

Ben, let me correct your info:

Air Attack 230 out of Grass Valley, while working a small fire in
Yuba County today, had to make an emergency shut down of
their #1 engine.

They immediately headed for Grass Valley ATB with Tanker 89
flying chase. They made a safe landing, but AT-230 will be out
of service for an engine change.

No virus found in this outgoing message.
Checked by AVG Anti-Virus.
Version: 7.0.308 / Virus Database: 267.7.9 - Release Date: 6/20/2005

All of the Air Attacks are twin engine craft. The older O-2/Skymasters are "centerline thrust" and are a different rating than the OV-10As.

Was at Grass Valley ATB this am, and the contract maintenance people
were working on AA-230. It turned out that they lost the seal to the
primary governor of the engine. The pilot noticed that the temp was coming
up on the engine and they were blowing hydrualic fluid out the back of
the engine.

The pilot immediately shut the engine down and headed for Grass Valley.
They were only about 15 miles out and made a safe landing. However,
the pilot said that the OV-10 is a real handful when flying with one engine.
Due to the asymmetrical thrust the aircraft wants to turn in the horizontal
plane,
forcing the pilot to use almost full rudder in the opposite direction. And
with the short wings on the Broco, it does not glide very well, so he can't
pull
the power back too much.

Both the pilot and the ATGS said that it was a high pucker factor event!

They were replacing the governor and were going to test fly the aircraft
shortly. It may be back in service this pm.

CDF NEU-ECC has established a new inter-dispatcher net for the
Nevada-Yuba-Placer Unit.

It is operating on the old Nevada County FD low band channel of
46.16 mHz. It ties the local city or county dispatch offices of the
following:

Sutter County, Yuba County, Nevada City, Grass Valley City,
Truckee City, Lincoln City, Roseville City, Rocklin City, Placer
County East (north Lake Tahoe) and Placer County West,
Auburn City and Sierra County.

It is using Oregon Pk, Wolf Mtn and Banner Mtn repeaters.

Not all stations are up and running yet, but there is traffic occurring
on the net now.

Ryan,
This was on the south shore of Lake Camanche near the old Penn Mine, down the hill from San Andreas. I couldn't post it because I was out on my boat watching it.
Should be in mop up now. On the ground, TCU engines were joined by at least 4 East Bay MUD units (38XX). They all just got released.
Your aircraft list was right on. C404 had to leave for fuel and C106 filled in. 404 returned and may still be there on the ground.
T80 has coverage duty at Columbia. I have no idea where 82 and 83 are.
Some units kept calling it the Penn Incident (Buena was the designated name). At one point, 440 called San Andreas as "Buena slash Penn Air Attack".

Ya they do, Ben. All the ranger trucks are equipped with foam, water tank, small pump, and hose reel.
They are also frequently part of initial attack around the village and off EBMUD property.

Thanks, George.

You don't have internet on the boat?? Get with times, man :)

FWIW, the other tanker was 81. Pretty darn sure not 80.

Thanks again, I was hoping someone down there would have the skinny on it.

apparently tac 9 traffic was killing FKU's dispatch.. tac 9 switched to
white 2.

From: David Coursey
Topic: 8764 Message: 8770

You'd think that we'd be able to hear FKU if they could hear mobiles on the ground here. I've never heard Fresno here in Tracy.

Fire Contained 0335 hours..... I am sure the elevation of these units up on Mt.Diablo has a lot to do with interferance with FKU.

No update or acreage.....I image 106 will map out the final acreage in the morning.

ED

Perhaps FKU has some (remote) receiver sites not co-located with their transmitters... a' la CHP? Or like LAPD, which has up to 12 or so receiver sites around the county for each frequency to ensure they receive the mobiles/portables, but most freqs use just one transmitter/"repeater" site.

Radio signals from Mt. Diablo paint an immense amount of land. Mobiles
on the slopes can easily be heard at FKU dispatch (with base station
antennas at Fresno International Airport) on the floor of the valley.
I suspect it was the ECC that was being impacted by the Tac 9 traffic.
As far as David or Ben hearing FKU, the repeaters are situated to cover
the Unit while being shadowed to their area (Black Mtn is shadowed to
Tracy and Livermore, and Joaquin Ridge is on the west wall of the valley).

They also have a site co-located with Sierra NF at Musick Mt. which can easily see Diablo. Of course, I can hit the South Diablo amateur repeaters all the time.

I think you will find the Mission Peak / Mt. Hamilton / Mt. Oso ridge line will severely impact receiving signals from the south at your location, Ben. If I recall correctly, you are south of I-580; looking north from you is relatively clear (once you get past the Diablo ridge).

If you look at a CA topo map, I suspect you will find that Mt. Oso is in the way of Joaquin Ridge, and that there are other (equal or taller) peaks in the way of the Fresno sites in the Sierras.

Valley IC El Dorado Hills,

Structures threatened, approximately 3 homes. I belive one is currently on fire.

3 tankers currently on scene, 4th en route from Sonoma.
C404 coming on scene.

154.430 Command
151.280 Air Tac 4
151.385 TAC 9

corner of valley view and scrrech owl.

8786. Confused!!

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-06 02:03:58 UTC
From: Ryan Villa
Topic: 8786 Message: 8786

I am hearing something strange on El Dorado Local Command (154.430)...
Tactical traffic.

Apparently this is a repeater located SOMEWHERE, being used on a
fairly decent size fire. I just have no idea where it is.

Here is what I have so far:

units:

Stanislaus 21
Burbank 1, 2, 56, 42.

Mentioned a Vivian Road and a canal. Also mentioned Divisions A,B and C.

PL on the repeater is 123.00. It is a decent signal strength with no
white noise.

Hearing this traffic from apprx 1645-present (1900)

Unfortunately, just about every agency in CA has a license for this
freq and there are 2 dozen CA cities with a Vivian Road.

They have mentioned the IC name a few times, but I can't decipher the
mumbling.

I was just wondering if anyone had any additional info on this.

TIA,

Ryan
El Dorado County

> Mentioned a Vivian Road and a canal.

The only Vivian Road I can find in California is in Modesto.

There are several irrigation canals that cross over it.

Clark and ONeill Road, Clark IC on Tac9; 151.385
19:35

Barn fire; extension to wildland with multiple structures threatened.

IC requested 3 additional engines. Barn fully involved.

PA

8789. Re: Confused!!

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-06 02:49:48 UTC
From: Ryan Villa
Topic: 8786 Message: 8789

Yes, you are correct. I should have mentioned that there are 27 cities in CA that are VIVIAN something, but I think Modesto is the only one with a VIVIAN RD. That was my initial guess initially, I figured it must be somewhere in the central valley, since there are irrigation canals all over th place.

Thanks again!

Ryan

Hello Ryan & others,

Sounds like your hearing Stanislaus County Fire Dispatch.

They also use 153.770.

I'll listen to 154.430 to see what I can hear from my

location in Columbia/Tuolumne County.

Rgds,

Jerry T.
WA6AVR

PS, I bit of historical trivia,San Francisco Fire used 154.430 back in the
olden days like 1970 thru 1985.

Stanislaus County Fire.

They use 154.430 as a secondary with that PL and High
power levels.

This has become a problem in the past with
interferance with El Dorado Command.

I am in Shingle Springs area and often times hear the
same thing you have described.

From: portofinor
Topic: 8797 Message: 8797

This group is for wildland fires only. There are no questions or comments allowed. It will be used for paging to cell phones if wanted. I think it will be great for people that just want wildland fire alerts and updates ONLY.

It seems like all the other groups have too much chatter. Any thoughts.

Thanks Gary, and to all who replied!

Hopefully they get it together and use a real TACT channel on simplex. This fire couldn't have been more than 1-1.5 sq. miles. No need to use a high level repeater.

I'm surprised that El Dorado and any of the 2 million other licensees for that freq haven't complained, and if they have, why nothing is different. Oh well.

Thanx agn everyone!

Ryan

My thought is that it's a great idea, but won't work
without lots of moderation. People will crosspost to
xCalFire, xCalScan and your group. Then others will
hit "reply all" and you're full of the stuff you don't
want.

A better option if you want fire paging (or cell text)
is to use one of the existing paging groups, i.e. IBN
or IPN... working within their sometimes strict rules
cuts down on the BS. And they're more adjustable by
region. If I don't care about say Amador County I
don't have to get it.

Mailing lists and paging groups both have their
purposes... but don't cross too well. Maybe for some,
but not the average schmo.

Just my opinion, I could be wrong...

8801. Butte Strike Team - 9210C

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-06 04:39:54 UTC
From: Nick Caldwell
Topic: 8801 Message: 8801

Butte just formed a strike team ASAP at Station 63 (I believe that is headquarters in Oroville) to move up at cover to the to Madera mobilization point. Strike Team 9210C on CSR63E4.

I believe the leader to be B2115, the engines I know of are E2182, E2184, E2167, missed the other two. We just got a strike team back in the unit yesterday about noon, and out goes another today...

Nick

John is correct, with IPN you can adjust to a large variety of calls, no matter if they are weather, police, fire or EMS related.

You can pick whichever State/county you want as well.

I don't care about working fires in San Diego, where John would. I do want to hear about greater alarms there and make my setup do just that.

The point about having to cross post is also quite valid. I pick ONE of the groups and post ONLY to it although I have cross-posted when a very large fire is working such as I might post to norcalfire about a major brush fire in Contra Costa County BUT will point out.....updates on Bayscan. Only makes sense.

8807. RE: [NorCalFire] Wildland Fire Alerts ~new group~

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-06 15:48:48 UTC
From: Andrew Witham
Topic: 8797 Message: 8807

John,

You are spot on! The only problem with IPN is that there are very few local dispatchers in the northern counties. I dispatched for them for just over a year - but with no-one else north in Shasta County it didn't really help me - at the time I was working for Redding PD and volunteering with Shasta County Fire - so if I didn't dispatch an incident, I didn't know about it - and of course, if I dispatched it - I knew about it before IPN!

It was also hard to respond and dispatch too. If I was paged on a fire call, I wasn't going to stop and dispatch it on IPN before responding for the engine.

Membership of IPN is paid - if you just want to receive - but if you dispatch you get an extra month's credit for each month that you provide a reasonable number of dispatches - I think I paid for three months and was on for over a year. Pages are formatted for phone / pager - but you can get email or use the web browser.

IPN provides a great service, and is very adaptable for each members personal needs. IPN needs a lot more local scanner listeners to act as dispatchers. I'd certainly resubscribe if there were more up here. The dispatchers are heavily monitored to ensure consistancy.

Anyone wanting more information is welcome to contact me off line.

I've been a dispatcher for IPN for over 5 years now, and at one point in time was the CAL Chapter administrator (when they had chapter admins). There were no dispatchers in my area to begin with, then picked up 2 in the span of 3 months. Then when I moved here to CenCal, there was just me, and now there's at least 3 in the area. We're always looking for dispatchers, so if you'd like to participate, drop me a line and I'll send you the URL for the dispatcher's application.

I also have been an IPN dispatcher for nearly 5 years and I was the SFO chapter administrator for a while until IPN dropped the title (for everyone).

We have a few in the bay area but not enough, my view is IPN can be very nitpicky about some of the way calls are dispatched and people get ticked off and quit. If they would quit "looking a gift horse in the mouth" so to speak, all chapters would probably have more dispatchers and IPN would be a much better service. It sure appears to me the Southern California has lost a number of dispatchers, probably the same reason and the system now relies on "out of state" dispatchers reading webpages and on-line / Internet scanners. The problem with that is you don't get all the information as local dispatchers do. While the system is still overall a good one, it has clearly gone downhill.

Yes what you are hearing is Stanislaus County Fire, which includes Modesto.

"Burbank" as you heard is the Burbank-Paradise Volunteer Fire District in Southwest Modesto.

8816. Martis Peak Lookout in service 7/12/05

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-07 01:11:41 UTC
From: Ric
Topic: 8816 Message: 8816

Hello group: Martis Peak Lookout on the Tahoe N.f. will be back in service 7/12/05. Myself and the CDF crew from Truckee went up on July 5th to do the setup and list of repairs for this season. I will be periodically going up to the lookout to finish up the loose ends and be back in service on the 12th as I mentioned before. I personally invite all group members to stop by and pay a visit this season. You can e-mail me for directions if you like. The lookout is in service from 0900 to 1900 hrs. I staff the lookout Tues - Fri w/ volunteers covering weekends and Mondays. Anybody that would like to volunteer at this lookout should contact me direct and I will setup a training date for you. I cant wait to get back in action again, and I hope all of you have a great season this year. Sincerely -

Ric Baender
Martis Peak Lookout

I guess I want to chime here just a little...I think IPN is a great service for those who like getting there alerts to the pager etc. I also can UNDERSTAND those who dont particularly care for the "over-updating" that can go on on the yahoo groups. (Yes, although I try to control I occassionally "chat" here but I do try to keep it on topic. I also TRY to list a fire in one place only depending on the incident.). But, I learn ALOT from some of the additional things that get brought up here on these boards.

I guess I am just saying I think there is room for both. As for ANOTHER service like IPN but on yahoo....as others have said...IF you can moderate it well enough I am in favor of free over paid any day! BUT, it is unlikely I will post there since I often times am posting information while doing other things (like work occassionally!) I like the little bit of leeway that the "xxxfire.yahoo" boards allow.

8818. Re: [NorCalFire] Re: Wildland Fire Alerts OPINION OF THE GROUP

From: Craig T.
Topic: 8797 Message: 8818

My opinion on this group consists of 3 things...

1.) It is a fabulous idea for people with the right equiment.

2.) I asked that my cell phone number be hidden, and it wasn't. I don't need freaks of nature getting ahold of my cell phone number, calling me at all hours of the day and night, thus causing me to pay some god awful charge to change my number.

3.) I own a Nokia phone ran thru Cingular. When I received messages, I would get these messages in 5 different text messages because they were just too long for the phone to handle. At 10 cents a message, this can get very costly when someone is constantly updating the fire. Over the 4th of July weekend, I must have gotten about 30 texts just from the Mt. Diablo Fire. So for Nokia members of that group, keep in mind you may recieve 5 texts just from one post.

So I have taken myself off the list until I can get either a better phone, or something that can handle all the info into ONE message.

Date: 2005-07-07 23:17:16 UTC
From: Nick Caldwell
Topic: 8822 Message: 8822

Vegetation fires burning (at least 4) on the summit of the Sutter Buttes, multiple IC's, structures threatened and outhouses already burned. North Butte fire is out, West Butte still burning. Butte sent a dozer and type 3 engine to assist. Unknown tacs, White 2 was given to the Butte units responding in but it sounds like the Sutter engines are using their own Sutter Co. tacs.

Sutter Fire Dispatch - 153.9350

been hearing fire flies on the radio checking in with check points.

are these air or ground patrols and Im wondering if this could be the reason why the season has not started yet in shasta-trinity-tehema counties. they must be going a excellent job so far :-)

oh one other thing, are these volunteers or paid personnel?

I believe these are logging inspectors doing patrols over logging areas to make sure no illegal logging is happening. The have various checkpoints that they radio in without giving real locations so loggers can't monitor the radio and hide illegal ops while the plane flies over. While the resource is up in the air they figure why not use it for fire patrol as well? They're independent and not part of CDF or anything.

Camping on a mountain top last year in Butte Co we were buzzed by one early in the morning with the plane just skimming the trees. Good wake up call. Heard a few minutes later on BTU Local clearing and switching over to Tehama.

FireFly is a private fire spotting plane paid for by the various Northern California private timber companies. These are paid, private personnel.

From: Andrew Witham
Topic: 8824 Message: 8827

City of Redding have a large vegetation fire working at Live Oak School, Oasis Road, Redding. A Seasonal On Call Firefighters have been paged to respond to the scene, and all seasonal fire fighters on station have been retained on duty. Additional paid staff have been paged to respond to Stations One and Six.

I haven't heard a formal scene size up yet - but I believe I heard ten acres moderate rate of spread.

Good info Drew. And the timber companies have a lot more at stake than illegal logging. They pay serious money for timber contracts on Federal lands. I've never seen one of these contracts, but I have to believe they would get their contract payments if the tracts were wpied out by fire. What they wouldn't get back is the future value of the harvested timber. That would probably get wiped right off their balance sheets. Bad stuff for a private or public company. Without turning this into a legal board (SIGH) is anyone familiar with the terms and conditions of a timber contract that could comment on this ?

True, George, look at what happened when the Fountain Fire came through my backyard 14 years ago - the area has had to be replanted with sixty million trees - after nearly fourteen years these trees are now about four feet tall. See my webpage at HYPERLINK "http://www.company71.org/fountain_fire.htm"http://www.company71.org/fountain_fire.htm for details of the Fountain Fire. This remains an unsolved, open, arson case. Three timber mills in Burney closed down as a result of the fire, and the towns of Round Mountain, Montgomery Creek and Burney remain financially disadvantaged. Twelve buildings, include at 1900 sq ft home were lost on the ten acres that I now own.

well that is a great idea. now wondering why CDF volunteers not out there or if they are maybe not radioing in.

seems with all these devistating fires the last few years they would come up with some plan. maybe like using the local ares chapter or something.

didnt you do something like that last year or before Jake? You still cordinator for your local ares? Is your club big enough for something like this?

I think redding still has good size club. dont know. have not been monitoring the local 2 meter net for a few months now.

anyways thanks again guys.....

Several times in recent years, CDF Volunteers in Protection (VIPs) have been used in SHU in areas which appeared to be being targetted by arsonists.

Three years ago we paired-up a ham and a non-ham VIP and CDF paid gas costs for private vehicle patrols of some remote areas, and provided CDF Fire Patrol magnetic signs for the vehicles. During each operation we ran a 2M net so that CDF communications were not impacted. Fire setting in the Bella Vista area stopped overnight.

Two years ago the scheme ran into problems when for liability reasons the State required all volunteers driving for CDF to take driver safety training, and then they ran out of money to run the classes.

In Tehama/Glenn the VIP Ham group (seperate from Shasta/Tehama ARES but can be the same people) does similar operations. A ham and non-ham VIP are paired up but we drive CDF vehicles, not privately owned. I've been doing this for approx 5 years now with TGU on the 4th of July. I was Utility 2552 last week. We operate on Local net and usually jump to a tactical channel (tac1 this year) to contact a nearby Prevention unit for a little "help"
with unruly partiers that want to compete with the $10,000 city fireworks show.

I think only once TGU did fire patrol outside of the 4th, when fire danger was extremely high and we had a number of suspiscious fires in a certain area. That was just before the ham portion of VIP was put together in TGU though. CDF loves us because we're communicators (unlike some STARS sheriff volunteers ;) and during certain times, can always bump to amateur radio to pass "secure by obscurity" traffic that arsonists in the area wouldn't imagine to monitor on their scanners.

8836. Butte Fire Exercises

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-09 17:02:59 UTC
From: Jake H
Topic: 8836 Message: 8836

From Nick who's working SAR evacuations...

Large I-Zone wildland fire drill off the Paradise Ridge and Butte Creek Canyon.
Haven IC

Tact 11 and 12 for ground. CDF Air to Ground 151.220 for Air Attack 210.
I'm sure SAR is working 155.160 and possibly their repeater on 155.940.

I think this goes on all day long.
Jake

8837. Roseville-Folsom fire

Yahoo group: norcalfire (2005 — 2016)

Only thing I've heard is a Sac metro 2nd alarm brush Grant line &
Keifer, south of Folsom.

Thanks for bringing up bad memories, Drew! The Defensive Driver training program is run by the Dept. Of General Services, which periodically holds classes in West Sacramento.
CDF down here could not get DGS to take their classes on the road - not even 1 or 2 counties away. We had to travel to West Sac, and CDF had to foot the bill for mileage and meals. What an uproar! A couple of my VIPs quit the program because of it. Finally, our FPS II was able to arrange for 1 class out here.
The fun starts all over again next year when our current DD cards expire.

Large fire working in NV just over CA border near Gardnerville.
Several CA agencies in support. Last info I got from
Wildlandfire.com "hotlist" is 1000 acres and still growing with
structure protection in place and threat to High value CA deer area...

TGU said any "55 stay alive" or other classes that teach defensive
driving to seniors etc. qualified. If one is in your area, check with
your local VIP program and see if passing it qualifies you for defensive
driving. It did for us with the state.

8848. Re: [NorCalFire] Vegetation Fire, Humboldt County "McKay IC"

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-11 23:53:22 UTC
From: Harry Marnell
Topic: 8846 Message: 8848

Thanks. I believe Fortuna was telling High Rock Crew 1 to respond to
this *in place of* their training exercise.

Also using CDF Tac 3, 151.175. Fire is about center of
http://tinyurl.com/dm4ne - helicopter is getting water from Fay Slough,
top of pic.

Prevention 1221 enroute, Tanker 96 in area.

As of 2330 tonite, Sac Sheriff Blanas confirmed the pilot and copilot died from injuries sustained in the crash and a third officer going the observer training was in very critical condition. Although the crash did spark a grass fire, the helicopter itself did not sustain any fire damage. God rest the souls of those who die and may our prayers be with the two who gave their life in the line of duty and we pray for the recovery of the third officer.

From: Pamela Alley
Topic: 8854 Message: 8854

Heard the start on this one, was 'a couple of acres, moderate rate of spread'. Had to go out for a while, now hearing like it got pretty big.

Anyone got the details on this, please? :)

Also, multiple reports of vegetation just reported on River Road (Chico-ish), cross of Hwy 32.
River IC
Tac is White 2 154.265
Butte Co Fire 151.400
Lone Tree Tac Gridley Fire 154.310

It was contained to 112 acres. BCSO H-1 was doing water drops on the fire for a while. Heavy mop up; IC requested more engines just for mop up.

The River Road fire was a small spot, 1 Chico engine to handle, one county engine to do paper.

Nick

Sorry about that all.

This is in Tuolumne county, just west of Don Pedro Resv. and due East
of Modesto and Oakdale.

Fire is now contained according to AA and one tanker been released.

From: Jake H
Topic: 8864 Message: 8864

Lassen NF is working a good fire in the Prospect Pk area northeast of Lassen Pk.

active torching and spotting 1/4 mile ahead of fire. I believe 30 acres about an hour ago.
172.225 Forest Net

unknown other freqs, turned the radios on after seeing the large plume from Red Bluff. ;)
I'll be working on more info for this. Forest Net is #2 priority on live scanner
http://www.norcalscan.org/live.html

Tankers now being diverted to a new fire breaking in Janesville. Pine IC ("151.175 Command" they're saying, I don't know how that can be...)

Shaky containment at 3 acres, tankers released. In mop-up stages now. Sounds like from the air-to-air someone got retardent on their tennis court, hopefully they don't mind its new color, at least its still around.

In an odd twist, this fire is near Lime Saddle Marina and Enloe Flightcare just got launched for a near-amputation at the knee, LZ at the marina. They will be flying through the fire's airspace to the LZ.

Red Bluff has a fun call last night. Paged for a transformer fire into vegetation. Halfway into our wildland gear police radio in that a structure is involved. Repaged as structure, transformer into vegetation. Live wires down on top of all of that (literally ;), including the hydrant we almost tapped into. Sat around for an hour unable to put water on anything, structure was just "very threatened." Huge juniper hedge was cooked.

Here's how the professionals take care of it
http://www.norcalscan.org/pix/pole1.jpg

The transformer just doesn't like dry chem...

Depends on the fire. If the fire is in open fields with no structure threat, usually not. Sacramento Metro has a huey with water drop capabilities.

Should the fire be in the interface, and should CDF air support be available, then yes, they could be used, and the air show would be on the usual channels.

Don

Since Sac does not have their own tanker. If CDF is requested for air support, then yes they will use the same air tacs that they would use on any other fire.

8875. Re: [NorCalFire] looking cdf air tanker freqs for sac county

Yahoo group: norcalfire (2005 — 2016)

From: John's PDA
Topic: 8872 Message: 8875

There's 3 freqs that CDF uses for air tactical channels. The freqs are:

151.280 (air tac 4)
151.295 (air tac 5)
151.310 (air tac 6)

Very seldom do they use other channels, but they have used 151.220 and 151.2725 in the Sierra Region (region 4).

Actually what comes into play with Sacramento County
is whether the fire is in State Responsibility area or
Local Responsibility area as with most of the state.
if it is in LRA and the IC requests aircraft from CDF
then they are charged for it, no one wants to show
that bill to their chief... If it is in the SRA then
CDF is obligated to launch airtankers as is many times
the case on the outskirts of folsom and sacramento but
usually the Folsom or Metro engines slow the fire
enough to reduce the aircraft assignments.

I believe it wasn't a reaction to anything, it was simply moving some fresh air into the transformer and the oil inside the transformer was able to flash a little more than normal. After this one, there was a smaller burp from the oil, and then the fire was finally out.

Quite a surprise though - my camera was set to 4 shots per second at this point. The PGE guy was a little perturbed also afterwards. He's just wearing a tshirt and hardhat up there - that's how the pros do it ;)

8887. Re: ST -9210-C

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-20 02:31:37 UTC
From: Ryan Villa
Topic: 8880 Message: 8887

Was the BRUNS renamed KELSO?? Bruns rd and kelso road intersect south of byron and this is the fire Eagle 5 went to and they were using tac 2. I know it was BRUNS, but must have been renamed.

I caught just part of conversation on SCU indicating some confusion with the BRUNS/BRUNES names.

Subject: [NorCalFire] Re: ST -9210-C

TAC for TESLA is WHITE 2, AIR TAC 5

TAC for BRUNS is CDF TAC 2, AIR TAC 9

Bruns Rd is a few miles south of Byron airport.

Ryan:

Do you have a list of all the airtac Freqs?

If so are you willing to share?

Thanks

Gary Mitchell

From: Ryan Villa
Topic: 8880 Message: 8898

I hate it when they do that! Pick a name and stick with it :)

I think they went from Bruns to Kelso back to Bruns. I was listening
to the TAC 2 traffic when I was driving through Amador county on my
way to the sprawling metropolis of Volcano at around 3:30pm. The IC
was referring to himself as the Bruns IC.

Same thing happened at Camanche a few weeks ago. Started out as Buena Incident but was changed to Penn. Many of the initial attack units kept using Buena. At one point, A440 got so frustrated he announced himself to San Andreas as ☐Buena-Penn-Whatever Air Attack☐.

LOL yeah i heard that. was classic. Why doesn't the fire service just
have a similar naming as they do with hurricanes. start at top of
alphabet and work your way down with pre existing IC names, then start
over again.

8904. RE: [NorCalFire] Re: ST -9210-C

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-20 15:53:24 UTC
From: Larish, Michael
Topic: 8880 Message: 8904

Because hurricanes are forecast by a single, national office whereas there are thousands of fire jurisdictions & districts in California all having their individual responses. Would be impossible.

LOL yeah i heard that. was classic. Why doesn't the fire service just have a similar naming as they do with hurricanes. start at top of alphabet and work your way down with pre existing IC names, then start over again.

8907. Re: Pre-Determined Incident Names

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-20 23:26:06 UTC
From: Bob Berg
Topic: 8880 Message: 8907

Do you realize how large this list would be based on the number of incidents that each CDF unit may have in any given year? Also, there would be additional workload in creating the list of names and for looking up the next incident name to use when dispatching emergency equipment.

It is quick & easy to call a fire on Smith Road the "Smith" incident. Also, the renaming of incidents is not a real common occurance. Of course, sometimes management has required renaming an incident when as a fire at a place such as Jackass Creek is called "Jackass". "Jackass IC" doesn't come across too professional on the radio.

Also, the names are reused over and over especially the fires that occur near the freeways. Many "205", "580", and "Altamont" fires each year.

Then a local fire dept or district, is first on scene sets up a IC,
orders additional resorces, and gets to play the name this fire
contest.

All CDF fire incidents are named at the dispatch center not by the IC like most city crews do. I noticed this change quite a while back. just by listening.to CDF dispatches

The Bisquet fire in Del Norte HHU, and southern Oregon that burned two years ago or was it three, went through three name change it seemed the name was changed every day,then back to the name of the day before, got to be a joke in the local papers.

Ok, this is my last off topic post for the day. Pamela, I run a great Bar-B-Q but I don't think you want to pay in cold Beer what I charge to cook. Hummmm, speaking of cold Beer, Im drinking Fosters tonight. Everyone watch out for the fine/flashy fuels out there. The Ag burn I just watched was impressive. Too many fire whirls to count.

8918. Shasta: Lookout IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-22 20:19:17 UTC
From: Jake H
Topic: 8918 Message: 8918

I'm surprised nobody posted this yet. On my lunch I noticed TGU sending cover units into Shasta. Looking for the plume on my way to Taco Bell I see it up in the Oak Run area. Looked like two small headers.

Lookout Road, Oak Run Road were two heard on the radio. Staging is setup for the incident. Unknown freqs other than 151.160 Local net and 154.920 for Shasta SO units in the area standing by for evacuation.

Heading back to the office, the plumes were barely seen.
Jake 1pm

8919. New Incident - Shasta, Burney - Main Incident

Started as fire in RV in parking lot to Tri Counties Bank, Main Street, Burney

Spread to adjacent wildland, now at two acres with rapid spread in grass,

Multiple outbuildings now burning, threat to other commercial structures,

Upgraded to full wildland response with air tankers being sent from Chico

Using Command CDF Local 151.160, TAC 9 151.385

Drew

From: Mike Daly
Topic: 8921 Message: 8921

A couple of months ago back on June 3rd 2005 was a really bad day for me. Some might recall the incident that happened in Redding (pursuit and stand off the Redding airport). Anyways sentencing day has arrived sept 6. After all is said and done i will receive 2 years felony local time. So its time to start cleaning house.
This is short notice but on 7/24/05 at 9am in Shasta Lake I will be giving way all my 2-way radio equ.(But maybe someone would like to give me somemoney for it.The catch is that u have to go thru the boxes and take them out of my truck the equ.
I have in my truck a Motorola spectra VHF-Hi programmed to all of Nor-cal police and sheriff freq and some fire. This is a remote head, also 1 motorola 99ch maratrac vhf-lo this has all of CHP with tones programmed in it.(TX disabled) and a BCT-8 this is in a 3 bay mobile rack. This stuff is set up better then most police and fire agencys. I also have a motorola spectra 800.I wont tell u what it does(been in lawsuit with motorla and there system keys)so if u know what that means then u will know what the radio will do. I also have a bearcat895 and 3 motorola 64 ch top display UHF MTS2000. None of this equ is stolen. I used to work for a 2-way radio shop and it was all used equ that we picked up. I also have abunch of other radios. I also have a digtail RS scanner that will go with it.It is safe to say that you could take this equ and go sell it on ebay for $2000.(u ask then y don't i?being 34 i have been listen to scanner for 20years. I rememmber the top of the line scanner was a 4-ch crystal radio.So i'm just giving back to what i have learned over the years and hopefully someone will.Give it some good use. I forgot i also have an ICOM 16ch VHF-Hi(field programmable radio) u can programm any VHF-Hi freq in it from the front keypad in like 2 min.Good for a firefighter who needs to put in freq on the go.The address is 4801 main st. shasta lake.

This accident is at 273 and Canyon, right in front of Win-River. RPD Supervisor has been requesting traffic units to respond, CHP H-14 to take aerial photos and Caltrans for traffic control, as the casino is having a concert tonight. I know there are 11-44's, and the appropriate office is responding, but no idea how many.

My office is >1/2 mile from the scene, got the scanner on monitoring.

8929. Shasta: Oasis IC - structures threatened 12:45

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 19:47:55 UTC
From: Jake H
Topic: 8929 Message: 8929

Oasis and Gold Hills Drive - good size fire with good wind. Requested augmented dispatch with 2 tankers, copter requested. Copter 506 will be the copter. Tanker 95 is one of the tankers.

RDN 6
OES296
RDN 35
RDN 45
2479
2487
2440
2444
3 crews

151.160 Local Net
151.445 or 151.460 tact (I forgot)
151.295 Air Attack

Fire bumping hard against sub division. Sounds like they have 2 heads on the fire.
Local Net and Air Attack on http://www.norcalscan.org/live.html

Okay - HUGE smoke plume now building, seen from north Tehama County.

Water tenders are requested now, with more engines/water tenders coming off Shasta Forest.

SHU now dispatching for a veggie Kimberly Road at Hawes Rd in Anderson. CDF Tact 9
2477
2476
2481
2481
2469
2442
Station 46

That pretty much empties the valley in Shasta. Start expecting strike teams to come in from out of county.

TGU starting to work a fire at the R Ranch Hwy 36W. Ranch IC on Tac 4. SHF Engine 12. They got Copter 205, will be on a different air tactics. Legal is Section33 of 28N 8W, I don't
see the smoke from this one but I have a few trees in the way. This is right out my office window. Trying to find access in.

Wind is about 10 from the north

8936. Ranch IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 20:34:12 UTC
From: Steve Jackson
Topic: 8936 Message: 8936

They are requesting 2 more airtankers for a total of 4 and
are talking of setting up overhead personnel. Copter 205
said there are three heads on fire and moving out. Additionally
two additional crews and 1 help was also requested.

8939. Tehama: Ranch IC - torching

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 20:40:07 UTC
From: Jake H
Topic: 8939 Message: 8939

3 heads going in different directions
active torching
AA210 and Copter 205 at scene. Requesting a total of 4 tankers.

R Wild Horse Ranch looks like north of Hwy 36W. No exact location yet.

Multiple water tenders requested. This is going to be an airshow, no ground access. Requesting overhead and Incident Command to be assembled for their prediction of a long-term incident.

Very large plume seen from Red Bluff. I can't see it from north Tehama County but I think a stupid tree is in the way. Apparantely I must be blind according to some people calling me. ;)

8953. Photos now available on NorCalFire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 21:20:26 UTC
From: Jake H
Topic: 8953 Message: 8953

I forgot earlier I had turned off members posting photos to the web portion of NorCalFire. Had some adult pictures being uploaded behind our backs. That feature has now been enabled again. You can post photos to the photo section at http://photos.groups.yahoo.com/group/norcalfire/

Thank you!
Jake

8954. Re: Ranch IC Tehama

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 21:28:40 UTC
From: Steve Jackson
Topic: 8954 Message: 8954

Estimates are this fire will go to between 300 and 500 acres. Copter 102 is now on scene.

8955. Oasis Incident

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 21:34:06 UTC
From: Andrew Witham
Topic: 8953 Message: 8955

Any heard a recent scene sizeup update on the Oasis incident so that I can update IPN?

Drew

8956. Tehama: Jelly IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 21:40:57 UTC
From: Steve Jackson
Topic: 1822 Message: 8956

Second fire in Tehama names Jelly IC up on Jelly's Ferry rd area. AA230 and H510 are enroute. Tehama scratching the bottom of barrel for assets but at present doesn't seem this will do anything.

8957. New Start Madera County

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-25 21:37:43 UTC
From: John's PDA
Topic: 8957 Message: 8957

Didn't catch the initial dispatch, but from the radio traffic I can gather that it's in the area of Quartz Mt. in the Yosemite Lakes Park area. Sounds like an augmented high-level dispatch, and AA430 reported 90-110 ac., Ops estimates larger by 50ac.

Command: 151.400
Air Tac: 151.310
Gnd Tac: CDF Tac 7 & 8

From: Jake H
Topic: 8953 Message: 8958

Just from looking at the smoke it seems like they have gained an upper hand on it. Both with my eye, plus some caltrans cams, it's laying low now. The smoke has finally reached north tehama county. Unable to monitor it anymore with work stuff I'm doing.

http://www.dot.ca.gov/dist2/cctv/lake.shtml
http://www.dot.ca.gov/dist2/cctv/lake8.shtml (history)

Also TGU's Ranch incident is getting lots of resources that Oasis would have gobbled up if it were cooking still.

Coarsegold is the closest community to this fire. Header visible from Fresno.

IC sez they just lost it and it's making a run and spotting really bad. Gonna be a handcrew and airshow. IC putting a no divert on the tankers.

Dennis,
Listening to the frequencies here in Chico and the traffic seems to be quite a bit less in the last hour or so. I'm hearing the air-tac guys sort of looking for targets now. I can see the smoke building from the NW Chico area though.
They put lots of resource on this incident this afternoon!

The fire from initial reports sounded like it was north of Hwy 36. They were planning on using RRanch for command and staging. Very little to no ground access into the fire so it was an airshow for most of the day until crews could hike in. Engines are almost a waste of the resource for most of the fire. Dozers are making roads that the Type 3's can use. This geography is ugly in this area. RRanch itself I don't think was in a direct threat area (at least it was never mentioned over the air as a goal)

Midnight last night they were discussing Tuesday's activities and also what to put on the morning IC-209. They had a line around it by midnight last night, and were expecting containment by 0800 this morning. Field observers and air attack gave a low estimate of 1000 acres. Copter 205 will map the fire this morning and they expect more.

8976. Quartz Incident, Madera County

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-26 19:16:57 UTC
From: Smokey Behr
Topic: 8976 Message: 8976

On the morning report from NICC (http://www.nifc.gov/news/sitreprt.pdf) they have the fire listed as 800 ac with 0% containment. The numbers in the SitRep are from about 1500 yesterday, just after everything blew out and before all the orders were placed into the system. The actual size and containment as of 0800 this morning is 1500 Ac, and 55% containment. They had a couple of small slopovers and spots, but they are working to get a handle on them, get them ringed and contained before they get too big. Estimated full containment is 1800 tonight, but they will reevaluate and may push it to 0600 tomorrow or later. I don't have an actual total of resources comitted, as I don't have access to the 209, but the broadcast news is reporting 500-700 firefighters. Air resources are 3 tankers and 4 helos. A training AA (AA501) out of Paso Robles has been flying over the fire and doing a pretty good job. Tanker 78, which was on the IA out of Fresno is at McClellan out of service with landing gear problems, and as I type this, AA430 is down with an oil leak. News is reporting that there is 1 FF injury, but no details.

Current Freqs:

Command 4: 151.400
Tac 6: 151.325
Tac 7: 151.340
Tac 8: 151.370
Air Tac 6: 151.310
Air/Gnd: 151.220
Helo Victor: 122.500

Sorry to clutter email boxes, but thanks very much for this well composed report. It's concise and really informative.

Cheers!

8978. Thank you - great fire posts

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-26 21:43:02 UTC
From: Jake H
Topic: 8978 Message: 8978

Thanks to all who have contributed the past few days with the sudden increase in fires. Lots of informative posts and the subject lines have matched the incident and message content, keeping everything organized. I'm always proud how this list pulls through nicely during chaos while most other lists fall apart to bickering and sniveling.

Remember during initial fire posts:
0. Only report significant fires, not every little veggie/spot fire dispatch...
1. Agency (spelled out if possible, no acronyms in initial post)
2. Size-up
3. Freqs involved
4. Other pertinant info

Subsequent posts
1. acronyms are okay at this point
2. pertinant information
3. If 2 or 3 people are duplicating posts, try to work it out so one person posts to limit list
traffic.

Thanks again!
Jake

From: Craig Rose
Topic: 8979 Message: 8979

For those of you with an interest in what a wildland response looks like in the SF Bay Area, CDF and cooperating local agencies are working a nasty fire in the hills of southern Alameda County near the community of Sunol. This is the KOOPMAN FIRE that is being driven by a persistent 15-22 MPH WNW wind.

Fire was originally reported by a local government engine at five acres started by a vehicle fire on Interstate 680 near Koopman Road. Reason for the heavy response is structure protection as there are quite a few $$$ homes in this area. Size of this fire has yet to be reported.

Here is a fairly accurate rundown on current resources.

DIVISION 1601
BATTALION 1613
BATTALION 1615
BATTALION 1616
BATTALION 1605
BATTALION 1117
EAST BAY PARKS FIRE CHIEF 5600

AIR ATTACK 460
TANKER 80
TANKER 81
TANKER 85
TANKER 86
COPTER 106
REGIONAL PARKS COPTER EAGLE 6

ENGINE 1179
ENGINE 1664
ENGINE 1663
ENGINE 1167
ENGINE 1771
ENGINE 1660
ENGINE 1261

HA. Lets go with 390 acres instead of 1000+ acres. There was a technical error while transferring GPS waypoints into the mapping system. Whoops :)

Ben,
According to the limited gastronomical protocols and procedures that are shared with me by the Amador-El Dorado uniforms, a launch is a lunch about 60 minutes later (unless the lunch is served by the Growlersberg Crew, in which case it is delicious and doesn't result in a launch).

Some nice shots Craig. One question, who's the gang in the nice, clean, Wildland gear?
A Launch..... that's what you do with the lunch they just handed you that had sat out in the sun (116 degrees) from the previous day. You take out all the goodies and launch it in the next convenient trash pile.

Good point about the " clean " gear. Way back when I joined the
SFFD Reserve I knew better than to show up at either a drill or fire with a
brand new YELLOW turnout coat ....so I made my jacket dirty BEFORE going to a
fire.....................didn't want to look like a " rook"

Little did I know, I would work 3 major fires in the next 24
hours and had not needed to " cheat" on my look on the new gear :-)

Thanks Dan -

That was an engine that arrived to the fire late and was assigned structure protection. In fact, the only newbie on that crew was the young man - nice folks! By the time they had reached the fire most of the "heavy lifting" was done. Some of the engines on this fire were en route coverage assignments and were diverted to the Koopman Fire.

8995. CHP CAD

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-27 20:22:37 UTC
From: Steve Jackson
Topic: 8995 Message: 8995

A little off subject here. But is anyone having problems with the CHP CAD. I get the top screen up okay but when I try to drill down to the incident I get a 404 error. It never did this before..

tks,

Steve

As John said...I posted about this problem on the SoCalScan not too long ago. It is a LITTLE better lately. Here is a work around for the problem you describe. The "search" feature works fine lately (i.e. FIRE), but as you say, when you click on a specific incident you get a 404 error. BUT, if when you find an incident you are interested in you can switch the CAD web page to that particular AREA and then find the incident and click the link and it will work....cumbersome...but....

interesting enough. When i go into the individual area it works. its
just the hot spots that don't work for me atleast.

Perhaps. But I once wrote to them regarding if and when they
would have the maps back up. They responded, "yes, soon". It
took almost two years -- and then the maps crashed, anyway.

It just may take a long while to get everything back the way is
was. Patience is a virtue! ;-)

Anyone monitoring this fire in Sacramento ?

Howe and University , must be at least a 2nd or 3rd alarm

building in danger of collapsing , using master streams , wires down and a fire fighter down

Hearing a lot of different Engines on scene

monitoring live feed and its broken / scratchy ?? anyone have more details ? as to what type of building , number alarms ?

thanks
Ed

It is a medical building, I believe a dialysis center. Master stream show.
It is at University and Howe near the Sac State Campus.

probably hearing sf because they share the same channels. since I get
both systems you'll hear both traffic sporadically

From: Rick
Topic: 9002 Message: 9010

It was interesting on 1 of the news station that one of the occupants indicated that there was no sprinkler system or fire alarm. They had smelled smoke then heard a loud explosion while the bldg was still occupied.

OK, this may be a dumb question, but I've often wondered what exactly does "6th alarm" tell me? I assume it's the sixth batch of equipment they've sent, but is there a definition of just what an alarm consists of? Or does it vary by agency?

Where I did most of my fire listening, in L.A., they never used alarm numbers like that. If they needed five triples and two trucks, they'd simply ask for "five triples and two truck companies," or if they wanted two additional two task forces and a Batt Chief, they'd ask for two task forces and a Battalion Chief.

TIA

Harry

9014. Re: [NorCalFire] Sacramento Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-07-28 03:39:52 UTC
From: caladded@aol.com
Topic: 9002 Message: 9014

LAFD is a bit unusual , most all depts use an alarm system

as far as how much equipment , it for sure depends on which dept , but almost everyone sends 2 - 3 Engines 1 BC and at 1 Truck. Larger Depts can afford to send more. SFFD sends 3 Engines , 2 Trucks 1 Rescue and 2 Battalion Chiefs AND a Division Chief to fires and once reported as a working fire they add a 4th Engine and a RC (Rescue Captain - EMS Supervisor)

Oakland 3 Engines 1 Truck 1 BC ,,,,,,,,,,San Jose 3 Engines , 1 or 2 Trucks and a BC or 2.

I am not going to drive everyone crazy listing every agency I know but I think you get the idea. Greater alarms are usually 3 maybe 4 Engines , another Truck or 2 and 1 or 2 more BCs. You also will get specialized equipment like breathing support unit , additional staff chiefs , Fire Support (rehab unit) .

From: caladded@aol.com
Topic: 9002 Message: 9017

OK, that makes sense.................Ben brings up a good point

a number of depts will do likewise.........(Ben you should know this one !!!!) Hayward sends 4 Engines to some and 3 Engines to others and that is probably why ....Commercial vrs Residential.........in Fact that may have been the case in DC.........I thought 5 Engines on a 1st alarm is quite unusual.........Even San Francisco didn't send the 4th Engine until recently. I am sure with manpower being reduced on Engines / Trucks over the years , this maybe one of the reasons depts are sending more equipment..........in the 60s all of SFFDs Engines ran with crews of 5 and the Trucks with 7. Now the Engines have 4 and the Trucks 5 or maybe 6 at best.

But doesn't a trunked system have a System ID, so you only hear the traffic you want to hear? There's a few people here (Greg, I think?) who are more in the know on this than me, but when I programmed my STX-821, I needed a System ID along with the control channel. So even if two 'agencies' (say San Francisco and Sacratomato) shared the same control channel, and even the same talk group ID, they have different System ID's?

Although... thinking back to my trunktracker days, there was no system ID on a scanner. :)

correct no system ID on a scanner, If you have 2 different systems using
the same voice freq and one is closer than the other, sometimes you'll
hear the nearest bleed. I've never heard it on my scanner but I'll take
ed's word for it

Fire Departments love ATF because they are federal , they have a lot more money to spend and can do a better in-depth investigation than cash-strapped city and county fire departments.

So everybody is sleeping? Coming home the entire valley is covered in smoke coming from a plume out of Mendocino USFS. Smoke is drifting over Glenn and into Butte Counties it looks like. One family member with scanner reports mendocino forest net 169.175 has been active all day about "the fire" but he has no location or other info. No info anywhere, just a lot of smoke.

I just checked the history on flight following and see nothing on the Mendocino but activity on the Tahoe off of I80 near 20 and the Truckee River. Two Helitankers and other aircraft. No other info.

Did hear of a IA on the Tahoe earlier today.

I think this is just the first incidence of drift smoke this season...those days you wake up and choke on smoke from a fire a million miles away, but swear it's burning in your backyard. It sure fooled a lot of people, and after listening to some Mendocino traffic myself they're just taking calls and reports of the smoke. Campground hosts who are a little concerned etc.

Following the smoke down the valley with different people it seems to be from the high sierra area. Not sure if it's the Truckee incident Frank and Nancy mentioned, or if it's the Comb Complex down in Fresno County. There was a slight south wind and cooler temps as the marine layer pushed into the valley which is what probably shoved the smoke up the valley to us. On some posts on wildlandfire.com a guy in Owens Valley reported smoke being pushed from over the Sierras also.

Thanks for those that checked and I'm glad they came up dry like I did. I thought we all were sleeping and missed some major incident nearby. :)

9039. RE: [NorCalFire] Fire on the Mendocino?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-03 15:53:20 UTC
From: Larish, Michael
Topic: 9036 Message: 9039

Actually, the smoke down here in Butte is from a controlled, training burn down near Greylodge that started yesterday and goes through today. We had a south wind and it was drifting from Gridley area all the way up to Chico and beyond fairly thick.

Mike

9040. Fire on the Stanislaus?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-03 21:34:08 UTC
From: John's PDA
Topic: 9040 Message: 9040

I just heard AA430 on FKU Local 1 saying that he would be flight following with Fresno until he was able to make contact with Stanislaus. I also caught a visual of him off Fresno AAB about 20 minutes ago headed north. Anyone have info on something happening on the Stanislaus NF? I can't pick them up her in Fresno on just the duckie on the scanner.

Smokey

From: Ryan Villa
Topic: 9041 Message: 9041

Started approximately an hour ago, now at 9+ acres.

C404, T88, T89, 4 crews AA230 all on scene. 2 dozers enroute. 14:35

TAC 2 151.160
El Dorado Command 154.430
AA 4 151.280

Only about 7 miles away from me, so I am streaming this on the
special event feed: http://eldoscanner.hopto.org:8002/tuner (feed)

If that doesn't work, try some of the other links on the website:
http://eldoscanner.servebeer.com/event.htm

Most of the TAC traffic is not coming in too well because they are in
a deep canyon.

This is the COAL IC.

Amador Command 153.935
TAC 9 151.385
AEU 151.190

Probably will be Air TAC 5.

No update on size.

I added Amador Command to the special event feed. I'll get some maps up on the website shortly.

Sac Metro Copter 1 en route ETA 5 minutes.

IC reports heavy spotting. Now working three tankers, C404 still on
scene. One structure fully involved, was old abandoned house.

9063. Butte: Vegetation - Durham IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-05 22:10:08 UTC
From: Nick Caldwell
Topic: 9063 Message: 9063

Another high level dispatch for a veg at Durham Pentz & Wheelock Road. Aircraft advised by Chico AAB the area has power lines and "is in a hot military training zone." 4-5 acres, one haybarn fully involved and several other structures threatened. Requesting traffic control for Durham Pentz road.

151.400 Dispatch
151.295 Air Tac 5
151.385 Tac 9

9064. Re: Butte: Vegetation - Durham IC

Topic: 9063 Message: 9064

Fire is surrounded by roads, canceling most units. Keeping a few aircraft up in case of spotting, and it sounds like they are just watching the haybarn burn as its throwing out quite a bit of heat.

9065. Veg Fires Humboldt

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-08 23:01:37 UTC
From: Harry Marnell
Topic: 9065 Message: 9065

Confirmed vegetation fire, Avenue of the Giants between Meyers Flat & Miranda - http://tinyurl.com/9qfam - between Elk Creek Rd & Hidden Springs Rd

"Hidden IC"
E1279
E1281
E1192
E1194 (?)
E1163
Batt 1211
Eel River Crew 2
High Rock Crew 1
Transport 1240
AA 120
Copter 102
Meyers Flat VFD
Miranda VFD

Using Hum Local -151.25 - for Command
CDF Tac 3 - 151.175 - for tactical

Also a confirmed veg fire on the Mattole Rd toward the coast, Mattole Fire, E1260, E1262, AA? and tanker 96 onscene

and another reported fire near Honeydew/Whitethorne E1290 responding, reported grass along the road

9066. UPDATE Re: Humboldt Incidents

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-08 23:25:25 UTC
From: Harry Marnell
Topic: 9065 Message: 9066

16:10 Mattole IC with "emergency traffic" reports that fire is running away from them, requests add'l resources, AA and T96 to return, also req Mattole VFD to respond. On old Hindley Ranch Rd. IC also requested an investigator to respond http://tinyurl.com/86qkm

Helitender 102 responding from Rio Dell
--

Also new dispatch, near Alderpoint, southeast of above fires, http://tinyurl.com/7e93h, HUU looking for resources, T91 and Air Attack to respond, and one Engine, AA will be "Alderpoint" IC when he gets onscene

Still using Humboldt Local 151.25 R for command on all incidents

9073. Re: [NorCalFire] MNF "Deer" Incident - Any updates

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-10 02:44:47 UTC
From: Jake H
Topic: 9068 Message: 9073

CDF TGU just did an over-the-air update according to the first ICS-209
that got filed as of 1700. At 800 acres with 0% containment. (although
just heard IC mention less than 5% of control as of 19:22). Moderate
fire behavior in the Snow Mtn Wilderness but extreme behavior on the
south flank out of the wilderness.

http://www.topozone.com/map.asp?lat=39.3683333333333&lon=-122.8525&datum=nad83&u=6

http://www.norcalscan.org/pix/deer.jpg
The lake shown is Lake Pillsbury. The picture was taken from Goat Mtn
and is part of a larger panorama I made back in June. To the far right
are the Snow Mountains. According to the maps the fire location is just
to the right of the line between me and Pillsbury. I believe the ridge
just to the right of the red dot is Potato Hill just southwest of the
fire. The fire I think is just behind the ridge to the right of the red dot.

From: Jake H
Topic: 9068 Message: 9075

I've put this on second priority on the live scanner. MNF 169.175 Forest Net. I have air tacs in there but I never heard anything throughout the day, and the 7000ft Snow Mtns are a pretty good block to my antenna. Only thing higher on priority is TGU Local.

http://www.norcalscan.org/live.html

http://www.fs.fed.us/r5/mendocino/maps/quad/block/potato_hill.php
This is the forest map for the area. Fire is in the area of Sec 34 and 35 in the upper left of map. Bear Creek Campground is where the units leave the M10 (main forest road) and head up the "33 road" or the "04 road" as needed for the fire. You'll hear reference to those a lot over the radio.

Deer Fire Update #3 8:00 a.m.
Willows, August 10, 2005

SIZE: 2400 acres

PERCENT CONTAINED: 10%

ESTIMATED CONTAINMENT DATE: Undetermined at this time.

NUMBER OF FIREFIGHTERS/SUPPORT PERSONNEL: About 500

AIR ATTACT AIRPLANES: 1

AIR TANKERS: 4 (ordered today)

HELICOPTERS: 8

LOCATION: Mendocino National Forest in Lake County, 5 miles se of Lake Pillsbury; 15 miles northeast of Upper Lake.

INJURIES TODAY: 0

STRUCTURES THREATENED: 0

CAUSE OF FIRE: Vehicle caught fire on Forest Road M-10; spread to dry grass and beyond.

FUELS/VEGETATION INVOLVED: Knobcone pine, brush, grass.

PROJECTED FIRE ACTIVITY: We are hoping to have the south flank of the fire tied in by this afternoon. The north and east flanks are still not contained.

CURRENT WEATHER CONDITIONS: Today's temperature: 100 (expected) degrees.

Humidity: Cool inversion.

Wind speed: Quiet.

Wind direction:

TODAY'S FORECAST: Hot and dry. 100 degrees; wind speed could reach 24 mph this afternoon.

SUPPRESSION COST TO DATE: Unknown

AREAS CLOSED TO THE PUBLIC: Forest Service officials are contacting campers and hikers at the Snow Mountain Wilderness trailheads.

PARTICIPATING AGENCIES: USDA Forest Service, CDF, BLM

GENERAL INFORMATION: An Interagency Fire Management Team will report at 1000 today and take over management of fire suppression activities. The Incident Command Post is being set up at the Upper Lake Union High School, 675 Clover Valley Road. Fire Information in the Willows Forest Supervisor's Office will be open from 8 a.m. to 8 p.m. Fire information can be obtained by calling (530) 934-3316, (530) 517-1057, or on the Internet at: www.fs.fed.us/fire/incidents/incident/134/.

Date: 2005-08-11 01:01:20 UTC
From: Jake H
Topic: 9082 Message: 9082

2 new fires working Hwy 36W at Ball Rd. 36 IC is both fires at this time (eastern and western fire). Eastern fire is the smaller fire, air attack will focus on that one first to get it slowed down and will go to the bigger western fire later. Western fire is about 50 acres rough estimate. Fires are about 5 miles apart.

Flame lengths are 50ft plus. Total of 4 tankers and 2 copters in addition to AA 240 and Copter 205. Tanker 95 enroute. Staging area manager and 4 division supervisors are requested. Looks like ICS is being built up.

151.370 TGU Local Net (on priority)
151.175 36 IC
151.295 36 Air Attack
151.460 Command 7 (not assigned, but likely pretty soon)

All on live scanner
http://www.norcalscan.org/live.html

I will not likely be near a computer for most of the evening so somebody else want to take this?

Jake

I am hearing an air tactical, working at least two tankers and two copters on 151.295 MHz and they are "loading and returning" from Redding. I don't think this is the RBF structure incident. Sounds like it is starting to run on them.
RBF is starting to scramble units to the Tehema structure incident. Any frequencies?

Thanks.

No air tack is working the 36 IC. No aircraft are working the
Ridge incident which is the structure fires and vegitation.

9101. 4 more dozers for a total of 8

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-11 02:49:29 UTC
From: Peter S
Topic: 9101 Message: 9101

listening in via the Internet - Red Bluff area

- approx 715PM your time - someone mentioned 4 more dozers for a total of 8

- Southbound south of Gile - and Southbound 5 south of ?Nell - use Tac 1 for 2 fires on I5 - possibly just 1 fire

- aircraft are making drops

- E2164 cover Bowman Station

- E2261 at Minerals - request assignment - E2262 cover Manton - E2261 cover X Lodge - 741PDT

- E2180 in qtrs at Red Bluff - 741PM - E2186 cover Gasquet

- Transport 2146 at scene at Hwy 36 at 745PM

- 745PM somone is guessing 500 acres

- E2261 in qtrs at Los Plot? - 1945hrs

- AA says will probably be chasing fire till sun sets

Can someone give me an accurate and up to date listing of CDF Engines and stations, I am working on a national database of equipment

I have EVERY UNIT that NPS has thanks to a 110 page list via a FOI Act request .

I have all USFS California, Colorado, Arizona, most New MExico

I have ALL BLM For California & Arizona & Utah & Nevada,

I am really lacking BIA units if anyone can help me with that as well

Thanks in advance for the help

Anyone who helps I will gladly share my info with, heck, I have gotten so much info off this list (group) I will post to the group as well.

Mike

Yes, the local scanner 20 miles to the west of this is at
http://www.norcalscan.org/live.html with Mac/Win compatibilty and up to
60 users. Its priorities are TGU Local Net and Command 7 for the 36
incident.

It is also covering Butte CDF, Shasta CDF, Mendocino Forest (Deer IC),
Shasta/trinity Forest, Lassen Forest, all air tactics, all area tactical
and command channels, air guard, flight following, TGU Crew net, and
travel net.

9118. Tehama: 36IC Update 22:00

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-11 05:12:20 UTC
From: Jake H
Topic: 9118 Message: 9118

1800 acres very rough estimate
holding at Vestal Rd on the east side of the fire, south of Hwy 36W.
Vestal Rd goes south a ways and then veers to the east into the valley.
At the turn they're trying to box in the fire and hold it from going any
further to the south, or to the east into the valley (residences are all
over that area if the fire breaks further to the east into the valley).
The north part of the fire is a little rough due to terrain and access
problems.

20mph ridgetop winds (surprising, no winds in the valley)

http://cad.chp.ca.gov/iiqr.asp?Center=RDCC&LogNumber=0332D0810
note that R Wild Horse Ranch is not affected by this fire (I think the
Ranch incident a few weeks back burned a nice break for them ;)

They are trying to hunt down the two motorcycles who dropped the melted
saddlebags. That's definitely what started the fire. Trinity Sheriff
searching through hayfork and hotels and such. Red Bluff doing the same.
CDF Prevention has their eyes out. Helitender 102 is coming in on the
red-eye drive to meet up with her helitack crew. They're staying at the
Red Lion in Redding.

Bummed I couldn't stop when I first saw this sight with a nice pink sun and much better exposure. By the time I could take this pic at 19:42, I was too far north and I had some raw sun getting into the camera.

http://www.norcalscan.org/pix/sunset.jpg

They're going to have CHP and Humboldt Sheriff sitting at their end of 36 until noon tomorrow to wait for those motorcycles to come out.

I'm glad you all can copy & paste from the forest website....thank you.... I'm only relying on what is coming over the scanner air traffic.... I'm only about 20 miles from the fire (as the crow flies)... and can see the smoke column rise and then lay over the top of us..... thanks again for the website ....gives us locals some good facts to gossip about...lol

CDF will be evaluating various wildland fire fighting gels for the rest of the fire season. Several air tanker bases were selected with different gels at each base. Grass Valley will be using Therm-Gel 200L. The color will be vivid blue, so there's no mistaking it for traditional fire retardant. Columbia is testing AFG Firewall. Depending on statewide activity, you may see air tankers on fires from several other bases; these will have different colors, but do not know what they are presently.

Thanks Dave. This will help defend our case that none of our photos of tanker drops were altered in any way in Photoshop ;) Blue gell coming out of a tanker would be an interesting picture. Could be part of the stealth OES tanker conspiracy. :)

Hemet-Ryans will be a very visible white so it will match your helmet quite nice. All bases will have both Gel and Retardant meeting what ever the need will be, depending on many factors. So your pretty red will still be availibe.

Tanker 100, 25 and one of the Redding Tankers are "load and hold" at their base. The Air Tactical still wants one to orbit for awhile. Sounds like they have a handle on it. I used to drive that route twice a week and it's pretty flat terrain in that area until you start climbing up to Manton.

9134. Airtankers Re-fuelng question

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-12 03:42:15 UTC
From: hosgs1@webtv.net
Topic: 9134 Message: 9134

During the Tehema/Manton fire (8/11) I heard on 134.975 air traffic of refueling in mid air.

the pilot said something like I have crew chiefs on board, gave three different alltitudes (I believe he said he had two other aircraft with him) and said they were going to do random air re-fueling and that they were heading to mendacino.

question is do air tankers refuel in mid air since some are ex-military planes?

or was I hearing some military traffic?

TIA,
Ron

Jake,
Thanks for your efforts here. I can usually hear anything direct here in NW Chico in Shasta, Tehama and Butte + most of Mendicino NF. I really appreciate and often listen to your scanner but not tonight as listening direct.
I locked out the 151.295 freq earlier as it was hanging my scanner up but still don't hear the Manton air stuff.
I'm a 60 yr old ex SJ and Helitack guy who still has the fire-fire in his belly. Also a Ham with some gear and during fire season...I admit I'm all over this end of the state for information.
When the horn goes off, my hair still stands on end! ;-)
Thanks again for your great efforts up there and to all who contribute to this!

Jon

I think you were catching military traffic bleeding over, I have never heard of any air tankers doing in-flight refueling.

134.975 is Oakland Center (air traffic control for most of norcal)
civilian high altitude frequency off of an FAA site near Red Bluff. This
covers the valley north of Sutter Buttes to Mt. Shasta. I'm surprised
you would hear military re-fueling traffic on here since they would be
on their respective Oakland Center milair freqs instead of the civilian
side of Oakland Center. Low altitude air traffic control for the north
valley is 132.200

Contract and state air tankers do not refuel in midair. MAFFS fitted
C-130 planes are actual military planes and may possibly refuel in
midair but even then, doubt it during fire operations.

For some reason the tankers use VHF for ATC almost exclusively, and I often hear them on 134.975 out of Travis and Beale. I think it might be because they need the UHF radios for talking amongst themselves; I often hear the front office talking to ATC on VHF while the gas guys are working on UHF in the back.

9142. Re: [NorCalFire] Airtankers Re-fuelng question

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-12 23:02:14 UTC
From: hosgs1@webtv.net
Topic: 9134 Message: 9142

thats what I thought (rare for military on oakland cil freq). thats why I questioned about air tankers re-fueling. I was wondering if I was hearing something military. could it be from yuba city?

I wished I taped it as it was very rare to hear. I listen alot to air traffic and first time I heard this.

btw...it was not related to the manton/tehama fire. I said that in-case anyone else heard it during that time.

does anyone know if military flies in the mendocino area? the pilot did say they were heading that way.

thanks again,
-Ron

> (rare for military on oakland cil freq)

this isn't true at all. there's plenty of military activity on the vhf
side of oakland center. it's mostly tankers (kc-135 and kc-10) and
cargo (c-5 and c-17), but it's there all day long.

> does anyone know if military flies in the mendocino area?

nearly every day :)

take a look here, download the map, and look around mendocino, just
offshore:

9146. Manton fire blew over the line today

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-14 04:02:41 UTC
From: Jon Casamajor
Topic: 9146 Message: 9146

The Manton fire blew over the line today causing a bit of a tense moment. The crew on the scene reported that it was "outside the line and in the crown"!
They dispatched Copter 205 for recon and called in two WT and two more engines along with an air tactical, plus a tanker from Redding. Apparently Inskip could not see the extension due to smoke.
I don't think they dropped from the tanker or from C-205. I did hear them release the tanker back to Redding, "loaded". I think this incident flared from an unburned "island" that was pretty close to the line from yesterday.
We had cool conditions in Chico today with 15 MPH SE winds. Not sure what they had on that fire.

9147. Deer fire update from MNF

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-14 04:10:46 UTC
From: Jon Casamajor
Topic: 9147 Message: 9147

Looks like they are getting this one. Pretty tough geography!

Deer Fire Update #7 - 8:00 a.m.

Willows, August 12, 2005

STARTED: August 9, 2005; reported at 2:15 p.m.

SIZE: About 1700 acres, (reduction is due to more accurate mapping)

PERCENT CONTAINED: 50%

ESTIMATED CONTAINMENT DATE: August 15, 2005

NUMBER OF FIREFIGHTERS/SUPPORT PERSONNEL: 768

AIR ATTACK AIRPLANES: 1

AIR TANKERS: 0

HELICOPTERS: 9

ENGINES: 14

LOCATION: Mendocino National Forest in Lake County, 5 miles SE of Lake Pillsbury; 14 miles Northeast of Upper Lake.

INJURIES TO DATE: 3 (minor)

STRUCTURES THREATENED: 2 old, unoccupied, hunting shelters.

CAUSE OF FIRE: Forest Service road grader caught fire on Forest Road M-3; spread to dry grass and beyond.

FUELS/VEGETATION INVOLVED: Knobcone pine, brush, grass.

TERRAIN: Steep, rough, inaccessible.

PROJECTED FIRE ACTIVITY: Slow rates of spread, some interior burning, and mop up is beginning.

TODAY'S WEATHER: Temperature: 90 degrees; 15% humidity;

6 mph

SUPPRESSION COST TO DATE: $925,000

AREAS CLOSED TO THE PUBLIC: Flight restrictions in the air space associated with the aerial suppression activities, 5-mile radius over the fire area.

Forest Service officials have closed to the public a portion of Forest Road M-3 from its intersection with Forest roads M-10 and 24N02.7. Also closed are two campgrounds, Bear Creek (which is being used for the spike fire camp,) and Lower Nye Campground and Gravelly Valley Airfield at Lake Pillsbury.

PARTICIPATING AGENCIES: USDA Forest Service, CDF, BLM, BIA, Lake County Sheriff's Office.

GENERAL INFORMATION:
An Interagency Fire Management Team is stationed at the Incident Command Post at the Upper Lake Union High School, 675 Clover Valley Road. Fire Information in the Willows Forest Supervisor's Office will be open from 8 a.m. to 8 p.m.

Fire Information in the Willows Forest Supervisor's Office will be open from 8 a.m. to 8 p.m. Fire information can be obtained by calling (530) 934-3316, (530) 517-1057, or on the Internet at: http://inciweb.org/incident/134/.

9148. Deer contained at 1,700 acres

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-16 01:53:02 UTC
From: Jon Casamajor
Topic: 9148 Message: 9148

Deer fire is contained as per the press release below. It's real tough to accurately map steep terrain through smoke! ;-)

Jon
Deer Fire Final Update - 8:00 a.m.

Willows, August 15, 2005 - The 1,700 acre Deer wildfire is 100% contained today. The Gravelly Valley Airport is open and the temporary flight restrictions have been lifted; however, please be advised that there will be low-flying helicopters still working on the fire and using the field today. Lower Nye Campground, Bear Creek Campground and Forest Road M-3 between the two campgrounds, will remain closed until further notice. Firefighters are focusing on mop up, monitoring, and coordination with the burned area restoration.

A Burned Area Emergency Rehabilitation Assessment is in progress to identify the most intensely burned areas which occurred during the wildfire. Emergency treatment measures of these areas currently underway will include:

* Restoration of fire line and dozer lines.
* Removal of equipment, debris, signing and flagging related to fire suppression.
* Restoration of facilities, developed sites, roads and other areas used for suppresion support.

Hot summer temperatures are predicted to continue. Forest visitors are urged to be especially careful with campfires, gas stoves, and lanterns. Forest workers using chainsaws or welders also need to be aware of the high fire danger.

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-17 00:23:53 UTC
From: John's PDA
Topic: 9150 Message: 9150

A thunder storm cell parked over Mariposa County has put down several lightning strikes that have started numerous small fires in the Jerseydale area. The largest is about 5 acres with most of them less than 1 acre. A full high-level response is in the area taking action and scouting for more strikes other than the ones already indicated. Access is hampered by narrow roads or the lack of roads, with the IC ordering the dozers to open the roads up to allow the engines in. Air attack is overhead directing crews into the less accessable spots.

I heard the Strike team dispatch and then something about Smartville and Hammonton Smartville Road. The "gate" might be one of the Beale AFB gates as there is one off of Hwy 20 in the Smartville area.
Butte sent three engines and one Dozer. That is a pretty volatile area that has seen some nasty fires over time.

Since General Doolittle was a famous AAF pilot, I guess my guess is pretty close in that it must be a Beale AFB gate. :-)
Grass Valley was working departing units on 151.325 which I hear pretty well here in Chico.

9158. Tankers

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-19 22:55:03 UTC
From: twobells2001
Topic: 2163 Message: 9158

Last night the History channel did a program on the aircraft bone yard in the Arizona desert. Where military and civilian aircraft go to die. In an effort to save money, they have a group there to find other uses for the planes. From salvaging parts for planes still in service, to finding other uses for the planes. As the jumbo jets, 747, are reaching 30 years old and being retired for more efficient craft.

They have a Jumbo jet ,747, converted to an aerial super tanker for forest fire service. Carries 24,000 gallons of retardant,didn't mention what color, rather than the four door system, this drops the retardant via pumps under pressure. In the tests it showed two outlets spraying the target.

If I was on the ground, and saw this craft flying over making a drop, I'd have to change my shorts. I can just imagine this giant in a narrow valley making a drop! So at your next wildfire you just might have a jumbo jet in your aerial assignment.

Any thoughts or comments?

Comment?

Yeah. Make damn sure you aren't standing under any loose rocks! Or mountaintops, for that matter. Or cornices!

While an avalanche would probably do an awesome job of putting the fire out, it is not super likely that they would steer real well. :)

For Florida or other relatively flat fires? Cool, if you can keep it flying slow enough to keep the retardant coherent enough to do some good.

As I watched the tanker program, it reminded me of a fire I watched many years ago. A fireman friend from the Reno F.D. brought a VCR tape, they had taken a hand held movie camara film from the early 1950's and put it on VCR. The subject was a 6-8 story hotel in Reno upper floors involved. Someone in the Reno overhead had a friend in the forest service, and convinced him to send a tanker to this hotel. To the delight of onlookers and firemen, on the first pass he missed, on the next three passes he watered down everthing for several blocks, not a drop hit the hotel. I wish I had a copy of that tape.

Joe,

I have heard somewhere that they were looking at the 747, I suppose the 200, smaller version as a possible new generation tanker. The thing that would make me wonder how viable this would be, is that at the extremely high weight when loaded, the airport options would be severely limited so response time would be effected. I don't remember what retardant weighs but would guess 12 lbs/gallon or so. That's a cargo weight of 288Klbs! Not many airports that are now home for air tankers could handle that or provide enough runway to safely operate I would bet!
On another tanker note, there was an article or news story last week about the 45 anniversary of the first air tanker drop. The very first one took place out of the Willows, CA airport with a crop duster carrying 100 gallons of water. They lit a grass fire along the runway and put it out with the drop.
The very next day two drops on real fires took place on the Mendocino NF and the rest, as they say, is history!

9165. Large air tankers in testing status

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-20 01:03:10 UTC
From: Glenn
Topic: 2163 Message: 9165

Unless something changes, the 747 WILL NOT be tested in CA this year. The FAA recently stated to FS and CDF management that they are not likely to certify the 747 anytime soon. Years of service and the 747 not really made for the role of airborne Fire Fighting are their main concerns, among others. CDF was to begin testing this month at San Bernardino Air Tanker base, but that is now on hold.

The DC-10 program is still under review by FS and CDF. 10 Tanker STC, LLC is running the show on that one. Here is the best link with pictures from the recent Perris air show.
http://www.airsider.net/files/2005/0605/010/airtanker.htm

Minden Air is also configuring a British Aerospace BAE-146 Jet engine air tanker.

Here is the link:
http://www.silverstatenews.com/newssections/Aviation/Minden_Air/BAE146AAT/

Might see testing on that next year.

The BAe146 is far better suited for possible tanker duty due to its relatively young manufacture, and the fact that the initial airframe design is that of a rough-field STOL passenger/cargo plane. There's plenty of redundancy in the 4 turbofan powered design.

Subject: [NorCalFire] Large air tankers in testing status

Unless something changes, the 747 WILL NOT be tested in CA this year. The FAA recently stated to FS and CDF management that they are not likely to certify the 747 anytime soon. Years of service and the 747 not really made for the role of airborne Fire Fighting are their main concerns, among others. CDF was to begin testing this month at San Bernardino Air Tanker base, but that is now on hold.

The DC-10 program is still under review by FS and CDF. 10 Tanker STC, LLC is running the show on that one. Here is the best link with pictures from the recent Perris air show.
http://www.airsider.net/files/2005/0605/010/airtanker.htm

Minden Air is also configuring a British Aerospace BAE-146 Jet engine air tanker.

Here is the link:
http://www.silverstatenews.com/newssections/Aviation/Minden_Air/BAE146AAT/

Might see testing on that next year.

SHU Shasta
Veg Fire
Soldier Mtn Area

AA240 is 9 miles out, requesting 4 air tankers and 2 helicopters in addition to response. Air attack reports large building column.

Engine jsut came up with emergency traffic reportind the Hwy 299 (on of the main access routes for the fire) is completely blocked due to a TC that just occured.

Sounds like this can turn into something big.

9176. BUTTE: Oroville Hoover IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-23 23:42:06 UTC
From: Pamela Alley
Topic: 9176 Message: 9176

Wow. Went to clean the barn and missed the start of this but here goes:

Hoover IC: Vegetation, numerous spot fires to the north; just called for five additional engines. Powerlines down; incident began at 51 Hoover St as structure into vegetation and is moving pretty quickly.

This area varies between fairly dense residental and grassy/woody vegetation with high power line corridor in the area. Could be complicated.

And to top it off there's a manhunt about five miles up the road with copter etc. Whee...

16:40
Butte Co Fire 151.400
Oroville Tac 1 (unknown, any ideas?)

Sorry, Nick...didn't you know you're supposed to carry a scanner in your backpack with a single-ear plug? :)

Hard to tell. They aren't on Oroville Fire, or if they are, I'm not picking them up at a two mile range.

Hoover IC just requested drinks for 50; there's been a medical emergency on Oro Bangor in the area with a pregnant female; someone said the trailer behind the structure was now completely engulfed. At about the same time the IC said things were looking pretty good/holding well.

More as it becomes apparent....

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-24 15:07:54 UTC
From: Helitack
Topic: 9180 Message: 9180

Just discovered the Barrel Fire just north of Fort Barrel. This is in BLM's area, Northeast of Hwy 395 and hwy 299. Puts it east of Alturas.

Started 3-4 days ago and is now at 8,000 acres, 10% contained, estimated containment 8/30. Heavy fine fuel loading, rugged terrain, winds and low relative humidity are hampering containment efforts. Extreme rates of spread, spotting, downhill runs and fire whirls were observed. Fire ran to the south during the night under strong night time winds.

A major fire developing on the Tahoe NF, 3 miles north of Sierraville
on Hwy 49. Large response from USFS, CDF (NEU) and locals,
including equipment out of Nevada.

Tankers 88, 89, AT-17 out of Grass Valley and SEATS out of Stead AAB.

Haven't heard acres but sounds like it is really running. Air tanker said
it looks like they will be working it till cut-off.

Reloading out of Stead.

Looks like an USFS Fire; believe called the "Harding Incident".
Stanislaus Dispatch & IC on 168.775 also note airtanker traffic on
170.600, 169.200. 'Bout all I can copy from our 100' tower with
Diamond discone here at Mather.

9199. Tanker 100 engine failure

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-25 03:11:24 UTC
From: Nick Caldwell
Topic: 9199 Message: 9199

Tanker 100 just landed at Chico Airport under an Alert 2 (a possible problem that might develop into a more serious issue), a single engine failure. Tanker is on the ground with no fire in the failed engine, but it will probably be out of service for a bit...

Nick

209 shows 600 acres, 20% contained. Fire Spotting into the Antelope Valley (Not the Lancaster/Palmdale area either) 2.5 miles SE of town of Loyalton. Most forest resources are committed to the incident. Moderate to Rapid Rates of Spread, with torching, Multiple spots ahead of fire. Expected containment 8/25 Maybe!

Judging by the way the smoke column appeared in the webcam, they will be lucky if they catch it!

From: Top Ramen
Topic: 9189 Message: 9204

When first caught, it was 23 acres of brush (i believe, i was driving and listening and also reporting, and eating all at the same time - LOOK OUT I80 COMMUNTERS!) and beginning to burn into timber.

so my guess is that it's gone for the timber, and now the majority is timber.

but that's pure speculation.

Incident Contact: Sierraville Ranger Station (530) 994-3401

Incident: Harding
Released: 2005-08-25 07:00:00

Sierraville?.The Harding Fire, in the Tahoe National Forest, started approximately 3:00 PM on August 24, 2005. The fire began near Harding Point, approximately 3.5 miles northeast of Sierraville and then burned towards Antelope Valley. At 7:00 AM the fire was approximately 1,000 acres with 25 percent containment. The fire started in grass, shrub area, then moved into the timber.

Over 300 personal are working the fire, including handcrews, helicopters, airtankers, engines and watertenders. The cooperating agencies include US Forest Service, California Department of Forestry and Fire Protection, Sierra Valley Fire Protection District #1, Sierraville Fire, Sierra City Volunteer Fire Department, California Highway Patrol, Caltrans and other local agencies and contractors.

The rate of spread was initially quite rapid. As the nighttime temperatures decreased and the humidity rose the rate spread slowed to moderate. Crews worked hard through the night and fresh crews arrived this morning. Winds pushed the fire north along the ridge through the night. The concern for today is winds shifting to the west. The focus for the day is firefighter and public safety.

From: w1sar
Topic: 9221 Message: 9221

Shasta Trinity CDF have just ordered all flags in the unit to be flown at half staff.

No details over the air - an email is being sent to each station.

Has there been an at scene death overnight?

A dozer driver collapsed enroute back to Redding from the Brown incident two nights ago with breathing and vision problems and was flown to Redding by copter. Anyone know if this is connected?

Drew

9224. New Manton fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-26 22:17:48 UTC
From: Jon Casamajor
Topic: 9224 Message: 9224

There is an active fire being broken now in Manton, Tehama county. The fire is right in the town of Manton, across from the CDF station. The two engines are "stuck" in the station putting out spot fires adjacent to the station.
I didn't get the whole dispatch but just heard them call for 5 additional engines for structure protection. At least 1 helicopter, three tankers and two hand crews heading that way. Most of the action is on 151.370, haven't heard the A/T yet and tactical is on CDF tac 3, 154.295. That area is pretty scary if one gets going. Reports of heavy spotting.
Jon

9225. Manton Fire 1522 hrs

9226. NEU fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-26 22:21:50 UTC
From: Jon Casamajor
Topic: 9226 Message: 9226

NEU has a fire in the Loma Rica area at Marysville road and Peoria road. Lat/Long 39d 16' 30"N by 121d 29' 5" W. I don't see that intersection on my Delorme mapping program. Butte send a strike team about 30 mins ago.

Manton IC now reports heavy fire on both sides of Manton road with structures involved and burning towards the village of Manton.

Jon

9227. Re: [NorCalFire] New Manton fire

Manton IC reports heavy fire on both sides of the Manton Road, spotting and structures involved but could not see how many. Didn't sound like there was an A/T on scene yet. Red Bluff calling Manton A/T on 151.370 but no response yet.

Jon

Downtown Covelo is 9.04 miles West of the MNF boundry. There is steep terrain at the eastern edge of that valley which is only 5 miles from the boundry.

Dan... not sure it's off hwy 101 off Covelo Rd. Hwy 162 on Bald Mtn Rd. The terrain is blocking my scanner from picking up tacticals.. still get occasional updates on the MEU freq.... sounds like at last update it was around 15-20 acres and they maybe getting a handle on it as they've reduced their support requests...

My live scanner feed is NOT down contrary to previous posts.
http://www.norcalscan.org/live.html
It has had this fire from initial dispatch on...

I had no idea this was happening until I stepped out of the air conditioned office after a long afternoon at work. Imagine the "oh sh##" after seeing this column. Oy! This does NOT look good for Manton. Ugly dry vegetation with structures all through there.

AA240 just called 500+ acres with some spotting on the Shingletown side 1/4 way up the slope to Shingletown. Strong upper winds from the south is pushing this column well to the northeast.

When I settle down from work I'll have more info. Might be involved in communications if TGU stays involved. Or possible ARES stuff.

9245. Manton Fire - location map

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-27 00:26:09 UTC
From: Jake H
Topic: 9245 Message: 9245

http://maps.google.com/maps?q=shingletown,+california&ll=40.455699068762335,
-121.87047958374023&spn=0.0871094724891833,0.11448097229003906&t=h&hl=en

Watch the wrapping of that link...

Shingletown is where Wilson Hill Rd meets Hwy 44 on the top of map. Manton is where Manton Rd and Rock Creek Rd meet.

There is a very large creek east-west that starts from lower left to middle right, crossing right at "Creek" in Rock Creek. This is Battle Creek - the Tehama/Shasta county line.

AA240 just requested two Type1 copters. That might come from Chester if they aren't committed to Sierraville. 10 additional engines at 5:25.

Jake

Jakef et al,
I heard the 500 + report also. Some good video, even time lapse, from channel 7R in Redding. 7R is reporting 200 acres and confirmed 10 mobile homes lost in the park next to the school. Air Tac just called for a "victor" freq of 128.250 MHz.
I used to travel that road twice a week and from Manton to Shingletown it is very brushy, steep and knarley terrain. It does flatten out just before Shingletown as I remember.
Good video now on 7R.

From: Andrew Witham
Topic: 9221 Message: 9248

I was mis-informed - I eventually got the proper press release - sorry for the mis-information

"Effective immediately, flags at SHU facilities will be flown at half staff in honor of Clem "Andy" Towner, Jr., CDF Fire Captain, born November 7, 1951, retired March 1, 2004, who passed away today. His death is a result of ALS (aka Lou Gehrig's disease).

Captain Towner served over 33 years with CDF and four years in the US Air Force. During his long career, Andy worked in the Orange, Riverside, Lassen-Modoc, and Shasta-Trinity (for the last 25 years) Units. Recently, the Worker's Comp Appeals Board ruled that Andy Towner's "disabling condition, ALS, arose out of and in the course of his employment with CDF."

Fire Captain Bill Reid has been assigned as "Family Liaison Officer." Captain Reid and I met with Andy's family earlier this week. His family would like CDF involvement in planning and hosting a Memorial Service. We are fully mobilized in this regard. The Memorial Service will be held in Chico, California. Details, including exact location and date are TBA."

Sorry that this is scattered subject lines etc. At work and trying to put everything together...

Just requested for the Shasta side
6 strike team of engines type 2 or 3, no type 1
6 strike team of crews
6 water tenders
5 strike team of dozers
3 division supervisors

From IC to AA240 "could use a gaggle of tankers up here"
Also just put priority on CDF Command 2.

Hi Drew,

Do you know if the dozer operator with CDF? My DH is one with CDF and hasn't heard anything, but has been up at the Harding incident. Now, is on his way to Redding. Any information you find out regarding the flags at half staff (why?) and the dozer operator, please post it (or kindly email me) , so I can pass it along. Thanks! Robin Besotes besotes@...

Subject: SHU Flags to half staff

Shasta Trinity CDF have just ordered all flags in the unit to be flown at half staff.

No details over the air - an email is being sent to each station.

Has there been an at scene death overnight?

A dozer driver collapsed enroute back to Redding from the Brown incident two nights ago with breathing and vision problems and was flown to Redding by copter. Anyone know if this is connected?

Drew

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-27 02:05:41 UTC
From: Jon Casamajor
Topic: 9258 Message: 9258

Channel 7 in Redding is now saying "30 to 40" structures reported lost in and around Man ton. No total of homes beyond their statement of a couple hours ago that "10 Structures, mobile homes" were lost near the school which was saved.
Some reports on Channel 7 of engines and even a press van having to retreat around the Rock Creek area due to ugly fire behavior.

That is a real nasty area and I don't think much burn has gone through there for many decades? Any info?

Thanks,
Jon

9266. Update Manton Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-27 03:41:05 UTC
From: Jim
Topic: 9266 Message: 9266

The Manton Fire in Tehama and now burning into Shasta Counties is at 2200 acres...15+ homes and 50+ outbuildings destroyed, the entire community of Manton and county residences along Hwys 36 and 44 under mandatory evac orders... on mattlogic scanner 8 and 5 and norcalscan feeds
IC has ordered all air tankers back in AM as soon as able to fly, strike teams from Lake/Napa LNU and Mendocino MEU (just roared by our place) enroute as well as strike teams from as far as Yreka requested for tommorrow. Winds generating Red Flag conditions are possible for this weekend.....

Jim, can you or anyone tell me what this fire is
burning toward...is this all brush and timber or has
it reached the timber as yet. Might take a drive up
there if this looks like a 3 or 4 day fire...Mike

There is timber in the area but it's mixed timber and meadow, field grass, oak, manzenita. It's just a mess. The terrain is just right to have timber on the ridges, flatland grass (half the fire is in the grass) on some plateaus, rolling hills with manzenita and scrub oak, it's all crazy.

Jim gave the last good report of info that Air Attack 14 had reported, 2200 acres etc. There is a meeting at Red Bluff ECC tonight at midnight to make final decisions on resources for tomorrow but it looks like we're gonna get everybody we can get our hands on. The fact Air Attack asked for all air resources back for 0800 tomorrow doesn't sound promising. Coming home from Redding tonight on I5 after sundown showed 3 good hotspots and flames from Interstate 5.

I'll be doing CDF VIP communications tomorrow for day shift.

How is cellular coverage in that area? Will they be requesting one of the OASIS units for phones? They mobed and demobed Comm 61 off the Sierraville fire the same day. I don't even think they got it set up before sending it home.

The coverage from the KRCR folks in Redding had lots of Cell problems with their reporters. I think they ended up in Manton, from the Hwy 36 side and you could hear them breaking up and lots of questions on how the signal was. The area may see too many cell sites or, maybe not enough which is typical of that foothill exposure.

Your street intersection and the lat/lon coord are approx six
miles apart.

Marysville Rd & Peoria Rd intersect five miles north of Browns
Valley, coord 39 17 51, -121 22 24

All this just for the record, since the fire is probably history
by now.

Data was from MS Streets and Trips. Folks, this software is a
steal when Costco occasionally sells it for $15 with rebate. No,
not perfect (none are), and nothing like DeLorme for GPS
interface, but superior mapping features. Now, if it only
converted to/from Thomas Guide coordinates!

Mike... The fire is burning NE towards Shingletown the last I heard... heard a BC requesting to meet another party on the Shingle Ridge a few ago... sounds like there's very little containment reported as of yet and they're requesting full strike forces both ground and air for the morning. They'll have a meeting sometime tonite to determine what resources they'll need.....also heard the IC put out the request due to possible anticipation of the weather creating Red Flag conditions on Sat thru Sun AM....

Also for flysmile... I have been receiving info on my scanner all the way down here in Clearlake of Rock Creek Structure protection team having problems....but my reception isn't that clear or reliable......evacuation center is at "the fairgrounds" whether that's the Red Bluff Fairgrounds or what I'm don't know....I'm pretty familiar with the area as I was raised up in Hat Creek.... there is lots of timber in the area especially around Shingletown but also lots of grassy meadow areas.....Just listening as I type ....they're setting up a staging area 2-3 miles East of Shingletown.....I'm afraid if they don't get a grip on it soon it could get up into the Lassen area and that'd be a mess.

9277. Request for List of Scanner Feeds

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-27 15:59:51 UTC
From: hithel
Topic: 9277 Message: 9277

Could someone make up a list of the live scanner feeds for northern California - list the URLs and featured general coverage - and indicate if the feed is a relay of a different feed. I am having trouble keeping everything straight.

Let me start -

Shasta County - County agencies - fire and sheriff - on Redding newspaper website

Shasta County - Redding city agencies - fire and police and ems - on Redding newspaper site

Tehama County - Jakes feed - fire action

Tehama County and ?Shasta County? - ?Mikes feed?

mattlogic - ?relay of Mikes feed?

Humboldt County - new feed

Mendocino County - newer feed

anyone else?

Peter S

I checked the 2 DOT camers about 15 minutes ago - 845 AM your time - nothing seemed to be showing

9278. Thank You

From: flysmile33
Topic: 9278 Message: 9278

Jockomo -
Thanks for the update - I did finally talk to my parents last night and they are fine and their house and outbuildings are fine. Apparently the fire went all around them, but luckily my Dad put in great firebreaks and he was out on his tractor the whole time. When I talked to them late last night the fire was burning just over the hill next to thir house down to the creek.

9280. Manton Fire update Saturday AM

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-27 17:00:16 UTC
From: Jon Casamajor
Topic: 9280 Message: 9280

Here is the update from the CDF incident update page.

Jon

Last updated: August 27, 2005 at 7:00 a.m.
Start Date/Time: August 26, 2005 at 3 p.m.
Administrative Unit: CDF Tehama-Glenn Unit
Location: Community of Manton
Acres Burned: 2,300
Containment: 20%
Control: 0%
Structures Destroyed: 30 residences have been destroyed and 20 residences have been damaged
Threatened: Numerous structures throughout the area.
Evacuations: Not at this time but potential exists.
Injuries: 2
Cause: Human
Cooperating Agencies: CDF, U.S. Forest Service, OES, CA. Dept. Corrections, local government
Total Fire Personnel: 510+
Fire crews: 17 CDF
Engines: 54 (32 CDF)
Helicopters: 5 CDF
Dozers: 3 CDF
Water tenders: 7
Major Incident Command Team: #1
Conditions: The store, school, church, diner, and post office were all saved in the town of Manton.
For fire information: 530-528-5150, 530-528-5151, 530-528-5153
Evacuations centers have been set up at Shingleton Blackbutte School, Tehama County Fairgrounds and Palm Valley School.

Bill,

Thanks for clearing that up. The NEU fire broke about the same time as the Manton fire so I probably got something down wrong. The DeLorme Topo 3D program is pretty good. I've had two versions of it and it just keeps getting better.
Thanks again,

Jon

From: Dennis
Topic: 9284 Message: 9284

Just called 3rd alarm for Morgan Territory Rd. outside of Clayton. CDF also called for a Command Team.
7-8 acres with structures threatened at this time. Moderate rate of spread.

CDF Tac 2 (151.160)
CDF SCU (151.445)
ConFire CT(160.110)
ConEast (159.615)

AT just said three structures in imminate danger of burning.

9289. Manton Fire - Eyewitness accounts

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-27 17:52:08 UTC
From: Jim Thomas
Topic: 9289 Message: 9289

MANTON -- Anthony Sylvia said he was clearing brush from around his home Friday afternoon at the Manton Trailer Park when he spotted smoke. He didn't know it then, but his life was about to change.
"It went so fast. There was nothing we could do but evacuate," Sylvia, 29, said. "I lost everything. My mom lost everything. The landlords lost everything."

By Sylvia's count, at least nine homes in the park were destroyed in the blaze.

"The worst part about it," Sylvia said, "was there was a bunch of firefighters here, and they had no water." He said a water line shut off after the fire burned a power pole.

As of 11:30 p.m., the fire had burned more than 1,000 acres, destroyed at least 20 structures and was threatening 200 more, a California Department of Forestry and Fire Protection spokesman said. Some 800 firefighters were battling the blaze, he said.

An official cause of the fire, which started near a CDF station in Manton, had not been released Friday night, but a CDF spokeswoman said arson was not suspected.

As the blaze spread in a northeast direction out of Manton, Tehama County Sheriff's deputies went door to door to evacuate threatened areas, including Quail Haven, Linman and Old Fiddlers lanes; Battleview Drive, Jacktom Road; and Tuscan, Woodcutters and Yule Tree ways.

All residents living south of Highway 44 between Shingletown and Long Hay Flat Road were asked Friday night to prepare for a possible evacuation, Shasta County Sheriff's Capt. Dave Dean said.

The residents were told to gather clothing, medications, important papers, pets and sentimental items.

Evacuation centers were opened at Black Butte School in Shingletown and the Tehama County Fair grounds in Red Bluff, officials said.

But even after being evacuated from their homes, some chose not to leave.

Karen Corder and her family packed up two trucks with animals and emergency supplies, and waited on Rock Creek Road down the street from their home as the blaze passed through.

After sunset, the Corder family was allowed to return to their home, which was undamaged.

"This is the second time we saved our house," Karen Corder said with tears in her eyes. "Five years ago, we did the same thing," she added, referring to a wildfire that struck the area in 1999.

But neighbors on either side of the Corder family weren't so lucky. Both had lost their homes.

Twelve-year-old Michael Corder and his sister Cornia, 14, had been at Manton School when the blaze began about 2:45 p.m.

"The smoke was coming over the school," Michael said. "You could see a little bit of flame."

All the children were brought to the school's gymnasium to wait for their parents, Corina said.

She said the fire, which burned around the school, scared at least a few of the younger students, who began to cry.

The National Weather Service issued a fire weather watch Friday afternoon for northeastern California, predicting gusty winds and low humidity for later this weekend.

Manton Fire continues...new structure burning sounds like a barn with threat to the home and other structures on property....

Dozer Op was building fireline and pushed right into a Marijuana plantation with "500 - 1000" plants...camp and tents found but occupants fled just before dozer pushed into the plantation....lol.. GPS reading given and Shasta County SO enroute.....

9291. Manton Fire - map/freq info

Some of this is old info from previous postings, but here's the rundown for the day shift today. Will have another major mtg at 7pm tonight to figure out what's happening tonight and tomorrow and how we did today.

Branch 1 - Tehama County
Div Charlie - southwest line, origin, Manton Rd, South Powerhouse Rd
Div Delta - southeast line, from Manton Sch House Rd over to Forward Rd.

Branch 2 - Shasta County
DIv Whiskey - east line from county line to end of woodcutters way (drop point 3 at end of woodcutters)
Div XRay - Bailey Creek northeast drainage, Manton/Pondersosa Rd
Div Yankee - most active fire, north line, Battle Crk Drainage. East to Manton/Ponderosa Rd, west to Volta Powerhouse Rd
Div Zulu - west flank from Volta to Digger Crk/County line.

AA 151.295
AG 151.220
Air Command 151.250
Command 151.265
Div Z/Y 151.145
Div X/W 151.175
Div C/D 151.190
Structure Groups 151.385
159.345 and 159.450 as needed additional tacs

tankers 95, 94, 82, 100, 25, 27, 48
various private copters and such.

9293. More on Tanker history

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-28 01:16:25 UTC
From: Jon Casamajor
Topic: 9293 Message: 9293

I posted last week on the 45th anniversary of the air tanker getting it's beginnings at the Willows airport. I couldn't find the original article until tonight. It was actually 50th anniversary! I'm attaching it here and hope this works!
My first major initial attack fire on the Lassen, in a 10 foot tall Manzanita field was a real thrill. We were thinking we were trapped when the wind shifted. Tanker 19, a B-17 out of Aero Union in Chico, dropped right on top of us after hearing us whining about what we had gotten into! We walked out, pink, smarter and in love with that 19 tanker! ;-)

Jon

50-YEAR CELEBRATION NEXT WEEK IN WILLOWS

AUGUST 04 -- WILLOWS, CA: On August 13 at the Willows Airport, the Mendocino National Forest will host an anniversary day marking the 50th year of aerial firefighting.

Early airtankers at WillowsThe anniversary day will honor the original flyboys of aerial firefighting in a tribute to 50 years of fighting fire from the air. In 1955, local pilots Floyd and Vance Nolta, of the Willows Flying Service, successfully modified a Stearman biplane to drop water on fires. Airtanker number 1 was in business.

The first drop on a fire was during the Mendenhall Fire, August 13, 1955, on the Mendocino. Vance Nolta flew the Stearman and dropped six loads of water on the fire. It was considered so successful that he worked another fire the very next day.

In 1982, the 25th anniversary of the first water drop on the Mendenhall Fire, the USFS honored the original fire pilots with a ceremony and a plaque at the Willows Airport.

The anniversary at Willows on Saturday, August 13, will feature displays of vintage aircraft, airtanker demo drops, and historical exhibits. The Forest Supervisor's Office in Willows will also have Mendocino National Forest historical photos and memorabilia on display from noon to 4:00 p.m. The program at the airport will include a fly-by of a Stearman and an N3N cropduster, and a demo by the Redding Smokejumpers is also planned. Static displays of USFS and CDF airtankers and other aircraft are also scheduled.

Order your anniversary shirtAvailable online are several commemorative t?shirts featuring anniversary art that includes a Stearman biplane water drop and a retardant drop by Tanker 66.

Professional fire photographer Kari Greer donated the photos for the shirts. All profits from the shirts will benefit the AAP memorial fund.

The keynote speaker at the anniversary will be Frank Prentice of Chico, one of the original seven pilots in the first airtanker squadron that operated out of the Willows Airport.

Other sponsors include CDF, Glenn County, Frank and Lila Prentice, the City of Willows, and the Willows Chamber. For more info email Phebe Brown at pybrown@... or call (530)934-1137.

-- "Jim Thomas" <jockomo3@...> wrote:
MANTON -- Anthony Sylvia said he was clearing brush from around his home Friday afternoon at the Manton Trailer Park when he spotted smoke. He didn't know it then, but his life was about to change.
"It went so fast. There was nothing we could do but evacuate," Sylvia, 29, said. "I lost everything. My mom lost everything. The landlords lost everything."

By Sylvia's count, at least nine homes in the park were destroyed in the blaze.

"The worst part about it," Sylvia said, "was there was a bunch of firefighters here, and they had no water." He said a water line shut off after the fire burned a power pole.

As of 11:30 p.m., the fire had burned more than 1,000 acres, destroyed at least 20 structures and was threatening 200 more, a California Department of Forestry and Fire Protection spokesman said. Some 800 firefighters were battling the blaze, he said.

An official cause of the fire, which started near a CDF station in Manton, had not been released Friday night, but a CDF spokeswoman said arson was not suspected.

As the blaze spread in a northeast direction out of Manton, Tehama County Sheriff's deputies went door to door to evacuate threatened areas, including Quail Haven, Linman and Old Fiddlers lanes; Battleview Drive, Jacktom Road; and Tuscan, Woodcutters and Yule Tree ways.

All residents living south of Highway 44 between Shingletown and Long Hay Flat Road were asked Friday night to prepare for a possible evacuation, Shasta County Sheriff's Capt. Dave Dean said.

The residents were told to gather clothing, medications, important papers, pets and sentimental items.

Evacuation centers were opened at Black Butte School in Shingletown and the Tehama County Fair grounds in Red Bluff, officials said.

But even after being evacuated from their homes, some chose not to leave.

Karen Corder and her family packed up two trucks with animals and emergency supplies, and waited on Rock Creek Road down the street from their home as the blaze passed through.

After sunset, the Corder family was allowed to return to their home, which was undamaged.

"This is the second time we saved our house," Karen Corder said with tears in her eyes. "Five years ago, we did the same thing," she added, referring to a wildfire that struck the area in 1999.

But neighbors on either side of the Corder family weren't so lucky. Both had lost their homes.

Twelve-year-old Michael Corder and his sister Cornia, 14, had been at Manton School when the blaze began about 2:45 p.m.

"The smoke was coming over the school," Michael said. "You could see a little bit of flame."

All the children were brought to the school's gymnasium to wait for their parents, Corina said.

She said the fire, which burned around the school, scared at least a few of the younger students, who began to cry.

The National Weather Service issued a fire weather watch Friday afternoon for northeastern California, predicting gusty winds and low humidity for later this weekend.

[Non-text portions of this message have been removed]

Jim,
Thanks for the great fill on what is going on up in Manton! I don't know where you found this but it is so indicative of stories you hear in the foot hill areas of the north valley.
These areas are so damn vollatile it's a wonder they have survived and haven't all burned down. If not for the heorics and super response and coverage of the fire fighting community and the planners who put resources in the right places, these areas would be gone!

There was a post from someone who had parents up in the Manton area earlier. His Dad had done the work required to give the fire fighters a chance to save him and it worked, they are ok. So many just don't think they will ever need that when they buy the cheap property with a view of the valley I guess.

The winds are supposed to pick up tonight but temps heading down for next week. Fall conditions are not far off which, is always the scary period of the year in NoCal.

Good post, thanks!

Jon

Actually that looks like a typo in their comm plan. The input to
that "command" freq is the same input as the command 2 freq 151.265.
And it doesn't make sense for them to push an extra command repeater
just for atgs, and it would have to be portable because there isn't
any infrastructure up here with those freqs in it (too close to HUU)

Good catch Ben
Jake

Date: 2005-08-28 02:24:44 UTC
From: Pamela Alley
Topic: 9299 Message: 9299

I know this is off the current fires topic, but I'm sitting here watching the first season of Emergency! on DVD, and it's fascinating how much more I'm still getting from the show in regard to firefighting. It was fun to watch on its own, but knowing what's really involved in wildfire fighting makes a cool difference and for quite a lot more understanding.

For its age, it's held up darn well. :)

Sorry for the OT post but I recommend the DVD. :)

Now, back to the current fires--any new info on the new break near Keswick?

PA

This ended up being approx 20 acres and knocked down pretty quick
(although a scary plume was able to develop first). No homes lost.
Expect a huge fire report from everything up here in www.redding.com
tomorrow morning.

Jake

9307. Manton Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-28 03:57:19 UTC
From: flysmile33
Topic: 9267 Message: 9307

I was the one who posted with parents in the Manton area - thanks Jon for mentioning my Dad. When he first bought the property a little over a year ago his first concern was putting in excellent fire breaks in case this ever happened, and it sounds like it worked. And he stayed when he was supposed to evacuate and kept on working on his tractor apparently - and between him and the amazing firefighters our home was saved and I am so grateful for that.
I spoke with my Mom finally a little bit ago and apparently their house is command central now for the fire crews, she said they cut a road to the fire up through their property.
She was telling me about when she tried to get back to their house as she was at work when the fire started (they live on battleview off of Rock Creek)that she was finally able to get past wilson hill by getting a ride with someone and she said it was a bit scary. She was seeing trees on fire on both sides of the road falling down, and then once they got to Rock Creek and Battleview the fire crews had it blocked off so she started walking up to their house and there was fire all around and it was apparently pretty crazy.
Last I talked to her she said it is very surreal up there as everything is black and places where houses and buildings used to be are all burned now. In such a short time so much can change...

Pam, you are never off topic.
And I don't copy disks either, any more than I walk into stores and steal them.
Hope everyone is OK up North. The folks who own the Shingletown KOA are friends of ours.
I hope the new start Jake reported doesn't get too ugly. We don't have much more we can give up. A wildland response in El Dorado County a few hours ago had only 2 45XX units. Everything else was from MMU, SCU, and a hand crew all the way form Owens Valley.
Take care.

Well, they did the right things and they are ok! It takes a lot of luck even if you do the right things and you need help from firefighters when and if they can defend your work preparations!
Sounds like your parents will be fine and be able to take some gratification in the fact that they did the work for the inevitable in the foothills.
Give them a big hug and congrats on my behalf please! ;-)

From: Jon Casamajor
Topic: 9305 Message: 9314

My scanner is pretty quiet tonight in NW Chico...last night it was "buzzing" most of the night with Manton traffic. I heard some bargaining between division commanders late tonight, putting some hand crews and a few engines off because things were improving on the line.
The low pressure that was due into the north valley, appears to be a little late and the winds that were expected to accompany them should be held off until tomorrow PM.
I heard a comment on KFBK radio today, praising the containment efforts from last night and today to stop this bugger. Hopefully, things will look good in the AM! Good Luck on the line and keep it safe!

Jon

---------- Forwarded Message ----------
I just heard that the Red Flag Warning actually includes all of the Sacramento valley and foothill communities. Sorry if I Miss-lead anyone on the fact that it was only posted for the Eastern Sierra. Winds in Chico now are 312 d @ about 15 and gusty to 20. At least it should calm down tonight. Wonder how the Sierraville fire will be effected?

Jon

Early morning veg fire. Probably won't mount to much HWY 44 and Kirkman. Full response. Does anyone know where Station 21 is in Shasta, is that at Millville?

Yes, that is in Millville. Station 21 is the Millville Volunteer Fire Station. It is in Eastern Shasta County.

Sincerely,
Chad

From: Jake H
Topic: 9330 Message: 9330

Shelterhaven cross of Bowman Rd in northern Tehama County

151.370 TGU Local
151.175 Bowman IC
151.295 Bowman Air

240 in the air, requesting 1 additional Type 1 tanker out of Redding. 205 just when flying past my office.

Additional dozers and water tenders requested, engines out of Shasta responding also. Powerlines down. This is I-Zone craziness in this area and hasn't burned in years.

Can't post much on this - at work now.

Engines pouring out of the fairgrounds staging from Manton incident. ;)
Air Attack reported 7 acres with spotting ahead of the fire. We have 17mph sustained dry north winds with 30mph gusts.

This is 11am Tuesday.
All on live scanner at www.norcalscan.org/live.html

Air Attack is releasing a type 2 copter and two S2T tankers loaded back to Redding. Wow - surprise they must have jumped on this REAL fast to feel comfortable with releasing aircraft. It could of bumped against Launder Lane to the south.
Last post on this one from me.

9336. Yolo County - Rumsey/Clearlake Area; and more.

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-08-30 19:50:19 UTC
From: Todd
Topic: 9336 Message: 9336

Practically the entire county of Yolo has gone up in smoke. (Was awakened by the sound of my wife's pager toning for Task Force assignments.) Here is what I know so far:

57 Command (Hwy 16 and Forrestville Rd. - Guinda area, Yolo)**
- Yolo Green Fire
- Rumsey (Station 25)
- Capay (Stations 21, 22, & 23)
- CDF LNU East
- 1455, 1456, and 1457 and more I am sure.
- White 2 as Tac

Petty -or- Pettit Command (Unknown exact location however in the upper north western part of Yolo)**
- Yolo Green Fire
- Unknown assigned resources.
- CDF LNU East
- Unknown assigned resources.
- White 3 as Tac

95 Command (County Rds. 95 and 29) in the eucalyptus.
- Yolo Green Fire
- Stations 26 & 30

128 Command (Hwy 128 and Co. Rd. 87; west of Winters). In an orchard at this time w/structures threatened.
- Yolo Green Fire
- Station 26 (What little personnel is left)
- CDF LNU East
- Unknown assigned resources.
- Air Attack 104
- Yolo County Black as Tac

**: Authorities are looking for a black Dodge Durrango with a single male occupant as a person of interest. Unknown for both 57 Command and the Pettit (??) or just one. Guinda station was being used for staging, however, unknown if for both fires or just one.

All fires are under control at this time and in the mop up stages.

Time to get my arms ready for when my wife comes home. I guarantee she is going to be sore.

Todd

KCRA, CH3 in Sac, just had a live copter shot and report on this incident. They stopped it at ~60 acres of grass, 1 outbuilding lost and it bumped right up to a subdivision.
Winds and Red Flag warning still going up here in Chico and north to Redding. Chico airport reporting winds at 18 from NE. Lots of starts up this way today but nothing working so far.

Jon

9361. FEMA asking for Fire Department help

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-02 04:31:27 UTC
From: Glenn
Topic: 9361 Message: 9361

I know many of you subscribe to firehouse.com and have seen this but for those of you that are full time fire fighters or know of someone who wants to help and is a full time firefighter here is the link on how to help. Next round to include volunteer firefighters.

9362. Berry IncidentC, Humboldt County 13:03

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-03 20:04:30 UTC
From: Harry Marnell
Topic: 9362 Message: 9362

Just walked in late to bits and pieces of an incident that seems to be winding down, of Hwy 299 in Humboldt County; "Berry IC" - http://tinyurl.com/d4ntl or http://tinyurl.com/99osk

Listen (to what's left to hear):
http://www.mattlogic.com/scanner29.html

HUU Local 151.25
Air Attack on 169.200
VFDs 154.07

CDF E1285 + ??
USFS ?
Willow Creek Fire
Blue Lake Fire

Copter 102 releasing shortly

Alder Crews 1 & 5, continuing
High Rock Crews 1 & 3, released

9363. Berryessa fire breaking

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-04 00:29:31 UTC
From: Jon Casamajor
Topic: 9363 Message: 9363

Just heard THU dispatch Coptor 205 to a breaking fire near Lake Berryessa. I hear the Air/tactical on 151.310 but nothing else.

Jon

9364. Maz fire?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-04 00:48:26 UTC
From: Jon Casamajor
Topic: 9364 Message: 9364

Apparently, the dispatch of copter 205 from Vina in the Tehema, was cancelled. The copter has just been dispatched to a fire near Ukiah called "MAZ" Location is at 39 d 07" 9' X 123 d 12' 3".
I hope I copied it right!

Jon

9365. Berryessa fire breaking

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-04 00:54:12 UTC
From: Jon Casamajor
Topic: 9363 Message: 9365

Looks like they got it. They just returned Copter 205 to Vina.

JOn

9370. Re: six rivers fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-05 20:37:17 UTC
From: Harry Marnell
Topic: 9370 Message: 9370

Thanks, the "Geary Incident" then. I'm on the coast in the shadow of
the mountains from the Hoopa/Somes Bar area, and only hearing Fortuna's
side of intermittent messages to/from somebody on HUU local (151.25).

Trying, with no luck so far, to pick up Hoopa, BLM or SRF frequencies on
the fire, not even aircraft. What freqs are you hearing anything on...
if at all?

Harry

Harry,

The frequencies are:

Geary Air Attack 166.6750
Victor 122.850
Geary IC 168.125
Air-to-Ground 170.000

9372. Re: [CaliforniaOnlineScanning] Re: six rivers fire

Thanks, Tim. How ya doing? I added those first two, already have the IC and A/G freqs in. I'm just in a bad spot I guess. And it's just as messy as when you were here.

Harry

9374. fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-07 00:52:25 UTC
From: THE ARM SOCIETY
Topic: 9374 Message: 9374

A fire was started a week and a half ago and it was in Manton C.A. It was damaging to alot of people, when I seen it I thought it was pretty big to what all it burn't. Man what a fire, it cost over $1,000,000.00 total. people did not leave but stood around in shock of their homes, and what is worse is their homes were right down town of the Manton store.

9375. hey

Yahoo group: norcalfire (2005 — 2016)

Topic: 9375 Message: 9375

I heard about the large six river fire over scanner good job guys you guys do help, I was wondering what all training is needed to get in handcrew is full training needed.

well will talk later.

9376. Re: [NorCalFire] fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-07 02:05:18 UTC
From: Pamela Alley
Topic: 9374 Message: 9376

ARM, if you look back in the archives to then, you'll see a lot of the coverage of that event in detail. It was a heck of a fire but not as bad as some we've seen in N. Cal over time.

Few years ago, for instance, Lewiston got toasted too. :(

Welcome to the list! What kind of scanner do you have, if any?

PA

9377. BUTTE: Cherokee Rd x Shrymer? Ravine; vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-07 12:02:15 UTC
From: Pamela Alley
Topic: 9377 Message: 9377

Cherokee IC on White 3.

Started around 04:15

At least nine engines, four water tenders, one dozer, two hand crews on this so far. Terrain very difficult and rough to access; winds moderate and erratic.

Good luck, guys!

PA
0500
Butte County Fire 151.400
White 3 154.295

9378. Update BUTTE: Cherokee Rd x Shrymer? Ravine; vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-07 12:33:07 UTC
From: Pamela Alley
Topic: 9378 Message: 9378

0530: Requesting copter 205 over fire at 0730 if possible.

(For those of you unfamiliar with this area, it's just below the crest of Table Mountain, just northeast of Oroville. Nasty place to fight a fire and plenty of fuels.)

PA

9379. Update 2 BUTTE: Cherokee Rd x Shrymer? Ravine; vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-07 12:36:33 UTC
From: Pamela Alley
Topic: 9379 Message: 9379

Crews making good progress, turning fire despite downcanyon wind; about 10 acres (wow, sure shows just how rough that terrain is!) as yet. Cherokee Road pretty much closed off due to apparatus on the road.

Sorry to not consolidate, I think the IC waited until I hit Send! :) No further updates for a while....

Easy to get confused when the unit designators don't signify all the
counties. Probably why a lot of people still call it N-Y-P.
El Dorado is in Amador-El Dorado, or AEU, which is all vowels and doesn't
roll off the tongue very well. Many people, including some CDF AEU
personnel, call A & E.

Yep pretty much its the old A&E and whenever we have
to cover up north I still refer to it as NYP alot
easier to remember and people figure out where you
mean quicker

9403. Live scanner tonight

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-09 05:09:14 UTC
From: Jake H
Topic: 9399 Message: 9403

For those of you tuned in earlier tonight Red Bluff city fire ran our monthly drill with a little more reality than I was expecting. Sometimes we'll have a full drill up to a fake dispatch by ECC with CDF and county fire responding as well. They're always fun. Tonight we had full run of a 3 story apartment complex being remodeled, with staged victims throughout the building, and smoke machines charging the 2nd floor to zero visibility. If you tuned in halfway, you would have heard firefighters down and full rescue operations (and utter communications chaos). Everything was played real except for no flames, and no charged hose lines. Some of our captains put on drills that are practically full theater productions - which only help in the realism of how the responders react. Some get so worked up their 30 minute air is used up in 7 minutes. "Firefighters down" really work people up, even though it's known it's a drill.

Just clarifying if anybody was concerned.
Jake - RBFD Photo

Topic: 9406 Message: 9406

The Shasta unit it breaking a fire not too far from Manton near the intersection of Rock Creek Road and Woodcutters way just inside Shasta county. Tehema is also rolling lots of resource that way. So far two additional tankers and an additional copter have been called in by Air Tactical. Copter 205 from Vina is on scene now. I haven't found the A/T freq yet. The ground troops are on CDF Tac 11.
The fire has "jumped the road" and has wind on it from the south. Air boss reports 2+ acres moderate rate of spread.

Jon

9407. Rock fire near Manton

Yahoo group: norcalfire (2005 — 2016)

From: Jon Casamajor
Topic: 9407 Message: 9407

Looks like they were able to turn this fire into the Manton burn and stop it at 4-5 acres. They are holding tankers in Redding. Not many engines have reported at scene. I heard the A/T say the winds were 15-18 and gusty. Makes me wonder if this start wasn't a "sleeper" from the Manton burn of a couple weeks ago.

Thanks for the reply. Nice to know someone is listening and looking! ;-)
I heard there were some lightening strikes on the crest of the Sierra this AM but, so far, no fires. Apparently there was some light rain in Sacramento, up to Gridley and over to Quincy today.

Jon

Thanks Jake. I think there was some lightning up towards Quincey Thursday as well. I'm hearing some activity on SNF, 171.575 MHz from Recon 49 who has picked up on 3-4 lightening fires. They are putting jumpers on one called "Tamarack" but I missed the lat-long for all of them. The Redding feed may hear them better than I hear them in Chico. Sounds like the Recon is up around McCloud.

IC is canceling assets and the tankers and now calls it contained. didn't hear size but was 15-20 when C205 went at scene. Sounds like it ran into an Almond orchard. Google Earth shows the Thunder Hill Raceway Park clearly and it looks pretty cool! I've never been out there...gonna have to take a drive for a look. It looks like right on the edge of the western foothills. I heard a couple of the engines on Tac 12 here so it must be off the valley floor a little.

Lots of lightening south and a little west of Chico right now. could be lake county or down around Dunnigan? Just a guess as it's over my horizon and trees. Pretty active, about a strike per 3-4 seconds. May be cloud to cloud, not sure.

Butte is on 151.400, Chico FD dispatch is 453.750. I didn't hear anything last night and Butte seems pretty quiet this morning and they don't seem to be working any fires. I still hear Shasta NF Recon 49 chasing some small lightening starts up around McCloud River. Both Butte and Tehema are pretty quiet.

Copter 510 just reported a fire at N40 10.817 and W121 32.170 which puts it close to Windy cut on Hwy 32 East of Chico. (an old Lookout site)
This is a very steep and isolated area in the Deer Creek drainage. There are two engines responding and the copter was going to rappel 1 or 2 Helitack crew into the area. The pilot says this has "moderate" potential which seems a little conservative to me. 1/2 acre, on the ground in medium to heavy fuels.
I have heard two recon flights moving over the Hwy 32 area as they had lots of strikes it appears.
Most traffic on 172.225 forest net.

New incident kicking off on SR89, just south of SR299e (Four Corners)

Five acres, moderate rate of spread on arrival, in woodland, some spotting ahead.

Called second alarm within 5 minutes for extra water tenders and aircraft.

SR 89 is closed both directions at location with traffic being routed via Cassel Road.

Lots of code three traffic coming past my office in Burney, and aircraft overhead now.

IC reporting poor access - potential to get large due to spotting

No sign of fire of the camera at Four Corners, other than a lone
S.C.S.O. car in the middle of the intersection - unfortunately the
CalTrans camera is looking north, away from the fire scene

http://www.dot.ca.gov/dist2/cctv/sr299sr89.shtml

SCSO have requested CHP to respond to take over road closure.

Drew

9433. RE: [NorCalFire] Rocky IC Shasta County - Burney

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-16 01:55:28 UTC
From: Andrew Witham
Topic: 9429 Message: 9433

All four engines that were sent up from the valley to cover Stn 14 (CDF Burney) have now been instructed into the incident.

As I cam home there was a good column still rising - I only had a cell phone with me - I'll post a picture as soon as I can get it out of the phone.

The vista point on SR299e just west of Burney gives a great view of the scene - I may go back with a camera shortly

Drew

9435. Mendocino Hotshots

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-16 04:42:08 UTC
From: Mike L
Topic: 9435 Message: 9435

Heard the Mendocino Hotshots calling for assistance around 2pm this afternoon for a broken down crew buggy, Last I heard the district was sending a van for the crew and a heavy tow truck for the buggy. now I see it made the wildcad for the Mendocino Forest as an Incident for today.

Mike

9436. Butte: Nord IC - spotting

There's a wildland fire working at Fair Play Rd and Serenity Oaks Rd (near Fair Play Rd and Omo Ranch Rd), Fairplay CA, El Dorado County. It would be about 12 miles southeast of Placerville. Unsure of current response or size, but 2 tankers from Grass Valley and H516 and H404 working it. Sounds like it's slowed down. Don

From: Jake H
Topic: 9444 Message: 9444

Lake Blvd at Shasta Lake Blvd. Toyon IC (Toyon School is right there). Potential to reach Shasta Lake.

Very ripping 30-40mph south winds in Redding right now - just south of this incident. Those winds luckily pushing the blaze into timber and not housing if I recall.

This was all 20min ago. Not much of plume due to strong winds. Unable to monitor due to meetings at work. :(A couple of phone calls clued me in to this one.

Command on SHU Local 151.160
Toyon IC Tact 12 151.460

Command might move to 151.265 or 151.355
Jake

You called the topography perfectly Jake. They got is contained at 204 acres and no structures lost. This area is just down the road towards Chico from the Vina Copter base. It jumped Broyles road and the worry was they wanted to keep it on the west side of 99E so that it couldn't make a run at the foot hills. Not much but grass there but they were calling the winds SE at 15-20. They put a lot of retardant on it and had two dozers. Lost count of the engines from both Tehema and Butte.

Jon

From: Terry
Topic: 9456 Message: 9456

New Fire at Spanish Resort Area of Lake Berryessa. Spanish IC. Approximately 120 acres and IC says fire will burn to Hwy 128. IC says only one engine able to make it into fire so it is an air show. Spanish IC now asking for Sheriff's boat to transport crews to fire, should pick up crews at Markley Cove. I have heard 4 air tankers and 4 copters assigned to the incident.

Sorry, no frequencies for you.

Clover Air Tactical just released 3 of 4 tankers. The fourth was out of service with a mechanical. Could be just to let the pilots go home for the night or could be they are holding. Let's hope it's the latter. That area can be so damn UGLY this time of the year! I heard the wind is to turn around to NE on Sunday I think. Let's hope they get these guys soon.

790 and Air Attack were working to the limit when I last heard them. Spanish Flat is a nasty area with some very steep terrain and lots of fuel. However, there are burn areas from fires several years ago that may help if the fire runs into them.

just heard dispatch asking one of the fire IC's if their fire was putting up a large column of dark smoke, they are getting muti reports of large column of dark brown-black smoke comming up north of one of the fires,

Air Attack says he has it in site and doesnt think it is one of the existing fires, he is saying based on smoke color it may be a vehicle or structure fire, he is going to go investigate.

I will post update when I here where/what this is

Helicopter 115/Helitender 115 enroute to check this out.

9473. Clover fire update

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-17 19:55:18 UTC
From: Jon Casamajor
Topic: 9473 Message: 9473

Here is the update as of 10:00 9/17/2005

Jon

Incident: Clover
Released: 2005-09-17 10:00:00

Clover Fire Update 10:00 a.m.

The Clover Fire is 775 acres and 60% contained this morning. It is located near Ladder Ridge in the Upper Lake area of the Mendocino National Forest. The fire started on private land yesterday and spread into the Mendocino National Forest.

After the winds subsided last night, fire behavior decreased and significant progress was made in containing the fire. Full containment is expected today.

A unified command system is in place between the Mendocino National Forest and California Department of Forestry. The unified command is divided into two branches; the portion of the fire that is on the Mendocino National Forest is called Branch 1 and is located in the Ladder Ridge area, (600 acres). The other part of the fire is Branch 2, directed by CDF in the Clover Valley area, (175 acres).

Other cooperators include California Highway Patrol, Upper Lake City Fire and Lake County Sheriff?s Office. ?This incident showed how agencies can work together to accomplish objectives safely and quickly,? Blaine Baker, Upper Lake District Ranger.

Afternoon winds are a concern today as building line, patrolling for hot spots and mopping up continues. Resources assigned to the fire include: 320 personnel, 21 engines and 6 dozers.

Three residences were destroyed in the fire and one was damaged. The cause of the fire is under investigation.

9479. CDF's pathetic incident updates?

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-18 04:15:53 UTC
From: Jon Casamajor
Topic: 9479 Message: 9479

Am I missing something here? CDF's incident website is two weeks old+ Is there some other way to find out what is going on in the north state with active, large fires other than to waste time looking at the CDF site?
Sort of Justifies the fact that I worked for the Fed's! Nothing is perfect but it seems that the only time CDF reports is when the fire is 100% contained!
What am I missing ? ;-)

From: Craig T.
Topic: 9479 Message: 9481

Might I also add, that really it has been sorta slow for the fire season up here, and until Friday really, there hasn't been much going on.

As for NICC reports, i think we get the same info from them that the CDF reports. The CDF is usually good with updates on acerages 2x a day. But as for maps, photos, etc... Not good at all.

When there are Fires working that CDF is handling (they are the IC) the fires get updated at 0700 and 1900 on their webpage. While It may not list everything, most basic information is on the sheet.

Thanks Kim and all for the links and leads to better information. I may need to do more digging and a better job of book marking the "good" sites for information.
I guess eventually the data shows. I was looking for information on the Pleasant incident but maybe I needed to look deeper. I know it's been a "slow" fire season so far at least for us...let's hope it holds!

Thanks,
Jon

Fully aware of the CDF role. My interest is progress on the fire, resources committed and containment estimates etc. I've seen lots of fire and while pictures are often dramatic and amazing, they all look alike after awhile. ;-) Tactics are always of interest to me as they are different on just about every fire. I don't care much about pictures even though they are always interesting.

Thanks,

Jon

Jon, CDF has no money to staff a person to update that site all the time. They use a person when they can, but she has other duties also. So until Sac gets some money to fund that position full time, well you see what you get...

Am I missing something here? CDF's incident website is two weeks old+ Is there some other way to find out what is going on in the north state with active, large fires other than to waste time looking at the CDF site?
Sort of Justifies the fact that I worked for the Fed's! Nothing is perfect but it seems that the only time CDF reports is when the fire is 100% contained!
What am I missing ? ;-)

Hi Glen,

Now that is an answer I can believe. I guess I would rather have people on the engines than doing web work. One day, hopefully, this state will be back to where it was and we can have both.

Thanks,
Jon

From: Jon Casamajor
Topic: 9490 Message: 9490

North end of Impala north of Dersch Rd, ~3 Acres, grass and oak headlands with "moderate" potential. 2 tankers, 1 copter and an air tactical. Guessing 10 engines and heard two hand crews. No report on winds but in Chico, it's from the NE @ 7 MPH. Location given as N40 28.7 by W122 12.4. My Delorme Topo program puts is right on Dersch near Millville plain, under some power lines. No air/Tac given or at least heard yet.

I think I've followed this thread to not repeat someone else but the information on that website ultimately comes from the two incident meetings that occur on a major incident (Ed pointed that out). I've worked public information in the local ECC for local major incidents and even being in the ECC right next to dispatch (or administrative meetings) we still don't have "official public info" until that next incident meeting. I sometimes force myself to not listen to northops or the scanner while doing public information just so I don't get "tainted" info out to people. The last incident we had, the Manton fire, the second day the fire was near extinguished in the actual town itself. There was very little smoke and to the public, it seemed like they could get back into town. However as of 0700 in the morning our info was still out of control, evacuations, yadda yadda. We had to share that info up until 1945 that evening. Yes, it's frustrating. People call in and tell us they heard different on the scanners. We tell them you probably heard differently, but the official word is yadda yadda. By about 2pm we start telling the callers that yes, the info is from 7am and don't bother calling until 8pm tonight or they're going to get the same info. TGU is strong with Internet info and we had the Manton info on the state site within 15 minutes of it being posted. So maybe there could be delays between some individual Units and the state Internet site in getting public info out.

Public info from the fire scene is the weakest link in a major incident. If there is a HUGE political push for public info, sometimes a 1pm briefing will occur and update some info.

My 2 cents
Jake

9493. Orr Springs IC - Ukiah - Mendocino Co

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-21 00:45:09 UTC
From: sh9730
Topic: 9493 Message: 9493

Again, from wildlandfire.com "hotlist" getting info of a new fire 100-200 acres heavy spotting with at least 1 local gov't strike team enroute. Don t have exact location but given fire name I assume on Orr springs road west of Hwy 101 and the town of Ukiah.

All I know...Im gonna try and get the mattlogic.com feed going, but I have not had good luck for traffic in this area in the past...

9494. Lightning around NCAL todayh

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-21 01:00:31 UTC
From: Jon Casamajor
Topic: 9494 Message: 9494

There has been lots of lightning today. Most of it seems, so far, to have been down between Modesto and Merced. Looks like most of it has been in the SJ valley but there have been some very active cells in the Sierra as just south of Tahoe.
Last week someone sent the group a site in SLO that tracked lightning strikes which probably will be perfect to see where this activity occur ed today. I guess either I or my PC managed to loose that link so if that kind soul would resend just to me is fine, I promise it won't happen again !! ;-)
Weather folks on TV news tonight say this system will probably continue to move N-NW tonight. Sky is increasing to cloud cover in Chico as of now but, no strikes are being heard on my AM "lightning detector".
As long as it stays in the valley, other than if you take a direct hit, it shouldn't be much of a problem I guess. I'm grounding my tower tonight...

Thanks,
Jon

I'm mobile, right on the San Joaquin - Sac County line. Solid cloud cover is just about over us and moving North. Lots of down-strikes in the middle of the valley to the South.

9496. LAL at 2000 - Amador

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-21 03:21:32 UTC
From: George.Cusack@alldata.com
Topic: 9496 Message: 9496

Intense electrical storm just south of my location. Visually estimating cells extend from central San Joaquin County into central Calaveras. TCU Local has reported multiple strikes and tree fires in Tuolumne. Line is moving north very slowly and approaching Amador. Cloud-cloud and cloud-ground, almost continuous at times.
Hunker down.

Heck, I live less than 3 miles from the fire and I not sure what is going on. We have the Spring IC fire at a couple hundred acres or so, heavy bush and unaccessible terrain, This is the only fire that I know of and last I heard they were releasing resources.
Will try to find out more.

Very ugly north wind up here. Shasta is breaking multiple fires. Placer Rd - Placer IC on Tact 12

Now a new one at Ashby in Shasta. There have been some articles in the paper about a fire bug working around Redding. Lots of suspicious starts, including the Toyon fire.

Helitanker 790 responding from Lassen NF (Bogard Ranger Station) to a fire in Sutter Creek in the NEU, with "Sutter Air" tactics of 151.280. I missed the lat/lon

As I hit send now they're releasing aircraft back to Redding and Vina so
it sounds like everything is calmed down in Shasta again as of 1pm.

INTERIOR PORTIONS OF DEL NORTE AND HUMBOLDT COUNTIES...
(ZONE 203) FROM COASTAL STRIP TO SISKIYOU COUNTY...EAST OF HWY
96 AND EAST OF SOUTH FORK MOUNTAIN. INCLUDES SIX RIVERS NF...
WESTERN PORTION OF HOOPA AND HUU EAST OF COASTAL STRIP AND WEST
OF HWY 96.-
UPPER TRINITY RIVER...(ZONE 204) INCLUDES EASTERN PORTION
OF HOOPA...TRINITY NF AND CDF AREAS OF EASTERN TRINITY COUNTY.-
INTERIOR MENDOCINO COUNTY...(ZONE 276) MENDOCINO COUNTY EAST
OF THE COASTAL STRIP. INCLUDES PORTIONS OF COVELO AND UPPER LAKE
RD.S OF MENDOCINO NF.-
145 PM PDT SAT SEP 24 2005

...RED FLAG WARNING IN EFFECT UNTIL 5 PM PDT SUNDAY FOR GUSTY
EAST WINDS AND LOW RELATIVE HUMIDITY FOR UPPER SLOPES AND RIDGES
OF EASTERN HUMBOLDT...DEL NORTE...MENDOCINO COUNTIES AND TRINITY
COUNTY...

THE NATIONAL WEATHER SERVICE IN EUREKA HAS ISSUED A RED FLAG
WARNING...WHICH IS IN EFFECT UNTIL 5 PM PDT SUNDAY. VERY LOW
RELATIVE HUMIDITY VALUES AND GUSTY EAST WINDS HAVE BEEN OBSERVED
ALONG HIGHER ELEVATIONS ACROSS NORTHWEST CALIFORNIA TODAY. THE
OFFSHORE FLOW IS EXPECTED TO CONTINUE TONIGHT AND THROUGH SUNDAY
AFTERNOON. VERY POOR OVERNIGHT RELATIVE HUMIDITY IS EXPECTED
TONIGHT...COMINED WITH GUSTY EAST AND NORTHEAST WINDS ALONG HIGHER
ELEVATIONS. THE OFFSHORE FLOW WILL CONTINUE INTO MONDAY HOWEVER
WIND SPEEDS WILL DIMINISH BEGINNING SUNDAY AFTERNOON.

A RED FLAG WARNING MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE EITHER OCCURRING NOW...OR WILL SHORTLY. A COMBINATION OF
STRONG WINDS...LOW RELATIVE HUMIDITY...AND WARM TEMPERATURES CAN
LEAD TO EXPLOSIVE FIRE GROWTH POTENTIAL.

CDF Contains 8 Fires Today
Tuesday, September 27, 2005 - 02:45 PM

Sonora, CA -- CDF Officials in Tuolumne and Calaveras Counties are on the lookout for smoke today because of all of the lightning clouds in the sky.

Karry Hubbard with CDF says they did 15 smoke checks today, which resulted in the containment of 8 small fires.

One of the fires was in Tuolumne County and the rest started in Calaveras County due to trees being struck by lightning. Hubbard says CDF will be surveying the area throughout the day and night looking for more fires.

9515. California Fires Year to Date

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-09-28 19:19:32 UTC
From: Larish, Michael
Topic: 9515 Message: 9515

Amazingly enough, California (so far) has been dead fire wise.

Southern California has had 3,265 fires for a total of 123,898 acres for an average fire size of 37.94 acres.

Northern California has had 2,517 fires for a total of 57,710 acres for an average fire size of 22.92 acres.

Heck, 57,000 acres is the size of a single large wildfire.

We probably have a month or so to go before rains start setting in ending this year's wildland fire season...

Mike

CHP H24 spotted the fire and radioed it in to Butte CDF as being at 39
45.77x 121
09.04, and then he went 10-98 for fuel (codes on a fire net, 1 demerit).
Reported as very steep terrain, about 1 acres, flames visible through the
smoke.

Turns out its in "The Plumas" and PNF is sending a few engines, a crew and
Helo 512, smoke jumpers, Air Attack 06, and Recon 40.

Butte sending 2 engines, Butte dispatched it as Section 32 Township 22N
Range 7E in the Mountain Springs House Ridge area.

170.550 - PNF Dispatch
168.200 - Tac

151.400 - Butte dispatch, occasional traffic on this fire

CDF is testing gel as a suppressant. Hemet, hollister, grass valley and 2 other bases. Hemet is using orange dye.
CDF is looking for the perfect color to have it show up from the air. So far gel works fine in light grass, as it is a suppressant, NOT a retardant, but is not doing well in So Cals heavy fuels. Forest service does not use gel in there air tankers yet, as it has not been "proven" in air tankers yet. So for now FS can make everyone switch to retardant on their incidents.

Thanks for the links, Marty. On a more serious note, the Columbia tankers have been testing a particular formulation/dye combination that Columbia and Grass Valley Air Attacks have repeatedly commented is very difficult to see on the ground. They have also commented that it appears to be very effective.

9533. Uniden Announces Industry□s First GPS-Enabled Scanner

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-10-02 01:33:39 UTC
From: Matthew Rios
Topic: 9533 Message: 9533

Fort Worth, Texas, September 1, 2005 ? Uniden America Corporation, a leading manufacturer of wireless consumer electronics, today announced a new mobile digital scanner, the Bearcat BCD996T. This model introduces the first-ever GPS-enabled scanner, allowing the product to automatically select nearby radio systems for scanning. The BCD996T also offers APCO 25 digital capability, allowing consumers to monitor the activities and signals of city and government service departments, and features advanced scanner technology in an in-dash or mobile mount design.

The GPS-enabled feature offered by the BCD996T provides automatic system selection, which permits the scanner to turn system reception on or off depending on the user's location, and allows the user to define the scanner display to show location-based information.

In addition, when a GPS unit, not included with this scanner, is connected to the BCD996T, it will alert at areas of special interest, such as dangerous intersections, school zones, or general points of interest.

Featuring APCO 25 capability, Uniden's BCD996T is poised to further enhance Uniden's offerings to public safety and increase interoperability between agencies using different types of radio systems. Uniden's BCD996T will not permit users to monitor sensitive, encrypted signals from national and local security services.

The Bearcat BCD996T also offers Close Call? RF Capture Technology, Dynamic Memory Management, Fire Tone-Out, and Multi-site programming as well as 6,000 channels and a frequency range of 25 MHz to 1.3 GHz (excluding cellular and UHF TV frequencies). This new model is slated to hit retail shelves in spring 2006 and carries a MSRP of $849.99.

"The BCD996T, the first GPS-enabled model in the scanner industry, is another milestone in the evolution of scanning," said Paul Opitz, product manager at Uniden America Corporation. "These new features will provide an efficient way for agencies that need compatibility in multiple geographic areas to use the scanner without having to reprogram the equipment for each location."

What a waste of features.

They could have been better served by incorporating some of the user
requests over the
past year.

FOR IMMEDIATE RELEASE

10/08/2005

Governor Schwarzenegger Lauds Firefighters and Discusses Wildfire Prevention in Weekly Radio Address Audio and English transcripts of Governor Arnold Schwarzenegger's weekly radio address are below.

Governor Schwarzenegger:

Hi, this is Governor Arnold Schwarzenegger with another California Report.

Wildfires are a threat all across the West and here in California we face some of the most extreme fire conditions you can imagine with hot, dry summers, high winds, steep mountains, and trees and brush everywhere. That is why California has the best team of firefighters and emergency personnel I have ever seen and we are taking steps to make them even stronger.

After I visited the devastating Southern California fires in 2003, I asked a group of experts to help us find ways to be even faster and more effective when a fire disaster strikes. And we put many of their recommendations into action beginning this year to provide 60 new fire engines for California Department of Forestry and Fire Protection and for local governments and better communication equipment and more emergency response personnel.

Last week I took an aerial tour of the Topanga fire in Southern California. This fire was a monster, burning more than 24,000 acres, destroying several homes and other buildings and my heart goes out to everyone who was affected. As bad as it was, the fire could have been much, much worse but we had fantastic coordination between local, state, and federal authorities that helped us respond more effectively and limited the damage.

And of course, our firefighters were down in the trenches, meeting this challenge head-on, working around the clock to getting it under control. I met and spoke with many of them and saw firsthand the incredible work they do.

Over the past two years, I have visited many of our brave firefighters. My respect for their service and sacrifice is unshakeable and nothing will ever change that. And they deserve all of our support because we know that fire prevention and fire safety have to be a team effort.

By following a few simple steps, we can all make California safer. For instance:

Clear out any dead brush, branches, or other fire hazard within 100 feet of your house. Clean pine needles and leaves off your roof. And in case there is a fire, make sure you and your family have a good evacuation plan.

There's an old saying that "failure to prepare is preparing to fail." By planning ahead and working together, we can prepare California to be ready for wildfires today and in the future.

Thank you for listening.

The fire persons should have done an about face for the photo op
turn their backs on the Gov. as he is doing to the Kahlifoania
public services. Yea easy for me to say, I'm a retired fire Captain,
I don't have to worry about repercussions.
Joe Lacey

I wonder what kind of battle that would be with the union if they did
that and actually were reprimanded by CDF.

Is this a fire board or a political board? If it is political, just let me know and I'll unsubscribe.

Thank You George. I just have to add a little bit. A
few yrs ago I was on a fire in Nor-Cal when Gov. Davis
was in office. The Gov. came to lunch at Firecamp. CDF
kicked all the Vol. F/F's out of camp so it could be
an all CDF show. The politics stink now as they did
then. I get tired of one group pointing fingers at
another when they should be looking at themselvs.
Politics as told to me by an old and wise friend,
Poly = many
Ticks = blood sucking little animals.
Lets keep it off this site pls

9564. RE: [NorCalFire] Re: The Govenor says.....

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-10-09 07:03:22 UTC
From: David Coursey
Topic: 9532 Message: 9564

Is there something wrong with politics? The fire service is inherently political, as is the availability of resources to fight, or not fight, a particular blaze or blazes in general. Budgets are political-larger budgets (or different spending) could have prevented tanker crashes and even the Oakland Hills (Tunnel) fire. CDF perhaps losing Riverside County is political. What's so wrong with politics as an *occasional* subject? If we don't talk about it will it just go away? And as we've recently seen, what about disaster response isn't political?

David...and everyone...

This is a FIRE SCANNING LIST. In FIRE SEASON, it is generally used to discuss FIRES.

It's not a FIRE POLITICS list, although political stuff gets mentioned once in a while.

As I understand it, this isn't a place to actively discuss, nor to snipe about, politics; it's a place to talk about fires in N. CA and what scan fans can do to hear more.

If I wanted to talk or read fire politics, I'd go to the FIRE POLITICS group, ok?

Please keep this list reasonably apolitical, so I can stick around. I HATE politics, and hate it more when a good list goes sour or gripey because of them.

Thanks...

I am not around for a week while I take care of escrow stuff (buying a house next to a ham who has a 40ft tall tower, yesssss) and NorCalFire goes political on me? That was the last thing on my mind.

Please no more political rants, jives, by the ways, etc. The story was good, related to the topic, the replies were not. Politics and fire radio don't mix, except for congressional meetings on RF spectrum. Even then, northern CA fire radio isn't going to 700MHz any time soon.

Thank you for your time. The list govenor has spoken...

Tac White 3
Skyline IC
Structure on Skyline Blvd, x Sunset View

Calling for more resources, AirTac in place. Calling in Salt Creek crew 1 so am assuming? that it's gone into wildland somewhat.

Missed the first part of this, so that's all I have. Can hear the airshow overhead...

From: Jake H
Topic: 9569 Message: 9571

I heard this one too but not the outcome. The CDF repeaters down there either went lower power or something because the past month has been horrible on the south county repeater. Unfortunately most everybody except Chico seems to use the south county repeater. I used to hear it, now it's just annoying static. The county did a complete revamp of their ctcss access tones and it was about the same time, so I wonder if some hardware was replaced too. We'll see what happens when I get a real antenna on a roof that I actually own. ;)

I heard Copter 205 respond to this also. Structure fire with vegetation involved.

The fire wound down a bit after I posted; people keep asking me why I stay in the area and I keep telling them...it's the emergency services and the response times! These guys really do do one hell of a job.

(Not that other areas don't, but this is where I know about them..LOL...)

As for the repeater...it's pretty hashed up here as well....maybe we should start petitioning!? :)

You aren't the only one complaining about hearing the south-county repeater. The EMS companies are complaining as well as they are having a hard time hearing pre-announces and dispatches for medicals which is how they often dispatch the EMS rigs. Not sure what they did or why but the votor off Sunset is very poor now.

From: Larish, Michael
Topic: 9574 Message: 9574

Anyone know why Butte is moving tons of engines up to the high country? They did a large shuffle of resources to move up to Forest Ranch, Paradise, and Station 55 which I believe is up in the Feather Falls or Forbestown area... Transport 2140 is also enroute to Station 55...

Is this due to the winds and possible thunderstorms?

Date: 2005-10-14 20:54:17 UTC
From: Larish, Michael
Topic: 9574 Message: 9576

Found out the engines are actually forming into a strike team going to NEU, unsure where or why...they've apparently got something active... Transport 2140 was ordered back to Oroville.

As for the storms, I looked up the Fire Weather Forecast... LALs (Lightning Activity Levels) are mostly 1's with a few 2's. Nothing major...

the national weather service has a fire watch. Seems most the Sierra's is effected for north west winds with a chance of thunderstorms/chance of rain.

Subject: [NorCalFire] Butte moving engines up

Anyone know why Butte is moving tons of engines up to the high country?
They did a large shuffle of resources to move up to Forest Ranch,
Paradise, and Station 55 which I believe is up in the Feather Falls or
Forbestown area... Transport 2140 is also enroute to Station 55...

Is this due to the winds and possible thunderstorms?

Mike

To add to the mass confusion of this thread, my brother just called and asked why two dozers were running Code 3 from Red Bluff south (down I-5) at 730pm. I have heard nothing from Butte CDF, Lassen NF north into Shasta. I also haven't seen LAL higher than 1-2 up here for the weekend. The storm coming in has a lot of rain, cool temps, and cloud cover so I don't think the sun has a chance of heating things up into any cells. But then again, you never know what Mother Nature has planned. ;)

9580. Shasta: Veg Fire, Ash Creek @ Dersch Rd..... Old Start Info.....

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-10-15 04:42:34 UTC
From: hosgs1@webtv.net
Topic: 9580 Message: 9580

for some time (since 15:30,10-14) there has been a fire in the Anderson Area going east near shingletown on Dersch Rd @ Ash Creek.

there was (in the beginning) a full response including air show for sometime. three tankers I believe.

anyways they are still containing it as of 20:55. Tehama is helping out also so I dont know if this was what Jakes brother was refering to.

so far the fire is 170 Acres and burning. (due to some wind here).

another fire started later around 16:30 in the general area of this one and rapidly burned 20 Acres until they were able to get a hold of it. So we are deffinetly not out of the woods yet.

check out www.redding.com for the latest updates

last one just came out.....

Hi Joe,

Probably the TS in the morning. Or I guess we have local news on Channel 3 tonight.

I listened for a while and they had given up on the "building" and were protecting the exposures and patrolling for flying brands. Mark, aa6dx@... took some pictures of the remains and has them in a 1MB zipped file he'll send. Not much left. I don't know how far along the construction was.

The "F" fire units around here are command folks, Battalion Chiefs and above, I guess. "2F--" being Arcata Fire, "3F--" for Eureka Fire. Don't know that I've heard any other local departments using "F" unit numbers.

Harry

A USFS controlled burn. You will be seeing several of these over the
next few weeks.

By the way, Grass Valley ATB was closed this past week. They are
going to keep Redding ATB open a little longer.

While the first sustained rain since May falls on Shasta County, Shasta Trinity CDF (SHU) announced this morning that the 2005 Fire Season will officially end at 08:00 hrs Monday 10/31/2005.

For those of us in the Round Mountain / Montgomery Creek area this will be an interesting winter, with the closure of both Station 74 Diddy Wells and Stn 75 Hillcrest for the winter, protection duties will rest with the volunteers of Station 71, Montgomery Creek VFD, now down to just seven members.

9597. New Uniden Scanner w/GPS Features BCD-996T

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-11-03 18:06:09 UTC
From: Tim Tribble
Topic: 9597 Message: 9597

COMING IN LATE SPRING 2006

Uniden Announces Industry's First GPS-Enabled Scanner

New Mobile Model Features Close Call☐ Technology and APCO 25 Capability In a Desktop Design

Fort Worth, Texas, October 1, 2005 ☐

Uniden America Corporation, a leading manufacturer of wireless consumer electronics, today announced a new mobile digital scanner, the Bearcat BCD996T. This model introduces the first-ever GPS-enabled scanner, allowing the product to automatically select nearby radio systems for scanning. The BCD996T also offers APCO 25 digital capability, allowing consumers to monitor the activities and signals of city and government service departments, and features advanced scanner technology in an in-dash or mobile mount design.

The GPS-enabled feature offered by the BCD996T provides automatic system selection, which permits the scanner to turn system reception on or off depending on the user's location, and allows the user to define the scanner display to show location-based information.

In addition, when a GPS unit, not included with this scanner, is connected to the BCD996T, it will alert at areas of special interest, such as dangerous intersections, school zones, or general points of interest.

Featuring APCO 25 capability, Uniden's BCD996T is poised to further enhance Uniden's offerings to public safety and increase interoperability between agencies using different types of radio systems. Uniden's BCD996T will not permit users to monitor sensitive, encrypted signals from national and local security services.

The Bearcat BCD996T also offers Close Call☐ RF Capture Technology, Dynamic Memory Management, Fire Tone-Out, and Multi-site programming as well as 6,000 channels and a frequency range of 25 MHz to 1.3 GHz (excluding cellular and UHF TV frequencies). This new model is slated to hit retail shelves in spring 2006 and carries a MSRP of $849.99.

"The BCD996T, the first GPS-enabled model in the scanner industry, is another milestone in the evolution of scanning," said Paul Opitz, product manager at Uniden America Corporation. "These new features will provide an efficient way for agencies that need compatibility in multiple geographic areas to use the scanner without having to

reprogram the equipment for each location."

There are many obvious questions about how the GPS features might be implemented. I've asked some on them in a post for Gearlog, where I am an editor. I'll report back if Uniden responds. BTW, for $850 I'd expect the GPS to be included with the unit and not merely an option.

Here's a link to my Gearlog post:
http://gearlog.com/blogs/gearlog/archive/2005/11/03/1876.aspx

PHOENIX (AP) -- The former commander of an elite wildfire team that battled the largest blaze in Arizona history and aided in recovery efforts at the World Trade Center is accused of starting two fires last year, federal prosecutors said.

Van Bateman, 55, was indicted Wednesday for allegedly setting the fires in the Coconino National Forest in 2004. He faces two federal counts of setting timber afire and two counts of arson on public lands. The first charge carries a maximum prison sentence of five years, while arson is punishable by up to 20 years, prosecutors said Thursday.

Bateman was a Type I incident commander, the head of a wildfire management crew that is called in for the biggest and most severe wildfires. His four-year term in that position expired in 2004 and he became leader of a slightly lower level team until he was indicted and put on paid leave, according to Forest Service officials.

Bateman is accused of setting a tenth-of-an-acre (0.04 hectare) fire on May 8, 2004, and a 21-acre 8.4-hectare) fire on June 23, 2004.

A message left at his home was not immediately returned Thursday.

Patrick Schneider, a spokesman for the U.S. attorney's office, declined to comment on the possible motive or other aspects of the case.

Bateman, a 34-year veteran, commanded a Forest Service team sent to the World Trade Center site after the Sept. 11, 2001, terrorist attacks.

He has fought wildfires across the West, including leading one of four elite teams that managed crews that battled the largest wildfire Arizona has seen. That blaze covered 469,000 acres in 2002, destroyed 491 homes and forced the evacuation of 30,000 people in eastern Arizona.

Bateman is not the first firefighter to be accused of starting a wildfire in Arizona. In 2002, part-time firefighter Leonard Gregg was accused of starting part of a blaze that destroyed hundreds of homes in northeast Arizona. Gregg pleaded guilty in 2004 to two counts of intentionally setting a fire and was sentenced to 10 years in prison.

this is a update on the fire on Yuba St. I posted a few days ago if anyone is interested.

-Ron

from Record Searchlight:
==========

Flames damage three law offices, advocacy service

By Christina, Lucarotti-Stubler
November 18, 2005

A candle left burning through the night caused extensive damage Thursday morning to several law offices at 1737 Yuba St.
The blaze was reported about 8 a.m. after smoke was noticed coming from the building.
The fire had probably been smoldering for several hours, said Redding Fire Department spokesman Jeff Granberry.
Shirley Hull accidentally left a candle burning about 5 p.m. Wednesday on top of a file cabinet inside the office of Hull and Associates, Granberry said.
After the candle wax melted, a fire began on top of the cabinet that spread to the floor and then to the walls and attic, said Battalion Chief and Assistant Fire Marshal Ray Johnson.
No one was hurt in the blaze, which was controlled about 30 minutes after firefighters arrived.
The building houses three law offices and an advocacy service, the fire department said.
Extensive renovation will be needed to repair the estimated $70,000 in damage, Granberry said. Content damage was estimated at an additional $50,000.
He said firefighters were careful not to cause additional damage to what could have been sensitive material, given the nature of the businesses.
"We'd usually throw stuff out the window," Granberry said. He stressed that a sprinkler system inside the office could have minimized the destruction.
No citations will be given in this fire, which has been ruled accidental, Granberry said.

Tanker 00 was often a resident aircraft at PHX. Lockheed P3, N900AU is a member of the Aero Union fleet, from Chico CA. It's seen here on the Cutter Ramp awaiting its next mission in April 2000. http://www.visitingphx.com/pt1a.html

The only copters that carry 1500 gallons are the skycranes
(Helitankers have 1500 gallons tanks, the buckets the chinooks use
are around 900-1200 gallons, nothing here in US holds 5000 gallons,
I dont know what the gallons the Russian Helo with double buckets
holds .

According to T-00's flight records, it was flown to Chico on Nov. 24 from the Los Angeles area. It's been in the air four times this month -- all in Southern California.

The plane flew repeatedly to and from Ventura on Nov. 18, maybe it was assisting with the fire down there?

Even the Hueys only usually carry 300 to 400 gallons in their buckets. Smaller ships including type 3 aircraft use bambi-buckets and carry 80 to 100 gallons.

I wasnt referring to recently w/ T00, he hasnt been in AZ for approx 2 years, he has been in the hanger for over a year, and Phoenix Air Tanker Base closed almost 10 years ago. Last time he was in AZ was 2 years ago and he was based in Winslow, this year they had T20 based up there, and T23 based here in Prescott.

As for the helos

Helitankers run between 1500 to almost 3000 gallons of water in their tanks Erickson AIrcranes tanks on their skycrane hold 2650 gallons

Los Angeles Sikorsky Firehawks have 1000 gallon tanks on bottom.

Boeing Chinooks carrys approx 1200-200 gallon buckets
Boeing Vertols carry approx 900 gallons in their buckets

But No one in US has 5000 gallons on a helo, even the air tankers only hold approx 3000-3500 gallons at one time.

Althoughj the Russian MI6 Halo Heavy Helicopter has a double bucket mounted on a bar and can carry 2000 gallons in each bucket for 4000 gallon total

I wonder if NHTSA is going to require ELTs in cars like the FAA requires in planes. Every year there seems to be a couple of incidents like this where a vehicle goes over-the-side and is not found for days or weeks, and the occupants are DRT.

Sorry trying to catch up on 800 emails, but most Helitankers hold approx 2500-2900 gallons, depending on manufacturer of tank. Erickson, Heavy lift, Carson and others all carry different amounts. Remember there is a difference between a Type 1 Helicopter and a Type 1 Helitankers.

The only copters that carry 1500 gallons are the skycranes (Helitankers have 1500 gallons tanks, the buckets the chinooks use are around 900-1200 gallons, nothing here in US holds 5000 gallons, I dont know what the gallons the Russian Helo with double buckets holds .

Mike

http://www.picturetrail.com/gallery/view?p=999&gid=7900233&uid=3825888&members=1

by the way you can view pics of fire aircraft here at Prescott I took this summer

was wondering if california still have strike teams/
manpower to send them to these fires in tx and oklahoma?

this is december and cant believe its still dry there.

-Ron

PS. are there any tankers/copters avail for these fires?

Maybe in South division units, but it would take quite a bit of work to get more than say 10 strike teams put together through the state.

December/February is the Southern Area fire season. They have a lot of fires in Florida in January, since it doesn't rain that much until Spring.

Ron,
There are tankers that could be available I'm sure. I don't think that there are many "contracts" available for Texas and Oklahoma but I'm sure some could be picked up. You have to wonder what could be put in place for retardant plants that could be put in place on short notice though?
Here in Chico, Aero Union had quite a few tankers on the field that I suspect had come home for maintenance a few weeks ago. I haven't been out that way since just after Dec 1 so not sure what is still here or maybe moved down that way.
The media have described these fires as "grass fires" which to us out west means pretty light, flashy fuels and with the high winds reported, tankers may or may not be the tool of choice. I also wonder how well they are equip ed and trained down that way for these sorts of fires.

Happy New Year,

Jon

Ron,

Using the concept of closest resource it would be a while before tasking California on a State-to-State request. There is a compact in place for such a request, but we would not be the cheapest or closest resource. Figure 2-3 days travel time, the logistics (meals, drivers, buses etc.) it would need to be a catastophic incident before we (California) would be involved. The last time we sent California OES Engines out of state was in 2002 to Oregon. A little closer drive. We have deployed to wildland fires in Colorado, Idaho, Wyoming, and Montana. But that is a very rare occasion. Aside from Hurricanes Katrina and Rita which was mainly Urban Search & Rescue Task Forces, Swiftwater Teams and Incident Management Teams it is rare to go beyond the border states.

However, the USFS is sending a tanker from San Bernardino to Albuquerque, NM for staging for the fires in Texas.

California's Mutual Aid system is based on approximately 200 local government strike teams statewide. However, an out of state response like that would be on an assistance-by-hire basis, and I don't know what the availability would be.

> this is december and cant believe its still dry there.

It is still dry in many areas of California.

> PS. are there any tankers/copters avail for these fires?

As far as I know the tanksrs are off-contract for the year, but I'm sure that the Fire Center knows how to find them. ;)

This may be old hat to readers of this list but now that we are in the quiet time of the year for wild land fires, some of you may find it interesting or want to pass it along. Last year I "surfed" up this really neat page that will answer just about any question any fire "expert" or "newbie" might have and is a nice bookmark to hang onto.
Lots of off the beaten path frequencies
Lots of details on the organization of the ranger units
Lots of good links to fire information and such.
It even has a complete sequence of events on a real fire starting with the lookout shot, the tone out and pretty much up to full dispatch on a major event. Point your browser to:

http://www.norcalscan.org/fire/cdf/index.htm

Have a look and enjoy.

Thanks,
Jon

Hi Jon,
I read on msnnbc that so far 125 structures are gone including homes and was curious about the tankers,teams.

they might be of use here.

I have not seen any news on tv so im not sure if it would help out or not.

thanks for the reply. :)

Ron,
As of just a few days ago the CDF aircraft were still visible on the Ramona Air Attack Base webcam. The southern end of the state is usually much drier than up your way and I am not aware of the far southern end of the state getting really drenched yet, but maybe I missed that. Remember, that end of the state can and has in the past had Santa Ana Wind-driven fires into January even though this year it appears we here in California are repeating what we did last year at this time with copious rainfall headed towards SoCal early on in the winter.

Well, when I left San Diego last week they were talking about Red Flag conditions. The southern-most counties have had a dry year.

CDF has one or two tankers on in Riverside and San Diego, and I saw a note that the Fed tanker at San Bernardino was being sent to New Mexico to stage for the Texas / OK fires.

> so my next question would be can the tankers be put in service again if
> they really need too? I mean the fed/state ones.

Depends on the availability of flight-ready aircraft and flight crews, I would bet.

Don

jon, I did a story for Firehouse magazine a few years ago on the "heavies". In regard to a tanker base. All that is needed is a water supply and a long enough strip of land. The Phoschek is carried in 50 pound drums and is in a powdered form. Any area like that can and has been used as a mobil tanker base by the feds and, in californias case, the state S-2's.

Don, any equipment here in the SoCal area will respond
but only if asked for. There are many other cities
closer tghen here to send help. Tankers are off
contract now but there are still plenty of helicopters
available. It's my guess that any help will come from
neighboring states if asked for.

9644. Air Tankers avialiblity in So Cal

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-12-29 19:36:08 UTC
From: keestrokes@cox.net
Topic: 9644 Message: 9644

For CDF there is 1 OV-10 and 1 S2T uncovered all winter at Hemet-Ryan and Ramona. THey just have to get the pilots back if needed. Useally takes about 2-3 hours. CDF helicopters are staffed year round, Mon-Fri, as long as ther is a pilot availible.

For the Forest Service, they have aircraft on somewhere almost year round. Remember North Carolina and surrounding areas start to burn this time of year also. Helicopters are contracted, so anyone can call and hire a helicopter, even people in Texas and OK. They don't need the FS to do that for them.

9645. Texas Fires and Air Tankers

Yahoo group: norcalfire (2005 — 2016)
Date: 2005-12-29 19:29:34 UTC
From: keestrokes@cox.net
Topic: 9645 Message: 9645

Tanker 07 and Tanker 48 (out of Fox and San Bernardino ATB) were sent to the area yesterday. They are still on contact until Jan 4, 2006. There is one more, not sure Tanker # that is on contact until Feb 06. These all came on late. There is also a couple of "SEATS" there already.

Bringing a air tanker base back up on line is a very easy thing. Most have retardant all ready on hand and just have to stir it up for a minute or to and they are back in the game. The hardest part is getting the folks back to the base during the holidays.

Mike,
Good to know. It used to take a pretty involved plant or at least the ones I was around were involved and permanent in nature.

Thanks!

Jon

Major flooding in Redding and surrounding area.

some evacuations are in progress.

earlier RFD was asking for 3 addtional engines and boats to help with evacuations along a mobile home park.

palo cedro getting hit hard. lights were out earlier.

HYW 273 @ Bonnyview closed both directions due to Major flooding.

county has not used the OES System yet. getting people in position first.

anyway here is a news alert that came out not to long ago from the record searchlight.

you may want to also check with the CHP Cad.

Rains cause floods and warnings

By Record Searchlight staff report

December 30, 2005

A rampaging Olney Creek in south Redding has forced about 100 residents from their homes and closed Highway 273 between South Bonneyview Road and Westwood Drive.

Numerous other south Redding roads have been closed. In north Redding, authorities have closed Old Oasis and Indianwood roads.

The Redding Fire Department will open an evacuation center for evacuated residents at Sycamore School by 6 p.m., Fire Marshall Bruce Becker said.

Dave Radar, the streets superintendent with the city, said the storm is hitting the south side especially hard so far today.

Rushing water was knocking manhole covers loose on South Bonnyview, Rader said.

Larry Schaller, acting Shasta County Sheriff, said his office participated in a conference call with the California Office of Emergency Services to discuss the county's emergency status.

Schaller said officials agreed that Shasta County, though being hit by a severe winter storm, would likely not face conditions enough to warrant extreme emergency measures.

"We're prepared to mobilize, but we have no plans to open shelters or our emergency operating center unless something gets worse," Schaller said.
Sandbags are available at Shasta County fire departments for residents concerned about flooding, he said.

Tehama County, south of Cottonwood Creek, is in more serious trouble, since the heart of the storm is expected to pass over that area, Schaller said.
Tehama officials have begun mobilizing their emergency operating center and have placed Red Cross officials on standby in the event of evacuations.

Schaller said Shasta County residents should be aware that high winds between 30 and 50 miles per hour could knock down power lines and start outages.

He advised residents to stock up on emergency supplies, such as flashlights, potable water and food in the event of a prolonged outage.

Just one catch, you have to help hump sandbags. Maybe I can get some Ben & Larry's, Ah, I mean Ken & Jerrys, ... they all said no. Hey, how about a hot steaming bowl of Ese's Firehouse beans? Come on over while we still have some. Like "Peas Porridge, some folks like em' 5 days old"

As of 0500 hrs on Sun. Morn the H2O is SLOWLY receding. Just sent a crew out on the Quads to look for Seepage and leaking Squirrel holes. As of 0100 hrs. it looked very good. Sleep seems to be the only thing I'm short of. Jake, we can whip you up a batch of Mint Cow chip, will that do?
Thx for the note. Maybe I'll have to call my old Indian friend Rod and ask him to do a "Sunny and Dry weather" dance?

Nice to see someone else up for it - my ice cream budget is dry!

A couple of times every day, Channel 7 KRCR TV in Redding shows a news promo piece - the opening couple of seconds shows a firefighter against a backdrop of a wall of fire coming through the trees. That firefighter was me - the shot was taken in the early hours of the first night of the Whitmore fire. Ironically - the reporter left just after the shot was taken - and about 15 minutes later we had to drop everything an run - when we returned our hoses were lines of ash and we were left to recover the brass that was left behind. Not quite a burn over - but closer that I felt comfortable with.

Well, taking on the heels of Bayscan, I figured we might try a small get-together for SCANnorCAL and NorCalFire. Only, we've got one-up on Bayscan, a date and location. Friday evening 7pm(?), February 17th in Anderson, CA at the Anderson VFW hall (oh yeah, a happenin' place) is a spaghetti dinner fundraiser for the Shasta-Tehama ARES team. What more could you ask for? A parking lot full of antennas? It is $7 a plate and $4 for kids. Salad, dinner, bread, drinks, dessert (most homemade!), raffle.

This is our team's second run at the spaghetti dinner and the first time was great. Plenty of room for people. It is in the evening though so out-of-towners might not like that, but I figured hey, it's a start. So this could be more of a Butte-Glenn-Tehama-Shasta gathering. And if the hams want to go home, we could migrate someplace else later? To Ron's house! (kidding)

If you're interested let me know (off list is fine) and I have tickets, or you can buy them at the door. Disclaimer, I'm not getting a prize for the most tickets :) I just think if we get an unexpected influx of 50 people the cooks would want to know ;)

154.430 is County Net for Shasta CDF/County Fire. CDF would simulcast dispatch on Local Net 151.160 and County net 154.430. Then CDF units would respond on local net, and County units would respond on county net. Now, I think the transition is near completion of all county units now responding on Local net. The simulcast still occurs so I believe there are a few stations/companies left on county net. That may be the case simply because county has repeaters were CDF doesn't, and Shasta is a huge county with lots of radio holes. County net was also rebroadcasted on 453.000 for some reason on a mountain in north eastern Tehama County, possibly covering Shingletown or Old Station areas.

Don't have any CTCSS info for county net.

9661. Eureka FD 154.37 repeater

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-01-20 20:00:33 UTC
From: Harry Marnell
Topic: 9661 Message: 9661

Eureka FD's new repeater on 154.37 appears to be in light use today, at least for some radio checks.

Back on October 25, most of the morning was spent by a unit in the field, might have been 3F6, who appeared to be using a portable making radio checks with dispatch from all over Eureka and the Humboldt FPD's area. That just HAPPENED to be the day before their FCC "Construct Deadline." Such timing.

I've received somewhat conflicting information as to how this new frequency will be used. One person states that 154.37 will become the new dispatch frequency for EFD and HFPD#1, while someone else tells me that 154.37 will become "Command 2," an alternate command channel, and 153.95 will remain as the dispatch frequency.

We'll just have to see what happens. Any updated information is invited.

Apparently neighboring departments have been or will be adding the new fequency to their radios.

9662. CDF NAME CHANGE

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-01-22 05:19:23 UTC
From: Dave
Topic: 9662 Message: 9662

The state Assembly passed a bill Tuesday that would change the name of the state Department of Forestry and Fire Protection to the Department of Fire and Forestry - or Cal-Fire for short.
The measure by Assemblyman Russ Bogh, R-Cherry Valley, passed unanimously. It now goes to the Senate.
The bill's sponsor - the union that represents state firefighters - contends that the agency's current name fails to reflect its dominant mission: putting out fires in state responsibility areas.
Managing the state's forests and rangeland makes up only about 5 percent of the department's 2005-06 spending. Firefighting-related expenses comprise about 94 percent of the department's budget.
Riverside County contracts with the department for firefighting services. The department also has the primary firefighting responsibility in thousands of acres in San Bernardino County.
The department's last namechange was in 1987, when the Department of Forestry became the Department of Forestry and Fire Protection

Welcome to life in Sacramento, Nina.

The CDF union has wanted to be a big-city fire department for many years. This is their latest attempt to make the world think they are.

(As another list member has said, "well, the agency IS named for the three lowest grades in school...")

Don

Good Morning,

Besides being fortunate of having CDF as the state
fire department that is depended on to respond to
statewide and national disaster this name change sets
up the stage for CAL-FIRE to go from a Resource agency
with no budget and no protection to become a Public
Safety agency to better staff and equipment that
protects you and the nation, but I guess you can do it
without any help..

have a nice afternoon

Harry,
Sounds like some changes are takeing place in Del Norte.

over the last week or two, each of the 6 Dept's seems to have a new

tone, also they are mentioning a new tac frequency. Any info?

I haven't gotten use to the blue uniforms yet. They seem hot in a high temp. vegiation fire, also not best uniform to be wearing when stumbling into one of our north coast plantations. Seems like a So Cal thing, to be dressed like the big city depts. CDF had their unique uniform to be proud of, and the work they did.

Hi, Joe -

Don't know about tones, as I don't pay a lot of attention to them here in the (big)sticks, but I do see
some added unfamiliar frequencies listed for Crescent FPD:

151.10 (yes, 151.1) repeater
159.06 mobiles
158.865 mobiles
154.34 base/mobile (is that new?)

Did you get my note on the Cal-Tran cams on 101 from Smith River &
199 through Humboldt, Mendecino, and Lake there still adjusting
them, 2 cams at Confusion Hill slide.

From: David Coursey
Topic: 9662 Message: 9673

I understand that CDF wasn't a perfectly descriptive name, but "Department of Fire" makes it sound like they provide fire to anxious cavemen, not protect lives and property. CAL-FIRE sounds quite silly. "Quick, dial 9-11, we need CAL-FIRE!" Yuck!

The California Department of Fire and Forestry could still remain CDF, I hope.

You have to remember where the change is coming from. You sometime wonder who is running the department, executive and manager staff or the union?

It was just like the uniform change, if it wasn't for the fact that the Chief Dep. Director (a Davis appointee) was the ex union president that would never have happened either. The cost for that rediculous change was hundred of thousands of dollars.

Who knows, the Gov might not sign the bill.

But it is sponsored by a junior Republican and if you go to his website he is spending money like a drunken sailor on shore leave giving out
$150,000 dollars to every police chief in Cal whether they need it or not?. I do not understand why Bush and the rest of the party spends so much money we do not have.
I thought that is what the Demo's used to be accused of!
He also makes the excuse that old logo's will not be changed out till needed Right? who is going to want old patches on new uniforms or stationary with old letterheads I do not believe it for a moment.

Please do not include politically-charged messages in the posts to NorCalFire. The CDF NAME CHANGE topic is on the edge of a political discussion. Lets keep it related to how this affects us as fire-scanner listeners and not how much we think it will cost to change decals, badges, who did what politically, etc.

The rest of the list appreciates it.

I do agree that if you personally believe this to be a stupid move financially or for whatever reason, contact your local representative, not the hibernating/off-season readers of NorCalFire. :)

Thank you
Jake

The uniform change was supposed to make the Department look more like other fire departments than sheriffs departments. If you look at the majority of fire departments across the state, they wear blue/blue, and sheriffs departments wear khaki/green.

What it did was cost all the current employees a LOT of money, since the first set of uniform pants wore out far too quickly, and were of generally poor quality. When they spec'd out better pants, just about everyone got rid of the old pants in favor of the new pants. At least they spec'd out good shirts.

Topic: 9683 Message: 9683

Discovery Channel has a new show called "Into the Firestorm" about last years' set of wildland fires on the west coast. The camera crews ride with all sorts of different resources, mainly with FS hotshot crews. The program shows may different aspect of the firefighting effort, with a lot of good videography. In tonight's episode, they showed action on the Volcan Fire in SD Co. and a couple of different fires in Oregon.

47 USC 605 was around long before the satellite TV provisions were added.

Thanks for the information.

So how do all of these online scanners get away with streaming ?

From reading the statute, it doesn't look legal to stream ANYBODY. Not just LA Fire.

IPN, Firefeeds, and about a dozen different ones on Shoutcast and Live365 all stream different public safety feeds or divulge their information via alpha pages.

Many people believe exactly that.

> So how do all of these online scanners get away with streaming ?

Possibly related to the second paragraph here, from the DOJ's United States Attorneys' Manual, http://www.usdoj.gov/usao/eousa/foia_reading_room/usam/title9/crm01066.htm

"[T]he nature of radio communications is such that there is the potential for a multitude of petty 47 U.S.C. ? 605 violations which do not warrant the initiation of federal prosecutions. Consequently, the proper use of federal law enforcement resources usually requires that investigation and prosecution of 47 U.S.C. ? 605 violations be reserved for those cases in which there is a continuing, repeated, and flagrant violation of the law despite the application of lesser measures...."

Well, not being a lawyer, I can't provide a factual answer to that one.

It is my _observation_ that LA Fire is one of the few agencies in
California that actively enforces their _withholding_ of permission to
rebroadcast their transmissions.

Butte CDF dispatched two alarms to a wildland fire at 156 Laughing Fox Lane X Cohasset Ave about 4PM today. They had to walk in and reported 2-3 acres of ground fire. Two WT's requested and 4-5 hours mop up estimated by the IC. Havn't heard much more, containment etc.
Heavy NE winds in the Chico area today but temps are falling like a rock now at sunset.

Just a reminder that there is a speghetti feed fundrasier for the Shasta-Tehama Amateur Radio Emergency Services, this Friday evening at the Anderson VFW Hall in Northern California. It starts at 6:30pm and will have door prizes/raffles from what I understand. Lots of pasta, bread, drinks, and dessert for $7 per adult and I think $4 per child. You can
purchase tickets at the door. If there is a sign in sheet that asks for your callsign and you
don't have one, put in "norcalfire" ;)

I'm not sure how I'll designate the "scanner" area so you don't get overwhelmed by a bunch of hams, but I might have an 895xlt scanner on the table with a Jack In The Box antenna ball.

Looking forward to meeting any of the locals who can make it. If you e-mailed me directly for help or ticket info and I haven't gotten back to you, I'm sorry. We have moved and I'm somewhat offline until the 21st when DSL comes back online. E-mail
jakeh@... if you need directions etc.

Anderson VFW Hall location on Google Maps

UPDATE: Hotlum Fire (Siskiyou County)

Fire started as a Shasta-Trinity Nat'l Forest controlled burn in the Hotlum area located to the west of US Hwy 97 about 8 miles northeast of Weed, CA (41-28.44N x 122-18.87W). High winds (30 mph, gusts to 60 mph) developed during the night. Late this morning, the fire jumped the control burn area and started north bound towards a very lightly populated, rural subdivision called Mt. Shasta Vista (41-32.49N x 122-18.73W). Fire entered the lower portion of this subdivision; mandatory evacuations and structure protection in place. Winds have lessened and light rain has started. Fire rate of spread has lessened; still being aggressively fought.

At least one structure lost in Mt. Shasta Vista subdivision; Union Pacific Railroad trestle threatened.

Command: CDF CMD 02 151.2650
North TAC: CDF TAC 07 151.3400
Structure: CDF TAC 04 151.1900

Bob,
Thanks for the updates.
I find this odd and fascinating given the time of year, part of the world and type of weather dominant over the last 24 hours.
Where would this fire be relative to the roadside rest area/lookout facing Mnt. Shasta that is on the WB side of US97?
I'm not referring to the full service rest area further to the east at Grass Lake.

I am familiar with the vista point on US 97.

The original control burn site was on the Mt Shasta side of the US 97 about 8 miles south of the vista point. This would be on the east side of US 97 between County Highway A-12 and Big Springs Road. The fire actually crossed Hwy 97 and progressed about northward three to four miles to the Mt. Shasta Vista subdivision.

~Bob

P.S. I feel sorry for the person that was the "burn boss" on this controlled burn.

It was said earlier, but what an eye-opener checking my e-mail under thunder and rain here to see a full-blown fire post on NorCalFire at this time of year. And what a post! Thanks Bob. We all look forward to more posts like this if anything goes up there over the season.

When a control burn goes out of control, do they count the acreage of the original controlled fire plus the area outside the lines? 300 acres seems like a LOT to burn "out of control" up there with our winter weather. But 250 controlled acres and 50 out of control acres seems more reasonable. And granted, half the severity of this kind of thing is the fact there are no wildland engines available. Pulling type 3's out of the barn 100 miles to the south is desperate. Oh yeah, the winds too :)

I'm going back to hibernation until May.

Don't know how they count acreage; I would guess that it would be the area outside the area of the controlled burn.

The fire "ran" for nearly five miles northbound from the area of the controlled burn to the Mt. Shasta Vista subdivision.

Subject: Re: [NorCalFire] SKU-Hotlum Fire (Was "Shasta Trinity Strike team sent to Siskiyou Wildland Fire"

<...>
When a control burn goes out of control, do they count the acreage of
the original controlled fire plus the area outside the lines? 300 acres
seems like a LOT to burn "out of control" up there with our winter
weather. But 250 controlled acres and 50 out of control acres seems more
reasonable. And granted, half the severity of this kind of thing is the
fact there are no wildland engines available. Pulling type 3's out of
the barn 100 miles to the south is desperate. Oh yeah, the winds too <...>
I'm going back to hibernation until May.
Jake

In other words, the 300 acres applies to the five mile run.
By the way, thanks for keeping us apprised of events in your relative backyard.
What kind of structure was lost and was the trestle damaged?

---- Bob Berg <bob.berg.listmail5@...> wrote:
Don't know how they count acreage; I would guess that it would be the area outside the area of the controlled burn.

The fire "ran" for nearly five miles northbound from the area of the controlled burn to the Mt. Shasta Vista subdivision.

Relative backyard was correct; fire passed within two miles of my residence. However, due to the direction of the strong winds, no threat to the area where I live. Plus there is a large volcanic hill between our area and the path of the fire.

From the radio reports that I heard, one single family residence was totally destroyed. Unfortunately, the damage assessment reports were done via cell phone. Did not hear any more reports about the train trestle except that a Union Pacific RR had a representative out there doing an inspection and trains were passing through.

The rains came in quite heavy around 8:00 p.m. Hand crews, dozers, and most engines were released for the night to return in the morning for final mop up. A few engines remain to patrol the areas. Evacuations were lifted around 8:30 p.m. News reports put the size at 600 acres.

Following information from another group:

Subject: RE: [CaliforniaOnlineScanning] SKU-Hotlum Fire

From the ICS-209 at 1800 26 Feb 06:

600 acres, 0% contained, cause under investigation;
10 miles of line to build; 150 homes at risk, 1 destroyed;
10 outbuildings at risk, 3 destroyed. No injuries.
Winds at 35 gusts to 50 mph causing erratic and extreme fire
behavior (duh); dormant fuels with low moisture. Short range spotting.

Rapid demob if the rain sets in as forecast. Projected final size 1000
acres. 242 people on the line.

~Bob

Thanks for all the information. It's nice to have an online witness. It's the next best thing to being there. That is tragic that a family lost their home. It's sad anytime, but to lose one's home in a wildland fire in February up in the State of Jefferson is just plain odd to me. I suppose it doesn't bode well for the upcoming fire season.

From: Dave
Topic: 9721 Message: 9721

Effective in the next week or so, the Placer Consolidated Fire Protection District will be desolved and its district will replaced by the Placer County Fire Department.

Placer Consolidated operated four stations in the area north and west of the City of Auburn. It was a very active district.

Placer County Fire Department contracts with CDF for operations and includes a large unincorporated area of western Placer County and several areas along I-80.

Personnel from Placer Consolidated FPD are being absorbed into CDF.

The long range plans of Placer County is to continue to desolve the numerous small fire districts in the County and replace them with the Placer County Fire Dept.

Another new change is that the Truckee FPD is aborbing the Donner Summit FPD. That change will occur in June or July.

No no float it was a cessna. the person made it. I heard this originally on the benton airpatk freq. 122.800 and heard the pilot say" Im loosing power, going down going down".

I thought he was doing stall training with another pilot but then he said he was going down near some power lines. I then knoew it was serious and started to record it. about five minutes later teh scanner started chirping with the call to the different agencies.

here are the cordinated by air 11. h-16 was out of the area.

No injuries in Keswick-area plane crash

By Christina Lucarotti-Stubler, Record Searchlight

May 18, 2006

KESWICK ☐ No one was injured when a small plane crashed in the Sacramento River about a mile north of Keswick Dam, said a spokesman with the California Department of Forestry and Fire Protection.

The plane went down about 11:20 a.m. before sinking a few minutes later, the spokesman said.

The pilot swam to shore uninjured. His name has not yet been released. No one else was on board.

Details about the type of aircraft and what caused the crash were not immediately available.

Fire and rescue crews and a California Highway Patrol helicopter were called to the area, a spokesman said.

10+ acres rapid rate multiple structures directly threatened, moving fast

Whispering Oaks, Kirkwood Manor
Priority need for 5 additional engines over initial response, Copter 205 and Dozer from Tehama.

151.160 SHU Local (on live scanner)
151.445 Tact 11

From: Jake H
Topic: 9747 Message: 9749

Woowee what a start to the season. First engine (2479) arrived on scene and reported 5 acres structures threatened. A few seconds later he bumped it up to 10 acres, rapid rate and wanting 3 additional. A few more seconds he wanted 2 additional for total of 5, with it "moving fast and multiple structures threatened"

Copter 205 got to roll onscene and do a few laps around the fire but they are now released. IC is also cancelling response to a few far out engines and continuing the nearest couple engines.

The live scanner is in the transition process between winter (law, trains, planes, etc) and fire (umm fire, and fire). Sorry for the interruptions with license/registration checks and UP Railroad :) They'll be gone in a few days.

Jake: have they staffed the Sched B stations in Region 2 yet? All of the Sched B stations in region 4 are staffed, and as soon as they have enough manpower to staff the second out units, they will be coming on line, probably around the 15th of June.

9752. BUTTE: Bridge jumper??

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-05-31 22:49:37 UTC
From: Pamela Alley
Topic: 9752 Message: 9752

Patient located on the underside of the Oro Dam Blvd West Bridge over the Feather River, patient with fractured leg, apparently still attached to the bridge.

Dispatcher is to be commended; he hardly snickered at all...just a little wheeze. :)

Pamela,
Oh, I'm sure there are. ;-p
On Californiasearthquakeforum@... there is a bloke who is convinced there will be no more damaging quakes striking California as he believes the plates have rearranged themselves very recently and dramatically so that can't happen anymore.
Talk about living in a fool's paradise.
I can't seem to convince him otherwise with science or common sense.
Therefore, expect anything from human beings.
Don't ever be surprised.

I know TGU started staffing their first out Sched B engines Monday. Not sure about Butte but we all usually play the same up here. Shasta staffed on Monday also. Considering the number of local govt engines on today's fire in Shasta, their second string isn't staffed yet. Usually late June for up here.

Back up - DSL had its annual hiccup last night. (Seriously, my DSL equipment probably only needs resetting once or twice a year) I consider that lucky from some horror stories I've heard.

As for the freq lineup - that'll change this weekend to strictly fire. I just got the external antenna up and I'm really pulling in some fun frequencies on law. I wanted to experiment a little this week before killing all law. :) See the things I do for you guys....

Thanks Steve

From: Pamela Alley
Topic: 9768 Message: 9768

Well, I missed the first fun of the season here. :(First named fire was Cherokee, took out 12 acres by the dam spillway.

Tonight, I just walked into the latest...Cherokee IC, Cherokee at Burma Road is clearing up...additional apparently on Springhill...Spring IC

Units responding to Derek Rd and Cherokee too...?? Engine 64, 71 all heading up Cherokee toward Derek, to Derek IC.

Oh, heck, go listen, I'm sick and totally confused. :)

9771. BUTTE: Vegetation, Yankee Hill.. Yankee IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-06 08:19:56 UTC
From: Pamela Alley
Topic: 9771 Message: 9771

Boy, when the fire season starts, it starts. Of course, the first 'goodie' of the year brings out the firebugs...and gods know the hills aren't green anymore, it's all a lovely *dry* golden brown now.
Doreen? Ct @ Yankee Hill Rd, multiple reports of several fires in the area; IC says this is the only one he sees at the moment but will have others check around.

2 acres, uphill spread, wind on it...continue response.

Yankee IC on Tac 9 151.385
Butte Fire 151.400

Whee..

Resident reports 2 additional fires. One vegetation on upper Yankee Hill Road and one on Pinebrae? which is a vehicle fire.

2 additional engines requested. Can't hear his end of it when he's on tone 12, don't know why.

Timing for rash of fires suggests possible arson

By GREG WELTER /MediaNews Group

Shortly before midnight Monday the first in a series of fires that appeared to be intentionally set was discovered along Cherokee Road. By 1 a.m. Tuesday a total of eight blazes had been reported along an approximate 10-mile stretch of Cherokee.
Five more were found later Tuesday morning burning near Highway 70 between Yankee Hill Road and Pinkston Canyon Road. Another burned on Glen Drive in Oroville.

Butte County Fire/CDF investigators believe some or all of the 14 fires are connected, and haven't ruled out the possibility that Tuesday's date, 6-6-06, may have played a part in them.

The 666 combination of numbers has long been associated with apocalyptic predictions. The superstitious avoid the number sequence, fearing it brings bad luck.

Finding a connection between the fires and the numerology would be troubling, but not finding a connection could be worse, because it might mean they'll continue.

"Those areas have seen a lot of arson activity over the years," said CDF spokesperson Janet Upton.

Four Butte County arson investigators were looking into the fires Tuesday and attempting to locate witnesses.

Nearly all of the blazes were small - under an acre - and controlled quickly. Three of them involved setting abandoned vehicles on fire and a couple of them appeared to be refuse piles that had been set aflame, Upton said.

A blaze near Doreene Court and Yankee Hill Road burned more aggressively than the others, scorching about two acres and reportedly coming close to some structures.

A hand crew was called in Tuesday to clean up the scene of that blaze.

Conditions were nearly windless Monday night, with higher than average humidity. Under the right conditions, however, the fires could have grown much larger, Upton said.

Twelve CDF engines, four water tenders and a bulldozer worked well into Tuesday morning to extinguish the fires, the last of which was discovered just before 2 a.m. off Highway 70.

Upton said the overnight fires aren't connected to a 12-acre blaze Monday near the Oroville Dam spillway. She said investigators have concluded that sparks from a vehicle started that blaze.

A reward of up to $10,000 may be available to citizens with information leading to the arrest and conviction of wildland arsonists. Upton said people calling in arson tips should be able to provide a general description of suspects, a vehicle description - ideally with a complete or partial license number - and the precise location where the suspects were seen. Tips may be called in to 538-7888

I enjoyed the photos, BUT did not see a single Fire TRUCK. I did see a Type 3 ENGINE & a Type 4 ENGINE. Maybe I am some what of a purest, but by ICS defination, a TRUCK has an aerial device (ladder, platform, snorkel, etc) attached to the chassis, as a minimum. Will not go into the complete requriements, here, for a Fire TRUCK due to bandwidth.

Actually, a truck has a minimum of 134' of ground ladders. An aerial device is just an additional determinant.

Fire fighters are in full response to a wildfire burning about three miles east-southeast of Baldwin Lake. Aircraft and ground crews with the Forest Service, the San Bernardino County Fire Department and local fire stations have been deployed. 1:30pm update: Officials have named this the Arrastre Fire for its proximity to Arrastre Creek near 2N02. Crews are exploring this forest service road as possibly the best access to it. It's currently estimated at about 20 acres, with the potential for 1,000 acres. Witnesses estimate the fire to be about a mile east of Hamilton Ranch Estates, and with winds out of the west at 5-10mph, the fire is likely to keep progressing eastward, away from Big Bear. 2pm update: The fire was spotted just before 1pm by the fire department. Smoke is visible from Yucca Valley and Arctic Circle. According to a bystander, the closest structures may be Camp Oakes at the far east end of Lake Williams, but the fire is still a good distance from that. Six air tankers have been employed. 3:15pm update: Acreage has been declared at 80. They are asking for voluntary animal evacuations of the Hamilton Ranch area only. Equipment on scene include: 10 engines, 4 helicopters, 1 helitack, 4 tankers, 9 handcrews, 6 water tenders. [Location T2N, R2E, Sec 23/Thomas Guide page 4813.] Burning west of Arrastre Creek. No threats to communities. 0% containment.

For major/extraordinary fires elsewhere in California, it is fine to
post a recap here to help us keep tabs of what is going on elsewhere.
Fires down south can really scramble resources up here and confuse the
heck out of us who wake up one morning with out-of-state resources
responding to the local medical aid.

There will be no play-by-play or initial posting of fires in anywhere
except the northern california.

And we always support our sister-list SoCalFire John :)

I would rather see a simple " mention " of a large fire outside

northern Cal. If people are really interested , then they can read messages

at SoCalFire. I subscribe to SCF but DON'T take all messages , so all you

really need is something like " 500 acre fire near San Diego - check SoCalFire

for updates. makes more sense to me

Although it's not good to see all fires on all lists, I like seeing a good
first rundown on fires out of 'this area', because then I know they're out
there, how bad they are, and where to look for updates.

Ed,
I second that. I also subscribe to both and really don't need the repetition. Speaking strickly for myself, until it becomes "major" I'd just as not see it here at all. What does major mean? To me at least, it means an incident management team has been ordered.

Of course, I've gotten in a "war of words" or two about not wanting to see postings from everyone for counties around that "Engine xxxx went to the fire" as well, so maybe I'm just uptight! ;)

Well, that's why I don't subscribe to the other lists... :)...fires close to me of any size are of interest, but little 'uns elsewhere aren't.

I did put it poorly, shoulda been 'major or large'. BUT...I do want to know about large/fast moving fires in other areas, even if it's just a 'heads up, Lancaster area, 50+ acres, heavy fuel and 60mph gusts, updates on Xcalfire'.

It's not that hard when you post to more than one list to make sure that the major post goes to the main list and the headsup goes to the others.

I have to agree that the details of a fire in Big Bear or the San Bernardino area probably aren't a good use of bandwidth on the Northern California list. A "heads up" is great if it's a major incident that may effect resources up this way soon but if I really need more details, I can find more details pretty easily on the web.
I personally like the information that a major incident is breaking down there but I'm not real keen on details for a fire 500 miles away.

Pam , I agree , as I said , I subscribe to So.Cal Fire but don't get individual posts this time of year because it gets busy. So if someone post a large fire is breaking in LA/ Orange / S.Diego county (whichever) on Bayscan or NorcalFire I can simply go to my SoCalFire page and change it to individual messages and get updates because they are fighting a large fire.

Just last summer this happened and no more than I has switched my settings that a post showed up showing that a LA County BC ordered up 35 Strike Teams .....now THAT type of post ALL of us in the state want to be aware of. :-)

I agree all the way John although I'm not in the least opposed to seeing an initial notification of a fire but nothing more unless it go's major and by major I mean a second alarm, air tankers being ordered, over 50 acres with a rapid rate of spread, ect, ect. On the Arrastre Fire, we got way to many post that were meaningless.....blah, blah...lol..Mike

9804. NorCalFire Postings - List Owner

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-12 21:02:43 UTC
From: Jake H
Topic: 9792 Message: 9804

Umm, let me refer everybody to my reply I made yesterday in case you didn't read it. After that - lets start closing this topic please. Thank you.

For major/extraordinary fires elsewhere in California, it is fine to post a recap here to help us keep tabs of what is going on elsewhere. Fires down south can really scramble resources up here and confuse the heck out of us who wake up one morning with out-of-state resources responding to the local medical aid.

There will be no play-by-play or initial posting of fires in anywhere except the northern california.

And we always support our sister-list SoCalFire John :)

Major = incident management team, or for those of us with accurate remote controls within reach of our armchair quarterbacking position, what we think will become major in the next 30-60 minutes.

Extraordinary fires = 100 acres in December in high snowy desert. Major dry lighting storm torching 100 new starts in a night. Etc.

Recap = just what Drew had sent, a paragraph touching base on what's happening. Nothing more, nothing less, one post, not 20 with 5min increments

Sister-list = SoCalFire. There is no other list on Yahoo that is active in california fires other than NorCalFire and SoCalFire. There are a few smaller options like CenCalFire that never really took off, and usually end up repeating what is stated in SoCal or NorCal.

The rest (at least to me) seems to be obvious. If you have any questions, feel free to email me directly.
Thank you. I always take pride in signing my administrative postings as List Facilitator since we have never had to have a List Moderator here before. Lets keep it that way.

9811. Butte: Veg between Neal Rd and Skyway, S of Paradise

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-13 19:44:05 UTC
From: Jake H
Topic: 9805 Message: 9811

12:41 Tue, 2656 Neal Rd.

2-3 acres moderate rate on top of the hill in grass. With the wind, it can move into the canyon and then bump Neal Rd hard. 1 structure threatened, requesting multiple hand crews, 4 additional engines, 1 safety officer, 1 division/group supervisor. Copter 205 on scene

Paradise FD is working this also.
151.400 BTU Local
153.950 PFD Dispatch
151.445 Neal IC

Jake (on lunch, can only update for a little bit more ;)

9813. Butte CDF Readies for Season

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-15 17:10:26 UTC
From: Mike Larish
Topic: 9813 Message: 9813

From the Chico Enterprise Record...

CDF getting prepared for fire season
Chico Enterprise-Record

Three fire stations, five engine companies and two aircraft will be added to Butte County Fire/CDF's seasonal firefighting arsenal as soon as next week.

On Monday, a federally authorized Grumman S-2T air tanker is expected to arrive at the Chico Air Attack base at the airport.

The turbine engine aircraft has a retardant carrying capacity of 1,200 gallons and flies with a crew of one. It will be assigned to Chico until the end of fire season.

Also coming Monday is an OV-10 Bronco aircraft, which flies with a crew of two and is used to direct aerial drops on fires and perform reconnaissance missions.

By June 26 a full complement of seasonal firefighters is expected to be available and CDF will open seasonal fire stations in Cohasset, Feather Falls and Butte Meadows.

Butte County/CDF Unit Chief Henri Brachais said the extra staffing and equipment has enabled firefighters to keep more than 95 percent of local wildland fires under 10 acres in size.

9814. Mendocino USFS fire simulation

John,
What I meant is that I thought only the CDF flew S-2 tankers, not the forest service, but I know far less than many on this list so I was seeking clarification.
I had no questions about the old and new AT planes.
Thanks for responding.

All the O-2s are gone, and have been replaced by the OV-10a. They're
about 50% faster, have more loiter time, have more room in the
cockpit, and have better visibility out of the cockpit.

All of the CDF tankers are S2T turboprop models. The fed contractors
use different models, mostly P-2 and P-3, and some other assorted
models.

Thanks, John.
I knew about the AT planes re: O-2 Skymasters being replaced by OV-10 Broncos.
My question was just about the S-2's.
I knew the CDF ran only those but from an article posted here some days ago it gave me the impression the author was saying the forest service was flying an S-2 out of Chico.
They must have meant "forestry department" i.e. CDF as opposed to "forest service".

Danke,

Kim

This was a major fire for Chico. i missed the whole thing on the scanner here and was amazed to see the report in the local paper this morning. I was in that building on Wednesday this week scheduling a service call with Mike to sort out a problem with my ice maker after the lightening storm induced power outage. The fire was caused by a fleeing Felon who lost control of his car and slammed into the business. Law enforcement was not in pursuit and had abandoned the chase earlier. Here is a link to the story in the Chico Enterprise Record as of this morning, Saturday, 6/17/2006.
http://www.chicoer.com/newshome/ci_3949019
I drove down by it this PM...it is a total loss and a real mess! Kudos's to the Chico FD and mutual response teams for keeping it from the very close by residences! Nice work folks!

9835. FW: Things Police Would Like You to Know

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-18 19:11:28 UTC
From: John Gleichweit
Topic: 9835 Message: 9835

I don't know who wrote this, but they obviously had been a cop for several years!!

Things Police Would Like You to Know

Your 5 year old kid getting pushed down by another 5 year old kid is NOT a police matter; talk to the other kid's parents, not the police.

If your kid won't do his homework or do his chores, 911 is not the answer.

If a cop causes a car accident we usually get a ticket, and sometimes we get suspended. When is the last time you got 3 days off (without pay) for rear-ending a guy at Wal-Mart?

If you think you can fan all the pot smoke out of the car before we smell it, good luck.

We know you've had more than two beers. When I've had two beers, I didn't hit six parked cars, drive my car through the front doors of a Toys-R-Us, pee my pants or pass out at a traffic light.

When you see an emergency vehicle behind you with its lights and sirens on, pull to the RIGHT, and stop. We are usually required to pass cars on the left.

When you're driving in the fast lane and you see a cop behind you, don't go 5 MPH under the speed limit. We are not impressed by how safe of a driver you can be, we're trying to go help someone (or catch that guy in the SUV that just cut you off). Safely move over and let us pass please.

If you get a warning instead of a ticket from a motorcycle cop, go buy a lottery ticket, because you've already beaten the odds.

When you see an officer conducting a traffic stop, or with a suspect in handcuffs, it is generally not a good idea to approach him and ask for directions. If you do, don't expect the officer to be nice when he tells you to get lost, and don't expect the officer to take the time to explain.

Here's how to get out of a ticket. Don't break the law.

If you drive a piece of crap, that is why you're getting pulled over.

In one week I pulled over 10 cars for minor traffic violations. 5 out of 10 had no vehicle insurance. 3 out of 10 had suspended driver's licenses. 2 out of 10 had warrants. 1 out of 10 had felony warrants. 1 was a known sex offender with his 12 year old niece in the car without her mothers knowledge.

If you've just been pulled over doing 70 in a 35, do not greet the officer with, "What seems to be the problem, officer?"

We get coffee breaks too, and sometimes we run into stores and do some shopping during them.

When you're the victim of a burglary, take the time you spend waiting for the officer to find the model number and the serial number of the stuff that was taken.

Some cops are just jerks, but take heart in the fact that other cops don't like them either.

If it's nighttime and you're driving a vehicle with tinted windows and I pull you over, it's not because of your skin color. I usually can't tell if the vehicle even has a driver until the windows rolled down.

Every time you hear on the news about people running away from a crazed gunman, someone's son or daughter in a police uniform is running TOWARD that crazed gunman.

Yes, it's true, cops usually don't give other cops tickets. Think of it as an employee discount, perk or benefit. Other cops are family and you wouldn't give your brother a ticket if you were a cop either.

If your local police agency has a helicopter, everyone knows it's loud and annoying, but did you know it can cover the same area as 20 patrol officers and safely chase criminals that are driving 90 MPH through city streets. Many times the guy has no idea it's there and slows down.

Police work is.... writing reports.

If you rob a gas station you're only going to get about $100, but I get to see a K9 dog use your arm as a chew toy. For all I care you can keep the $100.

In one year of patrol work in a large city, only about ten minutes would be cool enough to be on the television show Cops.

Every traffic stop could end in gunfire, but we have to be polite and professional until that time.

Thanks Steve. The shoutcast service on the server in Ohio hiccuped.
(official tech term) A swift restart and we're back up and running.

In the future, you can email me directly at jakeh@... to get
a hold of me regarding the live scanner. I'll see that faster than a
post to this list. I also keep an eye on the router light when I'm home
to see if it's passing traffic or not.

Good Day,

Although the Feds dont have any S-2's they have
purchased some old CDF aircraft for reasons unknown at
this time...

9839. Hot Weather and Fire Danger

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-20 00:16:04 UTC
From: Larish, Michael
Topic: 9839 Message: 9839

NATIONAL WEATHER SERVICE SACRAMENTO CA
506 PM PDT MON JUN 19 2006

CAZ013>019-063-064-066>069-201215-
SHASTA LAKE AREA / NORTHERN SHASTA COUNTY-
BURNEY BASIN / EASTERN SHASTA COUNTY-NORTHERN SACRAMENTO VALLEY-
CENTRAL SACRAMENTO VALLEY-SOUTHERN SACRAMENTO VALLEY-
CARQUINEZ STRAIT AND DELTA-NORTHERN SAN JOAQUIN VALLEY-
MOUNTAINS SOUTHWESTERN SHASTA COUNTY TO NORTHERN LAKE COUNTY-
CLEAR LAKE/SOUTHERN LAKE COUNTY-
NORTHEAST FOOTHILLS/SACRAMENTO VALLEY-MOTHERLODE-
WESTERN PLUMAS COUNTY/LASSEN PARK-
WEST SLOPE NORTHERN SIERRA NEVADA-
506 PM PDT MON JUN 19 2006

...HOT TEMPERATURES...LOW HUMIDITIES...AND INCREASED FIRE DANGER
THIS WEEK...

HIGH PRESSURE WITH DRY NORTH TO EAST FLOW WILL CAUSE TEMPERATURES
TO HEAT UP TO OVER 100 DEGREES FOR THE CENTRAL VALLEY AND LOWER
FOOTHILL LOCATIONS FOR MOST OF THIS WEEK. EACH DAY TEMPERATURES
WILL WARM A LITTLE AND DOWNTOWN SACRAMENTO COULD SEE ITS FIRST 100
DEGREE DAY OF HEAT FOR THE SEASON ON WEDNESDAY...AND AROUND 105
DEGREES FOR THURSDAY THROUGH SATURDAY. REDDING WILL SEE
TEMPERATURES EXCEEDING 105 DEGREES. IN THE MOUNTAINS TEMPERATURES
WILL WARM WELL INTO THE 80S AND 90S WITH SOME OF THE WARMER
LOCATIONS TOPPING 100 DEGREES.

HIGH PRESSURE OVER THE DESERT SOUTHWEST WILL EXPAND WESTWARD AT
THE END OF THE WEEK SO DONT EXPECT ANY RELIEF THIS WEEKEND. AT
THIS POINT LITTLE RELIEF IS IN SITE FOR THE INTERIOR AND THE ONLY
HOPES FOR SOME MODERATION FOR PARTS OF THE CENTRAL VALLEY WILL
COME FROM THE EVENTUAL REDEVELOPMENT OF THE COASTAL STRATUS DECK
ALONG THE COAST...PERHAPS BY THE BEGINNING OF NEXT WEEK. ALL OTHER
AREAS LOOK TO REMAIN HOT THROUGH THE FIRST PART OF NEXT WEEK.

THE CONCERN THIS WEEK BESIDES THE HEAT WILL BE FROM THE INCREASED
FIRE DANGER DUE TO THE NORTH TO EAST WIND FLOW AND LOW HUMIDITIES.
EXPECT VERY LOW HUMIDITIES IN THE TEENS FOR MOST AREAS WITH SOME
SINGLE DIGITS POSSIBLE. HUMIDITY RECOVERIES AT NIGHT WILL BE POOR
FOR MANY LOCATIONS PARTICULARLY IN THE MOUNTAINS WERE SOME
LOCATIONS COULD STAY IN THE 20 PERCENT RANGE AT NIGHT DUE TO THE
OFFSHORE FLOW.

A 2200 acre brush fire near Cuyama. Los Padres and
Santa Barbara County FD have a unified command set up.
4 air tankers along with 3 helos are on the fire. This
is just off highway 166....

Channel 10 in Sacramento is calling for 107 on Thursday in Sacramento. That could easily mean 110 + up here in the central/north valley! Yeow! Heck of a way to start Summer.

Date: 2006-06-20 19:56:04 UTC
From: Jake H
Topic: 9839 Message: 9842

Hazmat 64 along with a full contingent of engines and other toys responding to level 3 hazmat, ruptured 2" gas main, 1110 Pomona Ave in Oroville.

151.400 Butte CDF
153.815 Oroville Fire Net (although tactical is "Oroville Tact 1" and I actually don't know that one. Yikes.

Tue 12:53pm

3 way valve to a 2inch gas main, PGE sending crews to Chico now to try
and turn it off. Pomona IC is evacuating the area at this time. Sounds
like fun. Try 856.3625 for PGE as the first freq on their LTR system,
but I'm not sure if Gas crews are on there.

From: Pamela Alley
Topic: 9844 Message: 9844

Just down the road from me about half a mile or so.

3492 Oro Bangor, between VE and Shadow Oak Ct. Plenty of houses but lots of nice golden dry tinder too.

Provided no residences are lost, we should be able to keep it fairly limited....I hope! Little to no wind, 101*F.

Acre or slightly more; slow spread, moderate fuels. Access problematic.

1607
Bangor IC on Gridley Fire 154.190
Butte Fire 151.400 (Sorry, Jake, I am not sure anyone knows what Oro Tactical 1 is!)

If I recall, Oroville has had more frequencies licensed than they had been using. When they changed around the tones in the Butte Unit at the start of this year they also renamed the Oroville tac nets, I don't know if they are actually different frequencies than what was in use before, or if it is just a new name of the same old thing. Is anyone close enough to confirm that the tac they used to use is no longer active? If so I will start working on finding the new frequencies that are in use.

Hi group.

temps are planning to be up here in redding the next few days,

news is saying in the triples so keep your scanner close by for all the action.

110 by saturday so be careful out there and check out mike or jakes feeds.

hopefully the bugs will stay home and people will be careful.

From: Mike H
Topic: 9853 Message: 9853

Looks like some good red flag weather up here in northern california. Be sure to listen to the live feeds: http://www.mattlogic.com/scanner/scanner34.html

WHILE THE RED FLAG WARNING IS IN EFFECT FOR THE
NORTHERN SACRAMENTO VALLEY AND SURROUNDING FOOTHILLS...ANY WILDLAND
FIRE INITIATION ELSEWHERE IN THE SACRAMENTO VALLEY WILL HAVE
POTENTIAL FOR RAPID SPREAD IN GRASSES AND OTHER LIGHT/FLASHY FUELS.
THE NORTH WINDS WILL DECREASE TONIGHT BEFORE ENDING BY LATE THURSDAY
AFTERNOON.

Thanks. I only heard part of one transmission. I did hear a dispatch of 205 to the Mendocino unit this afternoon but haven't heard any more. Red Bluff dispatch said it was 273 degrees and 81 miles from Vina base.

From: Jake H
Topic: 9854 Message: 9857

I'll ask around, but I noticed that too. I wonder if they're staying at the Company 21 building, or at Ishi. But it would seem they would say "Ishi" instead of "Paynes Creek". It makes sense that it gets the engine into a more playable field, especially now with the wetness and snow still up in Mineral area. If I recall, it's still permissive burning up there until June 30th due to the wetness this year.

Not sure what they will done once both engines come online at Lassen Lodge.

Rapid Rate of spread. Heavy column build, So far 25 Acres. Burning into old 4 wheel Drive Recreation Area.

Black IC
TC Fire 151.370
Tac #12

-Ron

9859. Black Butte Fire breaking at noon

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-22 19:19:18 UTC
From: Jon Casamajor
Topic: 9859 Message: 9859

Red Bluff has toned out a pretty large response to a fast moving fire near the Black Butte Reservoir campground. It is reported by Copter 205 to be 25 acres, moving fast with wind on it. It is in the area of the old 4WD recreation area. 205 says it is surrounded by roads but with some spots. They are starting to back fire to try to keep it inside the roads. It has bumped into the lake on one flank.
It was first seen by Inskip lookout. Sounded like Tom Head didn't see it until the dispatch started.

Black IC
Dispatch: 151.370
Tactical: Tac 12 151.460
No air tactical frequency announced or heard yet.

Sounds like the wind is ripping on the west side of the valley.

Jake's scanner would be the best, he actually lives in Red Bluff.

http://norcalscan.org/live.html

As I listen to it now, they are releasing resources from the Black fire and sending them to another fire in the area.

This is for overhead purposes. It is a high dispatch level which for us, sends out 2-3 battalion chiefs and notifies a couple division chiefs for any fire dispatch. It allows them to immediately setup divisions and branches if needbe. One can also setup as a safety officer.

When that Black fire took off it almost doubled in size in about 5
minutes. When Inskip first said it was building, she put it at 15
acres, rapid rate of spread. When C205 arrived about 5 or so minutes
later it was 25 acres and still rolling hard. it was 106 in Chico
today so I bet pretty close to 100 when the Black fire broke about noon
on the west side. Anyone hear what size they stopped it at? A lot of
flash fuels this year.

Anybody catching the veg fire at Bald Mtn Lookout north of Paradise?

151.400 Local Command
151.445 Bald IC
151.295 Bald Air Attack (c205, tnk 88, tnk 93, aa210)

very remote engine access, air show right now, listening on my live
scanner in the office :) They seem to be load and hold on tankers though.

My live scanner currently has TGU Local 1st priority and BTU Local as
2nd priority.

Pat,

It is a medical acronym CSM, meaning "Circulation, Sensation, Movement".

This is usually associated with extremities such as arms, legs, hands, feet, etc. They will check for distal pulses (for instance, a pedal pulse), check to make sure the patient can feel you touch these distal locations (for instance, feet) and then they will check to make sure the patient can move the extremity.

Other common acronyms you'll hear are:

LOC - Level of Consciousness
PERL - Pupils Equil and Reactive to Light
A&O - Alert and Oriented (often with a number - A&O times 4)
GSW - Gun Shot Wound - don't hear it much around here thankfully but...
GCS - Glascow Coma Score (specific rating system more specific than A&O usually for unconscious or unresponsive patients. 15 is your normal GCS. A lower GCS, down in the single digits is bad).

There's a bunch of others but these are some of the more common... Ask if you hear others...

Mike
EMT

Subject: [NorCalFire] question

Hello I just joined the group.

I have a question for you fellow scanner enthusiasts.

Sometimes I hear firefighters or EMTs giving patient reports and they
mention something like the following:

"good cfm's"
"cfm's times 4"
"...cfm's intact"

I'm not sure whether they are saying CFM or CFN.

Can anybody clarify this for me or give me a link to a good list of terms?

9879. CFD Santa Clara Unit Update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-23 18:49:32 UTC
From: Craig Rose
Topic: 9879 Message: 9879

Sorry to stuff your email boxes if this information is of no use, but CDF Santa Clara Unit is working multiple incidents as of 11:41 AM, and I thought some folks might like a snapshot from down this way.

1. RODDY FIRE

Initial size-up was 5 acres in flashy fuels running toward the hills surrounding Mt. Diablo in Contra Costa County. BC just advised that containment has been achieved at 22 acres.

GENRAL AREA MAP OF FIRE LOCATION: http://tinyurl.com/hjh5n

2. UVAS INCIDENT

Fully involved 3,500 sq. foot residential structure on Uvas Road west of Morgan Hill that has since burned to the ground, but will require several hours of mop up. This one did pose a serious threat to the vegetation, but COPTER 106 tore it up and saved the day.

3. UNKNOWN FIRE

Not sure if this one is going to even involve CDF, but CDF Battalion Chief en route to the RODDY FIRE advised that he could see a 10-15 acre fire making a run in the vicinity of Martinez near Interstate 680 and Highway 4. He mentioned this was between the oil storage tanks, so I am guessing this is west of Interstate 680. Have not heard a CDF dispatch, yet.

We had some serious heat down this way yesterday and another hot day is on tap.

I want to take a moment to thank everyone up in the northern part of our great state for their posts. It's great to be able to keep tabs on the happenings up there and maybe I will run into some of you folks if I ride with a strike team up to your neck of the woods. Here's hoping that doesn't happen!

Cheers!

Craig

From: Larish, Michael
Topic: 9881 Message: 9881

Vehicle Fire, turned into wildland, now 5 acres, moderate to rapid spread

Requested augment assignment of 5 additional engines, a total of 4 tanker/aircraft, 2 helicopters, lots of water tenders, etc.

Butte Localnet: 151.400
Tac Net: 151.445 (Tac 11)

Location: Skyway @ Media Way just below Paradise, Fire headed towards Paradise

[Non-text portions of this message have been removed]

9882. BUTTE: Skyway IC update 2

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 00:51:36 UTC
From: Pamela Alley
Topic: 9882 Message: 9882

Requesting 2 Salt Creek crews; additional tanker for total of 4; Transport 2142....

Sounds like it has major potential for a hot run up the Butte Creek Canyon.

9883. Skyway incident

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 00:55:27 UTC
From: Jon Casamajor
Topic: 9883 Message: 9883

I missed the dispatch but I'm hearing a lot of activity on a fire near
Paradise on the Skyway. "Running uphill towards the town of Paradise"
is report from Air tactical to tankers. Copter 205 is on scene, at
least two tankers and several engines from Chico. Tehama is now
dispatching a transport to the fire "below Paradise".
Sounds hot and like it may be running. Temp here is now 101 wit no
wind in the valley.

Paradise IC on 151.400
Airtack on 151.290
also heard Air traffic on 122.935 AM
All the traffic sounds pretty "stressed".
I'll listen for the tactical which I missed.

Jon

9885. Skyway - BTU

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 01:03:33 UTC
From: Steve Jackson
Topic: 9885 Message: 9885

Sounds like a good one going. Several AT's and IC said
there would be a big order coming in. They are setting
up major command shortly. 2 crews and 1 dozer enroute
from TGU.

New order 2 task force leaders 10 engines 2 WT's 1 dozer
to division charlie.

9891. Butte fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 01:45:01 UTC
From: Jon Casamajor
Topic: 2608 Message: 9891

Copter 502 from Chester I think, just arrived on the fire. Airtack is telling tanker 89 to hold at Chico. Red Bluff is sending engines down to cover Butte stations. I'm not hearing much on the tac freq, they must be in the canyon?
Air tankers are sounding pretty confident that they are getting it slowed down.
Previous posts are not getting to the list it appears. Jake's scanner is hearing most of the traffic.
Jon

9892. Re: [NorCalFire] Skyway - BTU

9893. Butte/Paradise incident

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 01:13:34 UTC
From: Jon Casamajor
Topic: 9893 Message: 9893

Oroville just formed two task force teams to meet up at Neal road somewhere.
Tanker drops and copter work doesn't seem to have held it. Lots of Red Bluff tone outs to the Butte fire.

Butte Dispatch is 151.400
air on 151.290 "Paradise airtac"
tactical on 151.445

Not sure which canyon it is in, Butte Creek or Neal Road. It's slopped over the canyon and is now running up the "other side".
Jon

9894. Butte update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 01:58:17 UTC
From: Jon Casamajor
Topic: 9894 Message: 9894

Airtac just reported to the IC that the spread of the Paradise fire has been "contained". I think I heard 35 acres but he broke on my handheld here. They have released tanker 89 back to Grass Valley. the pilot, "Hoser" thought he might have a right side fuel leak on his rig as his fuel volume went way down quickly!
Skyway IC just requested two additional strike teams and hand crews.

Jon

Topic: 9894 Message: 9897

The AT is starting to release the copters. C205 is leaving at 2030 with his crew back to Vina. I didn't hear about C510 the Chester copter's release. Sounds like an all nighter. Maybe take a drive up there in the morning to have a look. No wind now in Chico so they probably have it pretty soon. Airtac thinks the retardant has a pretty good line around the head and flanks. He thinks it will hold.
Pretty active fire! Season has arrived in Butte county for sure. Sounds like a really good job knocking this thing down in 105+ temps! Good show! AT says it 85-90% contained at 20:23.

9899. Santa Clara Unit Update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 15:44:29 UTC
From: Craig Rose
Topic: 9899 Message: 9899

CHINA FIRE: I don't have a lot of detail on this fire at this point other than it has potential to reach 2,000 acres. It started in a very remote location in extreme eastern Santa Clara County. Planning has requested the following resources thus far:

- Four Tankers
- Three Copters (one Type 1, two Type 2)
- Three STs of Engines
- Three Hand Crew STs
- Three Dozer STs

In addition, CDF has requested the assembly of the area Support Team comprised of members from various local departments to assist with overhead.

Of interest to those of you up north is the radio communications conflict that took place yesterday between the AIR OPS here and the AIR OPS in Butte. Apparently our folks down here were causing interference for the folks up north working their fires. New frequency for AIR OPS on the CHINA FIRE is - AIR TACTICS 151.2875.

Cheers!

Don't know if you have found out by now....We opened a new station at Paynes Creek. It is replacing Lassen Lodge. We also opened a new station at Manton.

Jake H <yahoo@...> wrote: I'll ask around, but I noticed that too. I wonder if they're staying
at the Company 21 building, or at Ishi. But it would seem they would
say "Ishi" instead of "Paynes Creek". It makes sense that it gets the
engine into a more playable field, especially now with the wetness and
snow still up in Mineral area. If I recall, it's still permissive
burning up there until June 30th due to the wetness this year.

Not sure what they will done once both engines come online at Lassen
Lodge.

9903. Grass Valley fire exercise today (6/24)

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-24 17:28:54 UTC
From: Harry Marnell
Topic: 9903 Message: 9903

From http://www.theunion.com/apps/pbcs.dll/article?AID=2006106240169

More than 300 firefighters from surrounding counties will converge today on Brunswick Road and Greenhorn Road in Grass Valley for a mock wildland fire drill.

Firefighters will not set any fires for the drill, but fire engines will arrive by the dozens, along with fixed wing aircraft and helicopters.

Firefighters from surrounding counties will be working from 8 a.m. to 8 p.m. on air-to-ground communications, logistics and incident command coordination.

Verizon Wireless is also providing a generator-powered mobile temporary cell site to support wireless communications for the firefighters participating in the wildfire training.

Topic: 9881 Message: 9904

Spent several hours up in the area taking lots-o-pictures. Some turned out decent. Unfortunately, got a spec on my filter in my camera that showed up on 2/3rds of them in the upper-center third of my shots. Grr...

Anyway, while I didn't get any pictures of actual flame (wanted to keep out of the way of firefighters and emergency services), I got tons of pics of aircraft and a few engines, water tenders, etc.

http://photos.yahoo.com/larishphotos@...

The album is named "Skyway Fire 6-23-06"...

Topic: 9912 Message: 9912

The Bald Incident is a re-kindle of the fire from a couple of days ago. TGU has sent 4 hand crews there so far and BTU has multiple resources on it. Also very heavy activity in LMU which was struck with electrical storms. SHU has sent one strike team of engines so far and TGU is sending a strike team of hand crews. Also right now it looks like Plumas is getting hit with lightning so look for resources going there.

From: hosgs1@webtv.net
Topic: 9913 Message: 9913

Well this fire is out but I though since no one posted ill do a quick one.

around 3pm a fully involve structure fire (2 story barn with propane tanks in them) was on.

1rst unit on scene stated propane tanks were going up (exploding?).

there was a full response wih 3 tanker orders and 1 copter (I believe 206?). this fire got 1 acre of vegitaton and thats it. (good work on the fire fighters!).

air attack said over head there was a strong possibility of numerious spot fires starting but didnt happen. thank god for no wind. due to the high fire response they got this one before it got bad and escaped.

anyways record searchlight should have something on his in the morning.

-Ron

116 degrees in redding in my area.

9914. Heli-Tanker 102 ?

9918. NorCal running thin

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-26 06:09:13 UTC
From: Jake H
Topic: 9914 Message: 9918

Strike teams of engines and crews are bouncing everywhere. High dispatch levels are throwing a lot of resources at every spark, which is good, but drains the system pretty fast. Lassen/Modoc is working countless lightning fires and drawing in resources from Shasta and Tehama as well as air resources. First in tankers for the valley are now Grass Valley and Ukiah, not the greatest response times. Copter 104 is up here, and I guess 102 is up here too but was sent to LMU maybe?

Keep an ear out, the week is still very hot. The norcalscan.org live scanner is kicking, with TGU 1st priority and BTU 2nd priority. Numerous tactical, command and air tactics are scanning as well in case something breaks.

From: Pamela Alley
Topic: 9921 Message: 9921

Swedes Flat Road, above Oroville, between Oro Bangor Hwy and Forbestown Road.

Initial fire, appx 1 acre. Five additional smaller fires about 1/2 acre each further on up the road for total of SIX.

(Shades of last month's multiple Cherokee fires, come to that...)

Five additional engines after intial callout; IC is continuing up the road to make sure all are located.

Swedes IC on Tac 12
Butte Fire 151.400

The east side of the Tahoe NF and the west side of the
Toyiabe NF got hit pretty hard yesterday evening with
the same lightening outbreak.

The Tahoe is working several small lightening fires and
the Toyiabe has a developing fire in Balls Canyon (Balls fire)
on the east side of Sierra County west of Hwy 395.

Seats working out of Stead AAB with a heavy air tanker
on request.

Dave

Alas, every summer we have a new crop of readers/contributors on here...
as well as us OBGs... most of whom either don't know or can't remember
all the acronyms we don't use 10 months of the year. And then the posts
fly back and forth about "make yourself a list" or "Google is your
friend."

I concur with Pamela, that the forest or ranger unit MIGHT be spelled
out just ONCE in the initial post about new fires.

Harry

Same situation exists in Alpine County too. Amador-El Dorado has administrative responsibility and responds to the Kirkwood area. Tuolumne-Calaveras responds to the Bear Valley area in the south. Since the vast majority of wildland in Alpine is Federal, most of the CDF responses are car wrecks and scraping snowboarders off the sides of tree trunks.

Cant get any more info on this. they are sending Tehama co. e2553, e2572 to help.

redding county fire dispatch are dspatchng using handie talkies because of the power out at the center.

Co Fire 154.430
CDF 151.160
Tehama Fire 151.370

they now got the power on and doing test tones.

This could be a good time to promote my home-made statewide map and frequency guide. It has been around a while, not updated in a few months, so if anyone checks it out and sees a missing or changed dispatch frequency let me know and I can update it.

I am only interested in county-level dispatch nets, I don't have the room for any more detail. This map was created for when I travel around the state, and I figured others might enjoy it as well.

I think someone said it was ok to make one post here about out of area significant incidents. For those unaware the Great Basin, specifically Nevada is getting absolutely hammered the last couple days. Several VERY large fires, but the largest I ve heard about is the "Suzie" fire along I-80 near Carlin, NV. 1500 Hrs today update is 40,000 acres and growing. This fire is only 24 hours old!

No more posts from me on this but here is a good link for those interesed:

Very nice. And since you asked, Humboldt now has a County Fire Net on 154.07R; dispatching is from the HUU Command Center. Covers most all locals except Eureka, Fortuna and Arcata.

Also, I don't know if it's really a County Net, but "Howard Forest" in Mendo on 153.95 seems to come close.

9953. Transition to Gel

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-27 03:34:09 UTC
From: George.Cusack@alldata.com
Topic: 9953 Message: 9953

What are the Northern CDF tanker bases using, left over mud or the new gel? Columbia, which did extensive testing with the gel last year, is using it exclusively now, and there are some issues. I am basing this on Air Tac traffic from 2 incidents - a small one at Lake Tabeau in Amador late yesterday, and a pretty good one today at New Hogan in Calaveras.

1. The gel is drifting a lot more on the drop than mud does, so the drops are landing further downwind than intended. The Columbia tankers, who worked with this stuff last year, were having some problems yesterday. Tonight, the visiting tankers, some of whom had not used it before, were really having an adventure.

2. The gel is incredibly slippery when first applied, so the AAs are very concerned about getting drops too close to hand crews and other units on the ground.

In a related story, one of the tankers on the Hogan Incident this evening hammered a copter in the air with a retardent drop. Dunno if it was mud or gel. The copter had to land to clean its windshield (and maybe clean some underwear).

Just to add to the confusion, MNF is working several lightening fires tonight from what I'm hearing on my scanner in Chico. Nothing really of concern so far but, typical of MNF, they are hard to get to. I'll have a look at their web page in the morning and post an update.

Lots of lightening around tonight and news says probably more tomorrow. Just what we need eh?
Tom Head lookout just comitted to stay on until 24:00 and monitor all night if she is needed.
All the traffic is on 169.175 MHz

9957. Nevada Fire update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-27 04:15:38 UTC
From: nitrobear@comcast.net
Topic: 9957 Message: 9957

Here is an news update from Ch 10 in Sacramento. Sounds like Northern Nevada got hammered today . The buildups were pretty impressive and back tomorrow up towards Lassen NF.

Nearly Two Dozen Fires Blazing in Nevada
Stretches of two major highways in Nevada are closed due to fires.

Firefighters are trying to get a handle on two brush fires just east of Carson City in the Mound House area. The fires have jumped US-50, forcing its closure in that area. An estimated 1,000 acres have burned.

The Sierra Front Interagency Fire Dispatch Center says from 100 to 300 residences and businesses in the area are threatened. Voluntary evacuations have been requested in some neighborhoods.

The Carson City fire is one of nearly two dozen lightening-sparked fires in Nevada. Another one has consumed about 1,000 acres of forest near the California-Nevada state line about 15 miles northwest of Reno.

The largest blaze has scorched more than 40,000 acres about 20 miles west of Elko. The fire has closed Interstate 80 near Elko for a second day.

Evacuations have been ordered in two rural communities near Elko and flames burned within one-quarter mile of homes about 15 miles.

High temperatures and high winds are hampering firefighters' efforts. More lightening and thunderstorms are forecasted for tonight.

I don't find "air attack" on the federal site at
http://www.nifc.gov/fireinfo/glossary.html , but it has "Lead Plane:
Aircraft with pilot used to make dry runs over the target area to check
wing and smoke conditions and topography and to lead air tankers to
targets and supervise their drops."

OTOH, the CDF site doesn't have "lead" but *does* have "Air Attack:
Air attack planes fly over an incident, providing tactical coordination
with the incident commander on the ground, and directing airtankers and
helicopters to critical areas of a fire for retardant and water drops.
CDF uses the OV-10As for its air attack missions."

I think I saw something in the past week or so that the mud was about gone and the powers at be were having problems lining up gel. I haven't heard complaining from the air tac folks that I've been listening to. The biggest air show so far close by was the Skyway incident. No mention in that traffic about problems that I heard. Now that I think about it, they were being cycled through Chico air base I think. I don't remember if Chico played with gel last year or not but I think they may have.

As far as the gel goes there was some concern due to lawsuits against the state due to some possible illegal bidding practice with an injunction against CDF barring them from buying any new gel, which left whatever mud and gel was in the tanks from last year but supposedly they were ok to start ordering new gel before supplies ran short.

Plumas also has a new fire net. 155.085 (R). I believe tac 2 is 153.860.
154.190 is still being used around Lake Almanor area last I heard.

Later,

Harry, the lead plane does just that. It leads the air tankers in to where he wants the drop laid down. The lead will usually trail a white smoke plume for the tanker pilot to see. This indicates where the lead wants the drop.
The air attack is usually in charge of the tankers and orbits the fire from a higher altitude...

Resources are real short up north. Last night I heard someone say that they needed resources to respond to a fire in Lassen Modoc Unit (LMU) because LMU was out of resources. This morning on BTU a strike team leader for crews out of Valley View was told they had to respond to LMU after some crews rest (they are presently completing an all nighter on the Bald Incident) so arrangements were being made for them to go to Ishi camp for R/R before continuing to LMU. I wish we had a resource on here from LMU to tell us what is going on up there. We know they are getting hit by massive lightning the last two days.

Steve

Some units are still using Red mud. Chemonics out of Orland Ca still makes it but I don't know for how long. Some of my F/F's drive truck and are still making deliveries. Some complaints about the gel are from the Carps & Coots folks (US Fish & Wildlife) seems it sticks around TOOOOOOOO long. Even after winter raims its still there. The Mud battle continues.....

From: Pamela Alley
Topic: 9970 Message: 9970

I think the 'inequitable' part is inaccurate--after all, we got most of the forest, right?

You guys just have that stubby lil brushy stuff, how hard can that be? :)
Oh yeah, and a zillion people with swimming pools... :)

Topic: 9971 Message: 9971

Looks like the storms are really starting to build again.
For the second day in a row there is an active cell pretty
much over Tom Head lookout, they just reported the first
strikes. Also plenty of storms over Lassen, Modoc and starting
to creap into Shasta and Butte soon. Look out may have
to get resources from down south.

Or, because that's all that North Ops can handle!

Actually, North Ops also covers Hawaii and the Pacific Islands on the Fed side, so maybe that's why the inequitable split.

John... who's obviously from SoCal

Yesterday northern nevada and norcal were pounded by dry lighting. Multiple starts are burning right now. While i was at work yesterday, i heard the inital dispatch for the Linehan Complex, withing 2 minutes i could see a well defined colum going up. The western flank was visable all night from carson and douglas counties. A red flag warnign is up once again today for dry lighting.

I love the sense of humor we all have, but it's a busy time for norcalfire with the countless
lightning fires happening and lots of resources moving. If the topic of the message changes, please change the subject line to match.

The fire posting has been outstanding. Too bad we don't have any representation from the LMU. I might switch my live scanner to my ham JPole which is on the neighbor's tower at 40ft ;) That could probably pull in LMU pretty good.

Thanks, that is all, over and out
Jake

It's good to have you on board Ray. A few minutes ago I just put the scanner on the JPole up 40ft on the neighbor's tower. Everything scratchy just came in perfectly clear. I'm trying to listen to LMU right now.

Todd, try 151.250 for CDF. Not sure if there would be any worthwhile county fire activity. Try 168.750 for Modoc Forest.

Taking heavy lightning strikes now on the Plumas.
Emergency evacuations ordered for Maddalena Rd
just east of Beckwourth off of Hwy 70 east of Portola.

Fire threatening structures.

170.550 PNF
155.085 Plumas Fire net
156.090 Plumas SO

Going to disconnect all the antennas for now...
More to follow afterwards...

Todd...

9985. Re: [NorCalFire] Transition to Gel

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-28 01:32:17 UTC
From: nitrobear@comcast.net
Topic: 9953 Message: 9985

Hi Dan,
I guess I've heard that complaint also. I'm going to date myself here, but when we started using retardant in the 60's, PhosCheck and then Firetrol, you should have heard the screaming about what was being used on the forests. The enviornmentalists were not as visible then, but there were still some, mostly just ignorant, who thought is was a horrible thing. The folks who embraced it were those of us who were charged with putting the fire out of course! Retardant drops were nothing short of a MIRACLE!
When this started, I think it was not much more than emulsified clay. Then they put fertilizer in it to accelerate re-growth after the burn. The fact that it helped restore the area seemed to quiet the complainers. I'm not sure what is in the gel but my bet is that it works better or they wouldn't be dropping it.
I will never, ever forget getting my Macho, 20 year old fan NY saved by a drop up near Hat Creek on the LNF. A couple of us got in a mess of 10' tall Manzanita checking the perimeter for a hose lay, yep, we only had two small tankers on scene, not much water, people or hose.
The wind shifted as the brush exploded and we were in trouble. Tanker 17, an Aero Union B-17, was on scene and dumped his load right on the flare up and us knocking the flare up and the stupid foremans flat. I've never complained about being "pink" again! :-)
Mud, Gel...keep it coming as long as it helps the troops fight the battle! Retardant can't compare to the mess after any fire can it?
Sorry to vent but, this stuff is critical to the efforts of so many firefighters that it can't be compromised.

From: Ben ben96cal@...

Interesting food for thought.

I doubt the state would ever split BUT , if it did ....
One " part " would probably stay " California" and the other half
would add either North or South to it. Now the part that remains
just " California" saves a BUNDLE cause they don't have to change all
their buildings , highway patrol vehicls , Forestry vehicles etc etc to
show the change.

so WHO would decide ? does S.Cal get to be California
or N.Cal get to be California.
and WHO decides where to split it ?

Jake,
A Yagi antenna would probably be better. You are probably blocked real well by Lassen and the high ground up there. We had a place at Almanore that heard LMU real well but, I 've never heard them in the valley.

9994. Red Flag Waring up today

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-28 01:52:53 UTC
From: nitrobear@comcast.net
Topic: 9994 Message: 9994

I haven't seen it reported, but the :"Sierra front dispatch range" is under a Red Flag Warning today, 6/27 due to moisture feeding thunderstorms, dry lightening probability.low humidities and erractic wind potential for the day and evening.
:Listening on my AM radio this afternoon, I've heard lots of activity and seen build ups on the Plumas, Mendocino National Forest(MNF) and Lassen National Forest (LNF) I've heard lots of air patrols around today and a few fires spotted on the Shasta forest (SNF}, MNF and LNF. Also, the Plumas National Forest, (PNF) has some fires going I heard today.

LNF is 172.225
MNF is 169.175
SNF is 171.575
Could be an interesting couple of days.

Just heard Jumper 51 talking to B11 on 151.575. He is returning to Redding. B11 offered an engine that was close by for water and he waved it off.
Didn't hear how many jumpers went out.

9997. PNF - Follow up (1)

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-28 02:34:58 UTC
From: Todd
Topic: 9997 Message: 9997

T-cell mostly over the area now. Plumas SO having difficulty getting residents to evacuate. Order put out to leave or go to jail.

PNF IC is Div 1. Air drop just called in. Called out all outlying area fire districts for support. Not enough PNF fire units to handle. Fire moving south/southeast towards Hwy 70.

CHP closing Hwy 70. Traffic being diverted at Hwy 49/Vinton for westbound. County Rd A-23 for westbound.

Portola city fire working lightning strike behind the hospital.

Most fire traffic moved off to 154.385 (I show as Sierra County fire)

170.550 - PNF
156.090 - PCSO
154.920 - CLEMARS
153.785 - Sierra County SO
154.385 - Sierra Fire

More to follow...

9998. PNF - Follow up 2 and final

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-28 03:11:12 UTC
From: Todd
Topic: 9998 Message: 9998

Fire winding down. Air tanker reported to PNF
returning to Chester as out of time and low on fuel.

Local fire districts releasing crews and returning to
respective areas. Only damage I heard of was a
shed and woodpile near a home. These guys did
an awesome job - mostly all volunteers! Few crews
remaining to mop up...

Final post on this incident unless I hear anything else
reportable...

Later,
Todd...

This is an OT response, but none the less I feel that this
is an important issue. I've always felt in the back of my
mind that Plumas county did things their own way...

There is an extremely heavy law enforcement presence up here
to begin with. Some like it, some don't.

But I do know that this order tonight came from whom I
believe to be the Sheriff himself - callsign 1A3. He actually
set up the CP for the SO side of this fire. Then told the
deputies to tell the residents to "leave or go to jail".

The actual evacuation order came from the PNF IC
who stated that it was a "mandatory evacuation order",
so I think that's were the SO was coming from.

I think you'd be hard press to fight it out in court.
And from what I've heard up here, they arrest you,
and then arraign you within a couple of days.
Usually within 48hrs. So you get to spend in what
we call the Quincy Hilton, a couple of days...

And as the locals up here say:

Visit on vacation,
depart on probation...

Sorry to the group for getting off topic...

Later,
Todd...

Well the Red Flag conditions kicked in around 3:30-4 today, westflank and Bravo Divsion blew up, the fire jumped the retardent drop along the face of McClellan peak and is now heading west, and burning very active. The Balls Canyon fire blew up along the Alpha Division. Look at Sierrafront.Net for more info.

10011. RE: Mandatory Evacuations

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-28 06:18:38 UTC
From: Larish, Michael
Topic: 10011 Message: 10011

>"Failure to evacuate is not a crime in this state, and no law enforcement officer can force a consenting adult to leave his/her home."

Not entirely true. It's a gray area and has been interpretted by different cities and counties and even courts based upon different statutes. Butte County has taken a conservative approach and does not call them "mandatory" but rather "immediate evacuations" but won't take anyone out unless there are other issues with compentancy giong on.

However, within California, penal code 409.5 allows various types of officers to close areas based upon certain criteria and then make it a misdemeanor to not evacuate or return after it has been closed. We've used it upon occasion.

_____
409.5. (a) Whenever a menace to the public health or safety is created by a calamity including a flood, storm, fire, earthquake, explosion, accident, or other disaster, officers of the Department of the California Highway Patrol, police departments, marshal's office or sheriff's office, any officer or employee of the Department of Forestry and Fire Protection designated a peace officer by subdivision (g) of Section 830.2, any officer or employee of the Department of Parks and Recreation designated a peace officer by subdivision (f) of Section 830.2, any officer or employee of the Department of Fish and Game designated a peace officer under subdivision (e) of Section 830.2, and any publicly employed full-time lifeguard or publicly employed full-time marine safety officer while acting in a supervisory position in the performance of his or her official duties, may close the area where the menace exists for the duration thereof by means of ropes, markers, or guards to any and all persons not authorized by the lifeguard or officer to enter or remain within the enclosed area. If the calamity creates an immediate menace to the public health, the local health officer may close the area where the menace exists pursuant to the conditions set forth in this section.
(b) Officers of the Department of the California Highway Patrol, police departments, marshal's office or sheriff's office, officers of the Department of Fish and Game designated as peace officers by subdivision (e) of Section 830.2, or officers of the Department of Forestry and Fire Protection designated as peace officers by subdivision (g) of Section 830.2 may close the immediate area surrounding any emergency field command post or any other command post activated for the purpose of abating any calamity enumerated in this section or any riot or other civil disturbance to any and all unauthorized persons pursuant to the conditions set forth in this section whether or not the field command post or other command post is located near to the actual calamity or riot or other civil

disturbance.
(c) Any unauthorized person who willfully and knowingly enters an area closed pursuant to subdivision (a) or (b) and who willfully remains within the area after receiving notice to evacuate or leave shall be guilty of a misdemeanor.
(d) Nothing in this section shall prevent a duly authorized representative of any news service, newspaper, or radio or television station or network from entering the areas closed pursuant to this section.

T-cell mostly over the area now. Plumas SO having difficulty getting residents to evacuate. Order put out to leave or go to jail.

PNF IC is Div 1. Air drop just called in. Called out all outlying area fire districts for support. Not enough PNF fire units to handle. Fire moving south/southeast towards Hwy 70.

CHP closing Hwy 70. Traffic being diverted at Hwy 49/Vinton for westbound. County Rd A-23 for westbound.

Portola city fire working lightning strike behind the hospital.

Most fire traffic moved off to 154.385 (I show as Sierra County fire)

170.550 - PNF
156.090 - PCSO
154.920 - CLEMARS
153.785 - Sierra County SO
154.385 - Sierra Fire

Amador has interpreted much like Butte. We can't force you to leave, in most cases, but if you do, we can prevent you from returning.
Biggest problem here is the critter factor. We won't leave our pets - or barnyard animals. Texas fixed that one this year by making it mandatory for all shelters to accept pets. Does that mean you can reserve the cot next to you for the family longhorn? Dunno, and not sure I want to know.
Thank you guys for your responses. Figured it would be a hot button.
Jake - You can be "over" or you can be "out", but you can't be both at the same time.....

Subject: [NorCalFire] RE: Mandatory Evacuations

>"Failure to evacuate is not a crime in this state, and no law enforcement officer can force a consenting adult to leave his/her home."

Not entirely true. It's a gray area and has been interpretted by different cities and counties and even courts based upon different statutes. Butte County has taken a conservative approach and does not call them "mandatory" but rather "immediate evacuations" but won't take anyone out unless there are other issues with compentancy giong on.

However, within California, penal code 409.5 allows various types of officers to close areas based upon certain criteria and then make it a misdemeanor to not evacuate or return after it has been closed. We've used it upon occasion.

_____
409.5. (a) Whenever a menace to the public health or safety is created by a calamity including a flood, storm, fire, earthquake, explosion, accident, or other disaster, officers of the Department of the California Highway Patrol, police departments, marshal's office or sheriff's office, any officer or employee of the Department of Forestry and Fire Protection designated a peace officer by subdivision (g) of Section 830.2, any officer or employee of the Department of Parks and Recreation designated a peace officer by subdivision (f) of Section 830.2, any officer or employee of the Department of Fish and Game designated a peace officer under subdivision (e) of Section 830.2, and any publicly employed full-time lifeguard or publicly employed full-time marine safety officer while acting in a supervisory position in the performance of his or her official duties, may close the area where the menace exists for the duration thereof by means of ropes, markers, or guards to any and all persons not authorized by the lifeguard or officer to enter or remain within the enclosed area. If the calamity creates an

immediate menace to the public health, the local health officer may close the area where the menace exists pursuant to the conditions set forth in this section.
(b) Officers of the Department of the California Highway Patrol, police departments, marshal's office or sheriff's office, officers of the Department of Fish and Game designated as peace officers by subdivision (e) of Section 830.2, or officers of the Department of Forestry and Fire Protection designated as peace officers by subdivision (g) of Section 830.2 may close the immediate area surrounding any emergency field command post or any other command post activated for the purpose of abating any calamity enumerated in this section or any riot or other civil disturbance to any and all unauthorized persons pursuant to the conditions set forth in this section whether or not the field command post or other command post is located near to the actual calamity or riot or other civil disturbance.
(c) Any unauthorized person who willfully and knowingly enters an area closed pursuant to subdivision (a) or (b) and who willfully remains within the area after receiving notice to evacuate or leave shall be guilty of a misdemeanor.
(d) Nothing in this section shall prevent a duly authorized representative of any news service, newspaper, or radio or television station or network from entering the areas closed pursuant to this section.

I patrolled the area west of town for CDF VIP as the cell went through and it was nasty. I did see the glow of the Ohm fire but it was right over the airport and I didn't know at the time if it was an airport light glowing in a cloud or a traffic light. (Didn't see lightning down there so didn't assume fire). Of course Inskip Lookout reports it minutes later. I should be fired from VIP. :) Got about 10min of heavy precip but the roads are already drying. Heh, some neighbors to high tension power lines in the area were out under the towers with flashlights as I cruised by. He said that pylon got hit twice. Luckily I only had to report precip and nothing else tonight. We'll see what pops up tomorrow morning.

Lightning, with D70, and hair on my arm raising before the strikes hit. :)

Oh, WOW. Nice shots--what setting were you using?

We never see lightning like that here...or at least, *I* never get to see it. Dog hiding under the gas/brake/center dash console just doesn't work very well!! :)

Especially when there's two of 'em trying to fit in the same space and the third sitting in my lap....

Sure makes it easier to realize *why* there are so many fires with downstrikes like that....and DRY? Ouch!

It's pretty well-established that half the critter battle is in getting people to really understand what it takes to load em up and get em OUT as fast as possible, and how important a dry run can be.

So as usual, education is a major factor in helping firefighters do their jobs--you can't count on the neighbor's stock trailer in an emergency--he's using it! So you'd better either have your own if you live in high-risk areas, or have a 'safe area' which can be reasonably well-defended from fire, or reached in floods. (Of course, no fence is going to take a bunch of livestock slamming through it in fear, but you can do your best.)

I raise rabbits, which some of you already knew, and man, it's astounding how long it takes when you're moving at full speed! Even with carriers stacked and ready, it always takes longer than expected...by as much as a factor of two! And, in fire season, temperatures are always a concern for both humans and animals, particularly with rabbits, birds, cats, and other easily-stressed species.

If you have people in your areas who have animals (who doesn't?), particularly those with multiple animals and/or species, encourage them to plan ahead and be prepared. Talk to the professional disaster response teams that perform rescues, and see if they have literature which can be distributed with a liberal hand to feedstores, vet offices, and in person.

People gripe about moving their animals when a threat isn't absolutely, utterly, just-next-door imminent, but you might point out that moving one's animals BEFORE there's a mandatory evacuation is better than watching them flee, die of heat, flames, and/or smoke, and come back to smoking carcasses.

The rabbit community has really stepped forward on this; many people have posted that they have space for disaster housing for X animals of various species, and we are working on keeping that list as current as we can in various parts of the country.

Knowing there's somewhere to GO with the animals you value as much as you value yourself makes leaving a whole lot easier.

D70 in manual mode, shooting RAW. Set to bulb mode so I just hold the button down until satisfied (and these were single shots, I didn't get multiple strikes per frame so that tells you the amount of lightning in one strike). F/14 plus or minus a few stops between those shots. Me propped up in my side window, camera pressed against the cheek (my tripod enjoying a cozy box somewhere after the move...)

lg3 saturation was lowered for black/white
lg4 saturation raised to make the blue stand out
lg5 exposure really knocked down to make it visible, that was one HOT strike

Jake,
I have a nice Rebel 2000 which I use as a point and shoot camera on auto.
I feel stupid not knowing how to make all the adjustments you mention here.
I'd love to get great lightening shots like yours.
Congratulations on their turning out so awesome by the way.
I really enjoyed them.

I'm currently out at the Brins Fire in Sedona, AZ... Looks like we'll be tearing down and demobing around 1000 tomorrow (Thursday). At this point we really don't know whether we're headed to the Grand Canyon for the Warm Fire which blew up yesterday or the several fires in Northern Nevada. We're about 3 hours travel time from the North Rim and well over a days worth of travel to the Carson City area (we have a total of (7) 53' semi trailers, 3 command trailers and a shower/handwash trailer).

Either way, I know when I called NIFC this morning, it took a few rings longer than normal to even get thru to a live person.

10025. Strike Team enroute LMU

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-28 21:53:29 UTC
From: steve_j80917
Topic: 10025 Message: 10025

I overheard some bleed over I think, but it was Strike Team 9450C being dispatched to LMU. They would be out of Amador-El Dorado. Also heard earlier Strike Team 9483G arriving in Shasta. Have no idea where they are from there is no 4800 listed that I can find. Also Dozer 1744 arrived in Butte.

Steve

P.S. Eagle Peak Lookout is being manned but only with an HT.

Hello Steve,

ST 9450C is an Engine Strike Team from Tuolumne-Calervas Ranger Unit (TCU).

The engine numbers are in the 4400 series.

ST 9483G is a Hand Crew Strike Team from TCU

Dozer 1744 is from San Mateo-Santa Cruz Ranger Unit (CZU).

Rgds,
Jerry T.
WA6AVR
Columbia,Ca.

Jerry Tannhauser,

No he was right originally ST9450c is from Amador
Eldorado, ST9440c would be from Toulumne Calaveras...
Believe ST9483g is a hand crew strike team from Pine
Grove camp in amador el dorado

Madera-Mariposa Unit calling up a strike team for cover assignments in LMU. Rendezvous point is the Flying J in Turlock, and the destination is Susie's House (Susanville).

I personally know how long of a drive it is from here, since I've done it before. Scenic, yes, but long.

John Gleichweit, N6FOG, CA-OES 51-507

Well I know I am right about the numbers and where they
are from. But don't understand why ST9438g would be from
either of the Units, AEU or TCU. Looks like the north
finally gets to yank on the south chain for a while.

Crew strike teams are numbered different then engine
strike teams think they used to use individual camp
numbers back in the day like pine grove would be 4800
growlersburg would be 4700...

Gruppe,
A couple of hours ago an air unit for CA Dept. of Fish & Game reported into his dispatcher on 151.430 that he was observing four smoke columns which appeared to be unnoticed and unattended by the fire service and he wanted to know if any lightening had been observed in the area today to which he was informed "no".
I never did catch where this was but a short time later LPF was dispatching units to the area of Julia Pfeiffer State Park for an incident which I do not know what it is.
Did anybody hear if it was a fire?
Did anybody hear the transmission by the F&G unit?
Are these one and same incidents?

Kim

John,
Thanks for sharing this.
I always found the strike team numbering system confusing and even inexplicable.

Kim

A Type-I IC team took over what is now being called the Sierra/Tahoe Complex. Command Post is at Carson High School

Scott B

AJ Grantham <aj.grantham@...> wrote:
I'm currently out at the Brins Fire in Sedona, AZ... Looks like we'll be tearing down and demobing around 1000 tomorrow (Thursday). At this point we really don't know whether we're headed to the Grand Canyon for the Warm Fire which blew up yesterday or the several fires in Northern Nevada. We're about 3 hours travel time from the North Rim and well over a days worth of travel to the Carson City area (we have a total of (7) 53' semi trailers, 3 command trailers and a shower/handwash trailer).

Either way, I know when I called NIFC this morning, it took a few rings longer than normal to even get thru to a live person.

Warm Regards

10038. Air Ambulance Helicopter?

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-30 00:36:31 UTC
From: hosgs1@webtv.net
Topic: 10038 Message: 10038

was wondering if anyone seen a yellow with black strips on the side of a helicopter as a air ambulance?

looks identical to CHP H-16 except for the colors.

I could not get the craft ID or a closer look as I was driving past Shasta Regional Medical Center.

thanks,
Ron

Jake,
I was able to view the last pic on your page, med 45 and that was not it. however the color and markings were exactly the same but the ID numbers were on top,center near the blades and the nose,belly was longer. kind of looked like the old mercy craft but repainted.

thanks again,
Ron

btw......that was the first time i saw this. is mercy still flying theres? come to think of it I have not seen that one in while.

Last weekend for the multi-motorcucle crash here in Humboldt, the CDF Fortuna dispatcher told Copter 102 he was "getting a Mercy helicopter from Redding" and it turned out to be called alternately "Med 45" and then "PHI 45."

Here's this from http://www.phiwestcoast.com/ :
with this map at http://www.phiwestcoast.com/newmapPHI1.jpg
"Currently, PHI maintains 2 flight programs in California under the names Air Med Team and Mercy Air.

"Air Med Team operates 2 bases, one in Modesto serving the Central California Valley, the other in Columbia responding in the Sierra's as well as Yosemite National Park.

"Mercy Air is located in Redding in the Northern Sacramento Valley. Mercy Air maintains both a rotor wing as well as a fixed wing aircraft."

Several small fires in progress in Canyon Creek drainage near Junction City, Ca. One the "Creek" fire declared out by smoke jumpers earlier. Other the "Fisher" (I believe that is the name) is ongoing. Helo doing water drops out of pond adjacent to Trinity River across from Powerhouse Road. 9 minute turnaround. Helo released just before dark.

Awesome find Harry. This must be a brand new site since I dug the heck out of the Internet looking for this stuff when I re-did the shasta page on my site a month ago. I could only get their Arizona ops and they mentioned Redding as a contract in text, but that was it.

Yeah - it you look at link below you'll see the beautiful replacement to Mercy H-1. This is PHI Med 43 and it is nice. Med 45 is out of Weed thanks to Bob for the note on that. (same airport as Tanker 94 memorial)
http://www.phiwestcoast.com/images/Mercy%20EC%20135lg.JPG
Med 44 is the replacement for the Mercy Air fixed wing program.
Interesting the website shows a different plane than the records I have. I have N988AE which you will hear on the civilian air side as 988 Alpha Echo. It is a Conquest 441.
http://flightaware.com/live/flight/N988AE doesn't show RDD flights for the past month. Hmmmm
http://flightaware.com/live/flight/N416CS doesn't show any flights recently.

Air Med out of Shasta Regional is now contracted with Reach. It is Reach 5 up here.

http://www.norcalscan.org/misc/harvey.jpg (cheap shot)

Probably what you saw tonight - right behind the Yolla Bollas on Harvey Peak. There's a number of fires back here in the Yolla Bolla Wilderness where I've heard them ask to use chainsaws etc. over the air. I think this is the Harvey Fire, one they decided to let go and monitor instead of activally fight since it's in the wilderness.

I think YOU should be our Trinity "correspondent," Todd. ;-)

Trinity County's radio signals seem to have a habit of "What happens in Trinity, STAYS in Trinity." I'm in McKinleyville, and the only time I hear stuff out of TriCo is when either the Sheriff or County Net uses the Horse Mountain repeaters, Tone 4. Which isn't very often.

Yesterday afternoon I heard them tone out Junction City Fire to the vegetation fire "in the area of 8679 Canyon Creek Rd" on County Net (155.115) Tone 4, but after the initial dispatch I heard nothing else.

A lucky guess, I found it by goolging: phi mercy air

I just did the little javascript "last modified" thing on that page
(which doesn't always work) and it displays "4/30/2006 13:18:46" Some
interesting links on there, including their Comm Center.

I second you on that with Trinity Co signals, and Harry, you can keep your dirty signals from HUU on your side of the mountain. I'm trying to monitor Lassen/Modoc on 151.250 on my high antenna and Humboldt comes over instead. I was confused to hear Eel River traffic when I was expecting "Susanville" (when I just did Field Day off one of the Eel River forks...). I think I'm hearing tone 1 HUU.

My bevy of emails for the night are done. Good night.

Hey, the same thing happens with your/my respective Sheriff's Depts,
Jake... both using 154.74 repeater out. Never causes any problems for
me, but I don't know about for either agencies' deputies along SR36
and vicinity, though.

Off-topic and out.

10063. New start - Sierra NF

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-30 21:23:04 UTC
From: John Gleichweit PDA
Topic: 10063 Message: 10063

SNF responding to a fire in the forest. Mariposa County, T4S R19E S35 is the legal on it. I didn't hear the initial dispatch, so I didn't get thw full rundown on the equipment. USFS and CDF are responding, and there's probably 10 engines, 2 WT, 2 BC, 2 dozers, 2 helos, 2 air tankers and 1 AA inbound or at scene. If you can get a roan description, coult someone put it out on IPN for me? My number is CAL023.
TIA!

John Gleichweit, N6FOG, CA-OES 51-507

10066. SCU - Santa Clara Unit Update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-06-30 21:55:52 UTC
From: Craig Rose
Topic: 10063 Message: 10066

Quick update as far as resources south of most of you folks...

CDF Santa Clara Unit looks to be pretty much wiped out due to a vegetation fire in the area of Del Puerto Canyon just east of Santa Clara County in Stanislaus County. Last report was 600 acres, but I am not hearing anything direct from my location to confirm or gather any additional information.

Craig,
151.445 is CDF Tactical 11 I think. Not sure who down your way uses it. The propagation in that area of the spectrum has been crazy the past few weeks so you never know what you may hear.
I'm in Chico and during a local fire here, I was sitting in my family room with my hand held scanner and for about 30 minutes I was hearing Visalia CDF on 151.400, the local frequency for Butte county CDF. A lot of "ducting" goes on in the valleys when it's hot. ;-)

10073. Who uses 151.445.....

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-01 15:18:54 UTC
From: wireman1771
Topic: 10063 Message: 10073

According to my list the following units use this freq as:

Tac 11 - Mendocino(MEU) Siskyou(SKU) Shasta(SHU) Butte(BTU)

Dispatch - San Bernadino West (BDU) Santa Clara (SCU)

CT

10074. New Fire - Tom Head Lookout?

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-01 21:33:29 UTC
From: sh9730
Topic: 10074 Message: 10074

Ok, Im bored today...nothing happenin down south here yet, so I see CHP CAD incident reporting LARGE fire behind Tom Head lookout in the MNF (Oh yea, Mendocino Natl Forest!).

Anything good?

10075. What is....?

Yahoo group: norcalfire (2005 — 2016)

10076. Re: [NorCalFire] What is....?

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-01 22:53:44 UTC
From: Pamela Alley
Topic: 10075 Message: 10076

I think it's the same there as here...they are statewide CDF frequencies that are used for incidents--'tactical frequencies' which carry the heavier, more local traffic associated with an incident. Keeps all the back and forth off the main dispatch frequencies.

White 2 is 154.265; White 3 is 154.295, at least according to my list.

Hope that helps...

PA
Oroville/Butte Co

http://fire.norcalscan.org/cdf/cdfradiogrid.htm

That is an exclusive layout of the CDF freqs and how they are re-used throughout the state. This is a good list when ducting is happening and you're suddenly hearing somebody else that normally isn't there.

10080. Re: [NorCalFire] New Fire - Tom Head Lookout?

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-02 02:07:44 UTC
From: Jake H
Topic: 10074 Message: 10080

I believe this is the Harvey Incident that was discussed earlier with the picture of the plume from the valley. I'm sure CHP just put it on CAD since they were getting lots of calls from travellers. It is a good column. This fire, as seen from the valley, is behind Tomhead peak. It is actually deeper into the wilderness and as far as I know, isn't/shouldn't be threatening the lookout (well, 5ish miles as crow flies northeast of fire.) I haven't been listening to anything for 1.5 days though (wedding in family) so things could have changed. I have been keeping an eye on the smoke up there - definitely grew in size and might be seeing flames from the valley along the ridge (if it is indeed threatening Tomhead.)

I think I heard last week a few strikes right below the lookout and that she had to stay awake and active until a crew got there or an airdrop occurred so it wouldn't sneak up on her. She was stating something Friday about being relieved shortly (after 3 days of probably 24hour eyes-open, squatting on the lightning stool, I'd want a relief too.)

Thanks all.. yes they are the same here.
Always wondered..
Since we live upcountry we like to keep the scanner on.. especially after last years Power Fire! :)

From: nitrobear@comcast.net
Topic: 10074 Message: 10082

Not to drag this out but I heard the lookout say she was on the stool for awhile and was pulling the plug because stirkes were within a mile She, fairly quickly came back on and said she was back on the air. MNF, (Mendocino National Forest), dispatch was concerned that the cell had passed and she said it had lost it's punch and was moving east.
A little later, maybe 10 minutes, she came on and I think might have been talking to a mobile MNF unit and told him that she would be on until 24:00 and would leave the radio on in case anyone needed help or a relay.
I've been up to that lookout. It's a great radio location and just sees about everything from Redding to Yuba City +/- haze and smog. I suspect it really attracts strikes too! ;-(
If the lookout is 5 NE of the fire, that probably puts it in the vicinity of the old Patton Mills area doesn't it Jake? I had a repeater up there in the brush field many years ago and that area was always ripe to burn. I doubt it was there or we would see it clearly from Chico.

White 1 cannot be used as a Tac net anymore. It can only be used as a command net. Changed about 4 years back.

To: norcalfire@yahoogroups.com
Subject: Re: [NorCalFire] What is....?

The three California "White" frequencies are for mutual aid:

White 1 - 154.28 (base/mobile)
White 2 - 154.265 (mobile)
White 3 - 154.295 (mobile), except...

By FCC rules, base stations are permitted on WHITE FIRE 1 (154.280) only [except L.A. County Fire Dept has a waiver for base stations on 154.295, as they were there before the FCC designated the frequency as "intersystem"].

Sorry gang, this is off topic but you can listen if you want. Mike, have you heard of any plans for your side of the river on the 4th?
Normally folks, Butte S&R, Butte CDF, HCFire & Glenn Co. S&R + both sherriff offices converge on Irvin Finch State Park (SR-32 10 mi. west of Chico) and try to keep everyone from drowning and OD-ing on Beer.
Commom freq's to monitor are;
White II - (Help I can't remember)
BTU - 151.400
TGU - 151.370
GCSO - 155.55
BCSO - ???
CHP - 42.5
Mike,If you hear of a briefing, let me know.

Harvey Complex Fire is 5 miles SW of Tomhead at 200 acres. There are
five fires in the Complex, with Harvey and Harvey 2 burning together and
being used for fire benefit in the Yolla Bolla Wilderness. The Ceder
fire is being suppressed and two other fires have possibly burnt out.
Patton Mills radio site is about 14 miles south of Tomhead. I've hiked
to that little shack-in-the-woods. :)

That's odd, since Visalia (TUU/Tulare County) use 154.01 and 151.19 for their dispatch and command channels, and usually use Command 2 for the SRA command channel.

Latest: cident: Boulder Complex Fires
Released: 2006-07-02 17:18:00
The entire area including: roads, trails, and campgrounds are closed for an approximate 6 mile radius around Antelope Lake in northeastern California. The lake surface is also closed. Reservations at Antelope Lake campgrounds have been cancelled through July 6; call ReserveAmerica for details. Closure will last indefinately.

Stolen from another board:

From this morning's 209: 39: Actions planned for next operational period: Continue burnout operations on Boulder Fire. Continue to secure and mop-up remaining 17 small contained fires. 40: Projected incident movement/spread during next operational period: Boulder Fire continues to increase in size to the East due burnout operations. 41: For fire incidents, describe resistance to control in terms of: 1. Growth Potential - High 2. Difficulty of Terrain - Medium 42: How likely is it that containment/control targets will be met, given the current resources and suppression/control strategy? 80% likely. 43: Projected demobilization start date: 07/04/2006 0800 44: Remarks: Heavy fuels are receptive to spotting.

Boulder Complex Fires
As of 7/2/2006 17:18, the entire area including: roads, trails, and campgrounds are closed for an approximate 6 mile radius around Antelope Lake in northeastern California. The lake surface is also closed. Reservations at Antelope Lake campgrounds have been cancelled through July 6; call ReserveAmerica for details. Closure will last indefinitely.

As of 7/2/2006, 12:18:
The Boulder Fire, located along the northern shore of Antelope Lake, is the largest fire in the 3200 acre Boulder Complex on the Plumas National Forest in northeastern California. Containment is now projected for late Tuesday, July 4 and control on Saturday, July 8. Firefighters will continue burnout operations today to secure the southeastern end of the fire. The fire is burning slowly towards control lines, consuming light fuels located between the main blaze and the road. A column of smoke from the burnout was visible from Janesville and along Highway 395 throughout the day yesterday. Light ash also fell in some areas due to prevailing weather influences. Small spot fires ? mile ahead of the main fire are being picked up regularly. Sawyers are cutting down dead trees that are likely to fall across roads to make the area safer for fire fighters to complete the fire suppression work.

Two additional small lightning-caused fires were detected yesterday within the complex. Smokejumpers were dispatched from Redding to stop the fires, with assistance from helicopters and engine crews. Fire fighters continued to work to suppress burning material within the Hungry and Sage fires, also in the complex, which have been contained within fire lines.

The Fire Emergency Area Closure remains in effect for approximately a 6 mile radius around Antelope Lake. All National Forest lands, roads and trails within the Boulder Complex are closed to public access. This closure is necessary to protect public safety from the hazards of uncontrolled wild fire, including burned and unstable trees, heavy fire traffic on narrow roads and obscured visibility due to smoke. Campgrounds around Antelope Lake remain closed indefinitely.

Residents and visitors can find information about the Boulder Complex, including maps of the fire and the Antelope Lake Area Closure, at bulletin boards located at gas stations, post offices or stores in Taylorsville, Greenville, Susanville, Janesville, Doyle, and Milford. Fire Information Officers will be visiting those locations throughout

the day to provide updates about the current status of the fire and to answer questions.
About 638 people are fighting the fires today, including 17 twenty-person handcrews; 21 fire engines; 2 dozers; 11 water tenders; and 4 helicopters. One fire fighter was treated for minor smoke related injuries.

All other fires on the Plumas National Forest are contained including 3 new ones, located near the Lucky S mine, North Arm of Indian Valley and in the Bucks Lake Wilderness.

Ok, I guess my memory of the distance was flawed. I drove up to the shack once in my Jeep. Coming back down scared the #e!! out of me and I never did it again!

From: nitrobear@comcast.net
Topic: 10063 Message: 10095

John,
I thought so too. I was definatly listening to Visalia traffic. I've also heard them before on 151.400 when I was down the valley on my dual band Ham Xceiver that I have 151.400 programmed for Butte County dispatch. I know who to ask down there. A radio tech friend in Tulare would probably know how to explain it. ;-)

10097. Plumas National Forest(PNF) update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-03 01:06:23 UTC
From: nitrobear@comcast.net
Topic: 10097 Message: 10097

The Plumas National Forest (PNF) is still working the "Boulder complex" near Antelope lake. Here is an update from the Inciweb page. Check this link for more and regular incident information. Great asset and keeps the bandwidth down if you are looking for incident updates!

Incident Contact: Lee Anne Schramel Taylor (530) 283-7850
Incident: Boulder Complex Fires
Released: 2006-07-02 12:18:00
FOR IMMEDIATE RELEASE July 02, 2006
Contact: Lee Anne Schramel Taylor, (530) 283-7850
News Release #06-31
Lightning Fire Update
The Boulder Fire, located along the northern shore of Antelope Lake, is the largest fire in the 3200 acre Boulder Complex on the Plumas National Forest in northeastern California. Containment is now projected for late Tuesday, July 4 and control on Saturday, July 8. Firefighters will continue burnout operations today to secure the southeastern end of the fire. The fire is burning slowly towards control lines, consuming light fuels located between the main blaze and the road. A column of smoke from the burnout was visible from Janesville and along Highway 395 throughout the day yesterday. Light ash also fell in some areas due to prevailing weather influences. Small spot fires ? mile ahead of the main fire are being picked up regularly. Sawyers are cutting down dead trees that are likely to fall across roads to make the area safer for fire fighters to complete the fire suppression work.
Two additional small lightning-caused fires were detected yesterday within the complex. Smokejumpers were dispatched from Redding to stop the fires, with assistance from helicopters and engine crews. Fire fighters continued to work to suppress burning material within the Hungry and Sage fires, also in the complex, which have been contained within fire lines.
The Fire Emergency Area Closure remains in effect for approximately a 6 mile radius around

Antelope Lake. All National Forest lands, roads and trails within the Boulder Complex are closed to public access. This closure is necessary to protect public safety from the hazards of uncontrolled wild fire, including burned and unstable trees, heavy fire traffic on narrow roads and obscured visibility due to smoke. Campgrounds around Antelope Lake remain closed indefinitely.

Residents and visitors can find information about the Boulder Complex, including maps of the fire and the Antelope Lake Area Closure, at bulletin boards located at gas stations, post offices or stores in Taylorsville, Greenville, Susanville, Janesville, Doyle, and Milford. Fire Information Officers will be visiting those locations throughout the day to provide updates about the current status of the fire and to answer questions.

About 638 people are fighting the fires today, including 17 twenty-person handcrews; 21 fire engines; 2 dozers; 11 water tenders; and 4 helicopters. One fire fighter was treated for minor smoke related injuries.

All other fires on the Plumas National Forest are contained including 3 new ones, located near the Lucky S mine, North Arm of Indian Valley and in the Bucks Lake Wilderness.

The public is encouraged this 4th of July weekend to be cautious with activities that could cause sparks and to extinguish campfires and cigarettes thoroughly. Please check local fire restrictions before pursuing outdoor activities. Fireworks are not allowed anywhere in the Plumas National Forest.

For more information about Northern California fire conditions, weather, incidents, closure orders, and seasonal predictions, go to www.inciweb.org. or www.fs.fed.us/r5/fire/intel.

10098. Lassen Modoc fires

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-03 00:57:58 UTC
From: nitrobear@comcast.net
Topic: 10098 Message: 10098

I was up to Chester today and the copter, is it 415 or 520 these days, was on the ground and the crew was hanging around. I stopped by the Almanor Ranger station for another reason and asked how the lightening fire were coming along over by Susanville. The guy in the office thought they had everything pretty well under control if nothing new showed up He didn't know what the Plumas was dealing with outside of the Antelope Lake incident which LNF,(Lassen National Forest) had sent some assets to. Here is a report on the Lassen/Modoc fires.
Link is: http://cdfdata.fire.ca.gov/incidents/incidents_current

I also came down hwy 36 and drove by the Vina CDF base. Copter 205 was resting peacfully on it's new pad in the 98 degree heat with the doors open and nobody around the bird.

And I haven't heard much radio traffic on the
PNF net WRT these fires...Hear an occasional
air tanker talking to a ground unit, but that's
about it...

What a shame too. This is a beautiful lake.
Nice campgrounds, sandy beaches for kids
to swim, etc...Actually, I've only gone up
there once since the last fire a couple yrs
ago...

Later,
Todd...

Hi Mike,

The fire is located near Lake Don Pedro in southern Tuolumne County.

Near Hwy 49 & Hwy 120, closest towns are Groveland & Coulterville.

Sort of nortwest of Yosemite Nation Park.

Smoke and Ash is visible here in Columbia about 25 miles north of the fire.

Rgds,

Jerry T.

Hi Ron,
The 4WD climb Jake and I were discussing was on the Patton Mills property, near their HQ. There is a small, remote ham radio site that is just a bear to get up with a vehicle, well maybe a dirt bike, but still steep, rocky and not really a real road.
Tom Head lookout, on the other hand, is a good road right to the lookout. You go out of Paskenta on the paved road to the west and look for the turn off which as I recall is marked. I'll see if I can get you a map link and send it to you privately here.
It is worth the ride on a clear day!

Hi Pamela,
I was actually looking for the Nevada fires also. I'm not sure except that InciWeb is just USFS isn't it? I think there is a CDF equivilant in Nevada...Nevada Natural Resources or something like that. I'll sniff around a little bit.

Ron,
I was mistaken...again! I was thinking about Eagle Peak lookout, not Tomhead lookout! It looks like Tomhead is indeed a hike in lookout or a copter ride.
You can drive right up to Eagle Peak and it's a real neat location. I can send you a map for both if you are interested.
Sorry to confuse the issue! ;-(

Or Moccasin, or Chinese Camp, depending on what part of the lake (it is a big one). Moccasin has 3 buildings, including a Post Office. Chinese Camp has approximately 1, and it doesn't look habitable. La Grange, on the other hand, has a bar, so we know hat search priorities Mapquest has.

10122. Contra Costa County Fire on 33.440 MHz.

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-04 04:30:12 UTC
From: B r e n t
Topic: 10122 Message: 10122

Friends -

Recently, we re-installed a transmitter on 33.440 MHz. atop Kregor Peak near Clayton. It is multi-casting the same signals as our CON CENTRAL (160.110), CON EAST (159.615) and CON WEST (159.735) dispatch channels using a priority multiplexing-thing.

We used to broadcast on that frequency until about 6 years ago when the transmitter died. There is not a great deal of benefit for us from this transmitter but it is kind of fun from a hobbyist perspective.

As the sunspot activity increases, I will make QSL cards available for out of state people that can verify receipt of the transmission (email is bfinster@...).

Lake Don Pedro Fire Continues To Grow

Monday, July 03, 2006 - 10:50 PM

Lake Don Pedro, CA -- Starting as a mere 15 acre vegetation fire, the Lake Don Pedro fire had spread to 1,500 acres by 10:30PM Monday. C.D.F. reported the fire, first reported at 1:45, was caused by individuals setting up a campsite near Hwy. 49 and Marsh's Flat Rd.
By late Monday evening the fire was burning so close to the Hetch Hetchy power station it was causing lines to arc. Containment was listed at only 5%.
Moving in an easterly direction, the fire had not caused any injuries or structural damage at last report.

And there appears to be a second fire in Tuolumne County going right now:

Vegetation Fire On South Shore Of Tulloch
Tuesday, July 04, 2006 - 06:45 AM
Sabrina Sabbagh
MML News Reporter

Lake Tulloch, CA -- CDF and Tuolumne County Fire officials are reporting a vegetation fire on the south shore of Lake Tulloch.

Reports indicate the fire is burning more than 100 acres off of South Tulloch Road in Tuolumne County.

There are several strike teams with engines on scene and no structures are currently threatened.

Good location info, Harry. I believe that is the power station at Moccasin. Right behind it is about a 2000 foot wall called Priest Grade, with the town of Big Oak Flat at the top.

Lake Don Pedro, CA -- The first major fire in the Mother Lode is still burning strong.

Starting as a mere 15 acre vegetation fire, the Lake Don Pedro fire has spread to 1,500 acres.

CDF reported the fire at 1:45 yesterday, which was caused by people setting up a campsite near Highway 49 and Marsh's Flat Rd.

The fire is burning so close to the Hetch Hetchy power station that it is causing lines to arc.

Containment is listed at only 3%. CDF officials say the fire is moving in an easterly direction and has not caused any injuries or structural damage.

A briefing is scheduled to take place at 7:00am and more information will be available following the meeting.

*Where in this article does it indicate the CDF has "high hopes" in regards to this fire? Is it just me or is that headline really inane and stupid?

CDF Has High Hopes For Don Pedro Fire
Tuesday, July 04, 2006 - 09:45 AM
Sabrina Sabbagh
MML News Reporter
Fire crews rush to the scene of the Don Pedro Fire.

Lake Don Pedro, CA -- More than 250 firefighters are battling the 2,000 acre vegetation fire at Lake Don Pedro.

CDF official Nancy Longmore says their main goal for today is to contain the fire and get more lines around the blaze.

She says the fire is located two miles west of the Hetch Hetchy Power House at Moccasin and Highway 49.

Longmore says that although the fire is not contained, at this point it is not threatening any structures. Reports indicate the fire was started accidentally by people setting up a campsite.

Most newspaper reporters and editors are rather clueless. They'll rewrite a good headline to be stupid.

On another note, a nice header is visible from Turlock.

for those interested. I saw the copter on the 11 pm news last night
(krcr ch 7)

our local newscaster took a trip to climb MT Shasta and did a story on
it. well lo and behold there was the copter I saw with the reg numbers.
luck or what.

done a search on it and it is registered to PHI.

the guy said it was a rescue copter so unknown were it is stationed.
anyone can help me find out?
here is the link to the registry.

model: eurocopter, AS 35 B3

thanks,
Ron

This is a guess since I haven't been by Weed airport lately.

I believe N151AE is the PHI MED 45 copter which is based at Weed airport.

This copter (N151AE) was flying over 4th of July activities in Mt. Shasta this morning.

I drove down to Don Pedro this afternoon. The right flank is pretty well contained, but there is still active fire on the left flank - below Hwy 49 and east of a long, narrow stretch of the lake that runs NNE from the main body. Steep hills and ridge lines in this area. Fuel is brush, oak, and some digger pine.
2 tactical items I found interesting. First, copters are working with individual dozers to guide them with their line cuts in the heavy brush and steep terrain.
Second, CDF is using some of the lake's work barges to ferry hand crews from a crew staging area near Moccasin Point to a point further south on the narrow stretch of lake, where they are beginning a hand line. The barges will be standing by as the "escape route" for the crews. This operation started around 1600, and could be seen from the Hwy 49 bridge.

George,
Today I have been contemplating going up there for a night or two starting tomorrow after the holiday is done.
Does it look like it is going to be worth my time and money or does this thing look like it has peaked already? What is the potential for significant further growth as you see it?

Geez Kim. Tough call. The left flank has had a bunch of flare ups, but it hasn't really blown up at all. If it were any other state, maybe go, but I'd hate to bet against CDF on a fire like this.
The time to go would be tonight - for the fireworks show. Ops just ordered 30 gallons of drip torch mix for Division Bravo - the problem area on the left.

I am a little surprised at the size of this complex of fires in the LNF, (Lassen National Forest), NE of Susanville. Here is an update that is from this morning. I don't think there is much timber in that area but it is what it is and a pretty big fire for LNF. This is from the Inciweb site at: http://www.inciweb.org/state/5/

Am I the only one up this late after a commercial restaurant fire in Red Bluff? Countryside Deli, local sandwich deli on Main and Ceder. Good save, but the back half where all the storage was, and the attic got charred up pretty good. Extensive overhaul, water damage throughout the ceiling.

Pam - no excuse for not knowing Butte Support from your location :) 154.415 with a north repeater that you probably might hear, and a south repeater that you should hear. Although, this "hole" you're in might be a mysterious RF vacuum where you can't hear anything. Time to move. ;)

This helicopter is a AS350 A-Star owned by PHI (Petroleum Helicopters Incorporated)

The 151AE on his tail stands for Air Evac (They also own Air Evac services out of Phoenix AZ)

www.airevac.com

This ship is usually used in AZ as a reserve helo so it mustve been either relocated or filling in in reserve status for another one of their helos.

Passed a BDF STEN headed south on US395 just north of Reno.

I'm northbound heading for the Boulder Complex to cover the OASIS unit for a couple of days, and I'm stuck in construction traffic. Bleah.
John Gleichweit, N6FOG, CA-OES 51-507

cool thanks for the additional info Mike. I was wondering cause when I saw the first pic it was it was titled air evac 22 and near mesa,AZ.

pic was its first flight in service.

then I saw the weed pic.

well the mystery has been solved. thanks again guys for your help.

OASIS is the state's voice and data satellite comm system, connecting OES with various other state agencies as well as the EOCs in all Operational Areas. The system includes a number of trailers for field satellite comms. One of these is what John is towing to the Boulder Complex. The Feds "borrow" them quite often for remote incident command posts. I'm sure John and others in the group can give you more details.

I was thinking of a rehab station with a mist system under a canopy

with drinks,O2, and other items to revive firefighters in hot

weather. I know Phoenix F.D.uses these units. Thanks for the answer

learned somthing new today.

10161. Northern California update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-06 01:35:42 UTC
From: nitrobear@comcast.net
Topic: 10161 Message: 10161

Here is an update of the USFS fires in the northern part of California for today. Looks like the Tuolumne fire is a CDF show but still in the north despite the report saying it is southern Cal. Don't shoot the reporter! ;-)

Nitrobear
NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:
BOULDER COMPLEX, Plumas National Forest. A Type 2 Incident Management Team (Sinclear) is assigned. This complex is eight miles southwest of Susanville, CA in timber. Recreation sites
remain closed. Several residences, commercial properties and out buildings remain threatened.
Active surface fire, smoldering and creeping were observed.
HAPPY MILLER COMPLEX, Modoc National Forest. A Type 2 Incident Management Team (Paul) is assigned. This complex, comprised of fires within the Happy and Miller Complexes, is eight miles
northwest of Adin, CA and 20 miles west of Canby, CA. Interior creeping with some smoldering
was reported. No further information was received.
LAVA, Modoc National Forest. This fire is 44 miles northwest of Alturas, CA in old growth ponderosa pine and white fire. Backing, creeping and isolated torching were observed. The fire is
in monitor status.
YOLLA BOLLY COMPLEX, Mendocino National Forest. A Fire Use Management Team (Perkins) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is burning 35 miles west of Red Bluff, CA in timber. The
fire spread laterally and downhill.

10164. Pedro Fire - Tuolumne Co.

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-06 03:19:36 UTC
From: George.Cusack@alldata.com
Topic: 10164 Message: 10164

Radio traffic this evening indicates they are still working the Division Bravo area on the left, cutting hand lines from lake level up. Sounds like a continuation of yesterday's CDC/CYA Expeditionary Force that arrived on barges (now called Lake Group).
Big order for 2-cycle fuel mix, bar and chain oil, water, and batteries. These supplies have been trucked to Baseline and brought in on slings by the copters.
AA and copters ordered for tomorrow, but no tankers reserved.
Lots of concern last night among the command team that many of the hand crews had been working too hard for too long (regardless of how many days they CAN be kept on the line). They were trying to work out schedules to get the crews a minimum of 24 hours of "quality" rest - not on the ground at Sonora next to their buggies. Many of these crews came direct from 4 days on the brutal hills and deep canyons of Del Puerto.
Unless something goes upside-down or I hear something really interesting, this is probably the last post on Pedro from Cusack.

Later in the afternoon and evening it was determined to be a total of 10 fires, named 305-1, 305-2 etc. PGE truck claimed it had stopped to try and put the fires out. It said another vehicle was seen, possibly dragging chain or something that it thinks sparked the fires. Last seen heading east on Newville Rd. Prevention units from CDF and MNF were hopping like crazy down there.

Tanker 55 was on the fire, released to continue on to Minden, empty.

10181. PLUMAS NF Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-07 16:30:05 UTC
From: Dave
Topic: 10181 Message: 10181

The Plumas NF was working a new fire this past evening
using considerable air resources. With at least one heavy
air tanker (T-55) and two S-2Ts and multiple helicopters
and smoke jumpers.

I hear them again this am, starting an air show early.
Air Attack 17 is running the show this morning.

I have not figured out where the fire is. Anybody got
anything further?

It is called the "Foot" fire.

170.550 Plumas NF
169.150 Air tactics

Dave

A new fire started on the Plumas N.F. last night. The Foot Fire is reported to be 50-60 acres this morning. Two helitack crews and a load of smokejumpers worked the fire last night but had trouble with burning material rolling out of their control lines. This morning there are 25 additional firefighters plus 5 handcrews walking into the fire to help in containment. Airtankers and helicopters also came on duty early this morning to help support suppression efforts on the incident.

Dave,

Wildlandfire.com hotlist had a single posting on this
yesterday...saying it is near "Middle Fork"? That of course doesnt
help me at all since I m down south....but you prob know right where
it is!

At the time it was 15 acres and spotting....

Topic: 10181 Message: 10184

I'd like to say that I was nowhere near the Plumas last night. :@) We demobed Comm 61 off the Boulder Complex as NorCal Type I team was transitioning off and the Type 3 team was coming on, and were back in Sac by 1600.

The Boulder Complex is 100% contained, and about 90% controlled. They are still doing the full 300' cold line from fire edge, using mainly contract crews and engines. Yesterday's IAP is for 7/6-7/10, which is telling me that they are going to be clearing off the fire and closing it on the 10th.

From: nitrobear@comcast.net
Topic: 10188 Message: 10188

A Red flag warning has been issued for NE California and NW Nevada.

RED FLAG WARNING
NATIONAL WEATHER SERVICE RENO NV
829 AM PDT SAT JUL 8 2006

...RED FLAG WARNING THROUGH THIS EVENING FOR DRY THUNDERSTORMS
IN THE SURPRISE VALLEY IN NORTHERN CALIFORNIA AND IN NORTHERN
WASHOE COUNTY AND WEST CENTRAL NEVADA BASIN AND RANGE...

.LOW PRESSURE OVER CALIFORNIA WILL CONTINUE TO DRAW MID AND HIGH
LEVEL MOISTURE INTO THE WARNING AREA. THE LOW LEVELS WILL REMAIN
DRY AND THEREFORE ANY ISOLATED THUNDERSTORMS WILL PRODUCE VERY
LITTLE RAINFALL. LOW RELATIVE HUMIDITIES AND GUSTY OUTFLOW WINDS
WILL PRODUCE CRITICAL FIRE WEATHER CONDITIONS.

There was a red flag warning up there and some HUGE build ups for the past several hours visible from Chico. There is a "severe thunderstorm warning" that just expired for a storm between Mineral and Chester. Reno doppler shows the cell petty well. The weather service says there was "heavy rain" so shouldn't be anything explosive from the storm.
I heard the Strike team dispatch from BTU this morning and it sounded pretty generic in that no fire was mentioned. There sure could have been something I didn't hear later but I don't hear anything on the LNF frequency. I think there is a fire out of Redding I've heard air traffic on with two tankers and a copter but I didn't hear it's location.
From the size of the build ups today, I wouldn't be surprised if there aren't some new fires on the Plumas and Lassen. The AM radio was really buzzing this afternoon here.

There are still some 33MHz lowband freqs as an input into the 154.160
OES Fire system. This is most likely skip on lowband getting into the
remote base inputs on one of the mountain tops. OES's goal is to get rid
of the lowband inputs and strictly keep it highband VHF. No more skip
blasting across the microwave system ;)

10198. USFS Frequencies needed for R-5

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-08 21:40:38 UTC
From: sjfdjim
Topic: 10198 Message: 10198

Does anyone have a list, by frequency, of all R-5 USFS frequencies?

The "by forest" list is a hassle. I have a professional need to enter all of the frequencies in a few radios, and (lazy admission) I'd rather not have to poke through every forest list to see the total frequencies in use.

Reply here or e-mail me off list.

Thanks.

JIM

Kim -

What you are hearing is the legacy "OES 1" crossband pairing of 33.98 in / 154.160 out on the OES Fire Network.

For reasons I won't go into (too lengthy and inane), in the almost 15 year process of making this network VHF-Hi only a number of the repeater sites still have the lowband receivers connected live, even though all lowband user equipment has been removed from service. As the sunspot cycle gets better the next few years this will continue (until someone unplugs the lowband receivers).

> Which states utilize the term "township"?

Delaware and Pennsylvania are "frequent fliers" on the OES network, and have Townships.

Jake and all,
I think you nailed it Jake! Taking a look at the Telnet DX Packet network shows tons of ham band, 50 MHz, spots for most of today. Sporadic E?
Good call!

There was another band opening from the East Coast (North and South Carolina, Georgia, Alabama, at least) to Central California on 6 meter ham frequencies (just above 50 MHz) this morning, even on FM, and there have been several such openings very recently. So, 33 MHz having propagation characteristics somewhat similar to 51 MHz, Jake's idea about the source does sound feasible.

Cap,
Thanks for the further information.
Does the current solar activity contribute to any of this?

Any time the Sun has Flares or the Sun spots have activity it cause havoc with the frequencies. They actually bounce and skip around the atmosphere...DX [distance] . Usually occurs at night... on ham or CB radio, you can shoot skip and talk to folks aroind the world. Ever listen to late night radio and you can hear an AM station from 3 states away better than a local one? One of those wonderful phenomenoms!

Carolyn,
I was aware of the nighttime AM radio skip phenomenon and of the scanner skip in the morning on the lowband but never high band skip when it was almost evening.
I got it figured out now with all the responses and thanks for your's too.

Topic: 10189 Message: 10209

the nighttime AM radio phenomenonm is due to the lower absorption of the signals in the ionosphere at those frequencies. You will hear multi path, or phase distortion when the band starts to change and a fairly close by station, say 100 miles or so, starts to fade in and out and a long distance station, maybe 1000 miles or more starts to be stronger.
Higher frequency, the VHF hi band around 150 MHz, propagation can be very fickle but can "skip" at times. Ham operators skip signals on 144 MHz off meteor clouds at times, and 6meter, 50 MHz signals can also skip long distances when conditions are just right.
Sporadic E layer propagation is caused when the E layer on the ionosphere reflects signals around 50 MHz or maybe lower like the 33 MHz skip reported earlier. I think it is usually shorter distance but when conditions are just right, you can get multiple "hops" that allow the signal to go a long ways.
I'm no expert but I know hams who live for this to happen every summer and spring.. For more information, go to the link provided here.
http://en.wikipedia.org/wiki/Sporadic_E_propagation

Hello all -

This IS in the Del Puerto Canyon west of Interstate 5, straddling the
Santa Clara/Stanislaus County line.

Hope this adds some clarity.

Cheers!

One AA (I believe its 240) and one Forest copter (out of Paskenta) on scene.
Two
airtankers inbound.

Wow - from what I understand they also had a significant fire around 1700? yesterday evening on Middletown Park Rd. I have a coworker who lives right around there off Middletown Park. Hopefully it's accidental fireworks. That area is very ugly, and as I-Zone as you can get. Nice huge homes buried in oak, manzanita and very little defensible space.

What's the latest?
Rekindle or new fire?
If rekindle I wonder how it managed that?
Reburn in an unburnt island with a long range spot or area of dirty containment that somehow managed to hold some heat unnoticed and get going today or what?
Strange if true!

At 0700 this AM:
What's the latest? 0% containment, 2500 acres, 3 residences destroyed. IC Team #1 assigned.
Rekindle or new fire? Under investigation.
If rekindle I wonder how it managed that?
Reburn in an unburnt island with a long range spot or area of dirty containment that somehow managed to hold some heat unnoticed and get going today or what?
Strange if true!

Command channel switched to CDF 2, 151.265, last night.
Base camp and helibase have been setup again at at the old Crows Landing NAS.
As of 0830, there were no AA or tankers over the fire. First copter was due from Crows Landing at ~ 0845.

10222. RE: [NorCalFire] CANYON IC - 10JUL06 0830 HOURS

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-10 16:54:26 UTC
From: David Coursey
Topic: 10208 Message: 10222

The fire started across Del Puerto Canyon Rd. (on the south side) from the earlier fire. It was first reported, I believe, by a CDF person up on Mt. Oso who have a lat/long and a compass bearing (this is what I heard on the radio). An investigator was sent with the first units to establish the cause, since it seemed odd that the rekindle would be across the road from the old fire.

Hi Jake,
yes. they were still on that fire doing mop up when this second one broke out. The IC called on the radio requesting additional equipment.

engine responding could see the glow.

it almost got away but quick response saved it. that could of been a disaster waiting there. very thick, heavy vegitation all around. good thing no wind on this.

they depleted equipment off the first fire for this one.

good save on this one. of course there was a extensive mop up for a few hours.

temps going down by the end of the week but wind in the area around 10-15 they say.

keep up the good job FF's,CDF, etc.......

Columbia,Ca.

10226. [CDF SCU] CANYON IC - 2045HRS Update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-10 04:32:18 UTC
From: Craig Tomasello
Topic: 10208 Message: 10226

Again I apologize to anyone whom didn't understand my first few posts as to the location of this fire.

SCU = Santa Clara Unit
Del Puerto Canyon = A rural area of Western Stanislaus County and extreme eastern Santa Clara County. This entrance to this area is just west of Patterson, CA near I-5 and Sperry Rd. , about 40 miles SW of Modesto, CA. This area is known for it's fires due to high winds that whip over the Mt Hamilton range. Which tonight are blowing from the east and I can see the smoke drifting over to San Jose from this fire. This is a steep terrain area with heavy fuels.

FROM THE CDF SITE: 0% containment approx. 500 acres No command team has been designated yet.

On a side note: We have a cover Dozer from the SLU (San Luis Obispo Unit).

Hey gang - was doing my late morning chores here in San Jose and could easily see the column of smoke from Del Puerto Canyon rising above the area just east of Mt. Hamilton, which is east of San Jose in the Diablo Range.

AIR ATTACK 460 is handing off to AIR ATTACK 505 at 1320 hours, while fire continues to make significant runs and spotting increases outside the main dozer line. DIVISION PAPA requesting air support if available.

Looks like this will be a long-term battle.

Well, I for one like to hear about the action in this area especially when it's realitively quiet up here in the north end. One can ALWAYS delete something if there is no interest or bandwidth should it get really busy. Jake may have another opinion of course! ;-)

Channel 3, KCRA, in Sacramento just had a very good story on this fire at about 18:15 or so local time. They pegged the fire at 3,000 acres and very little containment due to difficult access and terrain. That area is pretty steep and remote as I remember. Delta breeze can't be a good thing there tonight. 10-15 in Chico right now.

Post away - just make sure there's some meat to the posts and not a million emails following a little red fire engine around the fire.

Incidentally, is Del Puerto using CDF Command 2? I'm not getting an incident name, but there's a very large incident working on CDF2 151.265 that I can hear perfectly up here in Red Bluff. Division Lima and all sorts of "large incident" goodies. I believe I heard the original Del Puerto incident on CDF2 also.

10239. [NorCalFire] CANYON IC - 10JUL06 1030 +/- HOURS

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-11 03:41:42 UTC
From: Mobile11@aol.com
Topic: 10239 Message: 10239

I was through the area around 10:30AM. I was Eastbound 580 just before 680 and heavy smoke from the fire. After dropping down in to the valley there was a small grass fire 30X30 or so. It was near Marina @ Wentte. Could see the smoke from Airway and 580. 2 engines took care of it all others canceled.

On Southbound 580 / Interstate 5 (Westly) area heavy smoke also. The winds were coming out of the west at about 20 MPH due to getting pushed around on the highway and flags were standing straight out. The smoke drift was across the entire valley. Temps in the high 80's to low 90's. I'm in Fresno right now and it was 110 earlier but as cooled off to a mere 98. To think I was in dripping fog and 51 when I left.

Just some observations

Paul - KF6YYI

10241. MNF Yollo Bolly Complex update

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-11 04:10:54 UTC
From: nitrobear@comcast.net
Topic: 10241 Message: 10241

Here is an update on the Yollo Bolly complex West of Red Bluff. I heard lots of copter traffic on the Mendocino Natinal Forest, (MNF) dispatch frequency off and on today on 169.175.
Nice shot of the Hot Shots hoofing it in.

Incident Contact: Jack Horner (530) 934-1266
ANNOUNCEMENT
Wilderness Area Is Open
The Yolla Bolly-Middle Eel Wilderness is open for visitor use. more...

Mendocino Hotshots help out on Harvey Fire
Credit: Scott Williams
click to enlarge
Summary
Fire activity west of Harvey Ridge is expected to increase through the weekend with warmer, drier weather expected. Harvey Fire worked its way uphill toward the ridge between Harvey Peak and D Camp. The helicopter found fire activity on Burnt fire Friday, the first such fire activity in a week on that fire. The helicopter made water drops on that fire.
Basic Information
Updated2006-07-10 10:03:46 EST
Incident TypeWildland Fire Use
Benefits & Objectives
To restore fire to the Yolla Bolly - Middle Eel wilderness ecosystem.
CauseLightning
Date of Origin06/26/2006 at 1401 hrs.
Location35 miles west of Red Bluff in the Yolla Bolly - Middle Eel Wilderness
Harvey Ridge near Ides Cove Trailhead
Incident CommanderJay Perkins

Current Situation
Size1,125 acres
Percent Contained
Estimated Containment Date
Total Personnel98
Fuels InvolvedShasta red fir and open glades
Fire BehaviorFire activity increased yesterday on the southwest side of the fire with short uphill advances and short range spotting occurring near D Camp.
Today's Significant EventsType 1 crew, the Mendocino Hotshots, was inserted to assist with management actions.

Outlook
Estimated Date of Control
Planned ActionsFire Use Modules will continue to monitor smoke, weather, and fire behavior,

scout management action points, map perimeter, and respond appropriately as the fire approaches management action points. A Type 2 crew will be used for one day to support the use of pack stock by shoveling snow off the trail.
Projected MovementContinued upslope movement and short range spotting on the southwest side of the fire.
Growth PotentialMedium
Terrain DifficultyExtremely steep terrain.
Containment Target
RemarksThe Harvey fire is currently the focus of this Wildland Fire Use event.

Weather
Current Wind Conditions4 mph NE
Current Temperature78 degrees
Current Humidity31 %
Forecasted Wind Conditions5 mph W
Forecasted Temperature76 degrees
Forecasted Humidity25 %

Steve,
TGU was NOT FIRST AT SCENE. A local government department was the
first one to report the fire, and also were the first units at
scene........

Did this local govt. department report on Mendocino Forest Net? I didn't hear a single unit go onscene and report on conditions to MNF Dispatch until TGU E2574. (granted, I didn't start listening to MNF until TGU engines were dispatched) When 2574 was at Stonyford (option to go the M5 or the M10 road) he got on MNF Forest Net and talked with MNF Battalion 38, who had no idea if the fire was on the M5 or M10, and simply said "you should see the smoke from there :)" He was 10 minutes behind 2574. MNF sounded like that was their first report on conditions.

MNF mendocino national forest

This really isn't telling us where the fire is at. It is probably
the Trough fire in MNF. Which is in the nw corner of
Colusa county.

Kim, et al...

Many times during the summer and especially the winter, there is LOTS of radio skip conditions usually due to atmospheric conditions, cloud cover, etc and you are able to hear frequencies from all over the country though the bulk of them are low band freqs. Over the years, I have heard depts in Michigan, Indiana, New York, New Jersey, Pennsylvania and many others. It is very fun to listen to. Even LA City used to get skip on their old low band freqs and the dispatchers were able to talk to depts in other parts of the country.

And something a bit unusual on a state/local fire - they are using a lead plane to scout some of the more difficult tanker runs that air attack is calling out.

KCRA, Channel 3 in Sacramento has live coverage on this incident on their news show. They say that 580 is closed, both directions...boy that is a lot of fun during the commute! ;-(The area is "littered" with wind generators that are not very friendly to aircraft. Ch 3 says the winds are 30+ MPH which is probably why the wind generator towers are there! Mostly grass, rapid rates of spread although some images from the Ch 3 copter show the fire backing into the wind. There is scattered scrub growth in that area where there are springs to water the growth.

Steve,
Any updates? I heard the original dispatch but was distracted away from my scanner. Did they get it controlled? My 3D topo program showed that area next to a large, steep ridge that was downwind of the original fire.

Thanks.

10263. fire bug, sweets Flat road BTU dispatch

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-12 01:54:23 UTC
From: nitrobear@comcast.net
Topic: 10263 Message: 10263

Fire bug in a blue low rider Toyota Pick up spotted leaving the scene of a new incident on Sweets Flat Road, Off Oro Bangor Hwy, south of Oroville. Lots of resources heading that way in the Bangor area.

Sweets IC on Tac 12
Butte dispatch, (BTU) on 151.400 MHz
Wind is 10-15 SW in Chico, probably stronger in Oroville area.

Spelling out the agency designations the first time on an incident is certainly handy. Shucks, I'm not sure that ANYONE knows them all. Or even wants to.

I began transcribing a list of California agency identifiers so I could quickly look one up if needed. I'm up to nearly 700, and still dumping them into a MS Excel file. Hint: The list can be found in ICS 420-1, Appendix B.

Also found a handy "official" list of California county abbreviations (just for consistency), National Forest designations, and some other handy lists.

Wondering if anyone would actually want such a compiled list (either MS Excel or MS Word format). It could be posted in the files section.

Incidentally, Microsoft offers free downloads of Word and Excel viewers on their web site.

But it's still a work-in-progress.

You know what? While having one's facts straight is a nice luxury, it ain't always gonna happen that way, especially when you have forty people listening to the 'cast on the fly.

Give it up or talk to the moderators about it so we can spend our time on current fires and issues, eh?

A very essential ingredient for around the area...get a MAP! :) Roads like Neal (and yes, a couple of dispatchers have sure SOUNDED like it was O'Neal), Swedes Flat, and Oro Bangor (all four sections of it) are enough to give even someone who lives here a bad case of hives. :)

Especially when you then have Hurleton-Swedes Flat, Swedes Flat, Hurleton, Upper and Lower (insert road name here but especially Coutalenc), 'Snake Road' which is 3rd section of Oro Bangor by colloquial name....

AIGH!!

Is it any wonder I want people to spell stuff out? I have ENOUGH to remember just keeping track of the roads to get to the store. :)

Craig,
That is awesome! You can see the fire boil up, take off and grow. You can even see the glow after the darkness sets in with the movie.
Thanks for the link!

10292. Canyon fire update, SCU

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-13 02:02:17 UTC
From: nitrobear@comcast.net
Topic: 10292 Message: 10292

Just heard Channel 3 in Sacramento say that this fire had "tripled in size" which sort of caught me by surprise. Here is the update from the CDF incidents page.
http://cdfdata.fire.ca.gov/incidents/incidents_details_info?incident_id=91
Yeow! This thing is getting pretty ugly. The sea breeze is supposed to lay down tonight in favor of off shore flow which should help maybe.
Canyon Fire
Canyon Fire Incident Information:
Last Updated: July 12, 2006 7:00 am
Date/Time Started: July 9, 2006 3:55 pm
Administrative Unit:CDF Santa Clara Unit
County:Stanislaus
Location:Del Puerto Canyon, west of Patterson
Acres Burned: 11,070
Containment45% containment.
Structures Destroyed:7 residences and 1 outbuilding
Threatened: 12 residences
Injuries: 3
Cause: Under Investigation
Cooperating Agencies: CDF, Office of Emergency Services, CHP
Total Fire Personnel: 1,621
Fire crews: 52 CDF
Engines: 113 (57 CDF)
Helicopters: 13 (1 CDF)
Dozers: 21 (13 CDF)
Water tenders: 5
Costs to date: $2.4 million
Major Incident Command Team: CDF Team #1
Conditions: Difficult access, steep terrain and lack of steady water source continue to be issues for firefighters. Wnds expected to continue to influence fire activity. Del Puerto Canyon Road closed to civilian traffic.
Phone Numbers (408) 779-0930 (Canyon Fire Information)

From: Pamela Alley
Topic: 10294 Message: 10294

Check http://www.inciweb.org for the fine details but they have two complexes down there that are going hell for leather through desert brush and scrub, chased by winds up to 40mph...."Millard Complex", accessible by copter only--the latest update (15:45 today):
"Burning debris has rolled out of the Millard Fire and begun burning outside of containment lines. Fixed Wing Air Tankers are grounded because of high winds, One Heavy Helicopter and water dropping Helicopters are working aggressively to keep the fire from crossing a drainage. A large smoke column can now be seen from the Millard Complex."

The Sawtooth Complex is also growing by blazing leaps, from 6,000 this morning to 37,000 at latest estimate. NAAASTY!!!

http://cdfdata.fire.ca.gov/incidents/incidents_details_info?incident_id=94

Don't know about anyone else, but I am thankful that we rarely have fires which run that kind of size and aggressive behavior!

Yahoo has the nasty habit of making messages disappear for weeks at a time, only to have them reappear at some random time. It's annoying when something that you posted weeks ago shows up completely out of the blue, the thread that it was in long gone...

Hey Pamela thanks for the info...
For those of you watching the San Berdo area fires.. These are of an extreme concern. If you remember the talk of the Bark Beetle and how it devasted the forests, then they had the big fire up hwy 18/330. Big Bear Lake is located in the San Bernardino Mountains.Right in the middle. it is serviced by 3 roads... Hwy 38 to the east... 18/330 up the front [area of the last huge tragic fire] from the south and 18 out the north. The Millard fire is off hwy 39 less than 5 air miles from Big Bear and the Sawtooth just 10 from the hwy 38 area.. Pioneertown is accessible by 4wheel to Big Bear.
San Gorgornio is about 10,000+ if I remember correctly. The timber is Jefferson, Pondo and Douglas. but there is some underbrush, Manzanita but not too much.. most of the fires here are Pines.
The Sawtooth being on the other side, from the east and about 3,000- 5000 ft elev.cosisists of Greasewood, Manzanita, Mesquite, Chapperal, Scrub Oak,. In both instances they are not far from each other, even on ground..
The big danger here is all the camps in between.... there are literally hundreds of Camps all along hwy 38...occupied all summer long...
Carolyn.. my old home town..

Correction: STEN = Strike Team ENgines, a Strike Team Leader (STL) is an intergal part of the ST.

Correction: STCR = Strike Team CRews, a Crew Strike Team consists of 2 - 15 CDC personnel + CDF Capt.

And I always thought an ST was a steam table. I guess I just have ADD - Acronym Deficit Disorder.
And if a hand crew strike team comes from a CYA camp, it has exactly zero CDC personnel. At least until they grow up.

No.
However, some camps have shut in recent years like Los Robles Crews no longer exist.
This is due to budgetary issues.

CYA is out of business. The agency was abolished a year ago as a part of the reorganization of CDC into CDCR. It is all one organization now.

Actually it's been 2 years since there have been CYA/ward crews on fires. Back in 2004, several CYA crew captains were jumped by their crews, and the crews were locked down. Sometime between the 2004 and 2005 fire seasons, all the crews were rolled up and sent back to the facilities. Last year, all the wards were re-evaluated for crew suitability, and retrained for this year's fire season.

Oops.
Don,
At the risk of sliding a bit off-topic, do you know if the reorg was due to the overall state streamlining plan, because of the alleged abuses within CYA, both, or none of the above?

I had not heard this.
Why the sudden breakdown of discipline?
I had thought they had those inmates screened well and disciplined well and that they viewed it as a privilege to be on those crews.
How sad.
It had seemed like such a great idea for so long.
Thanks for the info.

Oop, my bad. Sorry for stating bad info.
I was unaware of that change.
How interesting.
Thanks for the info.

From: Jake H
Topic: 10313 Message: 10313

Anybody else notice Shasta local net 151.160 seems to be on a different repeater? Over the past week or so their valley dispatches seem to be coming from a distant repeater instead of their primary one that covers the valley. While mobile, I really notice it even when I'm in Shasta Co. I switch over to the ham rig and my fire HT and reception is the same, minimal.

And I really wish they would make a scanner that allows you to adjust the volume on a various channel. There's a few agencies that don't have their radios adjusted just right and come in blaring, while everybody else (sans USFS) comes in normal. USFS is narrowband so they come in quiet on the scanner. It'd be nice to program in a +1 or a -2 on any channel so the scanner knows to pump it up a notch relative to the volume knob setting. (or just make narrowband compatible, affordable scanners. ;)

There is a dedicated Winamp feed in BigBear on www.publicsafetyfeeds.com drop-down menu on the left.

Also a teamspeak feed:
radio.scannerbuff.net:8767 on the Big Bear channel.

Both of these are fed to a server in a datacenter, so lots of bandwidth for many users.

Generally a Strike Team of Engines is 5 engine companies and a Leader in a separate vehicle, 6 vehicles total. And a Strike Team of Crews is two handcrews and a Leader in a separate vehicle (adding up to 35 or more people), 3 vehicles total. CDF Strike Teams of Crews also travel with a additional custodial Support vehicle tagging along, usually only as far as to the incident BASE.

There were 3 attacks within a month's time, with 2 coming in one week, all at 3 different camps. Nobody really knows what the reason was as to why it happened, but there was some speculation that it was gang-related and coordinated. There were some signs of unrest in the camps earlier with tensions between different ethnic groups that had migrated from the prisons and facilities. After the first attack, there was a lockdown for a week, and after the other two attacks, they were locked down for the rest of the season. There were dozens of wards that were rolled up from the camps and transferred back to the youth prisons immediately, with all of the wards going back later. All wards were (re-)evaluated for crew duty, and moved around to try and minimize the gang-related influences.

Most of the (adult) inmates that I talked to about their crimes said that they were in for DUI, burglary, and car theft.

10323. A few on-topic random thoughts

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-13 19:16:20 UTC
From: John Gleichweit
Topic: 10323 Message: 10323

As I sit here in Downtown Fresno listening to the scanner and the HT, monitoring every imaginable fire frequency used in the Central San Joaquin Valley, I look up and see the pall of smoke from the Canyon Fire stretching from the northern horizon around to the west, and finally dispersing slightly overhead. I hear on the broadcast radio that the Canyon Fire has gone to 24k acres in just 4 days, and the PIO says there's no end in sight due to the "steep terrain, erratic winds, and lack of resources". I remember William LaJeunesse on Fox News last night with smoke and glow from the Sawtooth Complex talking about basically the same thing. I read the morning report, and see that over 2600 people are on the Sawtooth, Millard and Canyon incidents.

Then I begin to wonder: Why haven't I heard the OES equipment being staffed and assembled into strike teams from MAR V? Why haven't I been called to see if I'm available to go out on a strike team assignment (not that is matters, 'cause I'm not)? What about all the other full-time and paid-call firefighters that are available to work? Why is there a "staffing problem" when there are plenty of firefighters that can be called back to work to staff reserve equipment to form up local government strike teams to go to the fires?

Another peeve of mine is that overhead positions that could be filled by qualified volunteers and paid-call staff are going UTF (Unable to Fill) because of the firefighters' unions bitching about it. I'm a CSFA member, just like they are; I get paid by the state, just like the rest of CDF does. Why should needed positions go unfilled at all, when there are plenty of qualified people available in the Paid-Call and Volunteer ranks? Why can't we even get the training we want to even get us available to be trainees?

From: John Gleichweit PDA
Topic: 10330 Message: 10336

CDF added 2 more air tactics channels last year. They did this to allow enough channels to be used on multiple, closely spaced incidents, or multiple fires on a complex.

Air Tactics 21: 151.2725
Air Tactics 22: 151.2875
John Gleichweit, N6FOG, CA-OES 51-507

Subject: [NorCalFire] Tactics 22?

Air Attack just inquired as to what frequency is being used air-to-air at the Canyon fire today and was told "Tactics 22." I didn't know there was an Air Tactics 22. Could someone enlighten me?

Speaking of the smoke, I was up at the Oregon Peak lookout tower in Yuba County yesterday (on assignment, not just screwing about) and they had a long line of drift smoke coming up from the south, the staffers presumed it must be coming from the fires down there. It was producing a nice haze over the Feather River Canyon areas they like to watch, so it was making their job a little bit harder. The so-cal fire affects more than its immediate area, it seems.

Nick,
I started the day in Alturas and ended up here in Dunnigan this evening and I can tell you it was the same story again today with smoke from the Canyon Incident traveling well north up towards the Mendocino NF and up Butte Co. way, too.
F.Y.I. the smoke from the SoCal fires is actually going over Las Vegas and getting their attention.
Well, except for the gamblers who don't even notice earthquakes that scare everybody else out of the building. ;-p

The socal fire is showing up on radars from Sats 23 miles up.. hey
measured the drift smoke as being around 100 kilometers in length
drifting east

Canyon Fire

Canyon Fire Incident Information:
Last Updated: July 13, 2006 7:00 pm
Date/Time Started: July 9, 2006 3:55 pm
Administrative Unit: CDF Santa Clara Unit
County: Stanislaus
Location: Del Puerto Canyon, west of Patterson
Acres Burned: 27,184
Containment 45% containment.
Structures Destroyed: 10 residences and 1 outbuilding
Injuries: 4
Cause: Under Investigation
Cooperating Agencies: CDF, Office of Emergency Services, CHP, Staislaus & Santa Clara sheriffs office, and other local government resources.
Total Fire Personnel: 2,002 (1,505 CDF)
Fire crews: 56 (54 CDF)
Engines: 164 (68 CDF)
Helicopters: 14 (1 CDF)
Dozers: 30 (14 CDF)
Water tenders: 24
Costs to date: $4.9 million
Major Incident Command Team: CDF Team #1
Conditions: Active fire is now burning in Santa Clara County and approaching Henry Coe State Park. The fire continues to burn in an area that has had no significant fire occurance in over 50 years. Residential and ranch properties are scattered in the area. Steep terrain, erratic gusty winds, and low humidities have continued to challenge containment. Del Puerto Canyon Road remains closed to civilian traffic.
Phone Numbers (408) 779-0930 (Canyon Fire Information)

Ben,
Tonight,
One of the Sacramento network TV news affiliates actually did a decent job covering the fires in SoCal and NorCal.
While discussing the SoCal fires they brought in their meteorologist who showed an enhanced satellite image showing the smoke plume from the San Berdoo fires trailing out 147 miles from the source and covering much of the central Mojave Desert nearly to Las Vegas.
This was an image from today.
On previous days this week Las Vegas was actually under the pall of smoke according to news reports.

John,
Today(7/13/06) as I drove through Redding I accidentally came across the CALTRANS highway info radio station on 1610 AM while scanning the dial and they were discussing this and saying Hwy 299 was shut at Nubieber with all commercial vehicles being turned around and only passenger vehicles allowed through via detour.

well arnold just requested a State Of Emergency
on those fires there. so far 40,000 acres burned and 100 homes up in
smoke and no relief in sight.

and

they are talkng about some fires merging.

good luck guys down there.

Re: [NorCalFire] SoCal fires getting nasty too Reply to:
norcalfire@yahoogroups.com
Hey Pamela thanks for the info...
For those of you watching the San Berdo area fires.. These are of an
extreme
concern. If you remember the talk of the Bark Beetle and how it devasted
the forests, then they had the big fire up hwy 18/330. Big Bear Lake is
located in the San Bernardino Mountains.Right in the middle. it is
serviced by 3 roads... Hwy 38 to the east... 18/330 up the front [area
of
the last huge tragic fire] from the south and 18 out the north. The
Millard fire is off hwy 39 less than 5 air miles from Big Bear and the
Sawtooth just 10 from the hwy 38 area.. Pioneertown is accessible by
4wheel
to Big Bear.
San Gorgornio is about 10,000+ if I remember correctly. The timber is
Jefferson, Pondo and Douglas. but there is some underbrush, Manzanita
but
not too much.. most of the fires here are Pines.
The Sawtooth being on the other side, from the east and about 3,000-
5000 ft
elev.cosisists of Greasewood, Manzanita, Mesquite, Chapperal, Scrub
Oak,. In
both instances they are not far from each other, even on ground..
The big danger here is all the camps in between.... there are literally
hundreds of Camps all along hwy 38...occupied all summer long...
Carolyn.. my old home town..

I'm still hunting good fire photo sites for Sawtooth/Millard and so forth...

I use GeoMAC for perimeter watching; from what it has on Sawtooth/Millard,
the merging of the two is something less than speculative now. :(
(http://geomac.gov)

http://www.Inciweb.org is pretty good.

The Morning reports are good, but again, I like up to the minute stuff. LOL!
http://www.fs.fed.us/news/fire/mreport.shtml

10353. Ok, question--

From: Pamela Alley
Topic: 10353 Message: 10353

Private replies please to keep this list clear...

Someone has told me that the Air National Guard at Point Magoo has multiple air tanker resources which *could* be used on the fires, but are not. Her information is a bit dated (like thirty years), but what's the story now?

Apparently, there is or was sufficient capacity to put paid to a lot of the fires which are going into the tens of thousands of acres...and they'd be put on 'ready', load up, then be called off and have to dump the stuff in the desert rather than on the fire.

Is this still the case? If so, why aren't we using the capacity we have? Are we using it elsewhere? :)

I'm just curious...please reply offlist...

Actually, I suspect more than just you are curious.

The Cal Air Guard has a number of C-130 aircraft assigned at Poin Magu (which may or may not be avaiable due to Middle East deployments, crew availability, aircraft availability (maintenance down time), etc. They also have a limited number of palletized retardant drop systems to slide into available C-130s. This set up is called MAFFS (Military Airborn Fire Fighting System).

Under Federal law, MAFFS may be activated only when all CDF / USFS / contract aircraft have been committed (wouldn't want to take meals out of the mouths of the contractors, you know) and it requires around 24 hours to get the MAFFS and comm systems installed, aircraft and crews certified, etc.

Don

It's one of the NIFC portable command repeaters, and I don't know where or which channel it's on. You'll probably have a hard time hearing it all the way across the valley from Columbia unless you have a straight shot at the mountain.

TGU just put out the following manning order: TGU 4546, order 01 cover all reserve engines, order 02 cover all dozers 24 hours a day. Now as far as I know they are already covering both reserve engines 2566 and 2576. I guess they could cover the engines at the camps, if they are still there. So are they doing this for the heat wave that is starting or for something else.

NORTHERN CALIFORNIA / NORTHERN REGION

OPERATIONS COORDINATION CENTER

INCIDENT SITUATION

7/14/06 @ 1900 hrs

North Operations Preparedness ☐ Level (3)

Team(s) Assigned in NOPs: 1 ☐ State Type 1

South Operations Preparedness ☐ Level (3)
National Preparedness ☐ Level (3)

Weather Synopsis:

High pressure will be strengthening over the Geographic Area during the next few days for a warming and drying trend to continue. Sunday and Monday appear to be the warmest days coming up with temperatures near 110 likely in the warmest inland valleys. Overnight RH recovery is expected to be poor on the upper slopes and ridges into early next week, especially beginning Saturday night. The weather pattern will shift a bit next week as the high moves back eastward, and this should bring about a bit more southerly flow over the PSA's. This is expected to bring enough moisture northward for some thunderstorms around the middle of the week or so with the most significant amount of lightning near and east of the Cascade-Sierra crest. There will also be an uncertain chance of lightning the middle of next week for all other PSA's except the North Coast.

KRON advised one Engine from ALCO and one from SFFD were going

fire Dispatch.com shows 2 Engines from San Mateo County going

thats 6 , I assume others (i.e. Santa Clara County) are also

going , so at least 2 strike teams from the bay area enroute

Canyon Fire Incident Information:
Last Updated: July 15, 2006 7:30 pm
Date/Time Started: July 9, 2006 3:55 pm
Administrative Unit: CDF Santa Clara Unit
County: Stanislaus
Location: Del Puerto Canyon, west of Patterson
Acres Burned: 31,933
Containment 75% containment, full containment now expected July 16 at 5 p.m.
Structures Destroyed: 10 residences and 3 outbuildings destroyed and 1 residence and 3 outbuildings damaged.
Injuries: 5
Cause: Under Investigation
Cooperating Agencies: CDF, Office of Emergency Services, CHP, Stanislaus & Santa Clara sheriffs office, and other local government resources.
Total Fire Personnel: 2,049 (1,519 CDF)
Fire crews: 56 (54 CDF)
Engines: 163 (67 CDF)
Helicopters: 15 (1 CDF)
Dozers: 32 (12 CDF)
Water tenders: 32
Costs to date: $9 million
Major Incident Command Team: CDF Team #1
Conditions:

Active fire is now burning in Santa Clara County and approaching Henry Coe State Park and into Isom Ranch area. The fire continues to burn in an area that has had no significant fire occurrence in over 50 years. Residential and ranch properties are scattered throughout the area.

Steep terrain, erratic gusty winds, and low humilities have continued to challenge firefighters.

Del Puerto Canyon Road is now open.Release of some cooperating agencies and dozers within the next day expected.

CDF Looking for Publics Help.

MILLARD COMPLEX WILDLAND FIRE

Summary

The Millard Complex is burning in rugged terrain in the San Gorgonio Wilderness. It is currently estimated at 15,572 acres and is 10% contained. There is no expected date of containment at this time.

The Millard Complex merged with the Sawtooth Complex in the Mission Creek drainage late yesterday afternoon. As the fires progress toward the west and northwest they will be managed as the Heart Incident, which is focusing on protection of the Big Bear community.
Basic Information
Updated 2006-07-15 09:49:33 EST
Incident Type Wildland Fire
Benefits & Objectives
Management Objectives: 1. Provide for firefighter and public safety. 2. Utilize minimum impact suppression tactics in wilderness areas. 3. Avoid and report archaeological sites. 4. Develop and maintain a cost containment strategy for the incident. Control Objectives: 1. Keep fire north of San Gorgonio Wilderness and Reservation Boundary. 2. Keep fire south and west of the Pacific Crest Trail. 3. Keep fire east of Mill Creek jump off.
Cause Lightning
Date of Origin 07/09/2006 at 0833 hrs.
Location 7 Miles north of Cabazon
In San Gorgonio WIlderness, north of I-10 and west of Highway 62
Incident Commander Norm Walker
Current Situation
Size 15,572 acres
Percent Contained 10%
Estimated Containment Date
Total Personnel 935
Fuels Involved The fires are burning within old decadent stands of intermixed timber, Douglas fir, sugar and jeffrey pine above the 6000' elevation. There is high mortality in the fuels due to drought and bug kill. Lower elevation fuels are chapparal and grass.
Fire Behavior Extreme fire behavior was observed today with plume dominated fire behavior this afternoon. The fire will continue to be dominated by topography and wind. During the night down slope winds expected tonight, the fire will progress toward the southeast. The north perimeter of the fire remains very active.
Today's Significant Events Unified Command established between U.S. Forest Service, California Department of Forestry and Riverside County Fire at 1600 hrs on 07-12-06. Constant communication between Incident Management Teams on Millard Complex and Sawtooth Complex. MIssion

Creek serves as the administrative boundary between the two complexes, although the fires have burned together. As the fire progresses toward the Northwest, it is being manged by the newly established Heart Fire incident management team which is based in the Big Bear area.
Outlook
Estimated Date of Control
Planned Actions Structure protection remains in place in Whitewater Canyon. Today line was successfully constructed along the southeast flank of the fire. Tonights efforts will focus on holding that line.
Projected Movement Fire continues to be active in Whitewater Canyon and Mission Creek drainage. Plume development occurred today and for the last several days and is expected tomorrow as well.
Growth Potential Extreme
Terrain Difficulty The San Gorgonio Wilderness is characterized by inaccessible, steep terrain. Air operations continue to play a significant role with 16 helicopters and 6 airtankers assigned, although no aircraft will be flying tonight.
Containment Target
Remarks No immediate threats to any communities at this time. Threats are to watersheds, wilderness, and tribal interests. Whitewater Road, Mission Creek Road, and San Gorgonio Wilderness remain closed to public use.
Weather
Current Wind Conditions 10-15 mph SW
Current Temperature 104 degrees
Current Humidity 16 %
Forecasted Wind Conditions 4-9 mph E
Forecasted Temperature 66-75 min. degrees
Forecasted Humidity 12-18 %

Date: 2006-07-16 07:47:28 UTC
From: Kim Noyes
Topic: 10370 Message: 10370

Sawtooth Complex Incident Information:
Last Updated: July 15, 2006 9:00 pm
Date/Time Started: July 9, 2006 8:30 am
Administrative Unit: CDF San Bernardino Unit
County: San Bernardino
Location: East of Yucca Valley
Acres Burned: 60,000
Containment 50% containment
Structures Destroyed:

50 homes, 8 mobile homes, 13 garages, 171 outbuildings, 191 cars & pick up trucks, 3 R.V.s, 27 trailers, 2 railcars, 9 tractors destroyed.
Threatened: 3,000+ structures continue to be threatened in the fire area.
Evacuations:

Mandatory evacuation remains in place for Burns Canyon.

Voluntary Evacuations for areas South of Hwy 38 from Little Cienaga Seca to the end of Rainbow Lane. This is a remote, rugged area approx. 10 miles East of the Barton Flats Campground.
Injuries: 10 minor injuries and 1 civilian fatality
Cause: Lightning
Cooperating Agencies: CDF, San Bernardino County Fire, U.S. Forest Service, CHP, LA County Fire, CA Dept. of Corrections and Rehabilitation, Red Cross & Office of Emergency Services
Total Fire Personnel: 2,902 (1,365 CDF)
Fire crews: 85 (52 CDF)
Engines: 206 (69 CDF)
Airtankers: 8 CDF
Helicopters: 15 (2 CDF)
Dozers: 35 (20 CDF)
Water tenders: 41
Costs to date: $10.3 million
Major Incident Command Team: CDF Team #8/Unified Command with U.S Forest Service/San Bernardino County Fire
Conditions:

The National Weather Service has announced the possibility of thunderstorm activity in San Bernardino County starting within the next 24 hours.

The fire has reached the upper reaches of the terrain and has slowed down. Extreme heat, low humidity and erratic winds continue in the fire area. The fire has now burned into a portion of the San Bernardino Nat'l Forest. Extremely steep rocky terrain is making

access difficult as the fire moves west..

The Millard Complex and the Sawtooth Complex merged to form one perimeter. Millard Fire Information

An Evacuation Center has been set up at the Yucca Valley High School, 7600 Sage Ave. The Big Bear Elementary School Evacuation Center has been closed.

For animal/pet information - 1-800-472-5609 (So. CA only), . www.sbcounty.gov/acc/

Cause Lightning
Date of Origin 07/09/2006 at 0833 hrs.
Location 7 Miles north of Cabazon
In San Gorgonio WIlderness, north of I-10 and west of Highway 62
Incident Commander Norm Walker
Current Situation
Size 15,572 acres
Percent Contained 10%
Estimated Containment Date
Total Personnel 935
Fuels Involved The fires are burning within old decadent stands of intermixed timber, Douglas fir, sugar and jeffrey pine above the 6000' elevation. There is high mortality in the fuels due to drought and bug kill. Lower elevation fuels are chapparal and grass.
Fire Behavior Extreme fire behavior was observed today with plume dominated fire behavior this afternoon. The fire will continue to be dominated by topography and wind. During the night down slope winds expected tonight, the fire will progress toward the southeast. The north perimeter of the fire remains very active.
Today's Significant Events Unified Command established between U.S. Forest Service, California Department of Forestry and Riverside County Fire at 1600 hrs on 07-12-06. Constant communication between Incident Management Teams on Millard Complex and Sawtooth Complex. MIssion

Creek serves as the administrative boundary between the two complexes, although the fires have burned together. As the fire progresses toward the Northwest, it is being manged by the newly established Heart Fire incident management team which is based in the Big Bear area.
Outlook
Estimated Date of Control
Planned Actions Structure protection remains in place in Whitewater Canyon. Today line was successfully constructed along the southeast flank of the fire. Tonights efforts will focus on holding that line.
Projected Movement Fire continues to be active in Whitewater Canyon and Mission Creek drainage. Plume development occurred today and for the last several days and is expected tomorrow as well.
Growth Potential Extreme
Terrain Difficulty The San Gorgonio Wilderness is characterized by inaccessible, steep terrain. Air operations continue to play a significant role with 16 helicopters and 6 airtankers assigned, although no aircraft will be flying tonight.
Containment Target
Remarks No immediate threats to any communities at this time. Threats are to watersheds, wilderness, and tribal interests. Whitewater Road, Mission Creek Road, and San Gorgonio Wilderness remain closed to public use.
Weather
Current Wind Conditions 10-15 mph SW
Current Temperature 104 degrees
Current Humidity 16 %
Forecasted Wind Conditions 4-9 mph E
Forecasted Temperature 66-75 min. degrees
Forecasted Humidity 12-18 %

Subject: [NorCalFire] Re: Canyon Incident Update (Containment date pushed back)

Canyon Fire Incident Information:
Last Updated: July 15, 2006 7:30 pm
Date/Time Started: July 9, 2006 3:55 pm
Administrative Unit: CDF Santa Clara Unit
County: Stanislaus
Location: Del Puerto Canyon, west of Patterson
Acres Burned: 31,933
Containment 75% containment, full containment now expected July 16 at
5 p.m.
Structures Destroyed: 10 residences and 3 outbuildings destroyed and 1
residence and 3 outbuildings damaged.
Injuries: 5
Cause: Under Investigation
Cooperating Agencies: CDF, Office of Emergency Services, CHP,
Stanislaus & Santa Clara sheriffs office, and other local government
resources.
Total Fire Personnel: 2,049 (1,519 CDF)
Fire crews: 56 (54 CDF)
Engines: 163 (67 CDF)
Helicopters: 15 (1 CDF)
Dozers: 32 (12 CDF)
Water tenders: 32
Costs to date: $9 million
Major Incident Command Team: CDF Team #1
Conditions:

Active fire is now burning in Santa Clara County and approaching Henry
Coe State Park and into Isom Ranch area. The fire continues to burn in
an area that has had no significant fire occurrence in over 50 years.
Residential and ranch properties are scattered throughout the area.

Steep terrain, erratic gusty winds, and low humilities have continued
to challenge firefighters.

Del Puerto Canyon Road is now open.Release of some cooperating
agencies and dozers within the next day expected.

10373. Re: Milestone In American Aerial Firefighting History Today

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-16 21:31:29 UTC
From: Kim Noyes
Topic: 10373 Message: 10373

Twice today Tanker 910 (DC-10) dropped retardent/water on the Sawtooth Complex in the San Bernardino Mountains of Southern California with apparent success.
A partial transcript of radio communications of the event courtesy of http://www.rimoftheworld.net./incident/2432 follows:

02:18 PM
Sun 7/16

are you done with that DC10? Done. We've got some action behind you out here by the canyon, heating up in that canyon that we've been watching; can we get some air attack in there? We've got no air resources to the Heart incident at all; anything we get has to come from you {Sawtooth} or from Millar; need to check with S and T; need to get the buggy that is stuck in the road; dozers are way out; punching out the line to the black; must have deployed all those dozers before they got to him; crew out of XX out of Tahoe is here with me; can't do much more for XX would like to use them to close the back door on XX and help us out on our line now; dozer is heading in to pull that buggy out now, about half way there now; Branch 2, go ahead and use that Tahoe Crew across there; I'll see if I can get you some air craft
02:14 PM
Sun 7/16

want all the helicopters back up in the air?
02:12 PM
Sun 7/16

air to air - supposed to wait three minutes while the wing tip vortices to settle; after the white turbulence settles {I think that's what was said}
02:09 PM
Sun 7/16

fire contained at 1/2 acre, line around it
02:00 PM
Sun 7/16

910 return to Victorville and we'll return the lead also
01:59 PM
Sun 7/16

last drop for the DC10, copy
01:58 PM
Sun 7/16

Clear out; lead 240 and tanker 910 are in the area; {helicopters are going back for fuel}
01:56 PM
Sun 7/16

We are clear of helicopters and personnel is out; we'll hold until helicopters are out.
01:55 PM
Sun 7/16

Air discussion - are they going to work that line that was just made by 910?; 910 is inbound; 32 miles out; about 5 minutes out
01:53 PM
Sun 7/16

flew in the air a long time so it didn't 'skoosh' anything
01:53 PM
Sun 7/16

Sierra hotshots are working in Branch 2 in that area; I'll have to clear them out for the next drop
01:41 PM
Sun 7/16

{discussion to get troops in to assess how the DC10 did} looking for downed timber, down pressure, that type of thing; documentation would be great; tanker ()reload and return; not positive, monitor air to ground
01:37 PM
Sun 7/16

sounds like we're getting dozer lines across everywhere we want today
01:36 PM
Sun 7/16

air to air - we're dropping pretty high; about 300 at the start

12:54 PM
Sun 7/16

there will be a three minutes limit {before air can get in)
12:53 PM
Sun 7/16

pushing from the Heart Bar campground up; running into a lot of rocks; we slipped around them and we're making hay; excellent!
12:50 PM
Sun 7/16

air discussions - "awesome"; "lovely"; "1st historical heavy tanker drop"; "cool" - {{note: this comment is added at 1:12pm - on another site they reviewed a tape of the conversation here and the "historical" was actually "hysterical" - which is what it actually sounded like - after that comment there was laughter from other air units}}

12:49 PM
Sun 7/16
To :To Dispatch
12E6 in area of Coon Crek {PIO?}
12:48 PM
Sun 7/16

air discussion - dropping retardant from that high?; oh yes
12:45 PM
Sun 7/16

Air unit to air - we're dropping the DC10 now; stay out; we're staying out, just checking with you; understand, kind of busy in here
12:43 PM
Sun 7/16

need to clear out the media looky loos; explained to CHP what we needed; we need some officers out here to keep working, not a hard closure do want them to work with law enforcement; got one at the Fish Creek Y to control them into Coon Creek and Fish Creek; not a hard closure, but wanted them to be aware; need the PIOs to show up, can't rely on FF to deal with the media, want to work with them, but can't be wide open
12:40 PM
Sun 7/16

All units on Sawtooth - Getting ready to drop Big Boy Air Tanker, everybody clear the line.; Big Boy Airtanker coming in; clear the lines
12:39 PM
Sun 7/16

to DC10 - can you go east of the antennas? affirm; ~~~~Helicopter discussion - stay with us in this circle as long as we keep each other in site; don't like your rotor wash, but probably better than starting a new pattern to the east
12:38 PM
Sun 7/16

do believe it is ready to go
12:38 PM
Sun 7/16

if they want to observe from the burn side, that would be ok? Will they be able to see?; well, maybe not; go to the antennas to watch, really would be good if we didn't have too many helicopters because we have to maneuver; well, wait, standby
12:36 PM
Sun 7/16

get North of the antennas and you'll be ok; if you know where the antennas are at, you can go east of the antennas
12:34 PM

Sun 7/16

{all helicopters are checking in}
12:33 PM
Sun 7/16

all helicopters on the Sawtooth complete your present missions and then clear out; the DC10 is coming in; I'm going to stay at the antennas, I don't know if I have enough time
12:33 PM
Sun 7/16

tanker 910 is 30 miles, about 7 minutes, out; go ahead and make one drop and then clear out; the DC 10 is 30 miles out
12:31 PM
Sun 7/16

Branch 4 to Ops - need at least 2 information officers in Coon Creek, we have law enforcement and media, but need IOs
12:30 PM
Sun 7/16

have water tenders go to SR38 at Coon Creek road, there at Heart Bar
12:29 PM
Sun 7/16

on the south side of that major ridge, just () by 1N02; going to make my way down to jumpoff, about 20 minutes; should have a dozer out there to have pretty good eyes for you; dozers are working towards division sierra; all activity is west on Double X almost at Mission Creek Road; I think if it isn't too smoky I can see in there; need to see how defensible the road is (Mission Creek)
12:26 PM
Sun 7/16

lead 24 will be leading the DC10; I'll find him here in a minute
12:24 PM
Sun 7/16

air to air - helicopters have cleared out if you want to make some runs
12:22 PM
Sun 7/16

holding on that ridge for now, but need some intel on Mission Creek road, need to know how far out it goes and where the fire is
12:21 PM
Sun 7/16

air to air - whenever possible we want to get a couple runs in before the DC gets here, but don't want to disrupt the helicopters
12:18 PM
Sun 7/16

air to air - go ahead and finish your runs, he'll tell us when not to
12:16 PM
Sun 7/16

order 4 water tenders for the contingency group; 4630L should be at staging now, get them on their way; send them to Heart Bar for now
12:13 PM
Sun 7/16

dropping a DC10 here in about 30 minutes; going to be dropping on the ridgetop here where the smoke is at.

10374. Re: Sawtooth And Millard Fires: Latest Updates

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-16 21:36:50 UTC
From: Kim Noyes
Topic: 10374 Message: 10374

SAWTOOTH AND MILLARD FIRES: LATEST UPDATES
July 16, 2:03 p.m.
The fires that have swept through the mountains northwest of Palm Springs today have charred nearly 78,000 acres, but firefighters continue to make progress in controlling the blazes, firefighters said today.

As they battle not only California's largest working wildfire but also oppressive triple-digit temperatures, firefighters are also possibly turning to a new ☐ and very big ☐ weapon to beat back the flames: A modified DC-10 "super-tanker" jet airplane capable of dropping 12,000 gallons of water or retardant on the fire.

Typical airplanes used in the aerial assault on the fire can carry 1,200 gallons.

It would be the first time the modified commuter plane would be used on a wildfire.

The retooled DC-10 tanker showed its water-drop capabilities at the prestigious Paris Air Show in June 2005.

But because it has never been used on a wildfire, officials are "more than cautious," Mike Padilla, director of aviation for the California Department of Forestry, told The Desert Sun around 12:30 p.m.

"This is a very big aircraft, a new tool," he said. "We want to take baby steps with it. It's not a matter of if; it's a matter of when we get all of this put together."

Here are the other latest headlines:

Even though the two fires ☐ known as the Sawtooth Complex and the Millard Complex ☐ merged Friday, authorities are still providing separate statistical edges on the fires.

As of about 9 a.m. today, the last time officials have provided media briefings, Sawtooth burned 62,000 acres, but is 60 percent contained. The smaller Millard is 15 percent contained and has charred 15,572 acres.

Authorities are monitoring firefighters' health and how they're being affected by the extreme heat.

There's significant concern about the potential for heat exhaustion.

Fire crews comprised of "hot shots" ☐ elite, specially trained, wildfire fighting teams ☐ are mobile. Each member can carry much on his or her back, officials said.

What they wear may not weigh as much as the gear worn by firefighters who extinguish house fires, however, one wildfire fighter may carry a 45-pound chainsaw, a 30-pound pack, an axe/pick, a shovel, a helmet and other items. Their clothing, officials said, does not breath and treks into areas where fire breaks will be built can sometimes be long and arduous.

Temperatures today are expected to remain in the triple-digits with a 20-30 percent chance of thunderstorms.

Thunderstorm clouds have the potential to carry strong winds, that could reach as high as 35 mph and create a down draft. Those strong downward winds could endanger firefighters on the ground because they wouldn't be able to tell what direction the winds were coming from.

Officials are also concerned about new lightning strikes that could hinder crews. Firefighters might become human lightning rods, officials said.

Residents living in the aftermath of a massive Southern California wildfire may soon find themselves in the path of another natural disaster ☐ mudslides and flash floods.

Midday Sunday, sheriff's deputies and public works officials set about warning as many as 5,000 people from Landers to Morongo Valley about the potential danger.

National Weather Service meteorologist Rob Balfour said thunderstorms are likely as monsoonal moisture moves into the area which is already experiencing record levels of heat.

He said cloud systems building over the mountains aren't likely to produce much moisture today. But rain is likely by mid-week.

"We have a second pulse of moisture coming up on Monday and Tuesday."

Vana Olson, assistant director of public works for San Bernardino County, said residents should stay away from washes and families should keep track of each other in the event of rain.

Floods could block or wash out roads leaving residents stranded. And hikers, children or anyone else at the bottom of a canyon, arroyo or wash could find themselves in a life-threatening situation with little or no warning.

"A person in a channel with a lot of debris does not have a prayer," Olson said. "People do not survive that."

10375. Grease Fire - Plumas Forest

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-16 23:22:34 UTC
From: sh9730
Topic: 10375 Message: 10375

Ok, things are quieting down a little here in SoCal so I saw this on wildlandfire.com hotlist and thought I would pass it along to this list.

Grease Fire - Plumas Forest near Lake Davis. Apparently up to 50-60 acres now and running with some significant spotting up to a mile ahead of main fire.

Lots of equipment responding.

All I can offer. Im sure one of you up there can offer the list more.

10376. Ore Incident - AEU

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-16 23:52:20 UTC
From: sh9730
Topic: 10376 Message: 10376

Ok, sorry....here is another one that seems worthy of this list. Two fires on Hwy 49 Between El Dorado and Plymouth. I saw this originally on CHP CAD and they are closing roads in area...now again, Wildlandfire.com has no size up but :

IC indicated that besides the initial high dispatch by CDF, he has requested 20 additional engines (10 local gov. and 10 CDF). NEU S/T part of this order. Also, the IC is requesting notification to the Ranger Unit Chief and upper management.

Per KCRA news, these fires were caused by a hit and run vehicle accident with the vehicle fleeing the scene and driving on a rim. The car started 20-30 fires, structures are threatened and evacuations are occuring. The smoke column can be seen from KCRA's Rancho Cordova web cam

They also said location is two miles south of the town of El Dorado on Hwy 49.

As of 1745 approx 20 acres burned, 3 residential structures lost. AA is keeping 2 tankers, releasing 2. 3 copters still working. IC expects containment in the next few hours.

This is the Ore incident as referenced in the previous posts.

SCU (Santa Clara) has dispatch ST 1771C and 2 dozers to this fire on highway 49 just south of the El Dorado Hills. 1771C is a San Mateo/Santa Cruz team , but they were covering stations in SCU at the time , now they are going to work ! (ST described as Code 3 Immediate Need)

Kim,
2 miles south of the town of El Dorado (not El Dorado Hills) would be close to the north "rim" of the Cosumnes. Mix of ranches, ranchette subdivisions, and genuine oak woodlkands with low elevation pines. Many dwellings in this area have inadequate clearance. Typical CDF battlefield.
This stretch of 49 has a moderate ridge on the west side, so a roadside start with a "downslope" wind out of the east would actually have an initial uphill run.
This is all a guesstimate. I know the area well, but I am not there.

George,
Thanks for the info.
I know the area like the back of my hand, too, as I have been through there so many times I feel like a former part-time resident which I essentially was back in the 90's and I still get up there a lot.
I'd move that way in a heartbeat if it weren't for the fact that area has the same problems for which I want to move away from SLO Co. for: expensive to live and getting too darned crowded with the White Flight/Nouveau riche/Wine Sip Crowd.
Anwho, I'm glad they nipped it and that it did not get established in the Cosumnes River Canyon.

10388. Butte: Vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-17 08:02:02 UTC
From: Nick
Topic: 10388 Message: 10388

Butte CDF dispatching for a vegetation fire on Skyway cross of Spanish Gardens.

25 acres, rapid spread, IC requesting 10 additional engines, at least 5 type-3. Skyway eastbound being closed at least one land by CHP.

Meanwhile, Chico city (10 miles away from the veggie) has two residential structure fires dispatching 10 minutes apart, the second having only 1 engine on the dispatch, all other equipment on order mutual aid (from Oroville, 30 minutes away). Also, Chico Fire running their second fire on Red Net, a tac net I have never heard of referred to. Anyone know what it is?

I've just been put on standby to respond with a mobile kitchen unit based out of Caldwell, ID for this incident. Our other unit based out of Salt Lake City, UT is already on site and most likely won't be capable of feeding the 1500 people per meal they were advised by dispatch.

I guess I'll go repack :) I've been at home since the night of 4 July waiting for another incident.

MILLARD COMPLEX WILDLAND FIRE

Summary

The Millard Complex is burning in rugged terrain in the San Gorgonio Wilderness. It is currently estimated at 15,572 acres and is 10% contained. There is no expected date of containment at this time.

The Millard Complex merged with the Sawtooth Complex in the Mission Creek drainage late yesterday afternoon. As the fires progress toward the west and northwest they will be managed as the Heart Incident, which is focusing on protection of the Big Bear community.
Basic Information
Updated 2006-07-15 09:49:33 EST
Incident Type Wildland Fire
Benefits & Objectives
Management Objectives: 1. Provide for firefighter and public safety. 2. Utilize minimum impact suppression tactics in wilderness areas. 3. Avoid and report archaeological sites. 4. Develop and maintain a cost containment strategy for the incident. Control Objectives: 1. Keep fire north of San Gorgonio Wilderness and Reservation Boundary. 2. Keep fire south and west of the Pacific Crest Trail. 3. Keep fire east of Mill Creek jump off.
Cause Lightning
Date of Origin 07/09/2006 at 0833 hrs.
Location 7 Miles north of Cabazon
In San Gorgonio WIlderness, north of I-10 and west of Highway 62
Incident Commander Norm Walker
Current Situation
Size 15,572 acres

Percent Contained 10%
Estimated Containment Date
Total Personnel 935
Fuels Involved The fires are burning within old decadent stands of intermixed timber, Douglas fir, sugar and jeffrey pine above the 6000' elevation. There is high mortality in the fuels due to drought and bug kill. Lower elevation fuels are chapparal and grass.
Fire Behavior Extreme fire behavior was observed today with plume dominated fire behavior this afternoon. The fire will continue to be dominated by topography and wind. During the night down slope winds expected tonight, the fire will progress toward the southeast. The north perimeter of the fire remains very active.
Today's Significant Events Unified Command established between U.S. Forest Service, California Department of Forestry and Riverside County Fire at 1600 hrs on 07-12-06. Constant communication between Incident Management Teams on Millard Complex and Sawtooth Complex. MIssion Creek serves as the administrative boundary between the two complexes, although the fires have burned together. As the fire progresses toward the Northwest, it is being manged by the newly established Heart Fire incident management team which is based in the Big Bear area.
Outlook
Estimated Date of Control
Planned Actions Structure protection remains in place in Whitewater Canyon. Today line was successfully constructed along the southeast flank of the fire. Tonights efforts will focus on holding that line.
Projected Movement Fire continues to be active in Whitewater Canyon and Mission Creek drainage. Plume development occurred today and for the last several days and is expected tomorrow as well.
Growth Potential Extreme
Terrain Difficulty The San Gorgonio Wilderness is characterized by inaccessible, steep terrain. Air operations continue to play a significant role with 16 helicopters and 6 airtankers assigned, although no aircraft will be flying tonight.
Containment Target
Remarks No immediate threats to any communities at this time. Threats are to watersheds, wilderness, and tribal interests. Whitewater Road, Mission Creek Road, and San Gorgonio Wilderness remain closed to public use.
Weather
Current Wind Conditions 10-15 mph SW
Current Temperature 104 degrees
Current Humidity 16 %
Forecasted Wind Conditions 4-9 mph E
Forecasted Temperature 66-75 min. degrees
Forecasted Humidity 12-18 %

Jake: Ever thought about making this list "reply to author" so you have to "reply all" if you want a message to go to the entire group? I think it's a Yahoo setting.

As for the Canyon Fire (a/k/a Del Puerto #2, the first was on the north side, this one is south), they have been off Cmd 2 for several days on NIFC Cmd 7, which doesn't make it as far as Tracy,

Subject: Re: [NorCalFire] Canyon Fire/CDF-SCU

Post away - just make sure there's some meat to the posts and not a million emails following a little red fire engine around the fire.

Incidentally, is Del Puerto using CDF Command 2? I'm not getting an incident name, but there's a very large incident working on CDF2 151.265

that I can hear perfectly up here in Red Bluff. Division Lima and all sorts of "large incident" goodies. I believe I heard the original Del Puerto incident on CDF2 also.

I don't know about Jake, but as a moderator of this and many other scanner groups, "reply to author" stifles the open exchange of information between list members, which is why I don't use it on the lists I own.

Members should (we,, we can hope) be aware of whom they are addressing (list or individual) and take personal discussions off-list.

plus breaking news as it happens.**
*

**

FIRE BULLETIN Monday, June 17 9:00 a.m.
The Crab Flats is 50% contained with fire retardant around the perimeter. 10
miles have been burned several miles east of Big Bear City.

As of this morning, the Sawtooth Complex is 70% contained with a total of
61,700 acres burned from the San Gorgonio Wilderness to the Big Horn
Wilderness. It's about 2 miles east of Yucca Valley, and f ull containment
is expected by tomorrow [July 18] at 6 p.m. There is c lose coordination
between the Sawtooth, Heart, and Millard Zones, with resource and
intelligence sharing. Hand lines continue, and retardant is being dropped
from aircraft on direct attack portions of the fire, including tactical use
of the DC-10 building a 1.3 mile retardant line. As of this morning, Millard
is 26% contained at 22,103 acres, moving northeast in Whitewater Canyon. It
gained about 1900 acres.
There are no evacuation orders for the Big Bear Valley, and all highways
remain open. However, delays are expected on Route 38 to Redlands, due to
the movement of heavy equipment for firefighting efforts.

SAWTOOTH COMPLEX, San Bernardino Unit, California Department of Forestry and Fire Protection (CDF). A Unified Command has been established between a CDF Type 1 Incident Command Team (Henson) and the Forest Service. This complex is two miles east of Yucca Valley, CA, in chaparral and has merged with the Millard Complex. Numerous residences remain threatened. An evacuation order for the Rim Rock area remains effect for the general public, landowners will be allowed to enter. Extremely steep, rocky terrain continues to hinder containment efforts. An increase in relative humidity moderated fire activity.

MILLARD COMPLEX, San Bernardino National Forest. A Unified Command has been established between a Type 2 Incident Management Team (Walker), The California Department of Forestry and Fire Protection (CDF), the U. S. Forest Service, and the Riverside County Fire Department. This complex, comprised of four fires, State, Jump Off, For Sure and Millard, is seven miles north of Cabazon, CA in chaparral and conifer and has merged with the Sawtooth Complex. Structure protection for White Water Canyon remains in place. Numerous residences, tribal interests and cultural resources remain threatened. Moderate fire behavior with a low to moderate rates of spread was observed.

HEART, San Bernardino National Forest. A Type 1 Incident Command Team (Molumby) is assigned. This fire is eight miles southwest of Big Bear Lake, CA in timber and brush. This fire was previously part of the Millard Complex. Wildlife habitat and cultural resources are threatened. Moderate rates a spread isolated tree torching was reported.

Hey Nick - am I correct that their other UHF freq of 453.550 is named Yellow? Which would put Red as an unknown. I haven't seen any reference to that color, or additional possible licensed freqs to city of Chico.

Also, can I assume the Butte Canyon fire is contained? I don't see CHP CAD reference. I'm stuck in a week long SQL Admin training and away from the "real world" for 9 hours a day. Oh it's 111 outside? Must...have...live...scanner....

The co-moderators answered. The fact that many of our readers have simply subscribed to the list is a major feat in their technological knowledge. Fancier list options such as having to use Reply-To-All would complicate matters much worse when trying to engage in discussion.

Like Don and John said, the feature would squelch most discussion on the list.

Since day one (5 seasons ago?), this list gets very busy during fire season and major events. As long as everybody follows the guidelines/rules, the traffic on the list will be informational, on-topic, timely, and fun. It's worked in the past, and will continue to work in the future. I am proud of the fact that we have gone through entire seasons without hitting the moderate button on this list. Good group of readers!

Thanks everybody!
Jake

As far as Chico Fire goes, I have never heard of Red being used, even in their weekly Sunday morning radio test where they use every radio in the cache on every frequency they have (or so I thought)... The channeI names I know:

Blue - Dispatch - 453.750R
Yellow - Tac - 453.550
Orange - Dispatch Direct - 453.750

The Skyway fire was contained sometime around 3 or 4am at 200 acres, with a little burn to the Welcome to Chico sign on Hwy 99, but not much else. They had engines patrolling Hwy 99 at 3 am when I went to bed to make sure it didn't jump the highway into Estates Drive.

On 7/17/06, Jake H <yahoo@...> wrote:

I can see from my office here at work at LLNL smoke from a fire approaching Sandia Labs appears to be between Greenville and Vasco. Air support is already on it. Appears to be only a couple of miles away from us.

Anyone know anything more about this?

Thanks,

JEff

I can only offer that CHP CAD says the units onscene with Greenville closed between TESLA and EAST say they can open up road in about an hour....whether that means the fire is under control, or just burning away from that area I cannot say.

1530 HRS

This fire was contained about an hour ago. The original response looked like this:

Vegetation fire Greenville Road (cross of East Ave.) near the Lawrence Livermore National Lab in Livermore area - power lines down - 1305 hours.

UNIFIED COMMAND with ALCO - 20+ acres at this time (1331 hours).

The above was a follow-up to this post from 16:09 which hasn't shown up yet on yahoogroups.. (tanker has been released). Rio Dell PD has since ID'd ta couple possible suspects.

CDF, RIO and SCT responding to a vegetation fire, east side of Eel River, RIO IC reports 1 acre moving uphill, partially contained by sandstone bluffs

5 CDF engines, Air Attack, Copter 102 and one air tanker enroute, Alder 6 & High Rock 1 crews, Rio Dell (RIO) & Scotia (SCT) FD as well

CDF 151.25 HUU Local
CDF Tac 3 151.175
VFDs 154.07

Scanner Feed:
http://66.116.100.4:8010/norcal-humboldt or
http://66.116.100.4:8010/norcal-humboldt.m3u

Rio Dell PD had reported in foot pursuit of possible arson suspects

Update: Fire off Geyser Road

As we speak more than 250 firefighters are battling a 250 acre grass fire south of Hopland, along 101 at Geyser Road. There have been no evacuations at this point, although some structures and a vineyard are in danger.
Firefighters have been brought in to help from 8 departments including CDF, Mendocino, Ukiah City, Ukiah Valley, and Redwood Valley. Officials say one firefighter has been treated for heat exhaustion and is doing well now.
They expect to have this blaze contained by tonight, but keep checking back with us as we will have updates until that containment has been reached. Also join Ed Beebout and Tricia Hua for the very latest on TV-50 News at 10pm.
Check out the video report they have of this here:http://www.kfty.com/mediacenter/default.aspx?videoId=1328@...,13\

There's gonna be a news story on the Phos-Chek Aqua Gel K tonight on the KRON Channel 4 news. Its the new gel that CDF is trying to get in full use. I know because I am the Ukiah Air Attack Base Manager for the Phos-Chek ops. So if ya wanna see the stuff we are using check it out. Rumor has it we are going to get retardant at all the bases again though... As far as the LNU incident its still burnin, Air Attack 140 flew the fire earlier and saying its layin down pretty good however we are expecting high temps again so, we'll see. We also had a fire here in MEU at the Mendocino Sonoma county line. The Geysers fire burned like hell yesterday and is pretty much whipped now at 321 acres.

The jackass fire is still burning hard and fast, it was started by the lighting storm that hit the sierra front yesterday. It burned activly all night. 3000+ acres are burning, Its moving towards Desert Canyon, Lyon Co FPD is providing structure protection. A type-I IC Team has benn ordered up, and the ICP is now at Smith Valley High School.

New frequencies to monitor
155.1000 Lyon Co FPD

5 mi northwest of Susanville. Initial reports were from firefighters on scene at the "Grease" fire but this is NOT the same incident. Latest I see is 500 acres with a structure threat. Yahoo has been VERY slow today so this could be very outdated info by the time this posts.

As far as I have heard, this is a CDF fire so far....not onto the forest.

1748 HRS

Also, the Jackass is at 6K and growing....

10443. New Yahoogroup for PDA owners

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-19 12:53:26 UTC
From: John Gleichweit
Topic: 10366 Message: 10443

Because of some comments from some of the members, I've changed the scope, purpose, and name of the group.

The group is for anyone with an email or web-enabled PDA who is interested in fire information. The new name for the group is PDAFireNet. You can subscribe to the list by sending an email to PDAFireNet-subscribe@yahoogroups.com from your email account, or you can go to http://groups.yahoo.com/group/PDAFireNet/ with your web browser.

The purpose of the new group is to exchange short messages without the long dissertations found on the "regular" groups.

How long has it been since Monsanto got out of the traditional diammonium phosphate retardant biz?

I heard that the impetus for changing to the gel retardant was due to the actions of a few concerned groups that claim that traditional retardant is bad stuff in the long term for the environment.

The ammonium phosphate is actually a fertilizer. What the econuts are concerned about is run-off into streams.

I haven't been able to hear anything down here in eastern Plumas
county, but did happen to catch some updates being given out
by the local Susanville FM radio station on 93.3 FM while
driving back from Reno. Go figure! From what I could hear
the fire was near the golf course southwest of town...Concerns
about wind shifting fire towards town...Livestock being evacuated...

Wish could give more updates, but CDF/USFS just hard to copy down
here in Portola...

Later,
Todd....

I remember the adds in National Geographic Magazine in the late 1970's for Monsanto bragging about Phos-Chek and always assumed they were the ones making it all along so I had no idea they were no longer making it or that anybody but them could make it.
I, too, would like to know what happened to their involvement with it.

Morning all!

Just confirmed that CDF has deployed the "10 Tanker" on the Sawtooth Complex way down south. Keep eyes peeled for this heavy to make it's debut up this way sometime this season.

See it in action here:

Actually the DC-10 made some drops a few days ago from what
I was getting on the SoCal group list. There were several
messages concerning this subject.

I dunno why the state went to the water enhancing gel. I know nothing about Chemonics. Phos-Chek makes all levels of retardant. We have mobile units and the whole nine yards. We do gel and class A foam too. I do know that the old Fire-Trol stuff was bad. Our stuff is gum thickened stuff with our own corrosion inhibitors. WE are using gel here in ukiah and its.... ok i guess. It's making a come back but we'll see

Craig -

Tanker 910 made a series of demonstration drops Saturday, and was
certified for service Sunday. As far as I know, it was chartered for
the Sawtooth fire only, and has not been placed into the front line fleet.

From: John Gleichweit
Topic: 10463 Message: 10463

Fresno/Kings is sending ST 9430C to Tuolumne/Calaveras, along with 2
strike teams of crews.

E4352
E4362
E4374
E4383
E4393
B4314
Dispatch was asking for 4/0 staffing if possible. No Incident# or
Request# yet, and 4314 was told to contact South Ops for the numbers.
Rally Point is the Pilot Truck Stop at SR99 and Ave 18 1/2 north of
Madera.

Cody,
I thought Phos-Chek was brand of red fire retardent we see used everywhere and that only Monsanto made the mix that you guys at the air attack bases and helibases out in the field mixed and served.
This is news to me that Phos-Chek per the National Geographic ads is no longer.
So is Phos-Chek a brand name that Monsanto sold the right to somebody else to make like Sikorsky selling the Skycrane to Erickson or did the patent expire and other's can make it or what? Please forgive my ignorance.

Gotcha Don. So use on the Sawtooth was strictly a test. Sounded pretty positive, so who knows!?!? It would be a pretty amazing thing to see.

Thanks for the link...

Im not saying if its go or bad on either type. My question is, can you get enough Gel when you need it? If not, don't depend on the Red Mud to be around if you get in a pinch.

Chemonics manufactured the Red Mud under the Firetrol label. They have plants in Orland, Ca, Phenoix Az, and some other places. One of my F/F's drives truck and has transported it all over the western states along with portable mix stations. I don't know who the parent Corp. is but food for thought.

Hi John & the Group,

This info is a bit on the old side, but here is a rundown on the incident that 9430C is being sent to. Please note the time of HUB AIR ATTACK's report on conditions. I do not have any additional information on this fire at this time.

TCU - Tuolumne-Calaveras - working a fast moving vegetation fire at 5394 Hub Ct. & Chuckwagon Drive in Copperopolis.

HUB AIR ATTACK - Multiple spots out ahead of fire, grass/oak woodland, rapid rate of spread, one structure fully involved. Fire has jumped two roads and continues to move rapidly with additional structures now threatened at 15:13 PM.

10469. Re: [NorCalFire] DC-10 in the CDF Fleet!

Yahoo group: norcalfire (2005 — 2016)
Date: 2006-07-20 01:41:29 UTC
From: Mobile11@aol.com
Topic: 10458 Message: 10469

A DC-10 Supertanker reconfigured to drop 12,000 gallons – or nearly 50 tons – of water in 17 seconds was used for the first time on a wildland fire. "Tanker 910" was sent to the fire around 12:45 PM today and made the historical drop at about 12:50 PM. Firefigters were ordered out of the area during the drop. "We're dropping in the DC-10 now – stay out," ordered air operations. After the drop officials were estatic with scanner comments like "awesome", "lovely", and "cool."

Smoke drifted across much of the Inland Empire today including most mountain communities. Several fires burning in Southern California have contributed to the smokey morning. Firefighters will focus direct firefighting efforts near the Coon Creek Campground today. Their indirect efforts will consist of continuing to cut "contingency lines" between the fire and the populated communities.

Evacuations are still in place for the Onyx Summit area. They are mandatory for non-residents and voluntary for residents. Highway 38 remains open at this time, but that may change if increased firefighting equipment crowds the roadway or the fire continues to approach.

Much of the fire is in inaccessible terrain leaving firefighters to cut fire lines and aircraft to perform much of the firefighting. According to the Forest Service, "The north perimeter of the fire remains very active. Active fire movement was present overnight above Whitewater Canyon and Cottonwood Creek." One of the dangers has been from rolling debris. According to Jeff Willis, Assistant Chief of the Big Bear City Fire Department, the extension of the Heart Complex portion of the fire into Coon Creek may have been from spotting or rolling debris.

Because the fire is so large, it is being managed by three incident management teams. The Sawtooth Complex Fire is being managed from Yucca Valley. The Millard Complex Fire – which consists of fire south of Mission Creek – is being managed from Cabazon. The Heart Complex Fire – which consists of fire north of Mission Creek – is being managed from Bear Mountain.

Weather today may pose the biggest problem, according to the National Weather Service. While higher humidities may slow the general movement of the fire, thunderstorms could produce strong winds and flooding – and some thunderstorms may become severe. "The main threat will be from strong downdraft winds, which will adversely affect firefighting efforts," said National Weather Service forecaster Mark Moede. There will be the risk of thunderstorms nearly every day this week, according to Moede, "With an elevated flash flood potential in the burn areas (Sawtooth, Millard, Edgemont, Heart and Pine) where as little as a quarter inch per hour over the denuded landscape could lead to flash flooding and debris flows."

Man, that is really impressive! I've flown all over the bloody world on these guys and as a pilot, they always seem to fly, no I haven't had the joy of flying one, of flying like a BIG Super Cub. When "dirty", they slow down really well and seem to respond equally well so they should respond pretty well to low level, bumpy ride type conditions and fly pretty safe with VFR conditions I would think.
This sort of a "tool" is really needed on these huge, explosive incidents if we are just going to keep controlling fires in areas that have historically burned naturally.
Man, that thing is very, very COOL! Did someone say 15,000 gallons? Killer! You can certainly lay down some line with that guy can't you?
Wonder what the cost/hour looks like. Better than maybe 5 or 6 smaller birds maybe?

Rick,
Man, that is some pretty amazing footage! The pre-heating is only part of the story I think. What I noticed, and I'm not sure that the footage is contiguous, labeled as "Raw" so it must be, is the radical change from white to black to white to black smoke from the eruptions as it consumed the hill.
Any idea what the footage was shot from? It looks like a blimp as it appears pretty stationary but I'm sure it's a fixed wing of some sort. Military maybe?
Great footage!
Thanks,

Unfortunately no. I haven't heard anything of late. My sense is they may have gotten a handle on this one, but don't quote me. I'll try to check up on this one in the morning and pass along an update.

Nitrobear,
The audio for the raw footage sure sounded like a chopper to me.
I'll bet ya $100 it was a chopper. ;-p

From: Pamela Alley
Topic: 10481 Message: 10481

I'm trying to remember where Humbug is...man, has it been 20 years since I lived in Yreka?

There is a hill area above Yreka which is called 'Humbug'...if you stand on I5 looking west, about the center of town , that biiiig hill is Humbug.

Apparently moving fast and downhill thanks to lots of fuel being piled up after ground prep for a subdivision; ate one house so far...

They're hitting it with 2 copters and hard, apparently....per a friend's dad who lives in Yreka still. LOL!

All I know....

Well, thanks Dan.
Perhaps Monsanto invented it like somebody invented aspirin or dynamite but many different companies have manufactored them.

Nitrobear,
12,000 gallons which created a retardent line 1.3 miles long in two drops, but had to be dropped from 300 feet above the target.

Kim Noyes
Atascadero,
California

---- nitrobear@... wrote:
> Man, that is really impressive! I've flown all over the bloody world on these guys and as a pilot, they always seem to fly, no I haven't had the joy of flying one, of flying like a BIG Super Cub. When "dirty", they slow down really well and seem to respond equally well so they should respond pretty well to low level, bumpy ride type conditions and fly pretty safe with VFR conditions I would think.
> This sort of a "tool" is really needed on these huge, explosive incidents if we are just going to keep controlling fires in areas that have historically burned naturally.
> Man, that thing is very, very COOL! Did someone say 15,000 gallons? Killer! You can certainly lay down some line with that guy can't you?
